The levels shown above do not include \$50 million in released emergency funding provided in the 1997 Omnibus Consolidated Appropriations Act.

Wildland Fire Preparedness.—This activity funds the non-emergency and predictable aspects of the Department’s wildland fire program. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, integration of fire into land-use planning, research, and the application of fire as a land and resource management tool.

Wildland Fire Operations.—This activity funds the emergency and unpredictable aspects of the Department’s wildland fire operations program. Wildland fire operations include the unpredictable costs of suppressing wildfires, rehabilitating fire-damaged lands, reducing hazardous fuels through natural and management ignitions, and monitoring natural fires permitted to burn within established prescriptions. This activity also includes funding for extraordinary preparedness based upon abnormal season duration and/or extreme fire potential as defined in preestablished plans. Emergency rehabilitation includes costs incurred to prevent land degradation, resource losses, and other measures necessary to stabilize soil, structures, and other conditions or damage caused by wildland fires or actions taken to suppress them. Hazardous fuels reduction operations include costs of applying fire and mechanical treatments necessary for fuels reduction. The 1998 funding for this activity is based on the historical 10-year average of non-emergency appropriations for suppression and rehabilitation, and a target level for hazardous fuels reduction operations.

This budget requests \$5.8 billion in contingent funding for 1998, which represents the 1991–1997 average annual emergency spending under the BEA. This fund will be available to this and other accounts as the need arises. Please see the Emergency Requirements for Natural Disasters account in the Funds Appropriated to the President Chapter for more detailed information. The requested amount for future years will be based on average annual emergency funding under the BEA.

The base programs will have access to the proposed contingency fund once all current appropriations in the affected account/accounts have been obligated, and a Presidential decision has been made to make additional funds available. The fund is meant to be flexible enough to respond to a variety of disasters and thus does not reserve or dedicate specific amounts within the total for the eligible programs. The flexibility of the fund is essential to meet the full range of Federal disaster funding requirements.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 et seq.) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Permanent Operating Funds Accounts include:

Forest ecosystems health and recovery.—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California Grant Lands, Public Domain Lands, and Coos Bay Wagon Road Lands. This account was established under the 1993 Interior and Related Agencies Appropriations Act to allow the Bureau of Land Management to more efficiently and effectively address forest health problems by allowing for prompt salvage and reforestation of insect-, disease- and fire-damaged forests.

Timber Sale Pipeline Restoration Fund.—This fund provides for the deposit and use of fees collected by the BLM for sales of green timber pursuant to the timber salvage provisions of Public Law 104-19. Of the total deposited into this account, 75 percent is to be used for preparation of timber sales on lands administered by the BLM, and 25 percent is to be expended on the backlog of recreation projects on BLM lands.

Recreation fees.—This account holds funds that enable the BLM to retain and spend up to 15 percent of recreation receipts collected during the current year to offset fee collection costs.

Expenses, road maintenance deposits.—Users of certain roads under jurisdiction of the Bureau of Land Management (BLM) make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

Recreational fee demonstration program.—Fees collected by the BLM at recreation sites identified pursuant to provisions of the 1996 Interior and Related Agencies Appropriations Act are deposited to this account. Of the total collected, 80 percent is permanently appropriated for use at the sites where the fees were generated; the remaining 20 percent is available for the general BLM recreation program.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

The Helium Privatization Act of 1996, Public Law 104-273, provides for the eventual privatization of the program and its functions. In FY 1998, the Helium program will consist of:

- (a) continued storage and transmission of crude helium;
- (b) continued marketing of refined helium through April, 1998;
- (c) preparation for disposal of helium refining facilities and other excess property not needed for storage and transmission of crude helium;
- (d) oversight of the production of helium on Federal lands.

The estimates assume that the program will continue to fund full implementation of the Helium Privatization Act.

The Minerals Management Service supervises exploration for, and the development and production of, gas, oil, and other minerals on the Outer Continental Shelf (OCS) lands; and collects royalties, rentals, and bonuses due the Federal Government and Indian lessors from minerals produced on Federal, Indian, and OCS lands.

