USAID Commodity Eligibility Listing
Preface

AID COMMODITY ELIGIBILITY LISTING

PREFACE

APPLICABILITY

The AID Commodity Eligibility Listing shows the general eligibility of commodities for AID financing. Implementing documents issued under individual AID assistance agreements may incorporate the entire Listing, or may designate only selected commodities or groups of commodities as being eligible. On occasion, a commodity not included in the Listing may be added, in accordance with the procedures set forth in Handbook 1, Supplement B, paragraph 4A1c, under a specific assistance agreement. Thus, to ascertain the eligibility of particular commodities under a specific assistance agreement, reference must be made to the implementing documents issued under that agreement.

Commodities in this Listing are classified by reporting numbers established in the Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. The Schedule B, as it is commonly known, is published by the U.S. Department of Commerce, Bureau of the Census, and may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. In the event of any discrepancy between a number or description in the AID Commodity Eligibility Listing and the Schedule B, as amended from time to time, it is the Schedule B, which prevails.

AID requires that each financing document submitted for review, payment or reimbursement in connection with commodity import programs include the applicable Schedule B number and commodity description. This enables AID to determine if the commodity covered by the document is eligible for AID financing under the particular assistance agreement.

GENERAL POLICIES ON COMMODITY ELIGIBILITY

AID's commodity eligibility policies are keyed to two basic objectives: (1) that the resources which AID provides in the form of commodities make a positive contribution to development; and (2) that AID programs are carried out in full accord with the Foreign Assistance Act, other pertinent laws, and relevant U.S. policies. To promote these objectives, commodities are not eligible for financing if they fall within any of the following categories.

1. Unsafe or ineffective products, such as certain pesticides, food products, or pharmaceuticals.
2. Luxury goods, such as recreational supplies and equipment, alcoholic beverages and equipment or products for their production or use, equipment or supplies for gambling facilities, jewelry, stamps, coins, furs and the more expensive textiles. AID may permit the financing of an item normally regarded as a luxury item which may be required to attain the objectives of a development activity or which is clearly justified by the intended end-use of the item.
3. Surplus or used items, unless inspected and approved in accordance with procedures approved by AID.
4. Items for military use.
5. Surveillance equipment of micro-miniature design for audio surveillance activities.

6. Weather modification equipment.
7. Commodities and equipment for the purpose of inducing abortions as a method of family planning.
8. Commodities for support of police or other law enforcement activities.
9. Waste and scrap products, since it is generally not possible to establish adequate information on such items necessary to perform a realistic price analysis.
10. Consumer goods and items for domestic or household use. The general preference is to finance raw materials, intermediate goods and capital goods used in the manufacture of these items, rather than funding the finished products. Examples of such finished goods are household furniture, cookware, footwear, clothing and processed foodstuffs.

ORGANIZATION AND USE OF THIS DOCUMENT

List of Commodity Groupings. The List of Commodity Groupings provides commodity descriptions by chapter number and the page numbers where particular items can be found within the Listing.

Part I, AID List of Eligible Commodities, is a list of commodities by Schedule B number. There are designations as to eligibility or ineligibility in each case, along with references to required special provisions or limitations on eligibility for certain items. In many instances, commodities with consecutive Schedule B numbers, which are subject to the same standards of eligibility, are combined into groups. For example, on the first page, all BOVINE ANIMALS are included under the Schedule B numbers 0102.10.0010 - 0102.90.0000. Also, it can be seen that there is a footnote in the SPECIAL PROVISIONS column that places an additional requirement on this grouping, which must be satisfied prior to financing.

Part II, Eligibility Criteria for Certain Commodities, provides information on additional requirements and considerations applicable to the eligibility of the following commodities: agricultural commodities, fertilizers, pesticides, pharmaceuticals, and rebuilt and reconditioned equipment, engines and parts or assemblies for engines and vehicles. The applicability of these criteria is designated in the item description or by footnotes in Part I.

Part III, Special Provisions, prescribes special requirements, certifications, and/or other documents in addition to those regularly required to be submitted to AID for obtaining payment or reimbursement for AID-financed commodities and commodity related services. When special provisions apply to a proposed transaction, the text of the special provision and any necessary instructions are included in relevant implementation documents and forms.

Waivers

Requests for waivers of any part of the Listing based upon eligibility constraints provided in Handbook 1, Supplement B, Procurement Policy, will be processed in accordance with the appropriate provision of Handbook 1B. Requests for waivers of other parts of the Listing should be forwarded to AID/W, Office of Procurement (OP/COMS), for processing.

Footnotes and Abbreviations

Use of Footnotes. When a footnote is shown adjacent to the commodity description in Part I, this means that, although the commodity is eligible for AID financing, there are noted additional requirements that must be met prior to financing.

N.E.S.O.I. This is an abbreviation for "not elsewhere specified or included." Commodities with this designation are assigned the applicable commodity number under the general heading only after it

has been determined that there is no other number elsewhere which the commodity will fit more specifically.

Industrial, Institutional or Educational Uses. Several footnotes in Part I limit the eligibility of items to industrial, institutional or educational uses. Such items are eligible if they are going to be used in factories, hospitals, clinics, schools, etc., or for similar purposes. The intent of the restriction is to make ineligible the purchase of these items for general resale in the host country or for household use.

8463.90 0040	OTHER MACHINE TOOLS FOR WORKING METAL, WITHOUT REMOVING MATERIAL, USED OR REBUILT		X
8463.90.0060 - 8463.90.0080	OTHER MACHINE TOOLS FOR WORKING METAL, WITHOUT REMOVING MATERIAL, NEW		X
8464.10.0040 - 8464.90.0080	MACHINE TOOLS FOR WORKING STONE,		

	CERAMICS, CONCRETE OR SIMILAR	
	MINERAL MATERIALS	X
8465.10.0020 - 8465.99.0050	MACHINE TOOLS FOR WORKING WOOD, CORK, BONE, HARD RUBBER, HARD PLASTER OR SIMILAR HARD MATERIALS	 X
8466.10.0010 - 8466.94.0000	PARTS AND ACCESSORIES SUITABLE FOR USE WITH THE MACHINES OF HEADINGS 8456 THRU 8465	 X
8467.11.1040 - 8467.99.0090	TOOLS FOR WORKING IN THE HAND, PNEUMATIC OR SELF-CONTAINED NONELECTRIC MOTOR, AND PARTS	 X
8468.10.0000 - 8468.90.5000	MACHINERY AND APPARATUS FOR SOLDERING, BRAZING OR WELDING	 X
8469.10.0000 - 8469.39.0000	TYPEWRITERS AND WORD PROCESSING MACHINES	X
8470.10.0000 - 8470.90.0090	CALCULATING MACHINES, ACCOUNTING MACHINES, CASH REGISTERS AND SIMILAR MACHINES INCORPORATING A CALCULATING DEVICE	 X
8471.10.0000 - 8471.99.9500	AUTOMATIC DATA PROCESSING MACHINES AND UNITS THEREOF	 1/
8472.10.0000 - 8472.90.9000	OTHER OFFICE MACHINES	X
8473.10.0010 - 8473.40.0000	PARTS AND ACCESSORIES FOR USE WITH MACHINES OF HEADINGS 8469 THRU 8472	 X
8474.10.0010 - 8474.90.0090	MACHINERY FOR SORTING, SCREENING, SEPARATING, WASHING, CRUSHING, ETC., EARTH, STONE, ORES OR OTHER MINERAL SUBSTANCES, AND PARTS	 X
8475.10.0000 - 8475.90.9000	MACHINES FOR ASSEMBLING ELECTRIC OR ELECTRONIC LAMPS, TUBES AND BULBS	 X
8476.11.0000 - 8476.90.0000	AUTOMATIC GOODS-VENDING MACHINES AND PARTS	 X
8477.10.3000 - 8477.90.0090	MACHINERY FOR WORKING RUBBER OR PLASTICS OR MANUFACTURING PRODUCTS FROM THESE MATERIALS, AND PARTS	 X
8478.10.0010 - 8478.90.0000	MACHINERY FOR PREPARING OR MAKING UP TOBACCO, AND PARTS THEREOF	 X
8479.10.0040 - 8479.90.8080	MACHINES AND MECHANICAL APPLIANCES HAVING INDIVIDUAL FUNCTIONS, N.E.S.O.I., AND PARTS THEREOF	 2/

