Regional Longleaf Pine Restoration Initiative and Fuels Management

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 8,975,000

Project Summary: These are programs of work that will be carried out on State and Private Lands. Specific projects have not yet been selected.

State(s): Alabama, Florida, Georgia, North Carolina, South Carolina

County(s): *Alabama:* Autauga County; Baldwin County; Barbour County; Bibb County; Blount County; Bullock County; Butler County; Calhoun County; Chambers County; Cherokee County; Chilton County; Choctaw County; Clarke County; Clay County; Cleburne County; Coffee County; Colbert County; Conecuh County; Coosa County; Covington County; Crenshaw County; Cullman County; Dale County; Dallas County; DeKalb County; Elmore County; Escambia County; Etowah County; Fayette County; Franklin County; Geneva County; Greene County; Hale County; Henry County; Houston County; Jackson County; Jefferson County; Lamar County; Lauderdale County; Lawrence County; Lee County; Limestone County; Lowndes County; Macon County; Madison County; Marengo County; Marion County; Marshall County; Mobile County; Monroe County; Montgomery County; Morgan County; Perry County; Pickens County; Pike County; Randolph County; Russell County; Saint Clair County; Shelby County; Sumter County; Talladega County; Tallapoosa County; Tuscaloosa County; Walker County; Washington County; Wilcox County; Winston County

Florida: Alachua County; Baker County; Bay County; Bradford County; Brevard County; Broward County; Calhoun County; Charlotte County; Citrus County; Clay County; Collier County; Columbia County; DeSoto County; Dixie County; Duval County; Escambia County; Flagler County; Franklin County; Gadsden County; Gilchrist County; Glades County; Gulf County; Hamilton County; Hardee County; Hendry County; Hernando County; Highlands County; Hillsborough County; Holmes County; Indian River County; Jackson County; Jefferson County; Lafayette County; Lake County; Lee County; Leon County; Levy County; Liberty County; Madison County; Manatee County; Marion County; Martin County; Miami-Dade County; Monroe County; Nassau County; Okaloosa County; Okeechobee County; Orange County; Osceola County; Palm Beach County; Pasco County; Pinellas County; Polk County; Putnam County; Saint Johns County; Saint Lucie County; Santa Rosa County; Sarasota County; Seminole County; Sumter County; Suwannee County; Taylor County; Union County; Volusia County; Wakulla County; Walton County; Washington County

Georgia: Appling County; Atkinson County; Bacon County; Baker County; Baldwin County; Banks County; Barrow County; Bartow County; Ben Hill County; Berrien County; Bibb County; Bleckley County; Brantley County; Brooks County; Bryan County; Bulloch County; Burke County; Butts County; Calhoun County; Camden County; Candler County; Carroll County; Catoosa County; Charlton County; Chatham County; Chattahoochee County; Chattooga County; Cherokee County; Clarke County; Clay County; Clayton County; Clinch County; Cobb County; Coffee County; Colquitt County; Columbia County; Cook County; Coweta County; Crawford County; Crisp County; Dade County; Dawson County; DeKalb County; Decatur County; Dodge County; Dooly County; Dougherty County; Douglas County; Early County; Echols County; Effingham County; Elbert County; Emanuel County; Evans County; Fannin County; Fayette County; Floyd County; Forsyth County; Franklin County; Fulton County; Gilmer County; Glascock County; Glynn County; Gordon County; Grady County; Greene County; Gwinnett County; Habersham County; Hall County; Hancock County; Haralson County; Harris County; Hart County; Heard County; Henry County; Houston County; Irwin County; Jackson County; Jasper County; Jeff Davis County; Jefferson County; Jenkins County; Johnson County; Jones County; Lamar County; Lanier County; Laurens County; Lee County; Liberty County; Lincoln County; Long County; Lowndes County; Lumpkin County; Macon County; Madison County; Marion County; McDuffie County; McIntosh County; Meriwether County; Miller County; Mitchell County; Monroe County; Montgomery County; Morgan County; Murray County; Muscogee County; Newton County; Oconee County; Oglethorpe County; Paulding County; Peach County; Pickens County; Pierce County; Pike County; Polk County; Pulaski County; Putnam County; Quitman County; Rabun County; Randolph County; Richmond County; Rockdale County; Schley County; Screven County; Seminole County; Spalding County; Stephens County; Stewart County; Sumter County; Talbot County; Taliaferro County; Tattnall County; Taylor County; Telfair County; Terrell

