Fall 2008 Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: Semiannual regulatory agenda.

SUMMARY: In compliance with Executive Order 12866, entitled "Regulatory Planning and Review," and the Regulatory Flexibility Act, as amended, the Department of Commerce (Department), in the spring and fall of each year, publishes in the **Federal Register** an agenda of regulations under development or review over the next 12 months. Rulemaking actions are grouped according to prerulemaking, proposed rules, final rules, long-term actions, and rulemaking actions completed since the spring 2008 agenda. The purpose of the agenda is to provide information to the public on regulations currently under review, being proposed, or issued by the Department. The agenda is intended to facilitate comments and views by interested members of the public.

The Department's fall 2008 regulatory agenda includes regulatory activities that are expected to be conducted during the period October 1, 2008, through September 30, 2009.

FOR FURTHER INFORMATION CONTACT:

Specific: For additional information about specific regulatory actions listed in the agenda, contact the individual identified as the contact person.

General: Comments or inquiries of a general nature about the agenda should be directed to Jennifer K. Nist, Chief Counsel for Regulations, Office of the Assistant General Counsel for Legislation and Regulation, U.S. Department of Commerce, Washington, DC 20230; telephone: 202-482-3151.

SUPPLEMENTARY INFORMATION: Executive Order 12866 requires agencies to publish an agenda of those regulations that are under consideration pursuant to this order. By memorandum of July 7, 2008, the Office of Management and Budget issued guidelines and procedures for the preparation and publication of the fall 2008 Unified Agenda of Federal Regulatory and Deregulatory Actions. The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires agencies to publish, in the spring and fall of each year, a regulatory flexibility agenda that contains a brief description of the subject of any rule likely to have a significant economic impact on a substantial number of small entities. The agenda also identifies those entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act.

For this edition of the Department of Commerce's regulatory agenda, the most important significant regulatory actions and a Statement of Regulatory Priorities are included in The Regulatory Plan, which appears in both the online Unified Agenda and in part II of the **Federal Register** that includes the Unified Agenda.

In addition, beginning with the fall 2007 edition, the Internet became the basic means for disseminating the Unified Agenda. The complete Unified Agenda will be available online at www.reginfo.gov, in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), the Department of Commerce's printed agenda entries include only:

(1) Rules that are in the Agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules that the Agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available

in the Unified Agenda published on the Internet. In addition, for fall editions of the Agenda, the entire Regulatory Plan will continue to be printed in the **Federal Register**, as in past years, including the Department of Commerce's Regulatory Plan.

Within the Department, the Office of the Secretary and various operating units may issue regulations. Operating units, such as the National Oceanic and Atmospheric Administration (NOAA), the Bureau of Industry and Security, and the Patent and Trademark Office issue the greatest share of the Department's regulations.

A large number of regulatory actions reported in the agenda deal with fishery management programs of NOAA's National Marine Fisheries Service (NMFS). To avoid repetition of programs and definitions, as well as to provide some understanding of the technical and institutional elements of the NMFS programs, an "Explanation of Information Contained in NMFS Regulatory Entries" is provided below.

Explanation of Information Contained in NMFS Regulatory Entries

The Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (Act) governs the management of fisheries within the Exclusive Economic Zone (EEZ). The EEZ refers to those waters from the outer edge of the State boundaries, generally 3 nautical miles, to a distance of 200 nautical miles. Fishery Management Plans (FMPs) are to be prepared for fisheries that require conservation and management measures. Regulations implementing these FMPs regulate domestic fishing and foreign fishing where permitted. Foreign fishing may be conducted in a fishery in which there is no FMP only if a preliminary fishery management plan has been issued to govern that foreign fishing. Under the Act, eight Regional Fishery Management Councils (Councils) prepare FMPs or amendments to FMPs for fisheries within their respective areas. In the development of such plans or amendments and their implementing regulations, the Councils are required by law to conduct public hearings on the draft plans and to consider the use of alternative means of regulating.

The Council process for developing FMPs and amendments makes it difficult for NMFS to determine the

DOC

significance and timing of some regulatory actions under consideration by the Councils at the time the

semiannual regulatory agenda is published.

The Department's fall 2008 regulatory agenda follows.

Lily Fu Claffee,
General Counsel.

International Trade Administration—Long-Term Actions

Sequence Number	Title	Regulation Identifier Number
190	Commercial Availability of Fabric and Yarn	0625-AA59

National Oceanic and Atmospheric Administration—Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
191	Maximize Retention and Monitoring Program in the Shore-Based Pacific Whiting Fishery	0648-AR63
192	Amendment 1 to the Fishery Management Plan for the Tilefish Fishery	0648-AS25
193	Atlantic Highly Migratory Species (HMS); Reducing Sea Turtle Takes	0648-AS49
194	Amendment to Coastal Migratory Pelagics FMP, Red Drum FMP, Reef Fish FMP, Spiny Lobster FMP, and Stone Crab FMP To Provide for Regulation of Marine Aquaculture (Reg Plan Seq No. 20)	0648-AS65
195	American Lobster Fishery; Fishing Effort Control Measures To Complement Interstate Lobster Management Recommendations by the Atlantic States Marine Fisheries Commission	0648-AT31
196	Amendment 10 to the Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan	0648-AT58
197	BSAI Amendment 73 and GOA Amendment 77 FMP To Revise Management Authority of Dark Rockfish	0648-AU20
198	Amendment 15 to the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan	0648-AU36
199	Restrictions for 2007 Purse Seine and Longline Fisheries in the Eastern Tropical Pacific Ocean	0648-AU79
200	South Atlantic Fishery Ecosystem Plan Comprehensive Amendment	0648-AV31
201	Modifying Maximum Retainable Amounts (MRAs) for Selected Groundfish Species Caught by the Non-American Fishing Act Trawl Catcher Processor Sector	0648-AV32
202	Certification of Nations Whose Fishing Vessels Are Engaged in IUU Fishing or Bycatch of Protected Living Marine Resources (Reg Plan Seq No. 21)	0648-AV51
203	Rule To Implement a Minimum Possession Size Limit on Spiny Lobster (<i>Panulirus argus</i>)	0648-AV61
204	Collection and Use of Tax Identification Numbers From Holders of and Applicants for National Marine Fisheries Service Permits	0648-AV76
205	American Lobster Data Collection and Broodstock Protection Measures	0648-AV77
206	Gulf Reef Fish Amendment 30B	0648-AV80
207	Amendment 3 to the Fishery Management Plan for the Spiny Lobster Fishery of Puerto Rico and the U.S. Virgin Islands and Amendment 4 to the Reef Fish Fishery Management Plan of Puerto Rico and the U.S.	0648-AV98
208	Amendment 15 to the Pacific Coast Groundfish Fishery Management Plan: Limited Entry Program for the Pacific Whiting Fishery	0648-AW08
209	Amendment 17 to the South Atlantic Fishery Management Council Snapper Grouper Fishery Management Plan ...	0648-AW11
210	Amendment 15B to the South Atlantic Fishery Management Council Snapper Grouper Fishery Management Plan	0648-AW12
211	Amendment 2 to the Fishery Management Plan for the Queen Conch Fishery of Puerto Rico and the U.S. Virgin Islands	0648-AW15
212	Amendment 7 to the South Atlantic Shrimp Fishery Management Plan	0648-AW19
213	Marine Mammal Protection Act Stranding Regulation Revisions	0648-AW22
214	Revise Regulations Governing the North Pacific Groundfish Observer Program	0648-AW24
215	Amendment 3 to the Northeast Skate Complex Fishery Management Plan	0648-AW30
216	Fisheries in the Western Pacific; Western Pacific Pelagic Fisheries; Amendment 18 to the Pelagics Fishery Management Plan; Shallow-Set Longline Swordfish Fishery	0648-AW49
217	Establish a Permit Fee Collection Framework Under the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (HMS FMP)	0648-AW50
218	Fisheries in the Western Pacific; Compensation to Northwestern Hawaiian Islands Bottomfish and Lobster Fishermen Due to Fishery Closure in the Papahānaumokuākea Marine National Monument	0648-AW52
219	Amendment 16 to the Fishery Management Plan for the Snapper Grouper Fishery of the South Atlantic Region ...	0648-AW64
220	Atlantic Highly Migratory Species; Atlantic Shark Management Measures	0648-AW65
221	Amendment 4 to the Atlantic Herring Fishery Management Plan	0648-AW75
222	Interim Action To Reduce Fishing Mortality and Maintain Stock Rebuilding; Northeast Multispecies Fishery	0648-AW87
223	Halibut Charter Vessel Moratorium	0648-AW92
224	Allowable Modifications to the Turtle Excluder Device (TED) Requirements	0648-AW93

