

and D each will report \$500 as dividend income, which does not affect their basis or S's AAA.

Example 7. Election to distribute earnings and profits first. (i) Corporation S has been a calendar year C corporation since 1975. For 1982, S elects for the first time to be taxed under subchapter S, and during 1982 has \$60 of earnings and profits. As of December 31, 1995, S has an AAA of \$10 and earnings and profits of \$160, consisting of \$100 of subchapter C earnings and profits and \$60 of subchapter S earnings and profits. For 1996, S has \$200 of taxable income and the AAA is increased to \$210 (before taking distributions into account). During 1996, S distributes \$240 to its shareholders. With its 1996 tax return, S properly elects under section 1368(e)(3) and § 1.1368-1(f)(2) to distribute its earnings and profits before its AAA.

(ii) Because S elected to distribute its earnings and profits before its AAA, the first \$100 of the distribution is characterized as a distribution from subchapter C earnings and profits; the next \$60 of the distribution is characterized as a distribution from subchapter S earnings and profits. Because \$160 of the distribution is from earnings and profits, the shareholders of S have a \$160 dividend. The remaining \$80 of the distribution is a distribution from S's AAA and is treated by the shareholders as a return of capital or gain from the sale or exchange of property, as appropriate, under § 1.1368-1(d)(1). S's AAA, as of December 31, 1996, equals \$130 (\$210-\$80).

Example 8. Distributions in excess of the AAA.

(i) On January 1, 1995, Corporation S has \$40 of earnings and profits and a balance in the AAA of \$100. S has two shareholders, E and F, each of whom own 50 shares of S's stock. For 1995, S has taxable income of \$50, which increases the AAA to \$150 as of December 31, 1995 (before taking into account distributions made during 1995). On February 1, 1995, S distributes \$60 to each shareholder. On September 1, 1995, S distributes \$30 to each shareholder. S does not make the election under section 1368(e)(3) and § 1.1368-1(f)(2) to distribute its earnings and profits before its AAA.

(ii) The sum of the distributions exceed S's AAA. Therefore, under § 1.1368-2(b), a portion of S's \$150 balance in the AAA as of December 31, 1995, is allocated to each of the February 1 and September 1 distributions based on the respective sizes of the distributions. Accordingly, S must allocate \$100 (\$150 (AAA) × (\$120 (February 1 distribution) / \$180 (the sum of the distributions))) of the AAA to the February 1 distribution, and \$50 (\$150 × (\$60 / \$180)) to the September 1 distribution. The portions of the distributions to which the AAA is allocated are treated by the shareholder as a return of capital or gain from the sale or exchange of property, as appropriate. The remainder of the two distribu-

tions is treated as a dividend to the extent that it does not exceed S's earnings and profits. E and F must each report \$10 of dividend income for the February 1 distribution. For the September 1 distribution, E and F must each report \$5 of dividend income.

Example 9. Ordinary and redemption distributions in the same taxable year. (i) On January 1, 1995, Corporation S, an S corporation, has \$20 of earnings and profits and a balance in the AAA of \$10. S has two shareholders, G and H, each of whom owns 50 shares of S's stock. For 1995, S has taxable income of \$16, which increases the AAA to \$26 as of December 31, 1995 (before taking into account distributions made during 1995). On February 1, 1995, S distributes \$10 to each shareholder. On December 31, 1995, S redeems for \$13 all of shareholder G's stock in a redemption that is treated as a sale or exchange under section 302(a).

(ii) The sum of the ordinary distributions does not exceed S's AAA. Therefore, S must reduce the \$26 balance in the AAA by \$20 for the February 1 ordinary distribution. The portions of the distribution by which the AAA is reduced are treated by the shareholders as a return of capital or gain from the sale or exchange of property. S must adjust the remaining AAA, \$6, in an amount equal to the ratable share of the remaining AAA attributable to the redeemed stock, or \$3 (50% × \$6).

(iii) S also must adjust the earnings and profits of \$20 in an amount equal to the ratable share of the earnings and profits attributable to the redeemed stock. Therefore, S adjusts the earnings and profits by \$10 (50% × \$20), the ratable share of the earnings and profits attributable to the redeemed stock.