1/ IF THE LIFE-CYCLE COSTS (ALL ESTIMATED COSTS ASSOCIATED WITH THE PROCUREMENT, INCLUDING HARDWARE, INSTALLATION, SOFTWARE DEVELOPMENT, AND EQUIPMENT MAINTENANCE AND TRAINING OVER A FIVE-YEAR PERIOD) WILL EXCEED US \$100,000, APPROVAL BY AID/WASHINGTON (OFFICE OF INFORMATION RESOURCES MANAGEMENT AND OFFICE OF PROCUREMENT) IS REQUIRED. THIS REQUIREMENT DOES NOT APPLY TO PRIVATE SECTOR CIP IMPORTERS.
 2/ ELIGIBILITY IS LIMITED TO INDUSTRIAL, INSTITUTIONAL EDUCATIONAL USES.

USAID Commodity Eligibility Listing
Part II: Eligibility Criteria for Certain Commodities
II.A: Agricultural Commodities Subject to AID/W Prior Approval

II.A: Agricultural Commodities Subject to AID/W Prior Approval

1. All proposed AID-financed procurements of certain agricultural commodities must be referred to AID/W (MS/OP/COMS) for prior approval. This policy stems from questions relating to supply, availability under the P.L. 480 programs, and suitability for AID financing.

2. AID/Washington will consider cooperating country requests for such commodities during the negotiation stage of the AID loan or grant or at any time thereafter. AID/W's review of the request will include an examination of the following conditions: (a) the eligibility and availability of the commodity under an existing P.L. 480 financing agreement with the cooperating country, (P.L. 480 financing, if available, will be the preferred means of supply, except that AID will consider making additional quantities of the commodity available when the P.L. 480 amount is deemed inadequate and there are no other reasons for excluding the commodity from the AID loan or grant); (b) the projected near term (6-month) and long term (12-month) United States availability and price range of the commodity; and (c) the availability of other donor financing and the projected export availability of the commodity from such source.

3. Authorization for AID financing may cover an agreed quantity of the commodity during a specific time frame, case-by-case approvals of individual transactions, or, in the absence of any supply constraints, general eligibility for the validity period of the particular AID loan or grant.

4. Individual agricultural commodities are subject to Special Provisions as specified in Part I of this Listing.

5. The following is a list of those agricultural commodities which are subject to AID/W prior approval:
 - 0404.10.2000 - 0404.90.0000 WHEY, FLUID AND DRY
 - 0713.10.4020 - 0713.10.4080 PEAS

USAID Commodity Eligibility Listing
 Part II: Eligibility Criteria for Certain Commodities
 II.B: Fertilizer

II.B: Fertilizer

1. General

- a. AID financing for fertilizers normally is limited to products of U.S. source (000). From time to time, lack of access to requirements for specific products and/or other exigencies may necessitate off-shore procurement of limited quantities. For each purchase from a non-U.S. source, prior approval of the specific product, quantity, and source is required from AID/W - MS/OP.
- b. AID finances only those fertilizers which conform to product and bagging specifications approved by AID.
- c. Fertilizers conforming to the product specifications listed in Part II.B.4, herein, and with bagging specifications (Part II.B.5) are considered eligible. All fertilizers are subject to Special Provision 42.
- d. Requests for fertilizers not covered by the specifications herein may be submitted through the U.S. AID Mission for review and possible approval by AID/W - MS/OP. All such requests must contain details covering the proposed product and/or bagging specifications and should justify the need for such material.
- e. All invitations for bids covering fertilizers must be approved by AID/W - MS/OP before official publication and/or release to the business community.

2. Evaluation

a. Single-Nutrient Fertilizers

Fertilizers will be evaluated on the basis of the minimum guaranteed analysis in increments of one unit of Plant Nutrient (PN); e.g., triple superphosphate ranging from 46.0% to and including 46.99% P205 will be evaluated as 46%.

b. Multinutrient Fertilizers

Fertilizers must be guaranteed and will be evaluated only on the basis of the analysis requested in the tender; e.g., 18-46-0 will be evaluated as 18% nitrogen and 46% P205 or a total of 64 units of Plant Nutrient.

3. Discounts

a. Rates of Discount

When a shipment fails to meet the grade of Plant Nutrient as guaranteed, the following discount schedule will apply:

Deviation from Guaranteed Analysis	Adjustment Factor
(1) When the deficiency of any nutrient guaranteed is not more than 0.5 units.	0
(2) When the deficiency of any nutrient guaranteed is more than 0.50 but less than 1.0 units.	2
(3) When the deficiency of any nutrient guaranteed is more than 1.0 units.	3

The above discounts will apply to each nutrient guaranteed. No allowance will be made for excess over guarantee of one nutrient to balance deficiency of another nutrient. Plant Nutrient value will be calculated on the basis of the contract price per ton of material.

b. Example of Computation

(1) Analysis of triple superphosphate guaranteed by the bidder is 46% on a lot of 1,000 tons priced at \$175 per ton. Upon testing, the Plant Nutrient content was found to be 45.2% viz., deficiency was $46.0 - 45.2 = 0.8$ of a unit. Price adjustment (discount) is computed as follows: 0.8 (unit deficiency) times 2 (adjustment factor) times \$3.80 (Plant Nutrient value equals \$175 divided by 46), times 1,000, (number of tons) equals \$6,080 (discount). NOTE: "Price" for calculating discount is unit landed cost at foreign destination.

(2) Analysis of 16-16-8 granular mixed fertilizer guaranteed by the bidder are 16% N, 16% P205, and 8% K20 on lot of 5,000 tons priced at \$160. Upon testing, the Plant Nutrients were found to be 15.3% N, 16.1% P205, and 8.8% K20, viz., deficiency was $16.0 - 15.3$ equals 0.7 of a unit of N. Although both P205 and K20 exceeded guarantee, no allowance is made for these excesses to balance the deficiency in N. Price adjustment (discount) is computed as follows: 0.7 (unit deficiency) times 2 (adjustment factor) times \$4 (Plant Nutrient value equals \$160 divided by 40), times 5,000 (number of

tons) equals \$28,000. NOTE: "Price" for calculating discount is unit landed cost at foreign destination.

c. Discount for Exceeding Chlorine Tolerance in Potassium Sulfate

Chlorine tolerance of 0.5% above specifications will be permitted without penalty. For every 0.5% in excess of this tolerance, a discount of 5% of the computed contract cost will be charged.

d. Nonnutrient Deficiencies

If, after inspection, the fertilizer is determined by the Purchaser at the port of loading to be so deficient as to be unacceptable, the Purchaser may decline to accept the commodity and exercise appropriate legal remedies. If, however, in spite of deficiencies the Purchaser determines to accept the commodity, the Purchaser shall be entitled, in any event, to a reasonable adjustment in the contract price.