County; Thomas County; Tift County; Toombs County; Towns County; Treutlen County; Troup County; Turner County; Twiggs County; Union County; Upson County; Walker County; Walton County; Ware County; Warren County; Washington County; Wayne County; Webster County; Wheeler County; White County; Whitfield County; Wilcox County; Wilkes County; Wilkinson County; Worth County

North Carolina: Alamance County; Alexander County; Alleghany County; Anson County; Ashe County; Avery County; Beaufort County; Bertie County; Bladen County; Brunswick County; Buncombe County; Burke County; Cabarrus County; Caldwell County; Camden County; Carteret County; Caswell County; Catawba County; Chatham County; Cherokee County; Chowan County; Clay County; Cleveland County; Columbus County; Craven County; Cumberland County; Currituck County; Dare County; Davidson County; Davie County; Duplin County; Durham County; Edgecombe County; Forsyth County; Franklin County; Gaston County; Gates County; Graham County; Granville County; Greene County; Guilford County; Halifax County; Harnett County; Haywood County; Henderson County; Hertford County; Hoke County; Hyde County; Iredell County; Jackson County; Johnston County; Jones County; Lee County; Lenoir County; Lincoln County; Macon County; Madison County; Martin County; McDowell County; Mecklenburg County; Mitchell County; Montgomery County; Moore County; Nash County; New Hanover County; Northampton County; Onslow County; Orange County; Pamlico County; Pasquotank County; Pender County; Perquimans County; Person County; Pitt County; Polk County; Randolph County; Richmond County; Robeson County; Rockingham County; Rowan County; Rutherford County; Sampson County; Scotland County; Stanly County; Stokes County; Surry County; Swain County; Transylvania County; Tyrrell County; Union County; Vance County; Wake County; Warren County; Washington County; Watauga County; Wayne County; Wilkes County; Wilson County; Yadkin County; Yancey County

South Carolina: Abbeville County; Aiken County; Allendale County; Anderson County; Bamberg County; Barnwell County; Beaufort County; Berkeley County; Calhoun County; Charleston County; Cherokee County; Chester County; Chesterfield County; Clarendon County; Colleton County; Darlington County; Dillon County; Dorchester County; Edgefield County; Fairfield County; Florence County; Georgetown County; Greenville County; Greenwood County; Hampton County; Horry County; Jasper County; Kershaw County; Lancaster County; Laurens County; Lee County; Lexington County; Marion County; Marlboro County; McCormick County; Newberry County; Oconee County; Orangeburg County; Pickens County; Richland County; Saluda County; Spartanburg County; Sumter County; Union County; Williamsburg County; York County

Alabama Mechanical Fuels Treatment

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,338,000

Project Summary: Over the past 10 years, catastrophic events such as hurricanes, tornados, drought, and Southern Pine Beetle infestations have threatened the National Forests in Alabama and surrounding communities. Large areas of standing and downed trees have increased fuel loads dramatically causing concerns for public safety and forest health. Hazardous fuel accumulations will be reduced by cutting, mulching, or removing down and dead vegetation in various stands covering over 1,300 acres, thereby decreasing the risk of fire danger. Project work will be conducted on national forest lands located in Cleburne, Clay, Calhoun, Lawrence, Winston, Talladega, Covington and Escambia counties. Jobs created will assist the Forest Service, Alabama Forestry Commission, and Natural Resources Conservation Service in doing more wildland fire management projects. Successful implementation will create jobs that will move land management agencies closer to reducing wildfire threats and improve forest health. Once these hazardous fuels are removed, forest managers will then be able to apply prescribed fire safely in these areas to restore natural plant communities.

