amount attributable to research performed within the United States can be treated as a contract research expense (even if 80 percent or more of the contract amount was for basic research performed in the United States).

(2) *Research in the social sciences or humanities.* Basic research does not include research in the social sciences or humanities, within the meaning of §1.41–4A(c).

(f) *Procedure for making an election to be treated as a qualified fund.* In order to make an election to be treated as a qualified fund within the meaning of section 30(e)(4)(B)(iii) (before amendment by the Tax Reform Act of 1986) or as an organization described in section 41(e)(6)(D), the organization shall file with the Internal Revenue Service center with which it files its annual return a statement that—

(1) Sets out the name, address, and taxpayer identification number of the electing organization (the "taxpayer") and of the organization that established and maintains the electing organization (the "controlling organization"),

(2) Identifies the election as an election under section 41(e)(6)(D) of the Code,

(3) Affirms that the controlling organization and the taxpayer are section 501(c)(3) organizations,

(4) Provides that the taxpayer elects to be treated as a private foundation for all Code purposes other than section 4940,

(5) Affirms that the taxpayer satisfies the requirement of section 41(e)(6)(D)(iii), and

(6) Specifies the date on which the election is to become effective.

If an election to be treated as a qualified fund is filed before February 1, 1982, the election may be made effective as of any date after June 30, 1981, and before January 1, 1986. If an election is filed on or after February 1, 1982, the election may be made effective as of any date on or after the date on which the election is filed.

[T.D. 8251, 54 FR 21204, May 17, 1989. Redesignated and amended by T.D. 8930, 66 FR 295, Jan. 3, 2001]

§1.41–6 Aggregation of expenditures.

(a) *Controlled group of corporations; trades or businesses under common control*—(1) *In general.* In determining the amount of research credit allowed with respect to a trade or business that at the end of its taxable year is a member of a controlled group of corporations or a member of a group of trades or businesses under common control, all members of the group are treated as a single taxpayer and the credit (if any) allowed to the member is determined on the basis of its proportionate share (if any) of the increase in qualified research expenses of the aggregated group.

(2) *Definition of trade or business.* For purposes of this section, a trade or business is a sole proprietorship, a partnership, a trust, an estate, or a corporation that is carrying on a trade or business (within the meaning of section 162). For purposes of this section, any corporation that is a member of a commonly controlled group shall be deemed to be carrying on a trade or business if any other member of that group is carrying on any trade or business.

(3) *Determination of common control.* For rules for determining whether trades or businesses are under common control, see paragraphs (b) through (g) of §1.52–1 except that the words "singly or" in §1.52–1(d)(1)(i) shall be treated as deleted.

(4) *Examples.* The following examples illustrate provisions of this paragraph.

Example 1. (i) *Facts.* A controlled group of four corporations (all of which are calendar-year taxpayers) had qualified research expenses ("research expenses") during the base period and taxable year as follows:

Corporation	Base period (average)	Taxable year	Change
A	$60	$40	($20)
B	10	15	5
C	30	70	40
D	15	25	10

(ii) *Total credit.* Because the research expenses of the four corporations are treated as if made by one taxpayer, the total amount of incremental expenses eligible for the credit is $35 ($55 increase attributable to B, C, and D less $20 decrease attributable to A). The total amount of credit allowable to members of the group is 20% of the incremental amount or $7.00.

(iii) *Allocation of credit.* No amount of credit is allocated to A since A's research expenses did not increase in the taxable year. The $7.00 credit is allocated to B, C, and D, the members of the group that increased their research expenses. This allocation is made on the basis of the ratio of each corporation's increase in its research expenses to the sum of increases in those expenses. Inasmuch as the total increase made by those members of the group whose research expenses rose (B, C, and D) was $55, B's share of the $7.00 credit is 5/55; C's share is 40/55; and D's share is 10/55.

Example 2. The facts are the same as in example (1) except that A had zero research expenses in the taxable year. Thus, the controlled group had a decrease rather than an increase in aggregate research expenses. Accordingly, no amount of credit is allowable to any member of the group even though B, C, and D actually increased their research expenses in comparison with their own base period expenses.

(b) *Minimum base period research expenses.* For purposes of this section, the rule in section 41(c)(3) (pertaining to minimum base period research expenses) shall be applied only to the aggregate amount of base period research expenses. See the treatment of corporation C in example (1) of paragraph (a)(4) of this section.

(c) *Tax accounting periods used*—(1) *In general.* The credit allowable to a member of a controlled group of corporations or of a group of trades or businesses under common control is that member's share of the aggregate credit computed as of the end of such member's taxable year. In computing the aggregate credit in the case of a group whose members have different taxable years, a member shall generally treat the taxable year of another member that ends with or within the determination year of the computing member as the determination year of that other member. The base period research expenses taken into account with respect to a determination year of another member shall be the base period research expenses determined for that year under §1.41–3A, except that §1.41–3A(c)(2) shall be applied only at the aggregate level.