5. AID-Approved Bagging Specifications - Fertilizers

a. Outer Bags

(1) Polypropylene Bags

(a) Capacity

50-kg net or 100-lb net

(b) Fabric

Bags shall be made of 100% ultraviolet-stabilized polypropylene resin with a weight of not less than 2.6 oz. per square yard and possess the properties described following test methods. The color shall be light tan or beige. A colored identification marker (yarn) shall be inserted in the weave by the fabric manufacturer. The identification marker is to be reported to AID.

The fabric forming the top or bottom of the furnished bags shall be a tucked selvedge or a natural selvedge containing not less than the number of ends prevalent in the body of the fabric. Alternatively, the selvedge may be heat cut and formed a minimum of 1-inch wide with a minimum of 20 warp threads per inch.

The fabric must be woven to a construction tight enough to prevent excessive product sifting in the event bag liner failure occurs. The bottom seam is to be flat sewn in accordance with Federal Standard 751a, SSa-1, regardless of heat cut or tucked selvedge fabric. The side seam "Export Type" shall be in accordance with Federal Standard 751a, SSd-1. Bags shall be turned so seams are inside. The sewing thread shall be U.V. stabilized, polypropylene nominal 1000 denier with test strength of 5 grams/denier. There is no thread color requirement.

(c) Test Methods

Ultraviolet stability test: Material and thread must have not less than 70% strength retention after 200 hours exposure in weatherometer. The U.V. testing weatherometer exposure method is 5804 Federal Standard 191.

Tensile Strength: Strength warp and fill, each 105 lbs. average. (10 samples shall be tested in each direction) with no single test below 90 lbs.) ASTM Method D-1682 (Grab Method)

Permeability: Air permeability of the fabric in an unstressed state should not exceed 100 cubic feet per minute per square foot. ASTM Method D737-75.

(2) Jute Bags

(a) Capacity

50-kg net or 100 lb. net

(b) Fabric

New fabric shall weight 9 ounces per square yard (305 grams per square meter) 11 porter into 12 shot Hessian, or heavier.

b. Liner (Inner Bag)

Inner loose tubular liner shall be of 4 ml polyethylene film. The liner shall be heat-sealed at the bottom. The film shall be of low slip plastic.

Test Methods

(1) Thickness--ASTM, D374. 4-ml polyethylene film

(2) Impact resistance--ASTM, D1709. An impact failure weight of 165 g.

(3) Kinetic coefficient of friction--ASTM, B1894 (kinetic coefficient of friction 0.8 m/s maximum.)

c. Methods of Closure

(1) Outer Bag

Top seam stitching shall be a minimum of one inch from the selvage. The sewing thread shall be 200 hours U.V. stabilized, polypropylene nominal 1000 denier with test strength of 5 grams per denier. There is no thread color requirement. The outer bag shall be sewn above--not to the liner.

(2) Liner

The polyethylene liner shall be closed at the top by one of the following methods after exhausting the excess air:

(a) Heat sealing

(b) Mechanically applied acid resistant clip of 0.150 inch minimum diameter (9 gauge) completely circling the polyethylene liner to hermetically seal it.

(c) Mechanically applied bag tie 4-1/2 inches long, plastic-covered wire with a 3/8 inch inside loop on each end. The wire shall be a minimum of 17 gauge before being covered with plastic to a minimum of 16 gauge.

(d) For valve type bag, see alternative below.

d. Valve Type Bags as an Alternative-Bag Construction

Bags submitted under this performance specification shall perform as well as those made under existing specifications (paragraph V.A. - V.C. herein) with respect to closures, retention of printed information and resistance to snags, tears, and water vapor transmission.

(1) Capacity

50-kg net or 100-lb net

(2) Outer Bags

Bags must be manufactured from polypropylene or jute fabric meeting specifications stated in paragraph V.A. herein, except in valve bag, top and bottom will be folded seam double selvedge per Federal Specifications S/S-N-1. The side will be folded seam double, raw per Federal Specifications S/S-N-1.

(3) Liner (Inner Bag)

Liners must be manufactured from polyethylene film meeting specifications stated in paragraph V.B. herein, except film is strip laminated to fabric and is folded over top, bottom, and edge with fabric.

(4) Impact Resistance

All bags, including inserted film liners, shall be capable of withstanding the following performance test for impact resistance:

(a) Ten filled and sealed bags containing the product to be shipped or an equivalent in specific gravity and general physical characteristics must each survive a single drop on the butt or bottom, on a shock machine that produces for each test a velocity change of 195 inches per second using a shock duration of .002 seconds without loss of product. Ten (10) bags constitute a test lot and all ten (10) bags must meet the minimum impact specified without a single failure.

(b) Test shall be conducted under standard temperature (73.4 degrees F plus or minus 1.8 degrees F) and relative humidity (50% plus or minus 2%) conditions.

(c) Filled bags must be placed in the conditioned atmosphere for sufficient time before the tests are conducted for the bags to come to equilibrium.

(5) Sifting

Valve bags including inserted film liners shall be capable of withstanding the following test for sifting. Testing of filled and sealed bags is to be performed on a variable frequency vibration table (1g input) from 2.5 to 30 hz and sifting observed at the frequency (ies) where the most violent bouncing occurs. Loss of product from the valve bags, due to sifting, shall be no greater than 0.5% of net weight filled.

(6) Independent laboratories known to be capable of conducting

the above impact resistance and sifting tests are:

(7) Valve type bags are not acceptable for ammonium nitrate or urea.

e. Tubular Woven Style Bags as an Alternative Bag Construction

Bags supplied under this specification shall perform as well as those made under existing specifications (Paragraph V. A. - V. D. herein) with respect to closures, retention of printed information and resistance to snags, tears, and water vapor transmission. Bag construction is to be tubular woven style with an unreinforced heat cut top and bottom to prevent raveling. The bottom seam is to be of single turnover construction in accordance with Federal Standard 751a SSN-1. All of the other bag provisions contained herein, except those pertaining to bag construction, shall apply to the tubular-style bag.

6. Inspection and Sampling

a. Responsibility

(1) A "Certificate of Inspection and Approval" must be issued for each shipping lot by an independent inspection firm acceptable to AID, unless independent inspection is waived by the purchaser with AID's prior approval. In the event Purchaser elects not to inspect the fertilizer, as this determination required AID/W approval, they shall provide to Supplier written waiver of its right to such inspection, duly executed by Purchaser or its agent. Said waiver shall be delivered to Supplier prior to sailing date of the shipment concerned.

(2) The inspections shall be performed and reported in

accordance with the instructions in the following sections VI.B, C, and D.

(3) Independent inspections shall not be performed if the supplier's test shows that the contracted commodity specifications were not met in full.

(4) The supplier shall arrange and grant the independent inspection firm any and all reasonable access to the commodity for the purpose of conducting all inspections and tests. The supplier shall notify the inspection firm by telephone, and confirm by telegram, or letter, at least ten days before commencement of bagging, that the fertilizer is ready for inspection. If the supplier has not met the contracted commodity specifications, the inspection firm shall not issue any certificate, and shall notify the purchaser, the supplier, and AID, Washington, at once.

b. Instructions--Inspection

The inspection firm shall:

(1) Verify that the vessel holds are clean, dry, and ready to receive the cargo.

