## EXPLANATORY NOTE

This publication contains data on fatal and injury accidents and fatally and nonfatally injured persons involved in motor vehicle traffic accidents for calendar year 1977. The 1977 data are classified, as were the 1976 data, by the realigned highway systems described below. Because of reporting problems related to the transition to new system definitions in 1976, complete data are not available for all highway systems.

### Highway Systems

In the Federal-aid Highway Act of 1973, the Congress introduced new definitions of highway systems based on general functional classifications, i.e., arterial, collector, and local. The new definitions became effective July 1, 1976. These functional classifications differ from the classifications used by the 50 States and the District of Columbia for calendar years 1967-1975. In addition to the highway system classifications for 1976 data, the 1977 data for Federal-Aid Urban highways were to be reported separately for arterials and for collectors. Very few of the states were able to meet this requirement for 1977.

The classifications of highways for calendar year 1977 are:

1. Interstate (Arterial)
2. Other Federal-Aid Primary (Arterial)
3. Federal-Aid Urban (Arterial)
4. Federal-Aid Urban (Collector)
5. Federal-Aid Secondary (Collector)
6. Non-Federal-Aid (Arterial)
7. Non-Federal-Aid (Collector)
8. Non-Federal-Aid (Local)

Each of the functional classifications is further described as rural and urban except that Federal-Aid Urban highways are only in urban places, and Federal-Aid Secondary highways are only in rural places.

With one exception, no direct comparison of the data can be made between the classifications used beginning with the 1976 data and the classifications used in earlier years. 1/ The Interstate data for 1976 and 1977 are comparable to the

---

1/ Fatal and Injury Accident Rates on Federal-Aid and Other Highway Systems, 1967 through 1975.

system identified as the Interstate-Final during previous years. The 1976 data are not published with the 1977 data in this publication because of incomplete reporting.

### Compilations

The tables summarize the data for fatal and nonfatal injuries in motor vehicle traffic accidents for calendar year 1977 by highway and by State. These tables are compiled from reports submitted to the Federal Highway Administration by the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories of American Samoa, Guam, and the Virgin Islands. 2/

The first table (page 1) shows U. S. estimates by highway system. These estimates exclude the Commonwealth of Puerto Rico and the territories of American Samoa, Guam, and the Virgin Islands. Because of the incomplete reporting for 1977, estimates were used for some States in compiling this table.

The tables on pages 2-29 present motor vehicle traffic accident data by State for each highway system. The tables indicate the States for which data are not complete. The first set of the these tables (pages 2-8) presents fatal accident data by State for each highway system, and the second set (pages 9-15) presents data on nonfatal injury accidents by State for each highway system. Similarly, the third set (pages 16-22) and the fourth set (pages 23-29) present data for fatalities and nonfatally injured persons, respectively.

The table shown on page 30, STATE TOTALS--1977, presents totals reported by the 50 States and the District of Columbia. There are nine States which did not submit totals for each category of data. The sum shown is the total of all data shown in the table; it is not the estimated U. S. total.

The table shown on page 31, PEDESTRIAN STATE TOTALS --1977 presents totals and rates for pedestrian fatalities and pedestrian nonfatal injuries by state. While the reporting requirements specify that the pedestrian data are to be reported by highway system, very few states were able to report the data in this manner for 1977.

---

2/ Annual Report of Travel and Accidents, Table TA-1, Federal Highway Administration, Instructional Memorandum 50-1-68, January 26, 1968, as amended.

The data reported by the Commonwealth of Puerto Rico and the U. S. territories are summarized on page 32.

The rates shown in these tables are uniformly carried out to two decimal places. This apparent precision surpasses the degree of accuracy of much of the data on which the computed rates are based. Collection and classification of information about miles of highway, vehicle-miles of travel, and motor vehicle traffic accidents is a highly complex undertaking in which thousands of persons participate. Because of this complexity and the necessity of subjective judgements at many points in the process, the computed rates should be regarded as approximations, not as precise measurements.

In addition to the fatalities reported in this publication, about 1,100 deaths per year occur in motor vehicle nontraffic accidents. Such accidents may, for example, occur in private driveways or involve off-the-road recreational or farm vehicles. The inclusion of nontraffic deaths in some of the figures published by the National Safety Council explains much of the difference between the statistics published by that organization and the statistics in this publication.

