See footnotes on following page.

*Data are partly estimated. Differences between the totals shown in this table and those shown in the monthly series (Appendix 10 above) will be noted for some programs (student work program, CCC, other Federal agency projects, and Farm Security Administration grants). In many instances these differences arise from the fact that Appendix 10 is based on the revised monthly series as published in *Social Security Bulletin*, IV (February 1941), while this appendix is derived from the State distribution for June 1940, published in *Social Security Bulletin*, III (September 1940); a revision of this distribution to conform to the monthly series was not available when this appendix was prepared. Differences not due to this cause are explained in the following footnotes.

For current data on payments to individual recipients of public aid under the Federal work programs and on means-test programs, see the monthly *WPA Statistical Bulletin*, table entitled "Earnings of Persons Employed on Federal Work and Construction Projects and Payments to Recipients of Public Relief, by Program and State." Data on payments to social-insurance beneficiaries are less frequently published except those pertaining to unemployment compensation claimants, which are given on a State-by-State basis in the monthly *Social Security Bulletin*, table entitled "Continued Claims Received, Weeks Compensated, and Benefits Paid by States." Data on social-insurance beneficiaries on a State-by-State basis are normally available only on a quarterly, semiannual, or annual basis. Workmen's compensation payments are not included in this appendix.

The sum of the rounded State totals for each program may differ slightly from the rounded National total because the latter was obtained by adding the unrounded State totals and rounding the result to the nearest thousand of dollars. The same type of differences may occur between the total for each State or region and the sum of its component programs.

¹ Represent earnings of persons employed on WPA projects (including those operated by other Federal agencies but financed by allocation of WPA funds); cover all pay-roll periods ended during June 1940. Source: *Social Security Bulletin*, III (September 1940), 68, table 9.

² Earnings cover all pay-roll periods ended during June 1940. Source: *ibid.*

³ Figures estimated by the CCC by multiplying average monthly number of persons enrolled by average of \$66.25 for June 1940. This average amount is based on amount of obligations incurred for cash allowances and for clothing, shelter, subsistence, and medical care of persons enrolled, and for certain other items. Source: *ibid.*

⁴ Represent earnings of persons employed on Federal work and construction projects other than those of the WPA, NYA, and CCC, financed in whole or in part from emergency Federal funds; cover all pay-roll periods ended during the monthly period of May 16 through June 15, 1940. Sources: Data from the Division of Construction and Public Employment, Bureau of Labor Statistics; and *Social Security Bulletin*, IV, (February 1941), 66-67, table 8.

⁵ Payments to recipients from Federal, State and local funds for programs administered under State plans approved by the Social Security Board, and from State and local funds for programs administered under State laws without Federal participation. Include cost of hospitalization and burial, whereas the monthly series (see Appendix 10 above) excludes those costs. Source: *Social Security Bulletin*, III (September 1940) 68, table 9.

⁶ Include cost of hospitalization and burial whereas the monthly series (see Appendix 10 above) excludes those costs. Source: *ibid.*

⁷ Represent net amount of emergency grant vouchers certified to cases and value of commodities purchased by the FSA and distributed during month. Source: *ibid.*

⁸ The total does not include (1) lump-sum death payments under the 1939 amendments of the Social Security Act; (2) lump-sum payments under the Social Security Act of 1935; (3) lump-sum death payments under the Railroad Retirement Act; and (4) payments under the several State workmen's compensation acts.

⁹ Represent amount of unemployment compensation checks issued during June 1940. Source: *Social Security Bulletin*, III (August 1940), 19, table 1.

¹⁰ Represent the amount of unemployment benefits certified in June 1940 based on a 20-percent sample taken in each regional office of the Railroad Retirement Board. The total shown in this table differs somewhat from the total in the monthly series (Appendix 10 above) because the latter is not based on a sample but represents actual amount certified for payment; also, the monthly series includes Territories, while this table does not. Source: *Social Security Bulletin*, III (August 1940), 36, table 3.

¹¹ Represent the amount of claims for primary supplementary and survivor benefits allowed as of June 1940, under the 1939 amendments of the Social Security Act. The total shown in this table differs from the total in the monthly series (Appendix 10 above) because the latter represents the amount certified for payment and includes retroactive payments; also, the monthly series includes Territories while this table does not. Source: *Social Security Bulletin*, III (August 1940), 63, table 6.

¹² Represent amount of old-age and disability annuities, pensions and survivor and death benefit annuities payable for June 1940. The total shown in this table differs from the total in the monthly series (Appendix 10 above) because the latter represents the amount certified for payment during month ended June 20, 1940, and includes retroactive payments, minus cancellations reported during period. Source: *The Monthly Review* [Railroad Retirement Board], I (October 1940), 7.

¹³ Estimated.

¹⁴ Less than \$500.