(2) Verify that the specified weight of cargo is loaded aboard the ocean vessel.

(3) Verify that loading is ceased during inclement weather or for any other reasons which may damage the cargo, and that stowage will not damage the cargo, or result in discharging difficulties.

(Should the conditions of items 1, 2, or 3 not be met, the inspector will notify immediately the purchaser, supplier, the ship's captain and AID/SER/OP/COMS.)

(4) Examine bags and report, if true, that the bags appear to meet specifications upon visual inspection. In addition, they shall verify that the export shipping marks are in accordance with the terms of the contract.

(5) Sample, prepare, distribute, and furnish analyses of samples as prescribed in Sections IV. and VI. C. Make the weight determination prescribed in Section VI. E.

(6) Furnish documentations and notifications of inspections as prescribed in Section VI. D., this document.

(7) If inspection and/or analysis reveal any deviation between the actual commodity or commodities and the specifications as stated in the IFB, the inspection firm must notify the Purchaser, Supplier, and AID/SER/OP/COMS of such discrepancies immediately.

c. Instruction--Collection, Preparation and Distribution of Official Samples

(1) The official samples shall be taken at the last point where the material is handled prior to ship loading. The inspection firm is required to draw the official samples itself, and arrange laboratory analysis

of same in accordance with procedures specified herein. Bagged material shall be sampled periodically at the time of bagging before the bag is closed whenever possible. Bulk material shall be sampled progressively during the entire time of loading onto the vessel.

(2) The inspector shall be responsible for making arrangements with the bagging firms to follow the sampling procedures as indicated below.

(3) The official samples obtained by the following procedures may be used in the event of a dispute regarding quality of commodity.

(4) Sampling

(a) Bagged Fertilizer

Sampling shall be done at unannounced times, but at intervals not exceeding eight hours bagging time.

Closed bags--Material shall be sampled as specified by TFI Method I.C.1. and the number of bags to be sampled is specified in the Sampling Schedule 3. The puncture bags should be neatly patched with printed labels, pressure sensitive tags, or special patching material.

Open Bags--Material shall be sampled by taking cup samples from the bags before they are closed. the samples shall be taken during random visits to the bagging operation to insure representation of the entire lot. The number of bags to be sampled is specified in the following Sampling Schedule 3.

(b) Bulk Fertilizer

When available at the loading port, the automatic sampling system for fertilizer materials shall be used. Otherwise, if possible, bulk materials shall be sampled from a transfer belt in accordance with TFI Method I.C.2., procedure 1.a. Where stream-cutting is not possible, sampling shall be done at equally spaced intervals from random points on the belt immediately following and as close to a belt discharge as safety will permit, all increments being of approximately equal size. The number of increments to be taken is specified in the following Sample Schedule.

(c) Sample Schedule

Where stream-sampling is not feasible as a means of obtaining official fertilizer samples, the following guide for sampling bagged or bulk materials shall be followed:

Tons	Consignment	
	Thousands of bags	No. of bags to be sampled or increments to be taken
Under 500	Under 10	60
501-1000	10 - 20	80
1001-5000	21 - 100	100

(5) Sample Preparation

Consolidations of increment samples into the gross sample and sample reduction by riffing shall be by the official inspector in accordance with TFI Method I.C.3. Procedure A. All samples must be kept in covered moisture-proof containers except when be added to the containers or being reduced. Final preparation of sample for chemical analysis shall be according to TFI Method I.C.3. procedure B.

(6) Distribution of Official Sample

The official consolidated sample shall be divided into four equal parts, prior to grinding, by means of riffing using the procedure specified in Sample Preparation. One of the four parts shall be analyzed by the official inspector either in his own laboratory or another laboratory acceptable to the Buyer and AID. Another part is made available to the seller upon request, and the remaining two such parts shall be retained by the official inspector for minimum period of twelve months for possible use by a third referee chemist in the event of a dispute, or for reserve purposes. (In the case of an off-shore supplier, one of the two reserve portions shall be returned to an accepted U.S. laboratory for verification of analytical results.) Regarding commodity shipped from non-U.S. sources, if no independent laboratory acceptable to AID is available locally, the inspection firm must air mail its consolidated, official sample(s) to an alternative laboratory acceptable to AID. NOTE: Analyses performed in the Manufacturer's laboratory under the inspection firm's supervision are an unacceptable substitute for the inspection firm's own sampling and chemical analyses.

(7) Collection of Bag Samples

The inspector shall obtain at least four of the outer bags and of the liners being used and retain such bags for twelve months.

d. Manuals

Each product specification includes, under the heading "Analytical Methods for Quality Control," precise analytical methods for checking compliance with AID Specifications. Unless otherwise indicated, the numerical citations shown for chemical requirements refer to analytical methods in the 13th Edition (1980) of the Association of Official Analytical Chemists (AOAC) manual, Official Methods of Analysis. Citations for physical requirements refer to the 4th Edition (1982) of The Fertilizer Institute (TFI) manual, Fertilizer Sampling and Analytical Methods. Both manuals are well known to persons in the United States and abroad who work with agricultural chemicals. The AOAC manual may be obtained from the Association of Official Analytical Chemists, 1111 North 19th Street, Arlington, Virginia 22209. The TFI manual may be obtained from The Fertilizer Institute, 1015 18th Street, Northwest, Washington, D.C. 20036.

e. Weight Determination

(1) The independent inspection firm shall attest, on or prior to the date of the Bill of Lading, as to the weights of the commodity or commodities described in the invoice.

(2) On bulk fertilizer the inspector is responsible for checking scales for calibration and weight verification. If scales are not available, weight should be verified from actual tare weights of hopper cars. If loading

is directly from barges, or from stockpile, weights should be established by means of light and heavy draft survey of vessel.

(3) On bagged fertilizer the inspector shall check the bagging scales and tare weights at intervals not to exceed 16 bagging hours. Inspector shall also spot check bagged material already stockpiled in the warehouse at intervals not to exceed 8 bagging hours. For purposes of check-weighing, an accurate platform scale adjacent to the bagging line should be maintained, kept clean and in balance. The inspector shall see that scales are checked at intervals during bagging and shall reweight bags periodically during the operation, keeping a record of these weight checks.

f. Instructions--Documentation

(1) Within ten days of final sampling and completing the weight verification, and concluding that the identified shipping lot has met all of the commodity requirements, the inspection firm shall issue its "Certificate of Inspection and Approval" to the Purchaser, Seller, AID, and others that may be designated. The certificate issued in the name of the purchaser must be transmitted immediately to the supplier.

The following is a suggested format for the "Certificate of Inspection and Approval."

Certificate of Inspection and Approval

Purchaser - B/L No. -
Supplier - AID No. -
Commodity Name/Grade - -
Metric Tons - Laboratory Report -
Ocean Carrier - Certificate of Weight Verification -

The "Certificate of Inspection and Approval" shall comprise of a narrative describing the inspection events in sequence. Where laboratory analyses are included in the commodity specifications, the inspection certificate must include actual laboratory results for each required test. If the commodity or commodities meet the specifications without exception, the inspector shall conclude his report stating, if true:

"We attach our 'Laboratory Report, and Certificate of Weight Verification,' each containing an attestation confirming the supplier's conformance to the contracted commodity specifications. On the basis of inspections and tests we conducted in accordance with our contract and the aforesaid attestations, we certify and confirm that the subject shipping lot meets all of the commodity, bagging, marking, and weight requirements stipulated in the contracted commodity specifications."