DOC

National Oceanic and Atmospheric Administration—Proposed Rule Stage (Continued)

Long-Term Actions**190. COMMERCIAL AVAILABILITY OF FABRIC AND YARN**

Legal Authority: PL 106–200, sec 112(b)(5)(B); PL 106–200, sec 211; EO 13191; PL 107–210, sec 3103

Abstract: This rule implements certain provisions of the Trade and Development Act of 2000 (the Act). Title I of the Act (the African Growth and Opportunity Act or AGOA), title II of the Act (the United States-Caribbean Basin Trade Partnership Act or CBTPA), and title XXXI of the Trade Act of 2002 (the Andean Trade Promotion and Drug Eradication Act or ATPDEA) provide for quota- and duty-free treatment for qualifying apparel products from designated beneficiary countries. AGOA and CBTPA authorize quota- and duty-free treatment for apparel articles that are both cut (or knit-to-shape) and sewn or otherwise

assembled in one or more designated beneficiary countries from yarn or fabric that is not formed in the United States or a beneficiary country, provided it has been determined that such yarn or fabric cannot be supplied by the domestic industry in commercial quantities in a timely manner. The President has delegated to the Committee for the Implementation of Textile Agreements (the Committee), which is chaired by Commerce, the authority to determine whether yarn or fabric cannot be supplied by the domestic industry in commercial quantities in a timely manner under the AGOA, the ATPDEA, and the CBTPA, and has authorized the Committee to extend quota- and duty-free treatment to apparel of such yarn or fabric. The rule provides the procedure for interested parties to submit a request

alleging that a yarn or fabric cannot be supplied by the domestic industry in commercial quantities in a timely manner, the procedure for public comments, and relevant factors that will be considered in the Committee's determination. The rule also outlines the factors to be considered by the Committee in extending quota- and duty-free treatment.

National Oceanic and Atmospheric Administration (NOAA)
Proposed Rule Stage**NATIONAL MARINE FISHERIES SERVICE****191. MAXIMIZE RETENTION AND MONITORING PROGRAM IN THE SHORE-BASED PACIFIC WHITING FISHERY**

Legal Authority: 16 USC 1801 et seq

Abstract: The Pacific Fishery Management Council (Pacific Council) at their October 21 to 25, 1996, meeting in San Francisco, California addressed the treatment and disposition of salmon in the groundfish trawl fisheries, specifically the shore-based whiting fishery. At that meeting, the Pacific Council discussed the retention of salmon in the shore-based whiting fishery and took action to maintain a viable shore-based whiting fishery by using exempted fishing permits (EFPs). These EFPs allowed the shore-based whiting fleet to temporarily deliver unsorted catch to processing plants and provided for the monitoring of incidentally taken salmon until a permanent monitoring program could be implemented. In keeping with the Pacific Council's recommendation, NMFS is proceeding with implementing a monitoring program for the shore-based whiting fishery. This action will aid in the sustainable

management of Pacific Coast salmon and groundfish fisheries while providing an important economic opportunity to those associated with the harvest, processing, and selling of whiting taken by the shore-based whiting fleet. The need for implementing a permanent monitoring program in the shore-based Pacific whiting fishery is to provide for a full retention fishery by enabling the shore-based whiting fleet, comprised exclusively of catcher vessels, to deliver unsorted catch to processing plants. This practice is necessary to ensure that whiting landings are of market quality, while abiding by Federal groundfish regulations and those implementing the Pacific Coast salmon and groundfish fishery management plans (FMPs).

193. ATLANTIC HIGHLY MIGRATORY SPECIES (HMS); REDUCING SEA TURTLE TAKES

Legal Authority: 16 USC 971; 16 USC 1801 et seq

Abstract: This action would amend the regulations governing the Atlantic pelagic longline fishery based upon a June 1, 2004, Biological Opinion regarding Atlantic sea turtles. This amendment could include framework mechanisms that would allow the Agency to take action, such as partial or rolling closures or gear or effort restrictions, if the number of sea turtle interactions or mortalities exceed anticipated levels during a certain period of time. This action would not change established quotas for target species.

RIN: 0648-AS65

195. AMERICAN LOBSTER FISHERY; FISHING EFFORT CONTROL MEASURES TO COMPLEMENT INTERSTATE LOBSTER MANAGEMENT RECOMMENDATIONS BY THE ATLANTIC STATES MARINE FISHERIES COMMISSION

Legal Authority: 16 USC 5101 et seq

Abstract: The National Marine Fisheries Service announces that it is considering, and seeking public comment on, revisions to Federal American lobster regulations for the Exclusive Economic Zone (EEZ) associated with effort control measures as recommended for Federal implementation by the Atlantic States Marine Fisheries Commission (ASFMC) as outlined in the Interstate Fishery Management Plan (ISFMP) for American Lobster. This action will evaluate effort control measures in certain Lobster Conservation Management Areas including: Limits on future access based on historic participation criteria; procedures to allow trap transfers among qualifiers and impose a trap reduction or conservation tax on any trap transfers; and a trap reduction schedule to meet the goals of the ISFMP.

197. BSAI AMENDMENT 73 AND GOA AMENDMENT 77 FMP TO REVISE MANAGEMENT AUTHORITY OF DARK ROCKFISH

Legal Authority: 16 USC 1801 et seq

Abstract: This amendment would remove dark rockfish (*Sebastes ciliatus*) from the Bering Sea and Aleutian Islands (BSAI) and Gulf of Alaska (GOA) groundfish fishery management plans (FMP). The State of Alaska would then assume management of dark rockfish in the BSAI and GOA. Regulatory amendments are needed to implement these FMP amendments to remove dark rockfish from Table 2a of 50 CFR part 679 (FMP species) and to add dark rockfish to Table 2d of 50 CFR part 679 (non-FMP species). The regulations implementing Amendment 73/77 also would revise the scientific name and species code for dusky rockfish on Table 2a to 50 CFR part 679.

199. RESTRICTIONS FOR 2007 PURSE SEINE AND LONGLINE FISHERIES IN THE EASTERN TROPICAL PACIFIC OCEAN

Legal Authority: 16 USC 951 to 961; 16 USC 971

Abstract: The National Marine Fisheries Service announces the 2007 conservation and management measures for international tuna fisheries in the eastern tropical Pacific Ocean. The purse seine fishery will be closed for six-weeks and any national longline fishery which reaches a catch level for bigeye tuna equal to the 2001 catch levels will also be closed. The intended effect of this rule is to establish prohibition of U.S. vessels purse seine fishing for tuna in the Inter-American Tropical Tuna Commission (IATTC) Convention Area from November 20 to December 31 period, and to announce the closure of the U.S. longline fishery. This will conform to the IATTC recommendation that was approved by the State Department.

200. SOUTH ATLANTIC FISHERY ECOSYSTEM PLAN COMPREHENSIVE AMENDMENT

Legal Authority: 16 USC 1801 et seq

Abstract: The purpose of this action is to develop an ecosystem-based approach to resource management. The South Atlantic Council plans to develop a Fishery Ecosystem Plan (FEP) Comprehensive Amendment, which would modify all its Fishery Management Plans (FMPs). The initial amendment would include the following actions: (1) Various actions to comply with new essential fish habitat requirements; (2) establishment of deep water coral Habitat Areas of Particular Concern, with possible gear limitations, such as the establishment of allowable trawl areas; and (3) other possible actions necessary to implement ecosystem-based fishery management.

201. MODIFYING MAXIMUM RETAINABLE AMOUNTS (MRAS) FOR SELECTED GROUND FISH SPECIES CAUGHT BY THE NON-AMERICAN FISHING ACT TRAWL CATCHER PROCESSOR SECTOR

Legal Authority: 16 USC 1801

Abstract: The National Marine Fisheries Service issues this action to amend regulations specifying the current interval of time allowed for determining the maximum retainable amount (MRA) of selected groundfish species that can be retained by non-American Fishery Act trawl catcher processors. This action would change MRA regulations located at 50 CFR 679.20(e) that establish the calculation of MRAs for groundfish species that are

closed to directed fishing by increasing the interval of time each vessel in this sector would have to retain the MRA specified in regulation for several species in the Bering Sea and Aleutian Islands. This action is intended to promote the goals and objectives of the Fishery Management Plan (FMP) for Groundfish of the Bering Sea and Aleutian Islands Management Area.