State(s): Alabama

Auburn HVAC Repair, Energy Upgrade, and LEED for Existing Buildings Certification

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 550,000

Project Summary: Jobs will be created by this \$550,000 project to replace the laboratory's antiquated and failing HVAC system and make the facility a model for energy efficiency. The Southern Research Station has completed 60 percent of the LEED for Existing Buildings' certification process, as established by the U.S. Green Building Council, for the 23,340 square foot facility. These updates include retro-commissioning, water reduction measures, waste management and recycling programs, and storm water management projects for LEED-EB. The project will replace major components of the 38-year-old system and will add new fresh air economizers and a new direct digital control system. The project will create an estimated energy savings of 35 percent. The G.W. Andrews Forestry Sciences Laboratory will be the first LEED-EB certified facility in the Forest Service inventory. The research engineers are documenting the LEED-EB process and will publish a guide to help other FS facilities achieve LEED-EB certification.

MatSu CWPP Wildfire Mitigation

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,436,000

Project Summary: These are programs of work that will be carried out on State and Private Lands. Specific projects have not yet been selected.

State(s): Alaska

County(s): Matanuska-Susitna Borough

Kenai Borough Spruce Bark Beetle Mitigat.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,795,000

Project Summary: These are programs of work that will be carried out on State and Private Lands. Specific projects have not yet been selected.

State(s): Alaska

County(s): Kenai Peninsula Borough

Hope Area Project Fuels Treatment - Thin and Pile.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 875,000

Project Summary: An estimated 1 million acres on Alaska's Kenai Peninsula are infested with spruce bark beetle. This has resulted in vast amounts of dead and dying spruce trees, especially near the town of Hope, Alaska. The increasing numbers of dead and dying trees has resulted in extreme risk of wildfire to this and other communities. This hazardous fuels reduction project is located along the Hope Highway, which is the only means out of the communities of Hope and Sunrise in the event of a wildfire. Several units in this project were identified in the Hope-Sunrise-Summit Community Wildfire Protection Plan. This is a collaborative effort involving residents from these communities. This project will remove dead spruce, thin stands to improve tree resistance to insect attack, and pile and burn debris. Workers will replace fire prone spruce with fire-resistant birch. All of these improvements will help protect these communities. Seven-hundred acres will be treated.

State(s): Alaska

County(s): Kenai Peninsula Borough

Cooper Lake Fuels Treatment - Thin and Pile

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 270,000

Project Summary: An estimated 1 million acres on Alaska's Kenai Peninsula are infested with spruce bark beetle. This has resulted in vast amounts of dead and dying spruce trees. The combination of dead and dying trees with limited access and evacuation routes has resulted in extreme risk of wildfire to Cooper Landing, Alaska. This hazardous fuels reduction project has been identified in the Cooper Landing Community Wildfire Protection Plan. The plan is a collaborative effort involving citizen volunteers and federal, state, borough, and municipal representatives. This project will remove dead spruce, thin stands to improve tree resistance to insect attack, and pile and burn debris. These actions will help protect the community from future wildfires by treating the 200 acres identified in this project.

State(s): Alaska

County(s): Kenai Peninsula Borough

Fairbanks North Star Borough & Yukon-Koyukuk Area Hazardous Fuels Reduction

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,500,000

Project Summary: Grant provided to Alaska Division of Forestry for Fairbanks North Star Borough for hazardous fuels reduction. The work will be in the Washington Creek, Salcha and South Fork Chena river drainages. Local work crews will thin forests by hand and mechanical means. Local rural village crews in the Yukon-Koyukuk area will thin black spruce and mixed hardwoods for 200 feet around homes and village infrastructure facilities, as well as construct firebreaks in areas identified with hazardous fuels buildups. The villages of Ruby, Venetie, Bettles/Evansville, Stevens Village, and Allakaket will benefit from the fuels reduction work. Many of these communities are so remote there are no connecting roads to other towns. This will provide much-needed jobs to small communities where unemployment is very high.