(2) The "Laboratory Report" so labeled shall:

(a) Identify the supplier's contract with the purchaser.

(b) Identify the shipping lot tested and analyzed.

(c) State the contracted commodity specifications, and the laboratory's corresponding analysis of the fertilizer, and shall if true,

(d) Attest that through use of the testing procedures stipulated in the Section above, and other means available to it, the fertilizer met the stated commodity specifications.

The "Laboratory Report" shall be issued in the name of the purchaser and be dated and signed by an executive authorized to bind the laboratory and/or the inspection firm.

(3) The "Certificate of Weight Verification," so labeled, shall be issued by the inspection firm under its letterhead, and be dated and signed by an executive authorized to bind the firm. The certificate shall state in so many words the date the data were taken and the number and weight of unbroken bags duly filled with fertilizer delivered to the ocean carrier, or, in the case of bulk goods, contain an attestation from the weightmaster at the port as to the weight loaded aboard ship.

(4) The "Certificate of Inspection and Approval" shall be typewritten under the letterhead of the U.S. inspection firm, and shall be dated and signed by an officer authorized to bind the firm. The certificate shall contain no exculpatory provisions exempting the inspection firm from the performance of its contracted obligations. Provision of inspection services by an independent inspection firm shall not relieve the supplier from his responsibility to assure that he has inspected and tested the shipping lot before calling for inspection, nor from his responsibility to assure that each lot has met the specifications of the commodity contract.

7. Inspection Clauses for Procurement Documents

a. When inspection is arranged by the Supplier:

(1) Fertilizer inspection and weight determination will be performed by an independent inspection firm for the account of the supplier in accordance with specifications set forth herein.

(2) The cost of inspection and certification of weight must be included in the offered price.

(3) Certificate of Inspection and Approval issued by any of the independent inspection firms listed in the IFB will be accepted. Bids must include the name of the inspection firm chosen, and the name of the laboratory to be used if other than its own.

(4) Suppliers wishing to use inspection firms other than those shown herein must receive prior approval from AID, SER/OP/COMS, in Washington, D.C. before the use of another firm.

b. When inspection is arranged by the Purchaser:

(1) The cost of inspection and certification of weight is for the account of the Purchaser and is not to be included in the offered price.

(2) Purchaser at its sole cost and expense shall have the right to inspect the fertilizer at all reasonable times prior to shipment thereof. Supplier agrees to grant Purchaser's Agents and representatives any and all reasonable access for the purpose of inspection at Supplier's plant, and at Supplier's subcontractor's plant, if any. Purchaser will provide the Supplier with the name and address of the firm which will perform the inspection services on Purchaser's behalf.

(3) Certificate of Inspection and Approval will be issued by one of the independent inspection firms listed in the IFB, or other firm having prior approval of AID.

(4) Inspection will be performed by the independent inspection firm in accordance with the specifications set forth herein.

USAID Commodity Eligibility Listing
Part II: Eligibility Criteria for Certain Commodities
II.C: Pesticides

II.C: Pesticides

1. Pesticides, as used herein, mean substances or mixtures of substances:

a. intended for preventing, destroying, repelling, or mitigating any unwanted insects, rodents, nematodes, fungi, weeds, and other forms of plant or animal life or viruses, bacteria, or other micro-organisms (except viruses, bacteria, or other micro-organisms on or living in man or other living animals), or:

b. intended for use as a plant regulator, defoliant, or desiccant.

2. AID's financing of pesticides must conform to the provisions of AID Regulation 16 (22 CFR Part 216), as revised effective October 23, 1980, and to the May 1978 Policy Statement on Pest Management distributed throughout AID/W and to Missions as an attachment to AIDTO Circular A-294 on July 22, 1978. Revised Regulation 16 is in Appendix 4B, Handbook 3, Project Assistance. The Policy Guidelines of the Policy Statement pronounce that it is AID policy:

a. To establish whenever possible, programs aimed at assisting developing countries in designing a operating economically and environmentally sound integrated pest management systems and procedures in which pesticides will be used only when necessary.

b. To help develop infrastructures of developing countries for pest and pesticides management.

c. To exert a greater degree of international leadership by communicating U.S. policies and experience on pest control and pesticide problems to other nations and international organizations.

d. To discourage requests for pesticides unless they are to be used in economically and environmentally sound integrated pest management systems.

e. To promote the use of available supplementary methods of vector control as well as development of new and improved supplementary or alternative methods which do not depend on the use of persistent pesticides, including such methods as source reduction, water management, larviciding, and biological control.

3. AID may fund pesticides on a project-by-project basis for public health and food production and preservation programs. However, AID first subjects proposed pesticide procurement and usage to specific environmental evaluation, making a risk/benefit analysis, before approving pesticide financing from AID funds. The scope and depth of this evaluation, as prescribed by AID Regulation 16 (22 CFR Part 216), is determined by the pesticide's current registration status in the United States.

4. The originators of an AID project which proposes to use pesticides must comply with the procedures of Section 216.3 of AID Regulation 16. These provide that pesticide activities will be subjected to environmental evaluation as part of the project assessment process. These procedures include the preparation of a separate section in the initial Environmental Examination for the project for the propose of evaluating the economic, social and environmental risks and benefits of the planned pesticide use to determine whether the use may result in significant environmental impact. In certain cases, a more extensive Environmental Assessment or Environmental Impact Statement may also be required. Normally, the Initial Environment Examination will be prepared with the Project Identification Document (PID) or the Program Assistance Initial Proposal (PAIP). When this is not feasible, the PID or PAIP must include an adequate statement as to why the pesticide requirements cannot be included in the PID or PAIP. AID's final decision as to providing funding for the project normally will be deferred until the pesticide requirements are established, and considered and approved as provided in Regulation 16. When identification of the pesticide required does not occur until after the Project Paper approval, the procurement of the pesticides is not authorized until approved, in writing, by the AID official who approved the Project Paper.

5. Under emergency conditions an exception is provided by Section 216.3(b)(2) of Regulation 16 of the otherwise proscribed means of proposing, evaluating, and approving pesticide procurement and use for projects. Either a Mission Director or the Chief of a Regional Economic Development Support Office may make a preliminary determination that such an emergency exists. This must be in writing and must include that:

- a. A pest outbreak has occurred or is imminent; and
- b. Significant health problems (either human or animal) or significant economic problems will occur without the prompt use of the proposed pesticide; and
- c. Insufficient time is available before the pesticide must be used to evaluate the proposed use in accordance with the provisions of Regulation 16.

6. Such preliminary determinations as to an emergency must be forwarded to AID/W and a final determination made in writing by the AID Administrator before the procurement of pesticide is authorized.

7. A further exception is made by Section 216.3(b)(2) of Regulation 16 for projects where AID is a minor donor to a multidonor project when (a) AID's total contribution is both less than \$1,000,000 and less than 25% of the estimated project cost or (b) AID's total contribution is more than \$1,000,000 but less than 25% of the estimated project cost and the environmental procedures of the donor in control of the planning or design of the project are followed, but only if the AID Environmental Coordinator determines that procedures are adequate. This exception only applies if AID does not control the planning or design of the multidonor project under the terms of the agreement governing AID's contribution to the project.

