

SUPPLEMENTARY INFORMATION: The FEIS analyzed three disposal alternatives with respect to the disposal and subsequent reuse of the 676-acre (440 land acres and 236 submerged land acres) comprising the MOTBY: (1) the no action alternative, under which the property would be maintained in a caretaker status after closure; (2) the unencumbered alternative, under which the Army would transfer the property without encumbrances, such as environmental restrictions and easements; and (3) the encumbered disposal alternative, under which the Army would transfer the property with various environmental restrictions and easements, limiting the future use of the property.

In the ROD, the Army concludes that the FEIS adequately addresses the impacts of property disposal and documents its decision to transfer the property as encumbered. Possible encumbrances include: Covenants and restrictions pertaining to asbestos-containing material, lead-based paint, floodplains, future remedial activities after transfer, wetlands, easements and rights-of-way.

Dated: November 29, 2000.

Raymond J. Fatz,

Deputy Assistant Secretary of the Army, (Environment, Safety and Occupational Health), OASA (I&E).
