

## Lands and Realty

- Should some BLM-administered land in the planning area be exchanged for other land with high public value? If so, what land should be available for exchange and why? What criteria should be applied to make those decisions?
- Should some BLM parcels be identified for sale or other disposal? What criteria should be applied?
- Are there private lands within the planning area that should be considered for purchase from willing sellers? Under what conditions?
- Is legal access to public lands needed, and if so, where?
- Should additional utility corridors and communication sites be designated, and if so, where?
- Are there areas in the planning area that should be identified as unsuitable for right-of-way routes for major utilities and roads?