8. AID does not normally fund pesticides under nonproject assistance programs. When a Mission Director, the Chief of a Regional Economic Development Support Office, or the Assistant Administrator of a Geographic Bureau considers that pesticides must be funded under a nonproject assistance program, he/she must propose that the Administrator make a determination in writing to that effect, under the provisions of Section 2.6.3(b)(3) of Regulation 16. The proposal must substantiate that either:

a. Emergency conditions, as categorized in paragraph 5 of this Part II.C, exist; or

b. Compelling circumstances exist such that failure to provide the proposed assistance would seriously impede the attainment of U.S. foreign policy objectives or the objectives of the foreign assistance program. The term compelling circumstances is intended to imply only those most serious situations in which no other way exists to provide the pesticide except through the nonproject assistance program. The decision as to whether such circumstances exist will be based, to the extent practicable, upon a consideration of the factors set forth in Section 216.3(b)(1)(i) of Regulation 16 and the history of efficacy and safety governing the past use of pesticides in the recipient country.

9. Pesticides approved for AID financing must conform to AID's standards as to product and packing specifications. These are maintained or, when necessary, developed by SER/OP/COMS and are available to planners, procurement officials, and suppliers on request.

10. The foregoing restrictions do not apply to assistance provided by AID for controlled experimentation of limited scope and not involving application for crop production purposes. See Section 216.3(b)(2)(iii) of Regulation 16. Initiators of pesticide requirements for such purposes should consult the AID Environmental Coordinator.

USAID Commodity Eligibility Listing
Part II: Eligibility Criteria for Certain Commodities
II.D: Pharmaceuticals

II.D: Pharmaceuticals

1. General (Applicable to Project and Nonproject Assistance)

a. There are no statutory restrictions relating to the procurement of

pharmaceuticals other than the Section 606(c) of the FAA which prohibits procurement outside the United States of those pharmaceuticals which infringe on U.S. patents. Given their importance to human life and health, however, AID gives especially careful consideration to pharmaceutical procurement requests and particularly to those under this nonproject assistance programs intended for general market use.

b. Measures are taken to assure that only safe and efficacious pharmaceuticals are procured, that they are manufactured in accordance with accepted quality standards, that prices paid for them are appropriate, and that in all respects, AID's financing of pharmaceutical procurements is carried out in a manner sensitive to the special public and Congressional interest in this important commodity.

c. Pharmaceuticals have an important place in AID health projects. Moreover, given the dependence of many developing countries on external sources to meet their need for sophisticated pharmaceuticals and given the large share of the United States in their manufacture, they are a commodity appropriate for inclusion in AID nonproject assistance programs.

d. AID coordinates its eligibility standards for pharmaceuticals, drug substances/projects, and biologics with The U.S. Food and Drug Administration's regulations governing United States interstate shipments of the items. In keeping with this, information made available by FDA on the safety and efficacy of finished dosage form pharmaceuticals will be supplied to USAID Missions when requested. Such information is used in assisting recipient governments in selecting those pharmaceutical products best suited to their needs.

e. The eligibility of U.S.-sourced pharmaceutical products is determined on the basis of their being in compliance with all United States laws and regulations. The eligibility of non-U.S.-sourced pharmaceuticals will be made on a case-by-case basis.

f. As a general rule, the source of AID-financed pharmaceuticals is limited to the United States, and the standard AID 50% componentry rule is applicable.

2. Project Assistance

All pharmaceuticals to be procured must be generically described. Pharmaceuticals for projects may be in finished dosage or bulk form. When pharmaceuticals are to be procured for a project the following rules apply:

a. To the extent possible, all proposed procurement should be identified and set forth in the Project Paper and have AID/W approval. If that is not possible, the proposed procurement should be submitted separately later for AID/W approval;

b. All pharmaceuticals should comply with U.S. Food and Drug Administration (or other controlling U.S. authority) regulations governing United States interstate shipment of pharmaceuticals. Non-U.S. products which do not meet this test may be financed under special circumstances.

3. Nonproject Assistance

a. All pharmaceuticals to be procured must be generically described.
b. Pharmaceuticals procured as nonproject assistance are expected to be in bulk form, when it is practicable, in order to minimize problems of overpricing and product identification. Finished dosage form, however, is not precluded if there is a special reason calling for it.

c. All pharmaceuticals must comply with the U.S. Food and Drug Administration (or other controlling U.S. authority) regulations governing United States interstate shipment of pharmaceuticals.

d. All procurements require prior approval by AID/W;

e. In addition to the applicable price rules in Subpart G of AID Regulation 1, AID will apply the following criteria in determining whether, under regulatory and statutory standards, a bulk pharmaceutical product described on the Application for Approval of Commodity Eligibility (Form AID-11) is "eligible and suitable:"

(1) AID will not finance from an authorized source country a bulk pharmaceutical product at an FAS price which exceeds by more than 10 percent the FAS price at which the product, by whatever description, is generally available from any other free world country. With respect to a product patented in United States, AID will compare FAS prices between the U.S. product and the identical product available in any free world country, provided such non-U.S. price was established by the patent holder or his/her licensee.

(2) AID will not finance from an authorized source country a bulk pharmaceutical product at an FAS price which exceeds the lowest FAS price at which the same product, by whatever description, is available from the same source country.

(3) AID will not finance from an authorized source country a bulk pharmaceutical product at a price which exceeds the price at which another lower-priced product can be obtained from any free world source, if there is evidence that the lower-priced product, although of different generic description, is, for the purpose intended, pharmacologically a substantial equivalent to the higher priced product for which AID approval is solicited. Items which AID has determined to be subject to this rule will be indicated in the implementing document issued by AID which authorizes the use of AID funds for the procurement of pharmaceutical products.

(4) AID will not finance a bulk pharmaceutical product at a price which exceeds the lowest price charged by the supplier in any export sale of the item to any country, whether or not such sale has taken place under AID financing. A supplier under this rule may exclude in his calculation of his lowest price, the lowest priced 5 percent of his sales volume within the most nearly relevant sales period. The "lowest price" shall take into account all sales by the supplier of the product in export, without regard to any trademark or other differentiation between items which are pharmacologically identical. AID will not apply this special rule (d) in determining whether a product is "eligible and suitable" for AID financing if (i) there is no U.S. patent covering the product and (ii) the proposed sale is to a buyer who is not affiliated with the seller.

While these price rules are not specifically applicable to finished dosage

products, AID may review the "eligibility and suitability" of such products under the same or comparable criteria.

With respect to any bulk pharmaceutical product for which AID does grant commodity approval under the foregoing special rules, a supplier shall continue to execute AID form 282 which binds the supplier to the price tests set forth in Subpart G of AID Regulation 1. Upon post audit, a supplier of any bulk pharmaceutical product shall be held to the price tests set forth in that subpart of the regulation.

AID will endeavor to provide a supplier, upon request, preliminary advice as to whether the price, at which the supplier proposes to sell a product in export, will be eligible for approval under the foregoing special rules prior to his entering into a contract to sell. AID will not supply this type of advice unless the supplier provides with his request to AID an indication that the solicitation may reasonably result in an agreement to sell.

4. Waivers

a. The prohibition on off-shore procurement of pharmaceuticals which infringe on U.S. patents may not be waived.

b. Exceptions to the general rule that AID-financed pharmaceuticals must be of U.S. source may be made under the authority set forth in Chapter 5B4 of AID Handbook 1, Supplement B, after consultation with the Office of Procurement. If Code 941 is the authorized source for procurement under the loan or grant agreement, an exception from the U.S. source requirement to permit a specific pharmaceutical procurement from Code 941 country would require only the authorization of the Office of Procurement.