Terms used in these tables are defined as follows:

An injury is any bodily harm received by a person in a motor vehicle traffic accident.

A fatal injury is any injury that results in death within one year of the accident.

A nonfatal injury is any injury other than a fatal injury.

A fatal accident is a motor vehicle traffic accident resulting in one or more fatal injuries.

A nonfatal injury accident is a motor vehicle traffic accident that results in one or more injuries, but no fatal injuries.

A fatality is the death of any person who suffers a fatal injury.

A nonfatally injured person is one who suffers a nonfatal injury in either a fatal accident or a nonfatal injury accident.

Vehicle miles are the miles of travel by all types of motor vehicles, as determined by the State highway departments on the basis of actual traffic counts and established estimating procedures.

The fatal accident rate, nonfatal injury accident rate, fatality rate, and nonfatal injury rate are, respectively, the number of fatal accidents, nonfatal injury accidents, fatalities, and nonfatally injured persons per 100 million vehicle miles.

An urban highway is any road or street within the boundaries of an urban area. An urban area is an area including and adjacent to a municipality or urban place with 5,000 or more population. The boundaries of urban areas are fixed by the State highway departments, subject to the approval of the Federal Highway Administration, for purposes of the Federal-Aid highway program.

A rural highway is any road or street which is not an urban highway.

The characteristics of the functional classes of highways referred to in this compilation of 1977 data are briefly described as follows:

Arterial highways serve major traffic movements or major traffic corridors. While they may provide access to abutting land, their primary function is to serve traffic moving through the area.

Local highways are those highways whose principal function is to provide direct access to abutting land.

Collector highways are those highways which link local highways to arterial highways.

The characteristics of the several Federal-aid highway systems referred to in this report are briefly described as follows:

Federal-Aid Primary, Secondary, and Urban highway systems are those for which Federal-Aid highway matching funds may be spent by the States.

The Federal-Aid Primary system is a system of connected main roads important to interstate, statewide, and regional travel, consisting of rural arterial routes and their extensions into or through urban areas.

The Interstate system is a part of the Federal-Aid Primary system. It is a system of freeways (i.e., expressways with fully controlled access) connecting and serving the principal cities of the continental United States.

The Federal-Aid Secondary system consists of rural collector routes.

The Federal-Aid Urban system consists of urban arterial and collector routes, exclusive of urban extensions of the Federal-Aid Primary system.

Paper and microfiche copies of Fatal and Injury Accident Rates on Federal-Aid and Other Highway Systems for the years 1967 through 1972 may be purchased from the U. S. Department of Commerce, National Technical Information Service (NTIS), Springfield, Virginia 22151. Accession numbers are : 1967--PB-206 147; 1968--PB-206 148; 1969--PB-206 151; 1970--PB-206 152; 1971--PB-218 136; 1972--PB-231 145. The 1973, 1974, 1975 issues may be purchased from the Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402. The 1976 issue is available from the Federal Highway Administration, Office of Highway Safety (HHS-30), Washington, D.C. 20590.

1/ U.S. estimates exclude the Commonwealth of Puerto Rico and the Territories of American Samoa, Guam, and Virgin Islands. Estimates for fatal accidents, fatalities, nonfatal injury accidents, and nonfatally injured persons are based on the partial data reported by States which are displayed in the following tables, together with totals reported by most States.

2/ Highway Statistics 1977, U.S. Department of Transportation, Federal Highway Administration. "Federal Highway Administration estimates were made for major highway categories where complete functional system data were not reported."

3/ Rates are per 100 million vehicle miles.

## APPENDIX 1

### Procedure for Computing U. S. Estimates

Estimates of accident statistics for United States highway systems are based on numbers submitted by each state. When highway systems and nomenclature were revised in 1976, some states were unable to provide information for all highway systems. A method was initiated to estimate 1976 accident statistics for each highway system based on data received from reporting states and 1975 data for states not reporting in a given year. This procedure was also used to estimate 1977 highway system accident statistics. The methodology used to compute these estimates is described in this paper.

#### DEFINITIONS:

Let

$k$  = year of data where  
 $k = s$ , the year for which estimates are desired  
and  
 $k = t$ , the year preceding the year for which estimates are desired and on which the estimates are based.

$i$  = highway system for year  $k = s$  where  
 $i = 1, 2, \dots, 12$  in year 1976 and  
 $i = 1, \dots, 13$  in year 1977.

