addressing and resolving differences are the central points of issue.

The Board is of the opinion that the Department of Energy should take additional action with respect to its program for improvement of feedback and safety for defense nuclear facilities by establishing clearer lines of authority and responsibility for resolution of safety findings of its internal, independent safety organization. Towards such end, the Board recommends that the Department of Energy:

- 1. Establish by policy statement, directives, or other protocols, the manner in which the Secretary expects Cognizant Program Secretarial Officers (Assistant Secretaries) and Field managers to address and resolve findings of its independent internal corporate safety organization (Assistant Secretary for ES&H). In so doing, consideration should be given to direction and guidance for the following:
- Establishing authority and responsibility for conducting and responding to independent oversight, preparing and approving corrective action plans, reporting on progress toward timely and adequate closure of findings, and subsequent closure, including independent verification of closure.
- Elevating cases of inadequate or untimely response to findings to the Office of the Secretary for resolution.
- Describing the purpose and content of corrective action plans responsive to oversight findings (e.g., cause identification, actions, to correct immediate problem, lessons learned, actions to prevent recurrence).

Scheduling the time frames within which the evaluation and process activities must occur.

- Periodically reporting the status of corrective actions by the responsible entity.
- Tracking findings and corrective actions to closure with a system accessible to DOE line management and the independent oversight organization.
- 2. Make explicit the Secretarial Officer or designee assigned the resolution function. John T. Conway,

Chairman

Abstract: The reauthorized **Elementary and Secondary Education** Act (ESEA), in general, and its provision for submission of consolidated plans, in particular (see section 14301 of the ESEA), emphasize the importance of cross-program coordination and integration of federal programs into educational activities carried out with State and local funds. Yet while nearly all States receive ESEA formula grant program funding on the basis of consolidated plans, until now the Department has still required states to report on program performance and beneficiaries on a program-by-program basis. Continuing to do so sends an inconsistent message about the value of consolidated planning and program integration as tools for increasing student achievement. This consolidated state reporting instrument would replace individual program reporting under ESEA programs and Goals 2000 for all entities that submit ESEA consolidated plans (and be an optional reporting vehicle for the other states). It

will allow state and local officials and educators to see, at one time, the full scope of their reporting (and corresponding data collection) responsibilities, and promote the Department's interest in (1) receiving essential information on how states have implemented their approved consolidated state plans and (2) promoting the Department's ability to provide assistance to states on how they may be able to use federal funds most effectively. In addition, the state consolidated performance report is intended as an initial step toward an optimal design to track indicators of program performance, including those the Department is required to develop under the Government Performance and Results Act. It is expected that reporting in future consolidated instruments will change as the U.S. Department of Education and the states develop their capacities to elicit and use accurate and reliable information for monitoring, reporting, and improvement.

Application To Amend Electricity Export Authorization; Western Systems Power Pool

AGENCY: Office of Fossil Energy, DOE. **ACTION:** Notice of application.

SUMMARY: The Western Systems Power Pool ("WSPP") has filed an application on behalf of its members to amend its electricity export authorization issued September 5, 1996, in Order EA–98–C. The application requests that five new members of WSPP be authorized to export electricity to Canada. The application also reflects name changes for six WSPP members already authorized to export electricity.

DATES: Comments, protests or requests to intervene must be submitted on or before November 5, 1998.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Power Im/Ex (FE-27), Office of Coal & Power, Office of Fossil Energy, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585 (FAX 202-287-5736).

FOR FURTHER INFORMATION CONTACT: Ellen Russell (Program Office) 202–586– 9624 or Michael Skinker (Program Attorney) 202–586–6667.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. Sec. 824a(e)).

On September 5, 1996, in Docket EA–98–C, the Office of Fossil Energy (FE) of the Department of Energy (DOE) authorized 42 members of the WSPP to export electric energy to Canada. On March 24, 1997, and again on May 5, 1997, FE amended the authorization issued to WSPP to add additional members. The facilities utilized for these exports are the international transmission facilities owned and operated by the Bonneville Power Administration (BPA), also a WSPP member. The facilities consist of two 500-kV transmission lines at Blaine,

Washington, and one 230-kV transmission line at Nelway, British Columbia, that interconnect with facilities of BC Hydro, and one 230-kV line, also at Nelway, connecting to West Kootenay Power, Limited. The construction and operation of these international transmission facilities was previously authorized by Presidential Permits PP–10, PP–46, and PP–36, respectively.

On September 11, 1998, WSPP submitted an application to amend the export authorization by adding five new member companies to the list of authorized electricity exporters. The new members are: Avista Energy, Inc. (Avista), El Paso Electric Company (El Paso), MIECO, Inc. (MIECO), Pacific Northwest Generating Cooperative (PNGC), and PP&L, Inc. In addition, the following companies currently authorized to export electric energy to Canada as part of the WSPP authorization have undergone changes in company name: (1) Citizens Power Sales, formerly Citizens Lehman Power Sales, (2) Engage Energy US, L.P., formerly Coastal Electric Service Company, (3) Koch Energy Trading, Inc., formerly Koch Power Services, Inc., (4) PanCanadian Energy Services Inc., formerly National Gas & Electric L.P., (5) Puget Sound Energy, Inc., formerly Puget Sound Power & Light Company, and (6) TransAlta Energy marketing (U.S.), Inc., formerly TransAlta Enterprises Corporation.
