WATER DOCKET NUMBER: OW-2004-0032

USER GUIDE TO THE DOCKET FOR THE 2005 AND 2006 ANNUAL REVIEWS AND THE 2006 EFFLUENT GUIDELINES PROGRAM PLAN

What is the Docket?

Docket ID No. OW-2004-0032 is the official public docket for EPA's 2006 Effluent Guidelines Program Plan and its 2005 and 2006 annual reviews of existing effluent limitations guidelines and pretreatment standards. The official public docket consists of the documents specifically referenced in the Federal Register notices of these actions, any public comments received, and other related information. Although a part of the official docket, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute is not included in the materials available to the public.

The official public docket is the collection of electronic and hard copy materials that is available for public viewing at the Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW, Washington, DC. An electronic version of the public docket is available through EPA's electronic public docket and comment system (EDOCKET) at <http://www.epa.gov/edocket/>. On October 31, 2005, EDOCKET will be replaced by a federal-wide electronic docket management system located at www.regulations.gov.

You may use the electronic docket system to view public comments, access a listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Certain documents are not available in the electronic docket system. These documents include but are not limited to copyright protected material and physical objects such as maps, aerial photographs, colored charts, etc. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials at the EPA Docket Center.

How do I Find Documents in the Docket?

You will find instructions for using EDOCKET on its Internet home page. EDOCKET and its successor electronic docket management system provide electronic search capabilities. After specifying the docket identification number, you can use the systems to search for documents using for key words and phrases. You can also search the specified docket for selected document categories (e.g., public comments). See EDOCKET for more details. The electronic docket system also provides a listing of the contents of the official public docket. The listing includes the document identification number, document title, date, and type.

If you know the title, DCN, or document identification number of a docket document, use the search capabilities of EDOCKET to locate the document. To locate documents addressing related topics or subjects, you may search by key words.

What is the Docket OW-2004-0032 Subject Outline?

In addition to the EDOCKET docket contents list, EPA has prepared a subject outline of the documents included in OW-2004-0032 to help you locate documents addressing related topics or subjects. The subject outline for OW-2004-0032 is provided in Attachment 1. Each section of the subject outline contains one or more documents that relate to a particular subject or topic. Each document in the docket has been assigned to an outline section. Some sections may not contain any docket documents at this time.

What is the Docket OW-2004-0032 Subject Index?

The Docket OW-2004-0032 subject index is a list of documents in the docket, sorted by subject outline section. The index summarizes certain information for each document, including the section, EPA EDOCKET number, DCN, document subject or title, author, recipient, data and other information. Each document in the docket has two document identification numbers. One is the EDOCKET document identification number that was assigned when EPA added the document to the official public docket. The second is the document control number (DCN) that was assigned during the development of the document. References internal to the docket documents typically identify documents by their DCN. Most document titles in EDOCKET include the DCN.

The index for the docket includes the following fields in order of appearance:

Field Name	Description
Subject Outline Section	Section number from docket outline
DCN	Unique document control number (DCN) assigned during the development of the document
Date Generated	Date originated or date received
Type of Item	Type of Document
Title	Title or subject of document
Pages	Number of pages in document
Recipient	Person that received the document (First initial, last name and company or organization)
Sender/Author	Author or sender of document (First initial, last name and company or organization)
Source	The "Source" of a docket document, such as the magazine or newspaper from which an article is taken, or the book or document from which a document excerpt is taken. For materials retrieved from the Internet, Source identifies the URL.
Industry Key Word	Words to aid in searching the index by industry (more than one industry name may be entered).
Key Word 1	Words to aid in searching the index for specific documents.
Copyrighted	(Checked <input checked="" type="checkbox"/> if Yes) - Materials that are copyright protected (e.g., books and other published material). Not available electronically, only available in hard copy at the EPA Docket Center.
CBI	Confidential Business Information (Yes/No). CBI is not available to the public.
EPA EDOCKET Document Number	Unique tracking number from the Water Docket. The document identification includes the docket ID and consecutive document number. The document ID consists of the program acronym + calendar year + consecutive docket number + consecutive document number.

How do I use the Subject Listing to Find Documents in the Docket?

Review the subject outline to determine which section may contain the documents of interest. Then, locate documents for that section in the index and note their EPA EDOCKET Document Number. Documents available electronically can be accessed through EDOCKET. Other documents can be reviewed at the Water Docket in the EPA Docket Center in Washington, DC.

Confidential Business Information

The docket contains some documents that contain confidential business information (CBI). CBI documents are not available for review by the public, and are not filed in the Water Docket in the EPA Docket Center. Some documents are classified as CBI because the companies specifically claimed certain information (e.g., operating or financial data) as CBI. Other documents are classified as CBI because release of these documents could indirectly reveal information claimed to be confidential.

Documents Cited in the Federal Register Notice and Other Key Documents

Documents cited in the Federal Register Notice are listed in Attachment 2, with their EDOCKET Document Number. Key supporting documents are available on EPA's Effluent Guidelines Biennial Plan webpage <http://www.epa.gov/waterscience/guide/plan.html>