RIN: 0648-AV51

203. RULE TO IMPLEMENT A MINIMUM POSSESSION SIZE LIMIT ON SPINY LOBSTER (PANULIRUS ARGUS)

Legal Authority: 16 USC 1801

Abstract: The United States is a major importer of spiny lobster from the Caribbean, importing over 88,000 tons (over 194 million lbs) over the past 10 years, worth an estimated \$2.27 billion dollars. The United States imports over 90 percent of the spiny lobster harvested in Brazil, Colombia, Central America and the Caribbean countries. The major exporters to the United States are the Bahamas, Brazil, Honduras and Nicaragua. All of these exporting countries have some form of minimum size requirement, but they are not standardized and enforcement is severely lacking. Therefore, NOAA Fisheries Service in coordination with the Caribbean, South Atlantic, and Gulf

DOC—NOAA

Proposed Rule Stage

of Mexico Fishery Management Councils is proposing to place a minimum size limit restriction on imports to curtail the flow of undersized lobster harvested in foreign countries.

204. COLLECTION AND USE OF TAX IDENTIFICATION NUMBERS FROM HOLDERS OF AND APPLICANTS FOR NATIONAL MARINE FISHERIES SERVICE PERMITS

Legal Authority: 31 USC 7701; 16 USC 1801 et seq; 16 USC 1361 et seq; 16 USC 1531 et seq

Abstract: In conformance with the Debt Collection Improvement Act of 1996 (Debt Collection Act), the National Marine Fisheries Service (NMFS) will issue a rule to require that each existing holder of and future applicant for a permit, license, endorsement, authorization, transfer or like instrument issued by the agency to provide a Taxpayer Identification Number (TIN) (business' employer identification number or individual's social security number) and Date of Incorporation or Date of Birth, as appropriate. Under the Debt Collection Act, NMFS is required to collect the TIN to report on and collect any delinquent non-tax debt owed to the Federal Government. NMFS plans to use Date of Incorporation or Date of Birth information for administrative aspects of permitting procedures with appropriate confidentiality safeguards pursuant to the Privacy Act. The rule will specify (a) The particular uses that may be made of the reported TIN, (b) the effects, if any, of not providing the required information, (c) how the

information will be used to ascertain if the permit holder or applicant owes delinquent non-tax debt to the Government pursuant to the Debt Collection Act, (d) the effects on the permit holder or applicant when such delinquent debts are owed, and (e) the agency's intended communications with the permit holder or applicant regarding the relationship of such delinquent debts to its permitting process and the need to resolve such debts as a basis for completing permit issuance or renewal. The rule will amend existing agency permit regulations and contain all appropriate modified and new collections-of-information pursuant to the Paperwork Reduction Act.

205. AMERICAN LOBSTER DATA COLLECTION AND BROODSTOCK PROTECTION MEASURES

Legal Authority: 16 USC 5101 et seq

Abstract: The National Marine Fisheries Service is considering the implementation of management measures in the Federal lobster fishery, consistent with recommendations for Federal action as specified in the Atlantic States Marine Fisheries Commission's Interstate Fishery Management Plan for American Lobster. These proposed management measures include: 100 percent mandatory dealer reporting requirements for Federal lobster dealers; implementation of a maximum size limit (maximum carapace length restriction) in several Lobster Management Areas (LMA); and, revision to the definition of a V-notch for protection of egg-bearing female lobsters in several LMAs in the Federal American lobster fishery.

206. GULF REEF FISH AMENDMENT 30B

Legal Authority: 16 USC 1801

Abstract: Amendment 30B addresses the findings of Gulf of Mexico red grouper and gag stock assessments. Red grouper is not undergoing overfishing and is not overfished. Gag is undergoing overfishing and whether gag are overfished is still being determined. This action incorporates both red grouper and gag management measures together as the measures affecting one species invariably affect the other. The amendment would implement management measures to increase red grouper total allowable catch and to end overfishing of gag. The amendment also proposes definitions for gag status criteria and reference points. The amendment also examines grouper accountability measures, closed fishing areas, and ways to reduce discard mortality.

207. AMENDMENT 3 TO THE FISHERY MANAGEMENT PLAN FOR THE SPINY LOBSTER FISHERY OF PUERTO RICO AND THE U.S. VIRGIN ISLANDS AND AMENDMENT 4 TO THE REEF FISH FISHERY MANAGEMENT PLAN OF PUERTO RICO AND THE U.S.

Legal Authority: 16 USC 1801

Abstract: Many species of fish in the reef fish fishery in Puerto Rico and the USVI are believed to be overexploited, largely due to trap fishing and bycatch associated with this fishery. Landings from the trap fishery have continuously decreased since 1990 in Puerto Rico; species composition has changed; and size frequency of some fish has decreased over the last 10 years. These effects have been attributed to excessive trap fishing effort, lack of compliance with trap construction requirements (i.e., fishers often do not use the required biodegradable fasteners on trap doors), use of other gears by commercial fishers (e.g., gill nets), and the lack of escape panels in traps which would allow smaller fishes to escape, resulting in high mortality of juveniles and a loss of long-term potential yield. Under current fishing practices, bycatch and the associated mortality of bycatch is not expected to be reduced sufficiently in the reef fish or spiny lobster trap fisheries. Without a reduction in bycatch, those stocks experiencing overfishing may become overfished, and those stocks overfished may not meet the goals of the rebuilding plan set forth in the Sustainable Fisheries Act Amendment of 2005. Therefore, the use of escape panels as a management tool is proposed in this amendment to help achieve the necessary reductions in fishing mortality among the species harvested by traps.

208. AMENDMENT 15 TO THE PACIFIC COAST GROUND FISH FISHERY MANAGEMENT PLAN: LIMITED ENTRY PROGRAM FOR THE PACIFIC WHITING FISHERY

Legal Authority: 16 USC 1801 et seq

Abstract: Amendment 15 to the Pacific Coast Groundfish FMP would implement a limited entry program for the Pacific whiting fishery, which occurs within the Exclusive Economic Zone off the coasts of Washington, Oregon, and California. This action would limit future participation in each of the three non-tribal sectors of the Pacific whiting fishery to those vessels with historic participation in those particular sectors.

209. AMENDMENT 17 TO THE SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL SNAPPER GROUPEL FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801

Abstract: Amendment 17 is intended to: establish management reference points (MSY, OY) for red snapper; establish a rebuilding plan (rebuilding timeframe and rebuilding strategy) for red snapper; specify Annual Catch Limits (ACL), Annual Catch Targets (ACT), and Accountability Measures (AM) for 10 species undergoing overfishing; specify allocations for 10 species undergoing overfishing;

reconsider OY for 10 species undergoing overfishing; specify ABC Control Rules; extend the range of the snapper grouper fishery management plan north through the Mid-Atlantic Council's area of authority; promote fair and equitable regulations in the commercial fishery for snowy grouper; and modify management measures to ensure future catch is equal to or below the ACL.

RIN: 0648-AW12

211. AMENDMENT 2 TO THE FISHERY MANAGEMENT PLAN FOR THE QUEEN CONCH FISHERY OF PUERTO RICO AND THE U.S. VIRGIN ISLANDS

Legal Authority: 16 USC 1801

Abstract: St. Croix queen conch landings by commercial fishermen alone have exceeded sustainable harvest levels since the 2000 to 2001 fishing season. In 2005 to 2006 the commercial harvest was over four times sustainable levels. Additionally, there is an unknown but significant recreational harvest. Overfishing of queen conch has led to resource collapse in other regions and in some cases, long-term resource loss. According to the NMFS Report on the Status of the U.S. Fisheries for 2006, queen conch is overfished and undergoing overfishing. Under current fishing practices, reductions in mortality are not expected to be sufficient in the queen conch fishery. Without a reduction in mortality, queen conch are not expected to achieve the rebuilding goals established in the Sustainable Fisheries Amendment of 2005. Therefore, a change in fishing practices is needed to help achieve the necessary reductions in queen conch fishing mortality.

212. AMENDMENT 7 TO THE SOUTH ATLANTIC SHRIMP FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: The South Atlantic Fishery Management Council (Council) in conjunction with NMFS intends to prepare a DEIS to assess the impacts on the natural and human environment of the management measures proposed in its draft Amendment 7 to the Fishery Management Plan (FMP) for the Shrimp Fishery of the South Atlantic Region. Options will address the 15,000-pound landings requirement for permits, permits that may have been lost due to not meeting the 15,000-pound requirement or failure to renew the limited entry permit, and requirements for all shrimp permit holders to provide economic data if selected.