Outer Continental Shelf (OCS) lands.—The program provides for: (1) performance of environmental assessments to ensure compliance with the National Environmental Policy Act (NEPA); (2) conduct of lease offerings; (3) selection and evaluation of tracts offered for lease by competitive bidding; (4) assurance that the Federal Government receives fair market value for leased lands; and (5) regulation and supervision of energy and mineral exploration, development, and production operations on the OCS lands.

Royalty management.—The Royalty management program provides accounting, auditing, and compliance activities for royalties, rentals, and bonuses due from minerals produced on Federal, Indian, allotted and OCS lands. The program includes an automated accounting system to ensure that all royalties are properly collected.

General administration.—General administrative expenses provide for management, executive direction and coordination, administrative support, Federal building space and general support services.

Alaska is paid 90 percent and other States 50 percent of the receipts from bonuses, royalties, payor late payment interest, and rentals of public lands within those States resulting from the leasing and development of mineral resources under: the Mineral Leasing Act (30 U.S.C. 191); the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351); the Geothermal

Steam Act of 1970 (30 U.S.C. 1001); and, from leases of potash deposits (30 U.S.C. 285), on both public domain and certain acquired lands.

The Omnibus Reconciliation Act of 1993 (OBRA) requires 50 percent of the Federal Government's mineral leasing administrative program costs to be recovered before disbursement to the United States Treasury and States. The Act also requires that a State's share of program costs be the lesser amount as determined under two different methods (revenue versus cost-based) as is prescribed in the Act.

Environmental protection.—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses those activities that ensure that coal operators adequately reclaim the land after mining is completed.

Under this activity, OSM provides regulatory grants to States to operate enforcement programs under the terms of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). It also provides for the operation of Federal and Indian land programs and the oversight of State programs. This activity also supports State regulatory program maintenance and the operation of a nationwide Applicant Violator System.

Environmental Restoration.—This activity funds environmental reclamation efforts through the collection of civil penalties for post-SMCRA reclamation and funds from bond forfeitures. It also provides funding for underground and coal outcrop fires.

Technology Development and Transfer.—This activity provides funding to enhance the technical skills that States and Indian tribes need to operate their regulatory programs. It provides technical outreach to States and Indian tribes to solve problems related to the environmental effects of coal mining. OSM also conducts technical studies on mining and reclamation—related problems.

Financial Management.—This activity provides the resources for the managing, accounting, and processing of collections and for the pursuit of delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

Executive Direction and Administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

Environmental Restoration.—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. Funds are used to restore land and water resources and the environment that have been degraded by mining prior to the passage of the Surface Mining Control and Reclamation Act (SMCRA).

This activity provides reclamation grants to qualified States. It also provides for: the Federal reclamation program, which includes the Federally-administered emergency reclamation program; high priority projects in States that do not have a reclamation program and on Federal and Tribal lands. It also funds the costs of AML program maintenance and oversight.

Technology Development and Transfer.—This activity provides funding to enhance the technical skills that the States and Indian tribes need to operate their reclamation programs. OSM conducts technical studies on mining and reclamation-related problems. This activity also provides resources for the Small Operators Assistance program.

Financial Management.—This activity provides funds needed to identify, notify, audit, and collect fees from coal operators for the Abandoned Mine Reclamation Fund. OSM seeks to maximize voluntary compliance with the SMCRA's reclamation fee provisions. It also provides for an audit program to assure that operators are paying fees as required by SMCRA.

Executive Direction and Administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

The water and related resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies.

This new consolidated account encompasses most of the Bureau of Reclamation's operations and reflects the evolving role of the Bureau as a water management agency. By depicting more clearly how Reclamation uses its budgetary resources, this account also will facilitate compliance with the Government Performance and Results Act (GPRA).

Note.—Includes \$12 million in budget authority in 1996 for activities transferred from the NATIONAL BIOLOGICAL SERVICE—Research, Inventories, and Surveys account.
Note.—Collections contained in this account include amounts that have been legislatively reclassified as intragovernmental funds.

The U.S. Geological Survey conducts research and provides scientific data and information concerning natural hazards and environmental issues as well as on the water, land, and mineral and biological resources of the Nation. It works with other Federal agencies to determine national priorities and to encourage increased data-production partnerships, data sharing, and adherence to standards for production of geographic, geologic, biologic and water data.

