

and which deductions have resulted in a reduction of the taxpayer's taxes for any taxable year under subtitle A of the Code (other than chapter 2, relating to tax on self-employment income), or prior income, war-profits, or excess-profits tax laws. The portion of such amounts which is equivalent to the expenditures which are reflected in the adjusted basis of the asset to which charged shall be excluded from gross income. The adjusted basis of such assets shall be reduced by the amount of such exclusion from gross income.

(4) Where amounts described in section 621 and this section are paid to the taxpayer in reimbursement for expenditures which have been charged to a depletable capital account, such amounts shall be excluded to the extent such expenditures are recovered through depletion deductions computed under section 613 (relating to percentage depletion).

(5) The amount of reimbursed expenditures charged to an account (depletable or depreciable) and recovered through depletion or depreciation deductions for any taxable year shall be that proportion of the total deductions allowed with respect to such account that such reimbursed expenditures bear to the total amount in the account. For example, in 1956 A incurs exploration expenditures of \$12,000 which he charges to a depletable capital account. This brings the total amount in this account to \$36,000 which is the adjusted basis of the property on January 1, 1957. In 1957, A is allowed a deduction for cost depletion of \$9,000 which resulted in a reduction of A's income taxes. One-third of this deduction is attributable to the \$12,000 of exploration expenditures since they were a third of the total in the capital account on January 1, 1957. Therefore, on January 1, 1958, these exploration expenditures make up \$9,000 of the remaining \$27,000 in the account. If on January 1, 1958, A receives \$12,000, which qualifies under section 621, in reimbursement for these exploration expenditures, he must report \$3,000 as income and reduce the capital account by \$9,000.

(d) *Definition.* As used in section 621 and this section, the term *critical and strategic minerals or metals* means minerals and metals which are considered

by those departments, agencies, and instrumentalities of the United States charged with the encouragement of exploration for, and development and mining of, critical and strategic minerals and metals, to constitute critical and strategic minerals and metals for defense purposes. See, for example, 30 CFR 301.3 (Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves, Excluding Organic Fuels, in the United States, its Territories and Possessions).

(e) *Repayments of amounts excluded under section 621.* Upon the repayment by the taxpayer of any portion of any amount to which section 621 applies and which portion has been expended for the purpose and in accordance with the terms and conditions upon which it was paid to the taxpayer, any expenditures attributable to such amount made by the taxpayer shall be treated as if such expenditures had been made at the time of such repayment. Such expenditures shall to the extent of the repayment be expensed or capitalized, as the case may be, in the order in which they were actually made or in such other manner as may be adopted by the taxpayer with the approval of the Commissioner.

SALES AND EXCHANGES

§ 1.631-1 Election to consider cutting as sale or exchange.

(a) *Effect of election.* (1) Section 631 (a) provides an election to certain taxpayers to treat the difference between the actual cost or other basis of certain timber cut during the taxable year and its fair market value as standing timber on the first day of such year as gain or loss from a sale or exchange under section 1231. Thereafter, any subsequent gain or loss shall be determined in accordance with paragraph (e) of this section.

(2) For the purposes of section 631(a) and this section, timber shall be considered cut at the time when in the ordinary course of business the quantity of timber felled is first definitely determined.

(3) The election may be made with respect to any taxable year even though

such election was not made with respect to a previous taxable year. If an election has been made under the provisions of section 631(a), or corresponding provisions of prior internal revenue laws, such election shall be binding upon the taxpayer not only for the taxable year for which the election is made but also for all subsequent taxable years, unless the Commissioner on showing by the taxpayer of undue hardship permits the taxpayer to revoke his election for such subsequent taxable years. If the taxpayer has revoked a previous election, such revocation shall preclude any further elections unless the taxpayer obtains the consent of the Commissioner.

(4) Such election shall apply with respect to all timber which the taxpayer has owned, or has had a contract right to cut, for a period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) prior to when such timber is cut for sale or for use in the taxpayer's trade or business, irrespective of whether such timber or contract right was acquired before or after the election. (For purposes of the preceding sentence, the rules with respect to the holding period of property contained in section 1223 shall be applicable.) However, timber which is not cut for sale or for use in the taxpayer's trade or business (for example, firewood cut for the taxpayer's own household consumption) shall not be considered to have been sold or exchanged upon the cutting thereof.

(b) *Who may make election.* (1) A taxpayer who has owned, or has held a contract right to cut, timber for a period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) prior to when the timber is cut may elect under section 631(a) to consider the cutting of such timber during such year for sale or for use in the taxpayer's trade or business as a sale or exchange of the timber so cut. In order to have a *contract right to cut timber* within the meaning of section 631(a) and this section, a taxpayer must have a right to sell the timber cut under the contract on his own account or to use such cut timber in his trade or business.

