#### § 129.450

automatically actuate upon failure of the main lighting. Unless a vessel is equipped with a single source of power for emergency lighting, it must have individual battery-powered lighting that is—

- (1) Automatically actuated upon loss of normal power;
  - (2) Not readily portable;
- (3) Connected to an automatic battery-charger; and
- (4) Of enough capacity for 6 hours of continuous operation.

#### §129.450 Portable lighting.

Each vessel must be equipped with at least two operable, portable, battery-powered lights. One of these lights must be located in the pilothouse, another at the access to the engine room.

# Subpart E—Miscellaneous Electrical Systems

### §129.510 Lifeboat winches.

Each lifeboat winch operated by electric power must comply with subparts 111.95 and be approved under approval series in subparts 160.015 or 160.115 of this chapter.

### §129.520 Hazardous areas.

- (a) No OSV that carries flammable or combustible liquid with a flashpoint of below 140 °F (60 °C), or carries hazardous cargoes on deck or in integral tanks, or is involved in servicing wells, may have electrical equipment installed in pump rooms, in hose-storage spaces, or within 3 meters (10 feet) of a source of vapor on a weather deck unless the equipment is explosion-proof or intrinsically safe under §111.105–9 or 111.105–11 of this chapter.
- (b) No electrical equipment may be installed in any locker used to store paint, oil, turpentine, or other flammable liquid unless the equipment is explosion-proof or intrinsically safe under §111.105–9 or §111.105–11 of this chapter.
- (c) Equipment that is explosion-proof and intrinsically safe must comply with subpart 111.105 of this chapter.

#### §129.530 General alarm.

Each vessel must be fitted with a general alarm that complies with subpart 113.25 of this chapter.

# § 129.540 Remote stopping-systems on OSVs of 100 or more gross tons.

- (a) Except as provided by paragraph (b) of this section, each vessel must be fitted with remote stopping-systems that comply with subpart 111.103 of this chapter.
- (b) The following remote stoppingsystems may substitute for remote stopping-systems that must comply with subpart 111.103 of this chapter:
- (1) For each propulsion unit, in the pilothouse.
- (2) For each discharge pump for bilge slop or dirty oil, at the deck discharge.
- (3) For each powered ventilation system, outside the space ventilated.
- (4) For each fuel-oil pump, outside the space containing the pump.
- (5) For each cargo-transfer pump for combustible and flammable liquid, at each transfer-control station.
- (c) Remote stopping-systems required by this section may be combined.

# § 129.550 Power for cooking and heating.

- (a) Equipment for cooking and heating must be suitable for marine use. Equipment designed and installed to comply with ABYC Standards A-3 and A-7 or Chapter 6 of NFPA 302 meets this requirement.
- (b) The use of gasoline for cooking, heating, or lighting is prohibited.
- (c) The use of liquefied petroleum gas for cooking, heating, or other purposes must comply with subpart 58.16 of this chapter.
- (d) Each electric space-heater must be provided with a thermal cut-out to prevent overheating.
- (e) Each element of an electric spaceheater must be enclosed, and the case or jacket of the element made of a corrosion-resistant material.
- (f) Each electrical connection for a cooking appliance must be drip-proof.