National mapping program.—The national mapping program collects, integrates, and makes available, in printed and digital format, cartographic and geographic base data, remotely sensed data, and multipurpose and special-purpose maps. Research is conducted in the mapping sciences, geography, and related disciplines in support of data production and applications. Activities related to the National Spatial Data Infrastructure support interagency and intergovernmental partnerships for establishing a national geospatial data clearinghouse, developing data standards, organizing regional coordination, and developing a data framework [data set] for the Nation.

Geologic hazards, resources, and processes.—The national program of onshore and offshore geologic research and investigations produces: (1) information on geologic hazards, such as earthquakes and volcanoes; (2) geologic information for use in the management of public lands and in national policy determinations; (3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; (4) geologic, geophysical, and geochemical maps and analyses to address environmental, resource, and hazards concerns; and (5) hazards, resource, and environmental assessments as well as improved methods and instrumentation for conducting assessments.

Water resources investigations.—The national program of water resources monitoring, investigations, and research has the objective of appraising the Nation's water resources and ensuring that the information necessary to develop and manage them efficiently and effectively is available when needed. The program produces data, analyses, and assessments to support Federal, State and local government decisions on water planning, water management, water quality, energy development, and enhancement of the quality of the environment.

UNITED STATES GEOLOGICAL SURVEY—Continued

General and special funds—Continued

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

Biological research.—This activity: (1) conducts biological research and inventories; (2) provides scientific information access for the management of biological resources; and (3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. It provides the high priority biological research needed by the Department of the Interior's land management bureaus. This activity also operates the Cooperative Research Unit program which provides research and information to resource managers, trains natural resource professionals and accesses university and State scientist expertise and facilities.

General administration.—General administrative expenses provide for management, executive direction and coordination, and administrative and information resources management services to the Bureau, human resources management, and the Washington Administrative Service Center.

Facilities.—This activity finances: (1) operation and maintenance, facilities management, and special support services for the operation of the National Center headquarters; and, (2) some services for major field centers.

Reimbursable program.—Reimbursements from non-Federal sources are from States and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission related work performed at the request of the financing agency.

Note.—Amounts shown for Prince William Sound Restoration in 1996 and 1997 are preliminary and subject to change.

Under the Natural Resource Damage Assessment and Restoration Fund, natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of damaged natural resources. Funds are appropriated to conduct damage assessments and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior.

Restoration activities include: (1) the replacement and enhancement of affected resources; (2) acquisition of equivalent resources and services; and, (3) long-term environmental monitoring and research programs directed to the prevention, containment, cleanup and amelioration of hazardous substances and oil spill sites.

The Fund operates as a departmentwide program, incorporating the expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of damaged natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (P.L. 101-380), and the Act of July 27, 1990 (P.L. 101-337). In 1992 and thereafter, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest therein.

EXXON VALDEZ RESTORATION PROGRAM

The budget incorporates the receipts and mandatory spending associated with the 1991 Exxon Valdez oil spill civil and criminal settlements. Receipts for restoration activities from 1992 through 2001 are currently estimated to total \$687 million. Not included in the receipts is \$108 million which is currently allocated to the Restoration Reserve to address restoration activities beyond 2001. The Exxon Valdez Oil Spill Trustee Council was formed to act on behalf of the public as trustees in the collection and joint use of all civil settlement recoveries. The criminal settlement funds are managed separately by the Federal and Alaska State governments, although activities are coordinated with the Trustee Council to maximize restoration benefits.

Funding from the settlements, as well as interest, is provided to the Federal and Alaska State governments to restore the resources and services damaged by the 1989 oil spill. Based upon the current assessment of damages, these funds are sufficient to complete the restoration program. Restoration activities were initiated in 1992 and habitat protection was begun in 1993.

The Trustee Council has completed or has under discussion thirteen large parcel agreements and numerous small parcel agreements to acquire land strategically chosen for restoration value. Approximately \$386 million has been set aside from the two settlements to acquire an estimated 762,000 acres of land in the Prince William Sound and the Kodiak archipelago areas as fee simple or conservation easements. All the land was nominated for consideration by its owners.