(1) Under project assistance, waivers of the U.S. source policy will be considered if:

(a) The pharmaceutical product is essential to the project:

(b) The product, in the same or substantially equivalent form, is not available from the United States, or the delivered price from the United States would be at least 50% more than from another source; and

(c) Information is available to attest to the safety, efficacy, and quality of the product, or the product meets the standard of the U.S. FDA or other controlling U.S. authority.

(2) Under nonproject assistance, waivers of the U.S. source policy will be considered if:

(a) The pharmaceutical product is essential;

(b) The product, in the same or substantially equivalent form, is not available from the United States; and

(c) The product meets the standards of the U.S. FDA or other controlling U.S. authority.

1/ WHEN PROCUREMENT OF ANY COMMODITY UNDER THIS CATEGORY IS PROPOSED, AID/W WILL FURNISH THE USAID WITH THE SPECIAL PROVISION WHICH IS APPLICABLE.

USAID Commodity Eligibility Listing
Part II: Eligibility Criteria for Certain Commodities
II.E: Used, Rebuilt & Reconditioned Equipment

II.E: USED, REBUILT AND RECONDITIONED EQUIPMENT

It is AID's policy generally to finance only new equipment. However, where special circumstances justify the purchase of used, rebuilt or reconditioned equipment, AID will consider requests from a borrower/grantee for authority to procure such equipment.

Under proper safeguards, the procurement of used equipment, which would normally be rebuilt or reconditioned, can provide certain advantages such as lower cost and quicker delivery. In addition, such equipment may be less sophisticated in design than new equipment, thus offering operational and maintenance advantages. Consideration should, of course, be given to the availability of spare parts.

Depending on the type of equipment involved, where it is to be purchased, and other relevant factors, the procedures for authorizing and implementing such financing may vary. However, when the procurement of used, rebuilt or reconditioned equipment is authorized, AID normally requires (1) that the equipment meet standards prescribed by the importer and by AID, and (2) that AID financing be conditioned upon compliance with test, inspection, and appraisal standards prescribed by AID, and certified to by inspectors designated by AID. (Detailed information on the approval process is included in Chapter 6E2 of Handbook 15.)

A supplier should not complete a transaction involving used, rebuilt or reconditioned equipment until the buyer provides evidence that AID has approved in writing the acceptability of the transaction for financing.

Part II: Eligibility Criteria for Certain Commodities
II.F: Rebuilt & Reconditioned Engines

II.F: Rebuilt and Reconditioned Engines;
Rebuilt and Reconditioned Parts or Assemblies for Engines and
Vehicles

These items must have been rebuilt or reconditioned by a plant holding an "AID Letter of Eligibility" in effect as of the date the commodities are prepared for shipment. They are also subject to Special Provision 61 set forth in Part III of this Listing.

1. AID Letter of Eligibility

a. An AID Letter of Eligibility, valid for three years, is issued to a producer (rebuilder or reconditioner) found acceptable to AID on the basis of inspection and evaluation reports prepared by inspector selected by AID.

b. Requests for plant inspection and evaluation are submitted to the AID Geographic Bureau Engineer. They may be submitted by potential rebuilders or reconditioners, by suppliers in behalf of rebuilders or reconditioners whose processed material they propose to export, by borrowers/grantees, or by prospective importers.

c. Inspection and evaluation reports prepared by inspectors selected by AID cover the production, testing and quality control methods used by the rebuilder or reconditioner.

d. The cost of inspection and evaluation services are payable directly to AID by the rebuilder or reconditioner.

e. Rebuilders or reconditioners must extend to the customer/importer warranties equal to those extended by manufacturers of similar new engines, parts and assemblies.

2. Item Eligibility

a. Each engine, part or assembly must have been inspected and certified as satisfactory by the AID-approved producer (rebuilder or reconditioner).

b. Each engine, part or assembly must bear punched or stamped markings appropriately identifying it as rebuilt or reconditioned. Markings must be of sufficient permanency to remain visible after installation for a reasonable period of time under ordinary conditions of use.

c. Each item must be accompanied by an inspection notice which identifies the inspector and the date of inspection.

d. Packaging for such items must bear markings identifying the contents appropriately as rebuilt or reconditioned. Packaging must also bear identification of the inspector and date of inspection.

3. Supplier Certification

Supplier's certification requirements are set forth in Special Provision 61 which is contained in Part III of this Listing.

Suppliers of AID-financed seed must furnish a Seed Grower's Certificate, so labeled, which attests that,

- (a) The seed was grown in _____(country)_____.
- (b) The seed was sampled by an official of, and tested in, a laboratory of (state).
- (c) The seed was put up in packages of containers for end-users, labeled with all of the following:
 - (1) Seed lot number;
 - (2) Kind, or kind and variety;
 - (3) Weed seeds;
 - (4) Inert matter;
 - (5) Germination and hard seed;
 - (6) Names and rates of noxious weed-seed occurrence (which must conform to laws of the importing country).
 - (7) Month/year in which purity and germination tests were completed;
 - (8) If seed was treated, chemicals with which treated and cautionary statement if advisable.
- (d) Not more than twelve (12) calendar months have elapsed since last day of month when germination test was completed (when seed is packaged in hermetically sealed containers).

(e) Samples of the shipping lot will be retained for one year by the (Grower), and a copy of the laboratory purity and germination test analysis will be retained by the laboratory for not less than three (3) years.

The laboratory report shall be prepared under the letterhead of the laboratory, dated, and signed by a person, such as a seed technologist, making the analysis, and shall be attached to the Seed Grower's Certificate.

The Seed Grower's Certificate shall be issued under the letterhead of the Grower. It shall identify the Supplier's transaction by letter of credit number and bank, and identify the lot involved. The Certificate shall be dated and signed by an individual authorized to bind the grower and shall be issued to the Supplier.

SPECIAL PROVISION 3

4407.10.0005 - 4407.99.0095 LUMBER

ADDITIONAL DOCUMENTS REQUIRED FOR REIMBURSEMENT:

Hardwood Products

At supplier's expense, Official Inspection Report issued by the National

Hardwood Lumber Association (NHLA). Suppliers must furnish a copy of the purchase contract, showing the contracted commodity specifications, to the inspection organization. This document or a copy thereof shall be returned to the supplier as part of the Official Inspection Report to be used for reimbursement purposes. Ordinary mill inspection certificates issued for reimbursement purposes in lieu of the Official Inspection Report are not acceptable for AID purposes. Lumber from a nonauthorized source cannot be offered for inspection.

Inspection shall be performed on the entire lot to be shipped at the supplier's yard prior to packaging for export.

The inspection report shall attest that: (A) the product was inspected and graded by the Association's official inspector in accordance with the NHLA grading rulebook; (B) the NHLA inspector hammer-branded each piece with an "N" inscribed inside a circle -- the official designation of NHLA evidencing inspection; and (C) the product, on sample inspection, met the dimensional and quality requirements of the supplier's contract with the purchaser.

Lumber shall be considered on grade if 96 percent or more is of said grade or better. The Official Inspection Report issued by NHLA shall be binding upon buyer and seller.

Furniture Grade White Pine Lumber

At supplier's expense, Official Inspection Report issued by the National Hardwood Lumber Association (NHLA) acting as an independent grading agency. Suppliers must furnish a copy of the purchase contract, showing the contracted commodity specifications, to the inspection organization. This document or a copy thereof shall be returned to the supplier as part of the Official Inspection Report to be used for reimbursement purposes. Ordinary mill inspection certificates issued for reimbursement purposes in lieu of Official Inspection Report are not acceptable for AID purposes. Lumber from a nonauthorized source cannot be offered for inspection.