(2) For purposes of section 631(a) and this section, the term *timber* includes evergreen trees which are more than six years old at the time severed from their roots and are sold for ornamental purposes, such as Christmas decorations. Section 631(a) is not applicable to evergreen trees which are sold in a live state, whether or not for ornamental purposes. Tops and other parts of standing timber are not considered as evergreen trees within the meaning of section 631(a). The term *evergreen trees* is used in its commonly accepted sense and includes pine, spruce, fir, hemlock, cedar, and other coniferous trees.

(c) *Manner of making election.* The election under section 631(a) must be made by the taxpayer in his income tax return for the taxable year for which the election is applicable, and such election cannot be made in an amended return for such year. The election in the return shall take the form of a computation under the provisions of section 631(a) and section 1231.

(d) *Computation of gain or loss under the election.* (1) If the cutting of timber is considered as a sale or exchange pursuant to an election made under section 631(a), gain or loss shall be recognized to the taxpayer in an amount equal to the difference between the adjusted basis for depletion in the hands of the taxpayer of the timber which has been cut during the taxable year and the fair market value of such timber as of the first day of the taxable year in which such timber is cut. The adjusted basis for depletion of the cut timber shall be based upon the number of units of timber cut during the taxable year which are considered to be sold or exchanged and upon the depletion unit of the timber in the timber account or accounts pertaining to the timber cut, and shall be computed in the same manner as is provided in section 611 and the regulations thereunder with respect to the computation of the allowance for depletion.

(2) The fair market value of the timber as of the first day of the taxable year in which such timber is cut shall be determined, subject to approval or revision by the district director upon examination of the taxpayer's return, by the taxpayer in the light of the

most reliable and accurate information available with reference to the condition of the property as it existed at that date, regardless of all subsequent changes, such as changes in surrounding circumstances, methods of exploitation, degree of utilization, etc. The value sought will be the selling price, assuming a transfer between a willing seller and a willing buyer as of that particular day. Due consideration will be given to the factors and the principles involved in the determination of the fair market value of timber as described in the regulations under section 611.

(3) The fair market value as of the beginning of the taxable year of the standing timber cut during the year shall be considered to be the cost of such timber, in lieu of the actual cost or other basis of such timber, for all purposes for which such cost is a necessary factor. See paragraph (e) of this section.

(4) For any taxable year for which the cutting of timber is considered to be a sale or exchange of such timber under section 631(a), the timber so cut shall be considered as property used in the trade or business for the purposes of section 1231, along with other property of the taxpayer used in the trade or business as defined in section 1231(b), regardless of whether such timber is property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year or property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business. Whether the gain or loss considered to have resulted from the cutting of the timber will be considered to be gain or loss resulting from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) depends upon the application of section 1231 to the taxpayer for the taxable year. See section 1231 and the regulations thereunder.

(e) *Computation of subsequent gain or loss.* (1) In case the products of the timber are sold after cutting, either in the form of logs or lumber or in the form of manufactured products, the income from such actual sales shall be consid-

ered ordinary income. When the election under section 631(a) is in effect, the cost of standing timber cut during the taxable year is determined as if the taxpayer had purchased such timber on the first day of the taxable year. Thus, in determining the cost of the products so sold, the cost of the timber shall be the fair market value on the first day of the taxable year in which the standing timber was cut, in lieu of the actual cost or other basis of such timber.

(2) This is also the rule in case the products of the timber cut during one taxable year, with respect to which an election has been made under section 631(a), are sold during a subsequent taxable year, whether or not the election provided in section 631(a) is applicable with respect to such subsequent year. If the products of the timber cut during a taxable year with respect to which an election under section 631(a) was made were not sold during such year and are included in inventory at the close of such year, the fair market value as of the beginning of the year of the timber cut during the year shall be used in lieu of the actual cost of such timber in computing the closing inventory for such year and the opening inventory for the succeeding year. With respect to the costs applicable in the determination of the amount of such inventories, there shall be included the fair market value of the timber cut, the costs of cutting, logging, and all other expenses incident to the cost of converting the standing timber into the products in inventory. See section 471 and the regulations thereunder. The fact that the fair market value as of the first day of the taxable year in which the timber is cut is deemed to be the cost of such timber shall not preclude the taxpayer from computing its inventories upon the basis of cost or market, whichever is lower, if such is the method used by the taxpayer. Nor shall it preclude the taxpayer from computing its inventories under the last-in, first-out inventory method provided by section 472 if such section is applicable to, and has been elected by, the taxpayer.