213. MARINE MAMMAL PROTECTION ACT STRANDING REGULATION REVISIONS

Legal Authority: 16 USC 1379; 16 USC 1382; 16 USC 1421

Abstract: The National Marine Fisheries Service (NMFS) is considering proposing changes to its implementing regulations (50 CFR section 216) governing the taking of stranded marine mammals under section 109(h), section 112(c), and title IV of the Marine Mammal Protection Act and is soliciting public comment to better inform the process. NMFS intends clarify the requirements and procedures for responding to stranded marine mammals and for determining the disposition of rehabilitated marine mammals, which includes the procedures for the placement of non-releasable animals and for authorizing the retention of releasable rehabilitated

marine mammals for scientific research, enhancement, or public display. This action will be analyzed under the National Environmental Policy Act with an Environmental Assessment.

214. REVISE REGULATIONS GOVERNING THE NORTH PACIFIC GROUND FISH OBSERVER PROGRAM

Legal Authority: 118 Stat 110; 16 USC 773 et seq; 16 USC 1801 et seq; 16 USC 3631 et seq; PL 108-199

Abstract: This rulemaking would revise Federal regulations relevant to numerous administrative and procedural requirements applicable to observer providers, observers, and industry participating in the North Pacific Groundfish Observer Program. Specifically, the proposed actions would: Modify the current permit issuance process so that observer and observer provider permit issuance is a discretionary National Marine Fisheries Service (NMFS) decision; amend current Federal regulations addressing observer behavior involving drugs, alcohol, and physical sexual conduct to remove NMFS oversight of observer behavior that does not affect job performance; require that observer providers submit policies related to these activities and continue to notify NMFS upon learning of an incident; revise Federal regulations so that observer providers are allowed to provide observers or technical staff for purposes of exempted fishing permits, scientific research permits, or other scientific research activities; revise the definition of "fishing day" in Federal regulations; require observer providers to annually submit detailed economic information to NMFS; specify a date by which observers who have collected

DOC—NOAA

218. FISHERIES IN THE WESTERN PACIFIC; COMPENSATION TO NORTHWESTERN HAWAIIAN ISLANDS BOTTOMFISH AND LOBSTER FISHERMEN DUE TO FISHERY CLOSURE IN THE PAPAHA NAUMOKUAKEA MARINE NATIONAL MONUMENT

Legal Authority: PL 110-161

Abstract: The Consolidated Appropriations Act of 2008 authorizes the Secretary of Commerce to provide compensation to bottomfish and lobster fishery participants who will be displaced by the 2011 fishery closure resulting from the establishment by Presidential Proclamation of the Papahānaumokuākea Marine National Monument, Northwestern Hawaiian Islands. The National Marine Fisheries Service (NMFS) (designee of the Secretary) is required to promulgate regulations to implement a voluntary capacity reduction program that: (1) Identifies eligible participants as those individuals holding Federal fishing permits for lobster or bottomfish in the designated waters within the monument, (2) provides a mechanism to compensate eligible participants for no more than the economic value of their permits, and (3) at the option of each eligible permit holder, provides an optional mechanism for additional compensation based on the value of the fishing vessel and gear of eligible participants who decide to receive these additional funds, provided that the vessels of such participants will not be used for fishing. For this purpose, \$6,697,500 is authorized to be appropriated to the NMFS for FY 2008.

219. • AMENDMENT 16 TO THE FISHERY MANAGEMENT PLAN FOR THE SNAPPER GROUPER FISHERY OF THE SOUTH ATLANTIC REGION

Legal Authority: 16 USC 1801 et seq

Abstract: The need for action through Amendment 16 is to end overfishing of gag and vermilion snapper. Species in the fishery management unit are assessed on a routine basis and stock status may change as new information becomes available. In addition, changes in management regulations, fishing techniques, and social/economic structure can result in shifts in the percentage of harvest between user groups over time. More specifically, these proposed actions for gag and vermilion snapper would: Implement measures to end overfishing of gag and vermilion snapper; allow the Regional Administrator to make adjustments to commercial and recreational management measures based on the reduction in harvest needed to achieve yield at Foy pending the outcome of a new benchmark assessment for vermilion snapper; specify the total allowable catch and define interim allocations for gag and vermilion snapper; update management reference points for gag and vermilion snapper; and reduce bycatch of snapper grouper species.

220. • ATLANTIC HIGHLY MIGRATORY SPECIES; ATLANTIC SHARK MANAGEMENT MEASURES

Legal Authority: 16 USC 1801 et seq

Abstract: This rule would evaluate the management measures for small coastal sharks (SCS) based on the results of the 2007 SCS stock assessment. This rulemaking could consider, among other things, commercial quotas and trip limits, recreational minimum size and bag limits, time/area closures, and the public display quota. In addition, this rule would implement a rebuilding plan for blacknose sharks. To the extent that blacknose sharks are caught in fisheries that are not targeted highly migratory species fisheries, the National Marine Fisheries Service (NMFS) will work with the appropriate Regional Fishery Management Council, Interstate Commission, and States to implement regulations through their processes to rebuild blacknose sharks. This action is necessary in light of recent stock assessments, which have determined that blacknose sharks are overfished with overfishing occurring. As needed, this rule may include other items to clarify existing regulations. This action is not significant under the meaning of E.O. 12866 since it is below the economic threshold of impact and has no novel policy issues associated with it. Additionally, NMFS does not anticipate that major changes to shark management will occur as a result of this action.

221. • AMENDMENT 4 TO THE ATLANTIC HERRING FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: The goal of Amendment 4 is to improve catch monitoring and ensure compliance with the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (MSRA) of 2006. The proposed objectives of Amendment 4 are as follows: To implement measures to improve the long-term monitoring of catch (landings and bycatch) in the herring fishery; to implement Annual Catch Limits (ACLs) and Accountability Measures (AMs) consistent with the MSRA; to implement other management measures as necessary to ensure compliance with the new provisions of the MSRA; to develop a sector allocation process or other Limited Access Privilege Program (LAPP) for the herring fishery; and in the context of the previous objectives, to consider the health of the herring resource and the important role of herring as a forage fish and predator fish throughout.

222. • INTERIM ACTION TO REDUCE FISHING MORTALITY AND MAINTAIN STOCK REBUILDING; NORTHEAST MULTISPECIES FISHERY

Legal Authority: 16 USC 1801 et seq

Abstract: The Fishery Management Plan (FMP) requires fishing mortality reductions to be implemented May 1, 2009, as a part of the rebuilding plan specified under Amendment 13 to the FMP, and if additional reductions in fishing mortality are necessary as a result of stock assessments that will occur in August 2008. The New England Fishery Management Council is currently developing Amendment 16 to the FMP that, if approved, would implement management measures to achieve the necessary fishing mortality

DOC—NOAA

Proposed Rule Stage

reductions to meet the required objectives of the FMP, as well as other extensive modifications to the FMP. However, due to the scope and complexity of Amendment 16, it is likely that the development of the Amendment may be behind schedule and not be implemented by May 1, 2009. Therefore, due to the need to meet the rebuilding goals of the FMP by May 1, 2009, an interim action is being developed by NOAA's National Marine Fisheries Service. This interim action would be more narrow in scope than Amendment 16 and focus on the required adjustments to the FMP, and include a measure that would provide flexibility to the industry and mitigate negative economic impacts. This action would remain in effect until Amendment 16 is implemented, which is expected no later than May 1, 2010.

223. • HALIBUT CHARTER VESSEL MORATORIUM

Legal Authority: 16 USC 773 to 773k

Abstract: This action would implement a moratorium on the entry of additional charter vessels into the guided sport fishery for Pacific halibut in waters of International Pacific Halibut Commission regulatory areas 2C (Southeast Alaska) and 3A (Central Gulf of Alaska). If approved, this moratorium would limit the number of charter vessels that may participate in these areas. The National Marine Fisheries Service would issue a moratorium permit to a licensed charter vessel fishing business owner based on his or her past participation in the charter vessel fishery for halibut and to a Community Quota Entity representing specific rural communities. All moratorium permit holders would be subject to limits on the number of permits they could hold

and on the number of charter vessel anglers who could catch and retain halibut on the permitted charter vessel. This action is proposed to achieve the halibut fishery management goals of the North Pacific Fishery Management Council. The intended effect is to curtail growth of fishing capacity in the guided sport fishery for halibut.

224. • ALLOWABLE MODIFICATIONS TO THE TURTLE EXCLUDER DEVICE (TED) REQUIREMENTS

Legal Authority: 16 USC 1531 et seq

Abstract: The National Marine Fisheries Service proposes to revise the turtle excluder device (TED) requirements to allow new materials and modifications to existing approved TED designs. Specifically, proposed allowable modifications include the use of flat bar, box pipe, and oval pipe for use in currently-approved TED grids; an increase in mesh size on escape flaps from 1-5/8 inches to 2 inches; the use of the Boone single straight cut and triangular escape openings; specifications on the use of TED grid brace bars; and the use of the Chauvin Shrimp Kicker to improve shrimp retention.