$m$  = highway system for year  $k = t$   
where  
 $m = 1, \dots, 15$  for year 1975 and  
 $i = m$  for  $i = 1$  and 2.

$j$  = states which may submit table TA-1 reports  
 $n$

where  
 $j = 1, \dots, 51$  and  
 $n$

$n = 0$  indicating states which did not report the accident statistic in year  $k = s$ , the year for which estimates are desired.

$n = 1$  indicating states which did report the accident statistic in year  $k = s$ , the year for which estimates are desired.

$vmt_{k ij n}$  = vehicle miles travelled for state  $j$  and highway system  $i$  in year  $k$ .

$VMT_{k i}$  = total vehicle miles travelled for highway system  $i$  in year  $k$ .

$$= \sum_{j=0} vmt_{k ij} + \sum_{j=1} vmt_{k ij}$$

$a_{k ij n}$  = accident statistic for state  $j$  and highway system  $i$  in year  $k$ .

$A_{k i}$  = total of the accident statistic for all reporting states  $j$ , and highway system  $i$  in year  $k$ .

$$= \sum_{j=1} a_{k ij}$$

$A_k$  = total of the accident statistic for all reporting states  $j$  and for all highway systems  $i$  in year  $k$ .

$$= \sum_i A_{k i}$$

$E_k$  = estimated total of the accident statistic for year  $k$  using all available sources of data.

$B_{k i}$  = estimated accident statistic for all nonreporting states  $j$  and highway system  $i$  in year  $k$ .

$$= \sum_{j=0} a_{k ij}$$

$B_k$  = total of the estimated accident statistic for all nonreporting states  $j$  and for all highway systems  $i$  in year  $k$ .

- $r_{k i}$  = estimated rate for the accident statistic in year k for highway system i. The rate is per 100 million vehicle miles.
- $C_{k i}$  = first estimate of the accident statistic for all states in year k for highway system i.
- $C_k$  = total of the first estimate of the accident statistic for all states and for all highway systems in year k.
- $P$  = adjustment factor
- $B'_{k i}$  = adjusted estimate of the accident statistic for all states in year k and for highway system i.
- $C'_{k i}$  = final estimate of the accident statistic for all states in year k and for highway system i.

COMPUTATIONS:

Let

$$r_{s i} = \frac{C'_{t i}}{VMT_{t i}} \times \frac{A_{s i}}{\sum_{j=1}^s vmt_{ij}} \times 100$$

$$\times \frac{VMT_{t i} - \sum_{j=0}^t vmt_{jt}}{C'_{t i} - \sum_{j=0}^t a_{jt}}$$

$$C_{s i} = (VMT_{s i})(r_{s i}) / 100$$

$$= A_{s i} + B_{s i}$$

$$C_s = \sum_i C_{si} = \sum_i (A_{si} + B_{si}) = A_s + B_s$$

$$P_s = (E_s - C_s) / B_s$$

$$B'_{si} = (1 + P_s) B_{si}$$

$$C'_{si} = A_{si} + B'_{si}$$

#### HIGHWAY SYSTEM DESIGNATIONS FOR 1975:

1975 HIGHWAY SYSTEM DESIGNATIONS USED FOR 1976 ESTIMATES

1976 Highway Systems	Comparative 1975 Highway Systems
1. Interstate-Arterial-rural	1. Interstate-Final-rural
2. Interstate-Arterial-urban	2. Interstate-Final-urban
3. Federal-Aid-Other Primary -Arterial-rural	5. Other Federal-Aid Primary -Rural
4. Federal-Aid-Other Primary -Arterial-urban	6. Other Federal-Aid Primary -urban
5. Federal-Aid Urban-Arterial and Collector-urban	11. Federal-Aid Urban
6. Federal-Aid Secondary -Collector-urban	7. Federal-Aid Secondary-State -rural
7. Non-Federal-Aid-Arterial -rural	5. Other Federal-Aid Primary -rural
8. Non-Federal-Aid-Arterial -urban	6. Other Federal-Aid Primary -urban
9. Non-Federal-Aid-Collector -rural	5. Other Federal-Aid Primary -rural
10. Non-Federal-Aid-Collector -urban	6. Other Federal-Aid Primary -urban
11. Non-Federal-Aid-Local -rural	14. Local Roads and Streets -rural
12. Non-Federal-Aid-Local -urban	15. Local Roads and Streets -urban

SAMPLE COMPUTATIONS:

Year for which estimate is desired:

k = s = 1976

Year of the data on which estimate is based:

k = t = 1975

Highway system:

i = 3 = Federal-Aid-Other Primary-Arterial-Rural

1976 Non-reporting states:

j = 1, ..., 13

0

1976 Reporting states:

j = 1, ..., 38

1

Accident statistic:

Fatal accidents

References:

For 1975 data refer to 1975 Fatal and Injury  
Accident Rates, page 17.