The Partnerships for Wildlife Act (16 U.S.C. 3741), authorizes wildlife conservation and appreciation projects to conserve the entire array of diverse fish and wildlife species and to provide opportunities for the public to use and enjoy these species through nonconsumptive activities. Grants provided to States are directed toward nonconsumptive activities and the conservation of species not taken for recreation, fur or food; not listed as endangered or threatened under the Endangered Species Act of 1973; and not defined as marine mammals under the Marine Mammal Protection Act of 1972. Funding is authorized from appropriations and is made available to the extent external matching funds are applied to the projects.

The Truckee-Carson Pyramid Lake Water Settlement Act, enacted in 1990, created the Lahontan Valley and Pyramid Lake Fish and Wildlife Fund, which is authorized to receive revenues from non-federal parties to support the restoration and enhancement of wetlands in the Lahontan Valley and to restore and protect the Pyramid Lake fishery, including the recovery of two endangered or threatened fish species. Payments in excess of operations and maintenance costs of the Stampede Reservoir are available without further appropriations, starting in 1996. Only donations made for express purposes, state cost-sharing funds and unexpended interest funds from the Pyramid Lake Paiute Fisheries Fund were authorized to be expended without further appropriation. Other receipts were to be available upon appropriation.

The Rhinoceros and Tiger Conservation Act (16 U.S.C. 5301-5306), authorizes funding for projects for the conservation of rhinoceroses and tigers. Projects will (1) conserve rhinoceroses and tigers, (2) enhance compliance with provisions of the Convention on International Trade in Endangered Species and U.S. laws regarding trade or use of habitat, or (3) develop scientific information on habitat and population trends.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid to Wildlife Restoration Fund. The funding for the North American Wetlands Conservation Fund is authorized by the North American Wetlands Conservation Act, Public Law 101-233. The Act established the North American Wetlands Conservation Council, which recommends wetlands conservation projects for the approval of the Migratory Bird Conservation Commission.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan, the Act and the Tripartite Agreement among Mexico, Canada and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, and will provide for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories to participate in conservation, recovery, and monitoring projects for species that are listed, or species that are candidates for listing, as threatened or endangered. The Fund is authorized by the Endangered Species Act of 1973, as amended (16 U.S.C. 1531-1543), and financed by permanent appropriations from the General Fund of the U.S. Treasury in an amount equal to 5 percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts. The actual amount available for grants is subject to annual appropriations. Starting in fiscal year 1997, grants are also awarded to States for land acquisition in support of Habitat Conservation Plans with local governments and other interested parties to protect species while allowing development to continue.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

In 1997, the U.S. Fish and Wildlife Service initiated the recreational fee demonstration program at selected refuges and other public sites authorized by the Omnibus Consolidated Rescissions and Appropriations Act of 1996, as amended. Entrance fees and other user receipts collected at sites that had no pre-existing fee program will be deposited in this account. Receipts collected at sites with previously established user fee programs will be deposited into the Migratory Bird Conservation account and the new Recreational Fee Demonstration Program account, in accordance with a legislatively prescribed formula.

The new fee program will demonstrate the feasibility of user-generated cost recovery for the operation and maintenance of recreation areas or sites and habitat enhancement projects on Federal lands. Fees will be used primarily at the site to improve visitor access, enhance public safety and security, address backlogged maintenance needs, and meet other operational needs.

Since Fiscal Year 1992 the Sport Fish Restoration Fund has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Budget Reconciliation Act of 1990 (P.L. 101-508).

The Coastal Wetlands Planning, Protection and Restoration Act requires an amount equal to 18 percent of the total deposits into the Sport Fish Restoration Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act of 1992 (P.L. 102-587, Sec. 5604) directs the Secretary of the Interior to make grants to states, in specified amounts, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. Sec. 5604 also amends the Sport Fish Restoration Act to provide for the transfer of funds from the Sport Fish Restoration Account of the Aquatic Resources Trust Fund for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Transportation for State recreational boating safety programs under section 13106(a)(1) of title 46, United States Code.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, the District of Columbia, and American Indian tribal organizations for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, and acquisition and improvement of fish habitat and provision of access for public use.