225. • SEABIRD AVOIDANCE REQUIREMENTS REVISIONS FOR HOOK-AND-LINE VESSELS IN INTERNATIONAL PACIFIC HALIBUT COMMISSION REGULATORY AREA 4E

Legal Authority: 16 USC 1801 et seq

Abstract: The National Marine Fisheries Service takes this action to revise the seabird avoidance regulations for the hook-and-line fishery for groundfish and halibut in the International Pacific Halibut Commission regulatory area 4E of the Bering Sea. This action would eliminate seabird avoidance requirements for hook-and-line vessels less than or equal to 55 feet length overall in portions of Area 4E. This action is necessary to revise seabird avoidance regulations based on the latest scientific information regarding the location of seabirds and fishing activities and to reduce unnecessary regulatory burdens and associated costs.

227. ● AMENDMENT 28 TO THE FISHERY MANAGEMENT PLAN FOR BERING SEA AND ALEUTIAN ISLANDS KING AND TANNER CRAB

Legal Authority: 16 USC 1862; PL 109-241; PL 109-479

Abstract: This action would implement Amendment 28 to the Fishery Management Plan for Bering Sea and Aleutian Islands King and Tanner Crabs to allow unlimited post-delivery transfers of shares to cover overages within the crab fishing year ending June 30. Under the crab rationalization program, harvesters receive annual allocations of individual fishing quota that provide an exclusive privilege to harvest a specific number of pounds of crab from a fishery. Any harvest in excess of an individual fishing quota allocation is a regulatory violation punishable by confiscation of crab or other penalties. Precisely estimating of catch at sea during the fishery is difficult and costly due to variation in size of crab, and sorting and measurement requirements. Overages can result from inadvertent mistakes by participants attempting to accurately estimate catch. A provision allowing for post-delivery transfer of individual fishing quota to cover overages could reduce the number of inadvertent violations, allowing for more complete harvest of allocations, and reduce enforcement costs without increasing the risk of over harvest of allocations.

229. ● ATLANTIC HIGHLY MIGRATORY SPECIES; 2009 NORTH AND SOUTH ATLANTIC COMMERCIAL QUOTAS

Legal Authority: 16 USC 1801 et seq

Abstract: This rule would establish the 2009 fishing season quotas for North and South Atlantic swordfish based on recent updated landings information and recommendations from the 2008 annual meeting of the International Commission for the Conservation of Atlantic Tunas (ICCAT). This rule is necessary to ensure that current swordfish quotas account for underharvests and reserve transfer from the 2008 fishing year, consistent with regulations at 50 CFR part 635 and ICCAT recommendations that establish the U.S. North and South Atlantic swordfish allocations. This proposed rule may also include other minor regulatory clarifications.

230. ● ATLANTIC HIGHLY MIGRATORY SPECIES (HMS); 2009 ATLANTIC BLUEFIN TUNA QUOTA SPECIFICATIONS AND MANAGEMENT MEASURES

Legal Authority: 16 USC 971 et seq; 16 USC 1801 et seq

Abstract: This rule would set Atlantic bluefin tuna (BFT) quota specifications and seasonal management measures for the 2009 fishing year (January 1, 2009 to December 31, 2009), and amend the BFT regulations. This action would implement the U.S. annual BFT quota as recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and allocate that quota among the domestic fishing categories. The seasonal management measures would set daily retention limits and their duration for both the General and Angling categories. The annual specification process is set forth in current regulations implemented under the Consolidated Highly Migratory Species Fishery Management Plan (FMP). Other BFT regulatory

DOC—NOAA

Proposed Rule Stage

amendments would be made within the framework procedures of the FMP. As ICCAT meets in November of the prior year, the rulemaking process needs to be performed expeditiously in order to publish the measures as soon as possible in the 2009 fishing year.

231. • AMENDMENT 92 TO THE FISHERY MANAGEMENT PLAN FOR BERING SEA/ALEUTIAN ISLANDS GROUND FISH AND AMENDMENT 82 TO THE FISHERY MANAGEMENT PLAN FOR GULF OF ALASKA GROUND FISH

Legal Authority: 16 USC 1801 et seq

Abstract: Amendments 92/82 would remove trawl gear endorsements on licenses issued under the license limitation program in specific management areas if those licenses have not been used on vessels that meet minimum recent landing requirements using trawl gear. This action would provide exemptions to this requirement for licenses that are used in trawl fisheries subject to quota-based management. This action would issue new area endorsements for trawl catcher vessels in the Aleutian Islands if minimum recent landing requirements in the Aleutian Islands were met. This action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act, the FMPs, and other applicable law.

234. PROTECTIVE REGULATIONS FOR KILLER WHALES IN THE NORTHWEST REGION UNDER THE ENDANGERED SPECIES ACT AND MARINE MAMMAL PROTECTION ACT

Legal Authority: 16 USC 1361 et seq; 16 USC 1531 to 1543

Abstract: The National Marine Fisheries Service (NMFS) is considering whether to propose regulations to protect killer whales (*Orcinus orca*) in the Pacific Northwest. The Southern Resident killer whale distinct population segment (DPS) was listed as endangered under the Endangered Species Act (ESA) on November 18, 2005 (70 FR 69903). In the final rule announcing the listing, NMFS identified vessel effects, including direct interference and sound, as a potential contributing factor in the recent decline of this population. Both the Marine Mammal Protection Act (MMPA) and the ESA prohibit take, including harassment, of killer whales, but these statutes do not prohibit specified acts. NMFS is now considering whether to propose regulations that would prohibit certain acts, under our general authorities under the ESA and MMPA and their implementing regulations. The Proposed Recovery Plan for Southern Resident killer whales (71 FR 69101; November 29, 2006) includes as a management action the evaluation of current guidelines and the need for regulations and/or protected areas. The scope of this ANPR encompasses the activities of any person or conveyance that may result in the unauthorized taking of killer whales and/or that may cause detrimental individual-level and population-level impacts. NMFS requests comments on whether—and if so, what type of—conservation measures, regulations, and, if necessary, other measures would be appropriate to protect killer whales from the effects of these activities.

235. DESIGNATION OF CRITICAL HABITAT FOR THE ENDANGERED U.S. DISTINCT POPULATION SEGMENT (DPS) OF SMALLTOOTH SAWFISH

Legal Authority: 16 USC 1531 et seq

Abstract: This action would designate critical habitat for the U.S. DPS of smalltooth sawfish, which was listed as endangered on April 1, 2003. The designation would be located in Florida, within the current geographic range of the species. Comments from the public on the proposal, including information on the economic impacts, national security, and other relevant documents, as well as the benefits to the species from the designation will be solicited during a 60-day comment period. A draft economic analysis and Section 4(b)(2) report will be conducted in support of this proposed rule.

236. MARINE MAMMAL PROTECTION ACT PERMIT REGULATION REVISIONS

Legal Authority: 16 USC 1374

Abstract: The National Marine Fisheries Service (NMFS) is considering proposing changes to its implementing regulations (50 CFR part 216) governing the issuance of permits for scientific research and enhancement activities

under Section 104 of the Marine Mammal Protection Act and is soliciting public comment to better inform the process. NMFS intends to streamline and clarify general permitting requirements and requirements for scientific research and enhancement permits, simplify procedures for transferring marine mammal parts, possibly apply the General Authorization (GA) to research activities involving Level A harassment of non-endangered marine mammals, and implement a 'permit application cycle' for application submission and processing of all marine mammal permits. NMFS intends to write regulations for marine mammal photography permits and is considering whether this activity should be covered by the GA. Any recommendations received in response to this advance notice of proposed rulemaking regarding regulations at 50 CFR part 216 will be considered prior to proposed rulemaking.

237. RULEMAKING TO ESTABLISH TAKE PROHIBITIONS FOR THE THREATENED SOUTHERN DISTINCT POPULATION SEGMENT OF NORTH AMERICAN GREEN STURGEON

Legal Authority: 16 USC 1531 to 1543

Abstract: Under section 4(d) of the Federal Endangered Species Act (ESA), the Secretary of Commerce is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. This rulemaking would establish an ESA 4(d) rule representing regulations that NMFS believes

necessary and advisable to conserve the threatened Southern Distinct Population Segment of North American green sturgeon (Southern DPS of green sturgeon). The 4(d) rule would apply the prohibitions listed under ESA section 9(a)(1)(A) and 9(a)(1)(D) through 9(a)(1)(G) for the Southern DPS and apply ESA section 9(a)(1)(B) and (a)(1)(C) prohibitions (called the "take prohibitions") to specific activities that take Southern DPS fish or alter its habitat in a manner detrimental to the continued existence of the species. The 4(d) rule would include exceptions to the take prohibitions for activities conducted in a way that NMFS deems adequate to protect or conserve the Southern DPS.

