Overview of the American Recovery and Reinvestment Act of 2009 (Recovery Act)

The American Recovery and Reinvestment Act of 2009 (Recovery Act) was signed into law by President Obama on February 17th, 2009. It is an unprecedented effort to jumpstart our economy, create or save millions of jobs, and put a down payment on addressing long-neglected challenges so our country can thrive in the 21st century. The Act is an extraordinary response to a crisis unlike any since the Great Depression, and includes measures to modernize our nation's infrastructure, enhance energy independence, expand educational opportunities, preserve and improve affordable health care, provide tax relief, and protect those in greatest need.

Implementing the American Recovery and Reinvestment Act of 2009 (Recovery Act)

The American Recovery and Reinvestment Act of 2009 includes approximately \$7.4 billion in Defense-related appropriations, which accounts for less than 1 percent of the total \$787 billion stimulus package signed on February 17 by President Obama. The Department of Defense (DoD) intends to spend this funding with full transparency and accountability.

As stated on recovery.gov, the purpose of the Recovery Act is to create and save jobs, jumpstart our economy, and build the foundation for long-term economic growth. In order to fulfill these objectives, the DoD intends to spend Defense-related funds as quickly as possible.

- \$4.2 billion in Operation and Maintenance accounts to upgrade DoD facilities, including energy-related improvements
- \$1.3 billion in military construction for hospitals
- \$240 million in military construction for child development centers
- \$100 million in military construction for warrior transition complexes
- \$600 million for other military constructions projects such as housing for the troops and their families
- \$300 million to develop energy-efficient technologies
- \$120 million for the Energy Conservation Investment Program (ECIP)
- \$555 million for a temporary expansion of the Homeowner's Assistance Program (HAP) benefits for private home sale losses of both DoD military and civilian personnel
- \$15 million for DoD Inspector General oversight and audit of Recovery Act execution