² This is an overall indicator of customer service that combines the ratings of twelve visitor services—park personnel, visitor centers, directional signs, restrooms, campgrounds, picnic areas, ranger programs, exhibits, park brochures, lodging, food services, and gift shops. Results shown in the 1996 column are the responses of over 8,000 respondents who were surveyed in 18 parks during 1994-95. The most recent survey results compare favorably to surveys conducted in the past. From 1988 to 1993, 74 percent of 15,000 respondents rated visitor services as either "very good" or "good", compared to the most recent survey results of 77 percent. n.a.=Not available; surveys will be conducted in 1997 or 1998.

Construction.—This activity provides for: (1) rehabilitation and restoration of historic and cultural resources; (2) rehabilitation of operational structures such as visitor use and maintenance facilities, trails, and utility systems; (3) construction of new visitor use and operational facilities where the need exists; and (4) rehabilitation and construction of park roads and bridges, funded from the Federal Lands Highways program in the Department of Transportation.

Emergency, unscheduled, and housing projects.—To continue visitor services and preserve resources, minor emergency reconstruction and repair projects are performed. Also, employee housing is built, repaired and rehabilitated.

Planning.—Under this activity, the National Park Service conducts environmental, architectural and engineering studies, as well as planning and design activities.

General management plans.—Under this activity, general management plans are prepared and revised to guide the National Park Service in the protection, use, development, and management of each unit of the National Park System.

Equipment replacement.—Under this activity, automated and motorized equipment to support park operations and visitor services throughout the National Park System is purchased to replace existing inventories that have met use and age limitations. Initial inventories of equipment are purchased for units recently added to the system.

Elwha River Restoration.—Full funding is being requested for the National Park Service to restore the Elwha River in Olympic National Park, Washington, as authorized by Public Law 102-495. The National Park Service would use these funds to acquire and remove the Elwha and Glines Canyon

dams so that the Elwha River can be restored to provide long-term benefits, including restored fisheries for the Elwha Tribe, improved recreation within Olympic National Park, and additional jobs from restoration projects, fishing and tourism. In addition to \$25 million requested for land acquisition and construction planning and design in 1998, advance appropriations are being requested in order to fully fund this project, consistent with a Government-wide effort to improve planning and budgeting for the acquisition of fixed assets. Full funding through advance appropriations provides the funding stability needed for the Secretary to proceed with restoration under the provisions of Public Law 102-495.

Full funding through advance appropriations.—Full funding of fixed asset acquisitions reduces the risk of cost overruns from delayed funding and increases accountability for cost estimates. Advance appropriations are requested for the following construction projects funded in 1998 that require additional funding in the outyears: Sequoia National Park (\$16 million after 1998); Independence National Historical Park (\$11 million); Lincoln and Jefferson Memorials (\$9 million); Washington Monument (\$2 million); Riis Park in Gateway National Recreation Area (\$5.5 million); Minuteman National Historical Park (\$1.2 million); Elwha River restoration in Olympic National Park (\$83.3 million); and Everglades Modified Water Delivery (\$31.5 million).

National Park Service agreements with private concessioners providing visitor services within national parks can require the concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account at the direction of the park superintendent for facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

This new appropriation funds over four years: (1) land acquisition projects, both Federal and non-federal; and (2) authorized modifications, and research, planning, and inter-agency coordination in support of land acquisition associated with the restoration of the Everglades watershed. This includes approximately \$12 million in 1998, \$8 million in 1999, \$18 million in 2000 and \$22 million in 2001 for construction of a critical water management project to modify the flow of water into Everglades National Park.

The Everglades watershed encompasses areas north of the Kissimmee River Basin all the way down through Everglades National Park and into Florida Bay. This vast region is home to: over 6 million Americans; seven of the ten fastest growing metropolitan areas in the country; a huge tourism industry; and a large agricultural economy. It is one of the world's most unique environmental resources. Land purchases and other activities funded through this account will improve water quality, provide a protective buffer between natural and urban areas, and serve as water storage areas so that water releases may be timed to replicate more naturally the original hydrologic functioning of the region.

