

Engaging Parents in Education: Lessons From Five Parental Information and Resource Centers

Innovations In Education

Engaging Parents in Education: Lessons From Five Parental Information and Resources Centers highlights five Parental Information and Resource Centers (PIRCs) and how they have collaborated with other partners to enhance parental involvement in education. This guide describes the promising practices and strategies each of these organizations has implemented to maximize parental involvement in schools. PIRCs, which are funded through a competitive grant program, are responsible for assisting state and local education agencies in implementing the parental involvement provisions of the *No Child Left Behind Act*, as well as for providing information, support, training, and technical assistance to the education community on child development and what children need to succeed in school. School and district administrators and educators will find this guide helpful as they seek to expand efforts to effectively involve parents in their children's education and in the improvement of their local schools.

This book is one of a series of innovation guides produced by the U.S. Department of Education's Office of Innovation and Improvement. All books in this series are available as free downloads at <http://www.ed.gov/about/pubs/intro/innovations.html>.

Featured Parental Information and Resource Centers (PIRCs)

Academic Development Institute, PIRC
Lincoln, Illinois