238. HARBOR PORPOISE TAKE REDUCTION PLAN MEASURES

Legal Authority: 16 USC 1361 et seq

Abstract: The National Marine Fisheries Service is preparing a proposed rule to reduce the number of harbor porpoise taken in sink gillnet fisheries in the Gulf of Maine and Mid-Atlantic. The Harbor Porpoise Take Reduction Plan implemented measures to reduce the incidental capture of harbor porpoises in sink gillnets to below the stock's Potential Biological Removal level (PBR) in 1999. Measures include: management areas in which deterrent devices (pingers) are required on gillnets; gear modifications; and seasonal closures. Between 2001 and 2005, incidental takes of harbor porpoise showed an increasing trend, and currently takes exceed PBR. The proposed rule will implement measures developed through discussions with the Harbor Porpoise Take Reduction Team,

DOC—NOAA

Proposed Rule Stage

which was reconvened in 2007 when it was clear that existing measures were not sufficient to keep porpoise bycatch to below PBR. For the Gulf of Maine, this action would expand pinger use in Massachusetts Bay to include November; establish Stellwagen Bank Management Area, requiring pingers November to May; establish Coastal Gulf of Maine Consequence Closure Area and require closure in October and November only if, after the most current two years, the average bycatch rate exceeds the trigger rate of .031, identified from observed compliant boats from the Mid-Coast, Massachusetts Bay, and Stellwagen Bank Management Areas; create Southern New England Management Area (includes current Cape Cod South Management Area); require pingers from December to May; establish Cape Cod South Expansion and Eastern Cape Cod Consequence Closure Areas; and require closure from February to April only if, after the most current two years, the average bycatch rate exceeds the trigger rate of 0.023, identified from observed compliant vessels fishing in the Southern New England Management Area. For the Mid Atlantic, this action would establish Mudhole South Management Area. Close from February 1 to March 15; and modify tie-down requirement.

239. • RULEMAKING TO DESIGNATE CRITICAL HABITAT FOR THE GULF OF MAINE DISTINCT POPULATION SEGMENT OF ATLANTIC SALMON**Legal Authority:** 16 USC 1531 et seq

Abstract: Under section 4 of the Endangered Species Act (ESA), the Secretary of Commerce (Secretary) shall designate critical habitat for species

listed as threatened or endangered. This rulemaking would designate critical habitat in 45 specific areas occupied by Atlantic salmon at the time of listing that comprise approximately 203,781 km of perennial river, stream, and estuary habitat and 868 square km of lake habitat within the range of the Gulf of Maine's distinct population segment and on which are found those physical and biological features essential to the conservation of the species. A draft economic analysis, biological report, and ESA section 4(b)(2) analysis report in support of the proposed rulemaking will be available for public review and comment. We solicit comments from the public regarding the proposed rulemaking, including comments on economic, national security, or other relevant impacts, as well as the benefits of the designation to Gulf of Maine Atlantic salmon.

245. AMENDMENT 14 TO THE FISHERY MANAGEMENT PLAN FOR THE SNAPPER-GROUPER FISHERY OF THE SOUTH ATLANTIC REGION**Legal Authority:** 16 USC 1801 et seq**Abstract:** Amendment 14 would establish a series of 8 Type II Marine Protected Areas (MPAs) in Federal waters in the South Atlantic. The MPAs range in size from 8 square nautical miles to 150 square nautical miles, and would be distributed from North Carolina south to the Florida Keys. Within the MPAs, fishing for, or retention of, species in the snapper grouper management complex would be prohibited, as would the use of shark bottom longline fishing gear. Trolling for pelagic species such as tuna, dolphin, and mackerel would be allowed within the MPAs.**Timetable:**

246. FRAMEWORK 4 TO THE FISHERY MANAGEMENT PLAN FOR MONKFISH**Legal Authority:** 16 USC 1801 et seq**Abstract:** This framework adjustment would establish target TACs of 5,000 mt and 5,100 mt for the Northern Fishery Management Area (NFMA) and Southern Fishery Management Area (SFMA), respectively, for the final 3 years of the rebuilding plan (FY 2007

DOC—NOAA

Final Rule Stage

to FY 2009), unless otherwise modified by the Monkfish Monitoring Committee (MFMC) during their annual review process. Essentially, this framework adjustment would remove the Framework 2 control rule and replace it with target TACs that were developed based upon an analysis conducted by the Monkfish Plan Development Team (PDT). This framework would also implement monkfish Days-at-Sea requirements for vessels fishing in the NFMA, and addresses other minor issues raised by industry.

247. REVISION TO ALLOWABLE BYCATCH REDUCTION DEVICES FOR THE GULF OF MEXICO SHRIMP FISHERY

Legal Authority: 16 USC 1801 et seq

Abstract: In accordance with the framework procedures for adjusting management measures of the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP), the National Marine Fisheries Service proposes to decertify the expanded mesh bycatch reduction device (BRD), the Gulf fisheye BRD, and to revise the allowable configuration of the fisheye BRD for use in the Gulf of Mexico shrimp fishery. The intended effect of this rule is to improve bycatch reduction in the shrimp fishery and better meet the requirements of national standard 9.

250. GENERAL PROVISIONS FOR DOMESTIC FISHERIES; SPECIFICATIONS FOR BOARDING LADDERS

Legal Authority: 16 USC 1801 et seq; 16 USC 2431 et seq; 16 USC 3636(b); 16 USC 5501 et seq; 16 USC 773 et seq; 16 USC 951 to 961; 16 USC 973 to 973r; 16 USC 971 et seq

Abstract: This regulation would require domestic fishing vessels to have a U.S. Coast Guard-approved pilot ladder on board as a safer means for authorized personnel to board the vessels in carrying out their duties under the Magnuson-Stevens Fishery Conservation and Management Act, the Atlantic Tunas Convention Act and other applicable laws. This action is necessary to provide for the safety of

personnel boarding domestic fishing vessels, as current standards have proven to be inadequate. This action would establish a safer and more enforceable national standard for ladders used by authorized officers for boarding domestic fishing vessels subject to Federal regulation.

251. • AMENDMENT 27 TO THE FISHERY MANAGEMENT PLAN FOR BERING SEA/ALEUTIAN ISLANDS KING AND TANNER CRABS

Legal Authority: 16 USC 1801 et seq

Abstract: Amendment 27 to the Fishery Management Plan (FMP) would amend the FMP to allow processors to modify use caps that limit the amount of individual processor quota (IPQ) shares that may be used by persons processing crab. Specifically, Amendment 27 would allow persons holding IPQ shares to process their crab at processing facilities they do not own through contractual arrangements with the facility owners to have their crab custom processed at that facility. Any crab processed under such a custom processing arrangement would not be applied against the IPQ use cap of the facility owners. This action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act, the FMP, and other applicable law.

252. ● REFERENDUM PROCEDURES FOR A POTENTIAL GULF OF MEXICO GROUPEL AND TILEFISH INDIVIDUAL FISHING QUOTA (IFQ) PROGRAM

Legal Authority: 16 USC 1801 et seq

Abstract: Grouper and tilefish species in the Gulf of Mexico are managed under the reef fish fishery management plan. Past management practices under the plan have contributed to overcapitalization in these fisheries, which the Council now seeks to address. The Council is considering an IFQ program to further control effort in the commercial grouper and tilefish fisheries in the Gulf of Mexico. Under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), NOAA's National Marine Fisheries Service must conduct a referendum to determine whether an IFQ program, as ultimately developed, should be submitted to the Secretary of Commerce for review, approval, and implementation. This proposed rule would provide potential referendum participants information concerning the schedule, procedures, and eligibility requirements for participating in the referendum. The intended effect of this proposed rule is to implement the requirements of the Magnuson-Stevens Act for implementing an IFQ program in the Gulf of Mexico.

254. VIRGINIA MODIFIED POUND NET LEADER INSPECTION PROGRAM

Legal Authority: 16 USC 1531 et seq

Abstract: With this action, the National Marine Fisheries Service (NMFS) issues a rule to implement an inspection program for modified pound net leaders in the Virginia waters of the mainstem

Chesapeake Bay. Previous regulations (71 FR 36024, June 23, 2006) required modified pound net leaders in a portion of the Virginia Chesapeake Bay from May 6 to July 15 each year, and this action would ensure that leaders used in that area do in fact meet the definition of a modified pound net leader. To comply with the inspection program, a pound net fisherman intending to set a modified leader must call NMFS to arrange for an inspection meeting. Then, the fisherman must meet NMFS and allow for the inspection of his or her gear to ensure the modified leader meets the definition of a modified pound net leader, as described in the regulations. The purpose of this action is to help protect threatened and endangered sea turtles, while enabling fishermen to use leaders, an important component of pound net gear, during the regulated period.