In addition, the Administration is proposing legislation to establish a steady source of funding, in addition to direct appropriations, for land acquisition and related activities furthering Everglades restoration. The Administration will propose that receipts from an increased marketing assessment on Florida sugar producers of one-cent per pound (estimated at approximately \$35 million per year) be deposited into the Fund and be made available without further appropriation.

The National Park Service and other land management agencies have initiated a demonstration fee program that allows parks and other units to collect new or increased admission and user fees and spend the new revenue for park improvements. This temporary authority, provided in section 315 of section 101(c) of Public Law 104-134 as amended by section

319 of section 101(d) of Public Law 104-208, expires at the end of fiscal year 1999. To ensure that increased fee revenue remains available after 1999, the Administration will propose legislation providing permanent fee authority to take effect once the current authority expires.

Proposed legislation would increase the amount of money that the City of San Francisco pays to the National Park Service for the City's use of the Hetch Hetchy Reservoir in Yosemite National Park. The amount would increase from \$30,000 to a sum determined by the Secretary of the Interior, not less than \$597,000. The estimate for fiscal year 1998 is \$597,000. The funds would be deposited in a special account and remain available, subject to appropriation, to fund operations of Yosemite National Park and other national parks in the State of California.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to Indian tribes, Alaskan Native groups, and individual Native Americans.

Tribal Priority Allocations.—This activity includes the majority of funds used to support ongoing programs at the local tribal level. Funding priorities for base programs included

in tribal priority allocations are determined by tribes. Although budget estimates include specific amounts for individual programs, funds may be shifted among programs within the total available for a tribe or a BIA agency office at the time of budget execution.

Other recurring programs.—This activity includes ongoing programs for which funds are (1) distributed by formula, such as elementary and secondary school operations and tribal community colleges; (2) based upon need, such as facilities operation and maintenance and special law enforcement; and (3) for resource management activities that carry out specific laws or court-ordered settlements.

Non-recurring programs.—This activity includes programs that support Indian reservation and tribal projects of limited duration, such as noxious weed eradication, cadastral surveys, and forest development.

Central office operations.—This activity supports the executive, program, and administrative management costs of central office organizations, most of which are located in Washington, DC, and Albuquerque, NM.

Area office operations.—The Bureau of Indian Affairs has 12 area offices located throughout the country. Area Directors have line authority over agency office superintendents. Most of the agency offices are located on Indian reservations. Virtually all of the staff and related administrative support costs for area and agency offices are included within this activity. Area Directors have flexibility in aligning their staff and resources to best meet the program requirements of the tribes within their area.

Special programs and pooled overhead.—Most of the funds in this activity support bureau-wide expenses for items such as unemployment compensation, workers compensation, facilities rentals, telecommunications, and data processing. This activity includes the Bureau's two post-secondary schools, the Indian police academy, the Indian Arts and Crafts Board, and the Indian Integrated Resources Information Program.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and, as of October 1, 1994, the Republic of Palau. Assistance to the Republic of Palau is now contained in the "Compact of Free Association" account.

Remaining funds in the "Trust Territory of the Pacific Islands" account will be used to meet final transition responsibilities of the United States. Outlays from numerous ongoing infrastructure construction projects in the Republic of Palau and the other two entities will continue as provided by the Compacts of Free Association and appropriation laws, and will be reported as Trust Territory expenditures until such time as the activities cease.

COMPACT OF FREE ASSOCIATION

For economic assistance and necessary expenses for the Federated States of Micronesia and the Republic of the Marshall Islands as provided for in sections 122, 221, 223, 232, and 233 of the Compact of Free Association, and for economic assistance and necessary expenses for the Republic of Palau as provided for in sections 122, 221, 223, 232, and 233 of the Compact of Free Association, [\$23,538,000] \$20,445,000, to remain available until expended, as authorized by Public Law 99-239 and Public Law 99-658. The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in fiscal year 1987 and will continue for fifteen years, totalling an estimated \$2.3 billion, to aid in the development of these sovereign nations. The Compact of Free Association with the Republic of Palau was implemented under the terms of Public Law 99-658 on October 1, 1994. This compact will provide annual benefits to the Republic totalling an estimated \$600 million over the fifteen-year period that began at the implementation date.