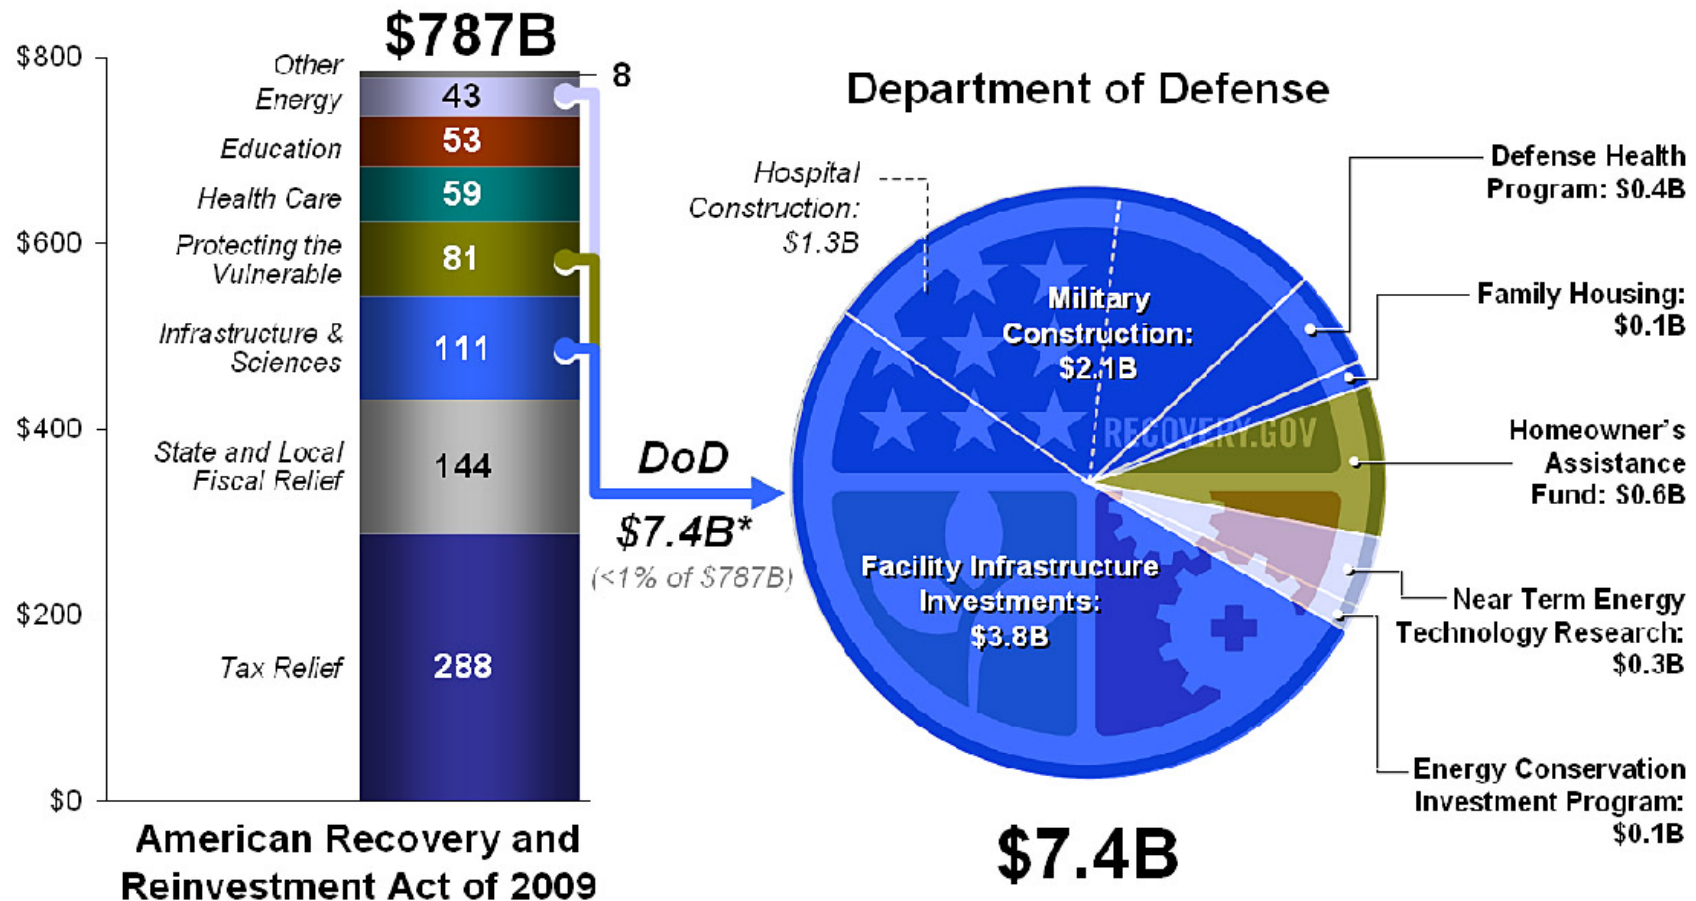

The Military Construction and Operation and Maintenance Appropriations provided through the Recovery Act are available for obligation through the end of fiscal year 2013 and fiscal year 2010, respectively.

The Recovery Act funding addresses some of the unique economic pressures faced by American service members because of their voluntary commitment to serve our nation. Specific investment in military construction will further President Obama's goal of providing stimulus to the economy while helping to improve the quality of life for our troops and their families. In addition to providing much needed facility improvements, this bill also provides more funding for our important energy research programs so that the DoD can continue to lead the way in the national effort to achieve greater energy independence.

DoD officials are working with the Army, Navy, Marine Corps and Air Force to quickly finalize details such as which bases will receive construction projects. We intend spending plans at the project level to be sent to Congress in the weeks ahead, with more announcements to be made as appropriate.

Defense Is Moving Swiftly on Recovery Act

(Dollars in Billions)

* \$7.4B in appropriations include funding from 3 categories: Energy, Infrastructure & Sciences and Protecting the Vulnerable
 Source: Recovery.gov, American Recovery and Reinvestment Act of 2009

Important Timelines

- The Operations and Maintenance budgets for Facilities modernization and energy efficient upgrades must be obligated by **September 30, 2010**.
- The Research, Development, Testing and Evaluation budgets for all DoD must also be obligated by **September 30, 2010**.
- The construction and family housing funding for hospitals, child development centers, and warrior transition complexes must be obligated by **September 30, 2013**.

