Coast Guard, DOT § 108.405

for Aircraft Fuel Servicing (N.F.P.A. No. 407-1975).

§ 108.241 Visual aids.

- (a) Each helicopter deck must—
- (1) Have a wind direction indicator located in an unobstructed area readily visible to helicopter pilots approaching the deck;
- (2) Be fitted around the perimeter with yellow and blue lights in alternate order, not more than 3 meters (10 ft.) apart; and
 - (3) Be marked with—
 - (i) The unit's identification:
- (ii) A continuous line 40 centimeters (16 in.) wide on the perimeter; and
- (iii) Aiming circles as may be appropriate considering deck configuration, helicopter type, and operational requirements.
- (b) All markings must be in a contrasting color to the surface of the deck

Subpart C—Stability

§108.301 Stability.

Each unit must meet the requirements in Subchapter S of this chapter that apply to Mobile Offshore Drilling Units.

[CGD 79-023, 48 FR 51008, Nov. 4, 1983]

Subpart D—Fire Extinguishing Systems

$\S 108.401$ Fire main system.

Each unit must have a fire main system.

§ 108.403 Fire extinguishing systems: General.

- (a) Each of the following on a unit must have an approved fixed gaseous type extinguishing system:
- (1) Each paint locker, oil room, and similar space.
- (2) Each enclosed space containing internal combustion or gas turbine main propulsion machinery.
- (3) Each enclosed space containing internal combustion machinery with an aggregate power of at least 1000 B.H.P.
- (4) Each enclosed space containing a fuel oil unit, including purifiers, valves, or manifolds for main propul-

sion machinery or internal combustion machinery with an aggregate power of at least 1000 B.H.P.

- (5) Each enclosed ventilation system for electric motors or generators used for vital services including bilge pumps, fire pumps, or propulsion.
- (b) Each space containing an oil fired boiler, the fuel oil unit or valves for the boiler, or manifolds in the line between the fuel settling tanks and the boiler on a unit must have a fixed gas type, foam, or other approved fire extinguishing system.

[CGD 73-251, 43 FR 56808, Dec. 4, 1978, as amended by CGD 95-027, 61 FR 26008, May 23, 1996]

§ 108.403a Fire extinguishing systems: Non-vital services.

Each enclosed ventilating system for electric motors or generators not used for vital services must have an access into the system for firefighting or be protected by a fixed fire protection system.

§ 108.404 Selection of fire detection system.

- (a) If a fire detector is in a space, it must provide effective detection of fires most likely to occur in the space.
- (b) The fire detection system must be designed to minimize false alarms.

§ 108.405 Fire detection system.

- (a) Each fire detection system and each smoke detection system on a unit must— $\,$
- (1) Be approved by the Commandant; and
- (2) Have a visual alarm and an audible alarm in the pilothouse or at a normally manned control station for the system.
- (b) Each fire detection system must be divided into zones to limit the area covered by any particular alarm signal.
 - (c) Each visual alarm must-
- (1) Have a chart or diagram next to the alarm that shows the location of the zones in the system and that contains the instructions for operating, and testing the system;
- (2) When activated show the zone in the system where fire has been detected; and
- (3) Be in a noticeable location in the pilothouse or control station.