Inspection shall be performed on the entire lot to be shipped at the supplier's yard prior to packaging for export.

The inspection report shall attest that: (A) the product was inspected and graded by the Association's official inspector in accordance with the grading specifications agreed to in the purchase contract; (B) that the NHLA inspector hammer-branded each piece with an "N" inscribed inside a circle -- the official designation of NHLA evidencing inspection; and (C) the product, on inspection, met the dimensional and quality requirements of the supplier's contract with the purchaser.

Lumber shall be considered on grade if 96 percent or more is of said grade or better. The Official Inspection Report issued by NHLA shall be binding upon buyer and seller.

Part III: Special Provisions
Special Provision 40.1: Alkaloids, Antibiotics, Vitamins & Related Products

SPECIAL PROVISION 40.1

ALKALOIDS, ANTIBIOTICS, VIATAMINS AND RELATED PRODUCTS

(SEE SPECIFIC SCHEDULE B NUMBERS COVERED BY THIS SPECIAL PROVISION UNDER
PART
II.D. OF THE LISTING.)

I. Special Requirements

A. Expiration Dates

Not more than 1/6 of full dating periods from 1 to 18 months, nor 1/3 of full dating periods of more than 18 months shall have expired on the date of shipment.

B. Identification

Each unit package shall bear labels which identify the contents by generic name. In the case of products consisting of more than one active ingredient, generic name and quantity of each active ingredient must be provided. Shall be additionally identified "USP" OR "NF," if covered by specifications of the U.S. Pharmacopeia or the National Formulary of the United States.

C. Professional Samples

Professional samples shall not be furnished in connection with AID-financed sales of drug substances and/or products in other than finished dosage form. If sales of finished-dosage forms are eligible for AID financing, any professional samples furnished in connection with such sales shall be at the supplier's expense and must contain less than the manufacturer's smallest available commercial package (but not less than an individual dose) of the same product. Each professional sample shall clearly state in its label "Professional Sample."

D. Invoices

Invoices must itemize each drug substance and/or product for which payment is claimed. The following information regarding each line item must be provided either on the face of the invoice or on an attachment thereto.

1. General Information

a. The quantity of each active ingredient in each item billed. Each active ingredient shall be identified by its "established name" and additionally identified as "USP" OR "NF," if specifications covering such material are included under established names in the U.S. Pharmacopeia or the National Formulary of the United States. "Established Name" is defined in Section 502(e) (2) of the Federal Food, Drug and Cosmetic Act.

b. The actual expiration date for each item billed, or an indication that no expiration date applies.

c. An itemized accounting of any professional samples related to AID-financed transactions, whether or not shipped separately.

2. Additional information, if invoices include:

a. Insulin

(1) List applicable batch numbers.

(2) Attach copies of pertinent Federal Food and Drug Certificates.

b. Drug substances and/or products shipped from a free port or bonded warehouse

(1) Specify operation(s) performed on the item if it or its packaging was changed in any manner while in the free port or bonded warehouse.

(2) List the name and address of the manufacturer who produced the ingredient(s) used in invoiced items.

II. Additional Documentation Required for Reimbursement

A certificate, by or for the supplier, endorsed on or attached to the invoice, as follows:

"The undersigned supplier, or agent acting in behalf of and authorized to bind the supplier, agrees with and certifies to AID that he has complied in full with each of the special requirements for AID financing of drug substances and/or products (AID Special Provision 40.1); guarantees that, on date of shipment, no item for which payment is now claimed is adulterated or misbranded within the meaning of the Federal Food, Drug, and Cosmetic Act, and is not an article which may not, under provisions of Sections 404 or 505 of that Act, be introduced into interstate commerce; and will, with respect to violation of any such requirement or guarantee make, upon demand, full and complete refund to AID of any sum received by the supplier as AID financing for any product which is the subject of such a violation."

I. Special Requirements

A. Identification

Shall have been manufactured at an establishment holding a product license issued under the Biological Control Provisions of the Public Health Service Act (42 U.S.C. 262) for such products. Each unit package

shall bear labels which identify the contents by "proper name." "Proper name" is defined in 42 CFR Section 73.1(1).

B. Expiration Dates

Not more than 1/4 of full dating periods from 1 to 18 months, nor 1/3 of full dating periods of more than 18 months shall have expired on the date of shipment.

C. Professional Samples

Any professional samples furnished in connection with sales of biologics for human use shall be at the supplier's expense and must contain less than the manufacturer's smallest available commercial package (but not less than an individual dose) of the same product. Each professional sample shall clearly state in its label "Professional Sample."

D. Invoices

Invoices must itemize each biologic for which payment is claimed. The following information regarding each line item must be provided either on the face of the invoice or on an attachment thereto:

1. Proper name of product supplied
2. The actual expiration date for each item billed.
3. The applicable lot number(s) for each biologic shipped, and attach copy(ies) of the official release(s) issued by the Division of Biologics Standards, National Institute of Health.
4. An itemized accounting of any professional samples related to AID-financed transactions, whether or not shipped separately.

II. Additional Documentation Required for Reimbursement

A. Specifications:

Iron and steel mill products shall conform to technical specifications which identify them as prime quality, as defined in B.1., below.

B. Definitions:

For AID purposes the following terms shall have the meanings indicated as follows:

1. Prime Quality are iron and steel mill products conforming to U.S. Federal Specifications, or to specifications issued by one or more of the following organizations, or to other comparable and well-recognized prime quality specifications. The specification and number shall be indicated in key documents submitted to the buyer as well as to AID.

American Society for Testing Materials
Society of Automotive Engineers
American Iron and Steel Institute
American Society of Mechanical Engineers
Lloyds Register of Shipping
American Bureau of Shipping
American Petroleum Institute
Association of American Railroads
American Railway Engineering Association

2. Producing mill is a firm that produces prime quality iron and steel mill products, or a firm that converts or processes prime quality iron or steel mill products. This includes such processes as casting, forming, rolling, and drawing. A firm that merely engages in finishing activities (e.g. steel service centers) such as roller leveling, slitting, shearing, coating and/or decorating is not considered a producing mill for AID purposes.

C. Additional Documentation Required for Reimbursement

1. Certifications as to Prime Quality: The supplier shall provide the following document with the required certifications:

a. Producing Mill Certificate:

"The undersigned individual, authorized to fully bind the producer, hereby certifies to AID that this firm is a producing mill as defined in B.2 of AID Special Provision 54; that the material furnished under this firm's invoice number _____ dated _____ is of prime quality as defined in B.1 of AID Special Provision 54; that the material has been tested in accordance with the applicable requirements of the following specification, and that the test results are within the limits prescribed by the specification (Identify the specification number and the issuing organization):

_____;
and that it complies with source and componentry requirements set forth in Section 201.11 of AID Regulation 1."

b. Endorsement by Supplier on the Face of the Producing Mill Certificate:

"The undersigned individual, authorized to fully bind the supplier, hereby certifies to AID that the prime quality material identified in the Producing Mill Certificate, as hereby endorsed, has been supplied in this transaction under this supplier's invoice number _____ dated _____. The undersigned further certifies that one copy of the Producing Mill Packing List has been mailed to the buyer.

2. Producing Mill Packing List: The supplier shall provide a Producing Mill Packing List for each shipment. It shall contain a complete description of the packing, quantities, sizes, total number of shipping units, gross and net weights, and the export shipping mark(s).
