

ovarian cancer cases are diagnosed at an advanced stage, however, because no reliable screening test exists for the disease. Because the early signs of ovarian cancer are easy to miss and often resemble the signs of other conditions, it is important for women to talk with their doctors about detection and be aware of the risk factors and symptoms of this cancer.

There is more we need to learn about how best to prevent, detect, and treat ovarian cancer. The National Cancer Institute (NCI) is currently sponsoring a study on genetic and environmental factors that may increase the risk of ovarian cancer. In addition, the NCI is sponsoring clinical trials to explore new ways to screen for and detect ovarian cancer. Researchers are studying new treatment options, including biological therapies, anticancer drugs, vaccines, and other therapies to treat resistant forms of ovarian cancer. The Centers for Disease Control and Prevention will spend almost \$4.6 million, and the Department of Defense's Ovarian Cancer Research Program will invest an estimated \$10 million.

As we observe National Ovarian Cancer Awareness Month, we recognize the courage and strength of women battling ovarian cancer, and of their families and friends who love and support them. Our Nation is grateful for the hard work and commitment of our dedicated researchers and medical professionals. With continued effort, we can raise awareness of ovarian cancer and find new ways to prevent and treat this deadly disease.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 2005 as National Ovarian Cancer Awareness Month. I call upon government officials, businesses, communities, health care professionals, educators, volunteers, and all people of the United States to continue our Nation's strong commitment to preventing and treating ovarian cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord two thousand five, and of the Independence of the United States of America the two hundred and thirtieth.

GEORGE W. BUSH

Proclamation 7920 of August 29, 2005

National Prostate Cancer Awareness Month, 2005

*By the President of the United States of America
A Proclamation*

Prostate cancer is the second leading cause of cancer-related deaths among American men. This year, thousands of men will be diagnosed with prostate cancer, and thousands will die from the disease. While great strides have been made in the battle against prostate cancer, we have more work to do. During National Prostate Cancer Awareness Month, we renew our commitment to fight prostate cancer by finding better ways to prevent, detect, and treat this deadly disease.

My Administration is committed to funding research for prevention and better treatments for prostate cancer. This year, the National Institutes of

Health will invest an estimated \$381 million in prostate cancer research, including \$310 million at the National Cancer Institute. The Department of Defense's Prostate Cancer Research Program will spend an estimated \$85 million, and the Centers for Disease Control and Prevention will devote an estimated \$14 million toward prostate cancer research. Scientists are examining risk factors to identify ways to prevent prostate cancer, and they are finding ways to detect this disease earlier, when it is easier to treat. In addition, newer treatments are helping to slow or stop the spread of prostate cancer in men with advanced stages of the disease. This progress offers hope to men who are living with prostate cancer and those who are at risk.

As we observe National Prostate Cancer Awareness Month, I encourage all men, especially those over the age of 50, to talk with their doctors about the risk of prostate cancer and the appropriate screenings. I commend those who fight this disease, and I applaud the dedication of researchers, health care providers, and all who are working to increase our knowledge of prostate cancer. By raising awareness and supporting research, we can save lives.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 2005 as National Prostate Cancer Awareness Month. I call upon government officials, businesses, communities, health care professionals, educators, volunteers, and all people of the United States to reaffirm our Nation's strong and continuing commitment to treat and prevent prostate cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord two thousand five, and of the Independence of the United States of America the two hundred and thirtieth.

GEORGE W. BUSH

Proclamation 7921 of August 29, 2005

National Alcohol and Drug Addiction Recovery Month, 2005

By the President of the United States of America

A Proclamation

The devastating effects of alcohol and drug addiction have destroyed the lives and families of countless Americans. During National Alcohol and Drug Addiction Recovery Month, we recognize the dangers of substance abuse and renew the hope of overcoming addiction for individuals across our Nation. This year's theme, "Join the Voices for Recovery: Healing Lives, Families and Communities," encourages those striving to recover from this disease and recognizes the many families, support organizations, faith-based and community groups, and volunteers working to help overcome addiction.

Substance abuse leads to a cycle of addiction and despair that too often causes disease and death among young people. The Helping America's Youth initiative, led by First Lady Laura Bush, is promoting positive youth development and combating alcohol and drug addiction. This initiative is