255. ENDANGERED AND THREATENED SPECIES; DESIGNATION OF CRITICAL HABITAT FOR ELKHORN AND STAGHORN CORALS

Legal Authority: 16 USC 1531 to 1544

Abstract: The National Marine Fisheries Service proposes to designate critical habitat for elkhorn and staghorn corals, which we recently listed as threatened under the Endangered Species Act (ESA). Areas proposed for designation will be within the current geographic ranges of these species that are under U.S. jurisdiction, including areas in Southeast Florida, Puerto Rico, and the U.S. Virgin Islands. Comments from the public on all aspects of the proposal, including information on the economic, national security, and other

DOC—NOAA

Final Rule Stage

relevant impacts of the proposed designation, as well as the benefits to elkhorn and staghorn corals from designation will be solicited during a 60-day comment period. A draft economic analysis and Section 4(b)(2) report will be conducted in support of this proposal.

256. ATLANTIC PELAGIC LONGLINE TAKE REDUCTION PLAN

Legal Authority: 16 USC 1361 et seq

Abstract: With this action, the National Marine Fisheries Service implements the Atlantic Pelagic Longline Take Reduction Plan in order to reduce serious injuries and mortalities of long-finned pilot whales, short-finned pilot whales, and Risso's dolphins in the Atlantic pelagic longline fishery to insignificant levels approaching a zero mortality and serious injury rate, within five years of its implementation. The proposed plan is based on consensus recommendations draft plan was by the Atlantic Pelagic Longline Take Reduction Team (Team) and includes including both regulatory and non-regulatory measures. Regulatory measures include: (1) Limiting the mainline length to 20 nautical miles or less within the Mid-Atlantic Bight; (2) designating a special research area offshore of Cape Hatteras, NC; and (3) requiring all pelagic longline vessels post an informational placards on careful handling and release of marine mammals in the wheelhouse and working decks of the vessel. Non-regulatory measures of the plan include: (1) Providing for 12 to 15 percent observer coverage throughout

all Atlantic pelagic longline fisheries that interact with pilot whales or Risso's dolphins; (2) encouraging vessel operators throughout the fishery to maintain daily communications with other local vessel captains; (3) updating guidelines for careful handling and release of entangled or hooked marine mammals; and (4) distributing quarterly reports of bycatch of marine mammals in the pelagic longline fishery to the Team.

257. AMENDMENT 9 TO THE ATLANTIC MACKEREL, SQUID, AND BUTTERFISH FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: Amendment 9 to the Atlantic Mackerel, Squid, and Butterfish (MSB) Fishery Management Plan (FMP) was developed by the Mid-Atlantic Fishery Management Council to remedy deficiencies in the FMP and to address other issues that have arisen since Amendment 8 to the MSB FMP became effective in 1998. Amendment 9 to the MSB FMP considers: Allowing multi-year specifications and management measures; extending or eliminating the moratorium on entry into the directed Illex fishery; revising current biological reference points for Loligo; designating essential fish habitat (EFH) for Loligo eggs; implementing closures of EFH areas to reduce gear impacts from MSB fisheries; increasing the Loligo

possession limit for Illex vessels during a closure of the Loligo fishery; and requiring real-time electronic reporting via a vessel monitoring system in the Illex fishery.

258. AMENDMENT 72 TO THE FISHERY MANAGEMENT PLAN FOR THE GROUND FISH OF THE GULF OF ALASKA

Legal Authority: 16 USC 1801 et seq

Abstract: This amendment would revise the Gulf of Alaska (GOA) Groundfish Fishery Management Plan to state that the Council will annually review the discards of shallow-water flatfish in Gulf of Alaska groundfish fisheries. After review of this annual report, the Council may recommend revisions to the retention and utilization requirements if the discard rate for shallow-water flatfish falls above or below a specified threshold. This fishery management plan has no implementing regulations.

RIN: 0648-AR72**259. AMEND SUBSISTENCE HALIBUT FISHING REGULATIONS IN WATERS IN AND OFF ALASKA**

Legal Authority: 16 USC 1801 et seq; 16 USC 773 et seq

Abstract: This regulatory action amends the subsistence fishery rules for Pacific halibut in waters in and off Alaska. This action proposes six changes to the subsistence halibut regulations that would: (1) Revise the subsistence gear restrictions in Kodiak and add seasonal gear and vessel limits in Sitka Sound; (2) add the village of Naukati to the list of eligible subsistence halibut communities; (3) implement a possession limit to enhance enforcement; (4) revise the definition of charter vessel; (5) revise regulations allowing customary trade; and (6) allow the use of special permits within non-subsistence use areas by tribes eligible for the permits. Additional administrative revisions to regulations include converting the gear and harvest restrictions from text to table format and revising language to consistently refer to Sitka Sound rather than Sitka LAMP. These regulations are necessary to address subsistence halibut management concerns in densely populated areas. This action is intended to support the conservation and management provisions of the Northern Pacific Halibut Act of 1982.

RIN: 0648-AU88**261. ATLANTIC HIGHLY MIGRATORY SPECIES; ATLANTIC SHARK MANAGEMENT MEASURES**

Legal Authority: 16 USC 1801 et seq

Abstract: This rule would reevaluate the management measures for large coastal sharks (LCS) and pelagic sharks based on the 2005/2006 LCS stock assessment, the 2006 dusky shark stock assessment, and the Canadian 2005 porbeagle shark stock assessment. This rulemaking could consider, among other things, changes to existing rebuilding plans for overfished species, commercial quotas and trip limits,

recreational minimum size and bag limits, and the public display quota. In addition, this rule would likely reevaluate the Mid-Atlantic shark closure and its role in the rebuilding plan for LCS. This action is necessary in light of recent stock assessments, which have determined that dusky and sandbar sharks are overfished with overfishing occurring, the status is unknown for the Atlantic blacktip shark population, and porbeagle sharks are likely overfished. In addition, the 2005/2006 LCS stock assessment determined it is inappropriate to assess the LCS complex as a whole, which has been the basis of managing these species since 1993.

264. REEF FISH AMENDMENT 30A FOR GREATER AMBERJACK AND GRAY TRIGGERFISH: TAC ADJUSTMENTS, MEASURES TO END OVERFISHING AND ESTABLISH SFA PARAMETERS

Legal Authority: 16 USC 1801 et seq

Abstract: Greater amberjack are under a rebuilding plan. A 2006 stock assessment (SEDAR 9) concluded the stock is not recovering as projected. It continues to be overfished and is undergoing overfishing. Adjustments to TAC and management measures are needed to end overfishing and bring the recovery of the greater amberjack stock back into compliance with its ten-year rebuilding time frame. Gray triggerfish were determined to be undergoing overfishing based on a 2006 stock assessment (SEDAR 9). Management measures are necessary to end overfishing of gray triggerfish. Additionally, the Council has not yet approved post-Sustainable Fisheries Act (SFA) benchmarks and reference points for gray triggerfish.

266. INDIVIDUAL FISHING QUOTA OMNIBUS V ACTION 2 AND 4: ALLOW LONGLINE POT GEAR IN BERING SEA DURING JUNE; ALLOW MOBILIZED MILITARY PERSONNEL TO MAKE TEMPORARY INDIVIDUAL FISHING QUOTA TRANSFERS

Legal Authority: 16 USC 1801

Abstract: The regulatory action amends existing commercial fishing regulations at 50 CFR part 679. The amendment would enhance the management of the halibut and sablefish Individual Fishing Quota (IFQ) fisheries, as well as the sablefish Community Development Quota (CDQ) fishery. In June 2006, the North Pacific Fishery Management Council recommended a suite of four amendments to the halibut and sablefish IFQ fishery regulations, otherwise known as OMNI V. This proposed action addresses Action 2 and Action 4 of the Council's proposed regulatory amendments. The action would amend regulations to (1) Allow the use of longline pot gear in the Bering Sea sablefish IFQ and CDQ

DOC—NOAA

Completed Actions

fisheries during the month of June; and (2) allow the temporary transfer of IFQ held by mobilized reservists and guardsmen.

