

unmitigable adverse impact on subsistence uses of these species.

Proposed Authorization

NMFS proposes to issue two IHAs to Veritas and one IHA to SOI for conducting on-ice seismic surveys in the U.S. Beaufort Sea, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed activities each would result in the harassment of small numbers of ringed seals, and potentially any bearded and spotted seals in the vicinity; would have no more than a negligible impact on the affected pinniped species and stocks; and would not have an unmitigable adverse impact on the availability of seals for subsistence uses.