Partners: Alaska Department of Natural Resources, Division of Forestry

State(s): Alaska

County(s): Fairbanks North Star Borough; Yukon-Koyukuk Census Area

Tongass Road Repair, Closure, and Fish Stream Improvement in Southeast Alaska

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,450,000

Project Summary: The roadwork will repair roads, clean culverts, brush roadsides, and resurface roads with crushed rock over 18 miles of high public use roads. This will occur south of Petersburg. The work will provide safer driving surfaces and reduce erosion into high value salmon streams critical to support of subsistence, charter, sport and the commercial fishing industry. Subsistence is living from the land and streams. It is critical for residents in rural villages in Alaska. This project will reduce future costs of transportation maintenance. The Forest Service can focus on other critical community access needs to the national forests in this economically depressed area. This project also includes the temporary closure of several miles of road on the False Island road system 45 miles south of Hoonah on Chichagof Island. It will rehabilitate 38 miles of roads and remove up to 120 deficient culverts and 10 blocked fish crossings. This will restore fish streams, wetlands and reconnect disrupted wildlife corridors.

State(s): Alaska

County(s): Skagway-Hoonah-Angoon Census Area

Alaska Public and Administrative Facilities Reconstruction and Maintenance

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 985,000

Project Summary: These projects support a wide variety of activities, including brown bear viewing, subsistence, and health and safety. Subsistence is living from the land and streams. It is critical for residents in rural villages in Alaska. These projects will stabilize failing structures, establish code compliance, and repair buildings. At Anan Creek is the second most heavily visited bear viewing site in southeast Alaska. The project replaces the float system that supports the living quarters for employees who provide visitor services to the site. In Hoonah, a cabin will be replaced using locally manufactured wood products supporting an emerging market. This will provide much needed jobs and training for the economically depressed native community. In Cordova, the project replaces deteriorated siding on three buildings at the Cordova Work Center. At the Kenai Lake Work Center, the project provides replacement of an existing fuel storage building. The existing building is deteriorated and does not meet current codes. New, prefabricated building will meet all codes and prevent environmental contamination.

State(s): Alaska

County(s): Skagway-Hoonah-Angoon Census Area

Arizona

White Mountain Apache Tribe Nursery Development for Post-Fire Rehabilitation

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

WHITE MOUNTAIN STEWARDSHIP

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 2,417,000

Project Summary: The White Mountain Stewardship Contract is the first, large, 10-year stewardship contract in the nation and is significant due to its emphasis on large-scale forest restoration activities that result in healthier forests, enhanced rural development, and the utilization of previously unmarketable small diameter trees. It facilitates the development of a woods products industry better suited to market the excessive number of small-diameter and some larger trees on the national forests. The new contract has resulted in the smaller trees being used for various uses such as power-generation, lumber, pallets and manufacturing of wood pellets. The need is to increase the number of acres the Forest Service can offer to meet current market demand for fiber. This will not only create new jobs by permitting more treatments, but also prevent the loss of jobs as the Forest is currently unable to meet local market fiber demands. This request is for the treatment of 3,200 acres.

State(s): Arizona

County(s): Apache County; Navajo County

ApacheZone Recreation Hazard Tree

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 132,000

Project Summary: The recent drought conditions throughout the west have had devastating impacts on forest vegetation across the landscape and within highly used recreation facilities. Combinations of drought, insects and disease have killed several hundred trees and weakened many more to the point that they have become hazards to the many visitors staying on Forest Service recreation sites. This project is needed to mitigate the hazard of these dangerous trees within several sites across the Alpine and Springerville Ranger Districts. Site visits from specialists trained in hazard tree identification and from the Rocky Mountain Research Station have identified many of these hazard trees and alerted Forest Service managers of the need and work required to reduce potential hazards. This work will reduce the likelihood of damage to recreation infrastructure and the possibility of injury to visitors. The project is located in one of the most economically depressed counties in Arizona, Apache County, and local contractors will be used to stimulate the economy.