For 1976 data refer to 1976 Fatal and Injury  
Accident Rates, pages 3 and 26.

1976 Nonreporting States	1975 Data	
	Vehicle Miles	Fatal Accidents
Alabama	5,198	209
Arkansas	3,316	142
California	11,602	419
Colorado	2,919	129
Delaware	1,075	43
Florida	6,997	251
Georgia	7,291	373
Idaho	1,327	58
Michigan	7,592	231
Montana	1,673	108
New York	9,293	539
South Carolina	6,223	186
Utah	1,007	41
Nonreporting States 1975 Total	65,506	2,729
1975 U. S. Total	213,068	8,587
	- 65,506	- 2,729
Reporting States 1975 Total	147,562	5,858
Reporting States 1976 Total	173,540	6,532
Estimated 1976 U. S. Total	1,409,164	40,438

$$A_{1975\ 3} = 8,587$$

$$VMT_{1975\ 3} = 213,068$$

$$A_{1976\ 3} = 6,532$$

$$\sum_{j=1}^{j_1} vmt_{1976\ 3j} = 173,540$$

$$\sum_{j=1}^{j_1} vmt_{1975\ 3j} = VMT_{t\ i} - \sum_{j=0}^j vmt_{t\ ij} = 147,562$$

$$\sum_{j=1}^{j_1} a_{1975\ 3j} = C'_{t\ i} - \sum_{j=0}^j a_{t\ j} = 5,858$$

$$r_{s\ i} = \frac{C'_{t\ i}}{VMT_{t\ i}} \times \frac{A_{s\ i}}{\sum_{j=1}^j vmt_{t\ ij}} \times 100$$

$$\times \frac{VMT_{t\ i} - \sum_{j=0}^j vmt_{t\ ij}}{C'_{t\ i} - \sum_{j=0}^j a_{t\ j}}$$

$$r_{1976\ 3} = \frac{8,587}{213,068} \times \frac{6,532}{173,540} \times 100 \times \frac{147,562}{5,858}$$

$$= \frac{(4.03)(3.76)}{(3.97)} = 3.82$$

$$\begin{array}{l} \text{VMT} \\ 1976 \quad 3 \end{array} = 260,841$$

$$C_{s i} = (VMT_{s i} (r)_{s i}) / 100$$

$$C_{1976 \quad 3} = \frac{(260,841) (3.82)}{(100)} = 9,964$$

$$A_{1976 \quad 3} = 6,532$$

$$B_{1976 \quad 3} = 9,964 - 6,532 = 3,432$$

Similar computations are completed for each highway system for fatal accidents. Computation of the re-adjustment factor requires the following:

- (a)  $A_k$  = total of the accident statistic for all reporting states  $j$  and for all highway systems  $i$  in year  $k$ .

$$= \sum_i A_{k i}$$

- (b)  $C_k$  = total of the first estimate of the accident statistic for all states and for all highway systems in year  $k$ .

- (c)  $B_k$  = total of the estimated accident statistic for all nonreporting states  $j$  and for all highway systems  $i$  in year  $k$ .

- (d)  $C'_{k i}$  = final estimate of the accident statistic for all states in year  $k$  and for highway system  $i$ .

$$A = 25,418$$

1976

$$B = 13,504$$

1976

$$E = 40,441$$

1976

$$C = \sum_{s i} C = \sum_{i} (A + B) = A + B$$

$$C = 25,418 + 13,504 = 38,922$$

1976

$$P = (E - C) / B$$

$$P = \frac{40,441 - 38,922}{13,504} = 0.1125$$

$$B' = (1 + P) B$$

$$B' = (1.1125) (3,432) = 3,818$$

1976 3

$$C' = A + B'$$

$$C' = 6,532 + 3,818 = 10,350$$

1976 3

The above computations are repeated for the three other accident statistics; fatalities, nonfatal injury accidents, and nonfatally injured persons.