(2) *Special rule where timing of research is manipulated.* If the timing of research by members using different tax accounting periods is manipulated to generate a credit in excess of the amount that would be allowable if all members of the group used the same tax accounting period, the district director may require each member of the group to calculate the credit in the current taxable year and all future years as if all members of the group had the same taxable year and base period as the computing member.

(d) *Membership during taxable year in more than one group.* A trade or business may be a member of only one group for a taxable year. If, without application of this paragraph, a business would be a member of more than one group at the end of its taxable year, the business shall be treated as a member of the group in which it was included for its preceding taxable year. If the business was not included for its preceding taxable year in any group in which it could be included as of the end of its taxable year, the business shall designate in its timely filed (including extensions) return the group in which it is being included. If the return for a taxable year is due before July 1, 1983, the business may designate its group membership through an amended return for that year filed on or before June 30, 1983. If the business does not so designate, then the district director with audit jurisdiction of the return will determine the group in which the business is to be included.

(e) *Intra-group transactions*—(1) *In general.* Because all members of a group under common control are treated as a single taxpayer for purposes of determining the research credit, transfers between members of the group are generally disregarded.

(2) *In-house research expenses.* If one member of a group performs qualified research on behalf of another member, the member performing the research shall include in its qualified research expenses any in-house research expenses for that work and shall not treat any amount received or accrued as funding the research. Conversely, the member for whom the research is performed shall not treat any part of any amount paid or incurred as a contract research expense. For purposes of determining whether the in-house research for that work is qualified research, the member performing the research shall be treated as carrying on

any trade or business carried on by the member on whose behalf the research is performed.

(3) *Contract research expenses.* If a member of a group pays or incurs contract research expenses to a person outside the group in carrying on the member's trade or business, that member shall include those expenses as qualified research expenses. However, if the expenses are not paid or incurred in carrying on any trade or business of that member, those expenses may be taken into account as contract research expenses by another member of the group provided that the other member—

(i) Reimburses the member paying or incurring the expenses, and

(ii) Carries on a trade or business to which the research relates.

(4) *Lease Payments.* The amount paid or incurred to another member of the group for the lease of personal property owned by a member of the group is not taken into account for purposes of section 41. Amounts paid or incurred to another member of the group for the lease of personal property owned by a person outside the group shall be taken into account as in-house research expenses for purposes of section 41 only to the extent of the lesser of—

(i) The amount paid or incurred to the other member, or

(ii) The amount of the lease expenses paid to the person outside the group.

(5) *Payment for supplies.* Amounts paid or incurred to another member of the group for supplies shall be taken into account as in-house research expenses for purposes of section 41 only to the extent of the lesser of—

(i) The amount paid or incurred to the other member, or

(ii) The amount of the other member's basis in the supplies.

[T.D. 8251, 54 FR 21204, May 17, 1989. Redesignated and amended by T.D. 8930, 66 FR 295, Jan. 3, 2001]

§ 1.41–7 Special rules.

(a) *Allocations*—(1) *Corporation making an election under subchapter S*—(i) *Pass-through, for taxable years beginning after December 31, 1982, in the case of an S corporation.* In the case of an S corporation (as defined in section 1361) the amount of research credit computed for the corporation shall be allocated to the shareholders according to the provisions of section 1366 and section 1377.

(ii) *Pass-through, for taxable years beginning before January 1, 1983, in the case of a subchapter S corporation.* In the case of an electing small business corporation (as defined in section 1371 as that section read before the amendments made by the subchapter S Revision Act of 1982), the amount of the research credit computed for the corporation for any taxable year shall be apportioned pro rata among the persons who are shareholders of the corporation on the last day of the corporation's taxable year.

(2) *Pass-through in the case of an estate or trust.* In the case of an estate or trust, the amount of the research credit computed for the estate or trust for any taxable year shall be apportioned among the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each.

(3) *Pass-through in the case of a partnership*—(i) *In general.* In the case of a partnership, the research credit computed for the partnership for any taxable year shall be apportioned among the persons who are partners during the taxable year in accordance with section 704 and the regulations thereunder. See, for example, §1.704–1(b)(4)(ii). Because the research credit is an expenditure-based credit, the credit is to be allocated among the partners in the same proportion as section 174 expenditures are allocated for the year.

(ii) *Certain expenditures by joint ventures.* Research expenses to which §1.41–2(a)(4)(ii) applies shall be apportioned among the persons who are partners during the taxable year in accordance with the provisions of that section. For purposes of section 41, these expenses shall be treated as paid or incurred directly by the partners rather than by the partnership. Thus, the partnership shall disregard these expenses in computing the credit to be apportioned under paragraph (a)(3)(i) of this section, and in making the computations under section 41 each partner shall aggregate its distributive share of these expenses with other research expenses of the partner. The limitation on the amount of the credit set out in