State(s): Arizona

County(s): Apache County

Bundled White Mountain Stewardship Contract Task Orders

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 5,000,000

Project Summary: The White Mountain Stewardship Contract is the first, large, 10-year stewardship contract in the nation and is significant due to its emphasis on large-scale forest restoration activities that result in healthier forests, enhanced rural development, and the utilization of previously unmarketable small diameter trees. It facilitates the development of a woods products industry better suited to market the excessive number of small-diameter and some larger trees on the national forests. The new contract has resulted in the smaller trees being used for various uses such as power-generation, lumber, pallets and manufacturing of wood pellets. The need is to increase the number of acres the Forest Service can offer to meet current market demand for fiber. This will not only create new jobs by permitting more treatments, but also prevent the loss of jobs as the Forest is currently unable to meet local market fiber demands. This request is for the treatment of 7,625 acres.

State(s): Arizona

County(s): Apache County

White Mountain Apache Forest Service TFPA Project

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,000,000

Project Summary: The White Mountain Apache Tribe (WMAT) is facing 80% unemployment due, in part, to the devastating effects of the 500,000 acre Rodeo-Chedeski Fire. The Apache-Sitgreaves Forest is in need of fuels reduction, restoration and replanting work as a result of the same fire. The Tribal Forest Protection Act provides the authority for the WMAT to do work on National Forest System administered lands in order to restore those lands and protect adjacent tribal lands. Acres treated, restored and planted will be approximately 1,000 acres. Navajo county, a distressed county, particularly affecting Tribal members, will benefit as the economic activity will result in a direct and immediate impact. The treatment outcome will be the reduction in hazardous fuels that border the two lands, Forest Service and Tribal. Also tribal members will receive valuable experience and skills enhancement at the end of this employment period.

Partners: White Mountain Apache Tribe

State(s): Arizona

County(s): Apache County

R-C Reforestation Site Preparation

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 525,000

Project Summary: The Apache-Sitgreaves Forest is in need of fuels reduction, restoration and replanting work as a result of the devastating effects of the 500,000 acre Rodeo-Chedeski Fire. This project would reduce fuels on 4,000 acres in preparation for future reforestation. This contract would be implemented under a forest wide IDIQ contract that was developed last fall. Seventeen contractors tendered bids on various service items. The long term benefits of restoration will be improved forest health, watershed stability and increased recreation opportunities. The majority of the treatments would be within Navajo county, a stressed county, which will benefit greatly from the economic activity. The Forest has reforested 1600 acres within the fire perimeter partnering with White Mountain Apache Tribe, the Navajo Nation, Salt River Project (utility), Super Bowl (football), Arizona Diamondbacks (baseball) and National Arbor Day Foundation. At the conclusion of the treatments, the Forest envisions 4,000 acres across the fire landscape ready for reforestation.

State(s): Arizona

County(s): Coconino County; Navajo County

Rim Country Wildland Urban Interface (WUI) Hazardous Fuels Treatment

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 3,125,000

Project Summary: The Rim Community WUI Treatment is located on the Tonto National Forest in Gila County, Arizona. This project consists of six treatment areas within the WUI along the Mogollon Rim. The project will treat approximately 7,933 acres, primarily within the ponderosa pine vegetative type. Implementing this hazardous fuels reduction project will reduce the risk of wildfire to 13 communities and support the restoration of fire-dependent ecosystems. These communities have been threatened by several large wildfires over the past 10 years and are very supportive of all efforts to reduce the risk from catastrophic wildfire.

State(s): Arizona

County(s): Gila County

Hoyer Campground Reconstruction

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,230,000

Project Summary: Hoyer Campground is on the Apache-Sitgreaves National Forest in Apache County, Arizona. The project provides additional economic benefit of sustaining tourism in one of the highest unemployment counties in Arizona. This project replaces 30-year-old, non-accessible flush toilets with accessible vault toilets and associated site work necessary for accessibility. It also provides reconstruction of a road system for the campground. Hoyer Campground is located 20 minutes from the recreation and tourism-dependant towns of Eagar and Springerville, Arizona and 5 minutes from Greer, Arizona.