Release of DoD Recovery Act Projects

March 20, 2009, the Department of Defense (DoD) released its EXPENDITURE PLAN for the projects to be funded with the American Recovery and Reinvestment Act of 2009. The Recovery Act provides \$7.4 billion to the Department largely for projects that are located at Defense installations spread across all fifty states, District of Columbia and two U.S. territories. The report includes \$2.3 billion in construction projects, including two major hospital construction projects: Camp Pendleton, California; Fort Hood, Texas; and a hospital alteration project at the Naval Air Station, Jacksonville, Florida. The plan also contains \$3.4 billion for nearly 3,000 facility repair and improvement projects that will immediately generate additional employment in communities around Defense installations. Furthermore, the plan details how \$300 million for near-term energy technology research will be allocated. The allocation of the remaining \$800 million for Defense facility infrastructure investment will be announced at a later date.

DoD Expenditure Plan:

http://www.defenselink.mil/recovery/plans_reports/2009/march/Final_ARRA_Report_to_Congress-24_Mar_09ver2.pdf

Project Selection

The Recovery Act specified Military Construction to be funded under various categories such as child development centers, troop housing, etc. Within those categories, the Department selected validated priority projects based on several factors, primarily operational need and the ability to obligate funds quickly. Further, DoD considered the degree of its compliance with legal requirements within the National Environmental Policy Act (NEPA) and the acquisition strategy in determining how quickly a project could be executed.

For the FSRM funding identified in the Recovery Act, the Department selected projects based primarily on the following criteria: (1) mission requirements, (2) quality of life impact, (3) NEPA documentation status, and (4) acquisition strategy, with a focus on ability to execute quickly. In addition, the Department included repair and modernization projects for facilities that are currently vacant, which potentially could be occupied by troops returning from Iraq or Afghanistan.

The Expenditure Plan report represents the Department's current plan. During the implementation of these projects, if significant events occur that impact on

attainment of one or more projects requiring a change, the Department will amend its plan accordingly.

DRAFT

As of March 20, 2009

DoD Announces Recovery Act Construction and Repair Projects

The Department of Defense (DoD) announced today details of approximately 3,000 military construction and facility improvement projects funded by the American Recovery and Reinvestment Act (ARRA). The \$5.9 billion budget for these construction and repair projects represents the bulk of the approximately \$7.4 billion in defense-related funding provided by the ARRA signed by President Barack Obama on Feb. 17, 2009.

DoD Recovery Act funds will be spent at DoD facilities in all 50 states, the District of Columbia, Guam, and Puerto Rico. The primary purpose of these funds is to create jobs and stimulate economic activity across the country. All projects focus on making much-needed improvements to military installations and include hospitals, child development centers, and housing for troops and their families.

The two largest DoD projects to be constructed under the ARRA will be new hospitals at Camp Pendleton, Calif., and Fort Hood, Texas.

Representing less than 1 percent of the entire \$787 billion ARRA package, the \$7.4 billion investment in defense-related projects will further the legislation's stated goal of stimulating the American economy, while improving the quality of life for service members, their families, and DoD civilian workers.

ARRA funds are also being used to support DoD high priority programs such as care for wounded warriors and energy security. Facility improvement projects include many energy conservation measures. \$300 million of ARRA funds will be used on military energy research programs so that the DoD can continue to lead the way in the national effort to achieve greater energy independence.

The DoD intends to spend ARRA funds as quickly as possible with full transparency and accountability. To view a complete list of the specific projects announced today, please visit <http://www.defenselink.mil/recovery> and <http://www.recovery.gov>. The DoD will continue to use these websites to post future announcements related to ARRA funding.