267. FRAMEWORK ADJUSTMENT 19 TO THE ATLANTIC SEA SCALLOP FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801

Abstract: Framework 19 would establish management measures for the scallop fishery for the 2008 and 2009 fishing years. It will include measures to implement new management measures developed and implemented under Amendment 11 to the Scallop FMP, if approved. Management measures in Framework 19 would include scallop days-at-sea and trip allocations, new area closures and/or access areas, and allocations for scallop fishing in the groundfish closed areas. It would also include improvements to some current management measures to make management of the scallop fishery more efficient and effective.

268. AMENDMENT 89 TO THE FISHERY MANAGEMENT PLAN FOR THE BERING SEA; BERING SEA HABITAT CONSERVATION MEASURES

Legal Authority: 16 USC 1801 et seq

Abstract: This regulatory amendment would implement Amendment 89 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area. The regulations would prohibit nonpelagic trawling in certain areas of the Bering Sea subarea to protect bottom habitat and certain nearshore bottom habitat areas that provide subsistence resources. The amendment also would provide for a Northern Bering Sea research area where the effects of nonpelagic trawling may be studied.

270. REVISE REGULATIONS TO EXEMPT CERTAIN GROUND FISH CATCHER-PROCESSORS AND MOTHERSHIPS FROM CHECK-IN/CHECK-OUT REQUIREMENTS WITH ACTIVE VESSEL MONITORING SYSTEMS (VMS)

Legal Authority: 16 USC 1801 et seq

Abstract: This regulatory amendment would exempt groundfish catcher-processors (CPs) and motherships carrying a transmitting vessel monitoring system (VMS) unit from check-in and check-out requirements in Alaska Region groundfish fishing regulations. The current check-in/out regulation requires CPs and motherships to submit check-in/out reports before they deploy gear in, or begin to process fish from, Federal management areas off Alaska. Additional reports are required for the use of additional gears, or for changes in the status (e.g., community development quota, exempted permit) of the fish being targeted. For many years the Alaska Region has required groundfish CPs and mothership vessels to file check-in check-out reports. This information was used for in-season management. However, in recent years new sources of information have become available, such as VMS, which make check in/out reports unnecessary.

This action is expected to reduce industry costs by about \$60,000 per year and to reduce public administrative costs by about \$40,000 per year. This rule is not anticipating additional costs.

271. FRAMEWORK ADJUSTMENT 5 TO THE MONKFISH FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: Framework Adjustment 5 to the Monkfish FMP will update the biological reference points in the Monkfish FMP to be consistent with the most recent monkfish stock assessment (i.e., July 2007 Northeast Data Poor Stocks working Group). In addition, this action will reduce carryover days-at-sea (DAS); eliminate a provision that allows gillnet vessels to land monkfish on trips less than 3-hours and only be charged for the actual time fished; establish a restrictive monkfish incidental catch limit for vessels that are fishing in the Southern New England Regulated Mesh Area (as defined under the Northeast Multispecies FMP) east of 72 degrees 30 feet west longitude; and eliminate the requirement to obtain a letter of authorization to fish in the Northern Fishery Management Area for vessels that are using a vessel monitoring system.

272. AMENDMENT 26 TO THE FISHERY MANAGEMENT PLAN FOR BERING SEA/ALEUTIAN ISLANDS KING AND TANNER CRABS

Legal Authority: 16 USC 1801 et seq

Abstract: Amendment 26 to the FMP would amend the FMP to exempt quota share issued to crew members, and the

annual harvest privileges derived from that quota share, from requirements for: delivery to specific processors; delivery within specific geographic regions; and participation in an arbitration system to resolve price disputes. This action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act, the FMP, and other applicable law.

273. ATLANTIC HIGHLY MIGRATORY SPECIES (HMS); RENEWAL OF ATLANTIC TUNAS LONGLINE LIMITED ACCESS PERMITS (LAPS); ATLANTIC SHARK IDENTIFICATION WORKSHOP ATTENDANCE REQUIREMENTS

Legal Authority: 16 USC 1801 et seq

Abstract: This rule would amend the regulations governing the renewal of Atlantic tunas longline LAPs, and workshop attendance requirements for businesses issued Atlantic shark dealer permits. Specifically, these regulatory changes would allow for the renewal of Atlantic tunas longline LAPs that have been expired for more than one year, if an otherwise qualified permit holder has maintained their associated swordfish and shark LAPs through timely renewal. Also, the rule would modify the Atlantic Shark Identification Workshop attendance requirements for businesses issued Atlantic shark dealer permits that have more than one dealer location listed on their permit. The regulations would specify that a dealer must submit a Atlantic Shark Identification Workshop certificate (dealer or proxy) for each place of business where Atlantic sharks are received, rather than from each location listed on their dealer permit.

RIN: 0648-AW46

274. APPROVAL OF ELIMINATOR TRAWL GEAR FOR SPECIAL MANAGEMENT PROGRAMS; NORTHEAST MULTISPECIES FISHERY

Legal Authority: 16 USC 1801

Abstract: This action would authorize the use of the 'eliminator trawl' gear for use in two special management programs of the Northeast Multispecies Fishery. The Northeast Multispecies Fishery Management Plan (FMP) specifies a procedure for approval of additional gear for two of the Special Management Programs (Eastern U.S./Canada Haddock Special Access Program and Regular B Days-at-Sea Program). At the request of the New England Fishery Management Council (Council), the Regional Administrator may authorize additional gear if, based upon an experiment, the gear satisfies existing standards. On February 13, 2008, the Council sent a letter to the National Marine Fisheries Service (NMFS) requesting that it authorize the proposed trawl gear. Based upon a preliminary review of the experimental data, the proposed eliminator trawl net meets one of the current gear standards. The implementation of new gear requirement would provide another option for vessels fishing in these Special Management Programs, which could provide additional flexibility for the industry. Further, authorization of the net would enhance industry and NMFS efforts to reduce bycatch in the FMP.

276. • FRAMEWORK ADJUSTMENT 6 TO THE MONKFISH FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: The proposed action would eliminate the backstop provision adopted in Framework 4. This provision would have adjusted, and potentially closed, the directed monkfish fishery in 2009 if the monkfish landings in the 2007 fishing year (FY) exceeded the target total allowable catch (TTAC). Available landings information for FY 2007 indicates that the TTAC will be exceeded by 30 percent in the Southern Fishery Management Area. Given the most recent information on the status of the monkfish stocks, and the expected minimal biological impact of a 30-percent TTAC overage on stock status, based on the revised reference points established through the recently implemented Framework Adjustment 5 to the FMP (73 FR 22831; April 28, 2008), the backstop provision is deemed no longer necessary.

277. RIGHT WHALE SHIP STRIKE REDUCTION

Legal Authority: 16 USC 1361

Abstract: These regulations would establish speed restrictions to reduce the number of deaths to North Atlantic right whales as a result of collisions

with vessels, which account for more confirmed right whale deaths than any other anthropogenic cause. Speed restrictions would be limited to areas and times when North Atlantic right whales and ships overlap to reduce the likelihood of ship strikes to the extent practicable.

Proposed Rule Stage

280. • FISCAL YEAR 2009 REVISION OF REQUEST FOR CONTINUED EXAMINATION, 18-MONTH PUBLICATION, AND OTHER MISCELLANEOUS COST-RECOVERY PATENT FEES

Legal Authority: 35 USC 2(b)(2); 35 USC 41(d); 35 USC 132(b)

Abstract: The USPTO is proposing to revise the rules of practice to adjust the fee or set a fee for certain processes and services for which the USPTO is required to set a cost-recovery fee. The USPTO is specifically proposing to adjust the fee for a request for continued examination, 18-month

publication, and a certificate of correction (applicant's mistake) fee, and set a fee for requesting a corrected republication of a patent application publication. The rules of practice currently do not set a fee, or do not set a fee that recovers the USPTO's costs, for these processes or services. The USPTO is proposing to adjust or set these fee amounts such that they more accurately reflect the Office costs for these processes or services.

Final Rule Stage

281. EXAMINATION OF PATENT APPLICATIONS THAT INCLUDE CLAIMS CONTAINING ALTERNATIVE LANGUAGE

Legal Authority: 35 USC 2(b)(2)

Abstract: The U.S. Patent and Trademark Office (Office) is considering revising the rules of practice to address Markush-type and other claims written so as to claim an invention in the alternative. The search and examination of Markush-type and other claims written in the alternative generally consume a disproportionate amount of Office resources as compared to other types of claims, because these claims can encompass multiple independent and distinct inventions and determining the patentability of such a claim may require a separate examination of each of the alternatives within the claim. The Office anticipates that requiring applicants who choose this claim-drafting format to ensure a certain degree of relatedness among the

members of a Markush group or the alternatives presented in the claims will allow the Office to do a better, more thorough and reliable examination of Markush-type and other claims written in the alternative.