State(s): Arizona

County(s): Apache County

California

Airborne remote sensing and fuels mapping to target fuels reduction projects

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 800,000

Project Summary: The FireMapper thermal-imaging radiometer has been under development by the Forest Service Pacific Southwest Research Station (PSW) and its partners for several years. It provided rapid response fire intelligence in support of fire suppression operations on several large fires, including the Poomacha, Corral, Harris, Rice, Slide, and Santiago fires, during Santa Ana wind events in 2007. PSW also imaged the Summit, Basin, Indian, Clover, Oliver, North Mountain, and Piute fires during the California fire emergency in June and early July 2008. Thermal-infrared images were transmitted by satellite communications from the PSW Airborne Sciences Aircraft; assembled into mosaics; and displayed in near-real time at <http://www.fireimaging.com/> for use by incident management teams. The same technology can be used to map forest health conditions and forest mortality. The forest condition maps will help the forest health community with an important layer of information for their fuels management decisions.

County(s): Riverside County; San Bernardino County

Hazardous Fuels Mitigation.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 3,970,000

Project Summary: The current drought in California coupled with vast landscapes of trees killed by insects, and thousands of acres of old decadent chaparral brush has created hazardous fuels buildup throughout the State. Contiguous buildup of dead and dying vegetation can lead to large, dangerous and expensive wildfires that can be harmful to Forest watersheds and threaten surrounding communities. This project will help reduce the size and scale of forest fires by clearing brush along roads and fire lines, and removing dead trees in areas where they create an unnatural fuel buildup. The fuel breaks created will help slow the rate of spread of wildfires and provide places for firefighters to take a stand in fighting fires. The wood biomass byproduct will help support wood-to-energy industry in the Sierra Nevada region of the State.

State(s): California

County(s): Fresno County; Kern County; Monterey County; San Luis Obispo County; Santa Barbara County; Sierra County; Ventura County

Regionwide Fuels Reduction and Urban Tree Planting Projects

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 6,012,000

Project Summary: These are programs of work that will be carried out on State and Private Lands. Specific projects have not yet been selected.

Hazardous Fuels Reduction Project

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 10,700,000

Project Summary: This project is a continuation of work currently funded through the American Recovery and Reinvestment Act. One part of the project will ensure the sustainability of critical small business saw mills in the Southern Sierras. Grants and contracts will be provided to support removal and utilization of wood/biomass material from National Forest lands to support these mills. Another part of this project is an integrated project in Northern California involving fuel reduction work near communities, recreation facilities, and access routes by the California (Youth) Conservation Corps and private sector contractors. The work also includes addressing long standing facility maintenance needs.

Partners: California Conservation Corps

State(s): California

County(s): Shasta County; Siskiyou County; Trinity County; Tulare County; Tuolumne County

Humboldt-Toiyabe NF- California

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,711,000

Project Summary: This project will reduce hazardous fuels in forested areas that experience frequent wildfires

and complete needed surveys in wildland urban interface areas (WUI). In Mono County, located in the Eastern Sierra, a 300-acre fuels reduction project will occur in Lahontan cutthroat trout habitat, a threatened species under the Endangered Species Act. In Sierra County, next to Washoe County in Nevada, around 250-to-300 acres of fuels will be reduced in an area that receives heavy dispersed recreation and provides deer winter range; project work is adjacent to a larger, Forest Service fuels reduction project. These activities in Mono and Sierra Counties will thin smaller trees in low-elevation Jeffrey pine forests - wildfires have converted forested land to brush fields. Boundary surveys will also be completed in Alpine and Mono Counties. Establishing property boundaries in the wildland interface is a critical step to complete project implementation. Benefits from the project include protection of threatened species habitat, deer habitat, provide information for future hazardous fuels reduction and create needed jobs in high unemployment counties.

Partners: Washoe county partners: Nevada department of Forestry and Washoe County.