Report Date: 2009-03-20

Financial Status:

- Total Obligations: \$0
- Total Disbursements: \$0

Major Actions Taken to Date:

- The Services have completed the majority of their lists of projects for Facility, Sustainment, Restoration and Modernization (FSRM) in coordination with the Office of the Deputy Under Secretary of Defense (ODUSD) (Installations & Environment) and the DoD Inspector General. Air Force and Navy/Marine Corps completed their FSRM projects lists while the Army continues to review remaining FSRM project requirements. Following OMB review, On 20 March 2009, DoD transmitted the ARRA report to Congress which included 3,306 FSRM projects identified to date: 1,473 for Army; 143 for Navy & Marine Corps; 1535 for Air Force; and 155 for Other Defense Agencies. For the 56 projects > \$7.5 million each that required Congressional Notification under 10 USC 2811, DoD transmitted the notification via the 20 March 2009 ARRA Report to Congress.
- The Services have completed their Military Construction project lists in coordination with ODUSD (Installations & Environment) and the DoD Inspector General. These 122 Military Construction projects included 43 Army; 44 Navy & Marine Corps; 27 Air Force; and 8 Other Defense Agencies. Following OMB review, these were transmitted to Congress in the 20 March 2009 ARRA Report.
- The Office of Management and Budget approved the DoD Recovery Act plan for all appropriations and authorized DoD to release our recovery act plan to Congress on 20 March 2009.
- The Deputy Assistant Secretary of the Army for Installations and Housing hosted an initial meeting of the Housing Assistance Program (HAP) Task Force with primary mission to draft HAP implementing guidance.

Major Planned Actions:

- Continue review of National Environmental Protection Act/National Historic Preservation Act status on all recovery act projects.
- Distribute ARRA Federal Acquisition Regulation contract clauses for all ARRA related contracts after Defense Procurement and Acquisition Policy office approval.
- DoD will issue additional guidance on project execution and reporting requirements as developed by cross-functional working group.
- DoD will submit the remaining Army FSRM projects to Congress within the next two weeks.
- DoD will be publishing specific accounting coding guidance by component and by ARRA appropriation to address reporting requirements.

Report Date: 2009-03-27

Financial Status:

- Total Obligations: \$0
- Total Disbursements: \$0

Major Actions Taken to Date:

- Completed Federal Acquisition Circular (FAC) which contains the proposed ARRA Federal Acquisition Regulation (FAR) changes published in the March 31 Federal Register.
- The Department of the Navy is ready to award the following Facility Sustainment Restoration and Modernization (SRM) projects after publication of Federal Acquisition Circular and incorporation of the required contract clauses: BS33 Parking Garage Repairs, National Maritime Intelligence Center, Suitland MD; BS54 Replace Metal Roof, San Clemente Island, Naval Base Coronado, CA; BS52 Replace Fire Detection Devices Bachelor Quarters, Building 72, Naval Support Activity, Washington DC; and BS09 Building 30 Parking Lot Improvements, LA (Marine Corps).
- DOD is working to develop systems to meet ARRA reporting and transparency requirements, including procedures to identify project-level detail for Facility Sustainment Restoration and Modernization projects.
- All Army Installations are reviewing projects to verify compliance with the National Environmental Protection Act .
- The Army Office of Assistant Chief of Installation Management is standing up a team to coordinate the Army's MILCON and SRM project execution reporting.

Major Planned Actions:

- The Department of the Navy has the following projects which can be awarded by the end of April: Facility Sustainment Restoration and Modernization projects BS43 Replace Elevators #37 and #40 Building 171, Norfolk Naval Shipyard, Norfolk, VA; BS56 Replace Roof Mounted Boilers, Bachelor Quarters Building 3144 and Bachelor Quarters Building 3150, Naval Base San Diego, CA; BS06 Advance Meter Installation, Various Locations throughout Washington State; BS30 Replace HVAC and Modernize Board Hall Bachelor Quarters Complex, Buildings 30-34, Naval Station Great Lakes, IL; BS07 Renovate Ground Floor HVAC, Bldg 100, NOSC Bronx, NY; and Military Construction Project P115, Replace Steam Lines, Naval Station Norfolk, Norfolk, VA.
- Begin contract modifications to incorporate ARRA FAR contract clauses posted in the Federal Register
- Issue additional guidance on project execution and reporting requirements as developed by the cross-functional working group
- DoD will conduct pre-solicitation actions in preparation for authority to award contracts
- Army will review execution timelines for SRM lists projects

- DOD will develop Homeowners Assistance Program (HAP) implementation guidance.
- Complete review of National Environmental Protection Act/National Historic Preservation Act requirements for report to White House Council on Environmental Quality
- Complete review of National Environmental Protection Act/National Historic Preservation Act requirements for report to White House Council on Environmental Quality