State(s): California

County(s): Alpine County

Region-wide Fuels Reduction Project

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,500,000

Project Summary: This project involves hazardous fuel reduction work on the Shasta-Trinity and Stanislaus National Forests and a transportation grant to Sierra Forest Products. On the Shasta-Trinity, fire-prone vegetation is being removed around popular campgrounds, administrative field offices, recreation residence tracts, and along popular trails and forest roads. The work is being accomplished by local Youth Corps crews. On the Stanislaus, the work involves a contract for thinning stands on 2700 acres. These stands were planted after the devastating 1973 Granite Fire and have become overly dense with vegetation, creating a fire risk and unhealthy watershed conditions. By thinning the stands to reduce fuel ladders and the number of trees per acre, the remaining trees will be healthier and more resistant to the effects of drought, insects and disease and wildfires. Sierra Forest Products, is a local small business sawmill located in Terra Bella, CA. The transportation grant funds will be used to transport small sawlogs from the Granite fuels project to assist the mill sustain jobs and remain in business.

Partners: California Conservation Corps; Silverthorne Recreation Residence Association; Mule Deer Foundation; California Deer Association; Central Sierra Environmental Resource Center; Summerville High School

San Joaquin Barracks Repair and Restoration

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 2,269,000

Project Summary: The San Joaquin Experimental Range (SJER) facility is an historic adobe structure that is in need of repair and restoration to provide safety and working conditions for scientists and collaborators. SJER has been key to the development of sustainable grazing systems in California's oak woodland savannas. Recently, research has expanded to include watershed management related to water quality and watershed stability, wildland and plant ecology, species biodiversity, and climate change research.

Arcata Forest Science Lab Seismic and Safety Retrofit

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 825,000

Project Summary: The Arcata Forest Science Lab has been undergoing seismic upgrade. One pending plan is to build out and retrofit the third floor to be used as the library and meeting rooms. In addition, the heating and air circulation systems upgrade is included in this work. The project provides jobs for local contractors and construction workers.

County(s): Humboldt County

Riverside Lab Improvements

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,150,000

Project Summary: The Riverside Fire Laboratory has three Forest Service owned buildings that house about 60 research employees and research equipment. Repairs to the roofs and replacement windows and doors with energy efficient ones will protect the buildings from winter weather, save energy, and improve the work environment. The project will provide immediate employment to construction roofing crews and building retrofit businesses in the surrounding area.

Partners: Universities, Region 5, International research community

State(s): California

County(s): Riverside County

Dinkey Mills Barracks Construction

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,300,000

Project Summary: The Sierra Nevada Research Center of PSW is collaborating closely with the Sierra National Forest (Region 5) on a number of science and management projects including the Teakettle Experimental forest, the Kings River Experimental Watershed and wildlife monitoring. The Forest is closing several sites and consolidating them at the Dinkey Mills site. PSW needs barracks at this site to accommodate field crews and collaborators and provide access to conduct field work. The investment will build two barracks and pay for the associated infrastructure needs. The barracks will house field crews that will be recruited from local communities.

Partners: Universities, Region 5, Fish and Wildlife Service

State(s): California

County(s): Fresno County

Region-wide Trail Maintenance Project

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 3,750,000

Project Summary: This project involves trail maintenance work on the Angeles, San Bernardino and Sierra National Forests. The trail work includes grooming trail surfaces and tread improvement work, rock removal, repairing or creating erosion control features, removing vegetation such as dangerous tree limbs and brush, graffiti removal, repairing or replacing signs, and trash pickup. Popular motorized and non-motorized trails and trailheads are being repaired throughout these Forests. Some of the trails are in wilderness areas which require more labor intensive work due to the remote location of the trails and the fact that mechanized equipment is not allowed to be used in Wilderness areas. Virtually all the work is being accomplished through agreements with local Youth Corps that employ young adults from some of the most financially distressed areas in the State.

Partners: Los Angeles Conservation Corps (LACC); San Gabriel Conservation Corps (SGCC); Outward Bound Los Angeles (OBLA). ; Economic Opportunity Commission (EOC); Students Conservation Association (SCA); High Sierra Volunteer Trail Crew (HSVTC); Urban Conservation Corps of the San Bernardino National Forest Association; California Conservation Corps

County(s): Fresno County; Los Angeles County; Madera County; Riverside County; San Bernardino County

Region-wide Road Maintenance Projects

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 2,000,000

Project Summary: This project involves road maintenance on the Cleveland, Six Rivers, Sierra, and Stanislaus National Forests. On the Cleveland, damaged road surfaces at campgrounds, fire stations and a district ranger station are being repaired. Much of the old roadbed material is being recycled on-site and used in the new paving. The work is being done by a local small business contractor. On the Six Rivers and Sierra, the project involves roadside brushing on the most popular roads throughout the Forest. The work includes removing and disposing of roadside brush that is creating hazardous driving conditions for forest users. On the Six Rivers, the work is being done through the Northern California Indian Development Council, a private nonprofit corporation that serves the employment and training needs of American Indians residing in Del Norte, Humboldt and Siskiyou counties. On the Stanislaus, the project involves road maintenance on Forest roads being used to transport saw logs and biomass from the Forest to local mills. The work is under contract with a local small business.

Partners: Northern California Indian Development Council (NCIDC); Trinity County Resource Conservation District (TCRCD)

State(s): California

County(s): Fresno County; Madera County; Mariposa County; Riverside County; San Diego County; Siskiyou County; Tuolumne County

Region-wide Facility Improvement Projects

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 2,000,000

Project Summary: This project involves much needed building maintenance work on the Angeles, Eldorado and

San Bernardino National Forests. On the Angeles, the San Gabriel River District Office, a National Historic property, will be repainted and have its leaking roof replaced. At the popular Crystal Lake Recreation Area, the historic restroom building will have its leaking roof replaced and two new 3,000 gallon vault toilets will be installed at the site. In San Dimas Canyon, a popular hiking area, 13 abandoned, dilapidated buildings will be demolished, the materials recycled and the site restored. On the Eldorado, the Placerville Work Center and the popular Echo Summit Ski Lodge will have their leaking roofs replaced. And on the San Bernardino, the Headquarters Office, Interagency Communication Center and Training Center will receive energy retrofits. Outdated windows, heating and ventilation systems and water systems will be replaced with energy efficient, state of the art systems. This will not only help the environment by reducing energy and water consumption, but reduce future operating costs as well.

Veterans Jobs Project

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 500,000

Project Summary: The Forest Service will be putting returning armed forces veterans to work reducing wildland fire potential in and around communities in southwest Colorado. Several locations on the San Juan National Forest will benefit from the work that veteran hand crews will perform. The backdrops to these projects are forested areas adjacent to communities. Veterans will be trained as sawyers and will use chainsaws to cut down dense stands of trees to reduce wildland fire potential for homeowners. A Veterans Green Jobs (VGJ) partnership, in cooperation with the Southwest Conservation Corps (SCC) is designed to support military veterans to become leaders in the emerging green jobs industries. About 350 veterans have already applied to accomplish natural resource conservation and energy audit certification courses through this effort. The intent of ARRA is to create jobs and stimulate the economy. On the San Juan National Forest, many acres of non-mechanical healthy forest treatments will provide employment for veterans in need of jobs and civilian life reintegration and contribute to the improvement of forest health conditions.

Partners: Southwest Conservation Corps; Veterans Green Jobs

Boundary Identification for Fuels Reduction

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 200,000

Project Summary: With work focused on the Pike National Forest, the U.S. Forest Service will be able to accelerate the rate at which it moves closer to meeting the goal of reducing wildland fire risk in the wildland urban interface (WUI) along the Front Range of Colorado. This project will identify National Forest System (NFS) boundaries in support of high priority hazardous fuel reduction projects. It is vital to properly identify NFS lands so that fuel treatments are planned and executed efficiently. The boundary lines also allow adjacent private landowners to complete accurate fuel reduction treatments. This boundary work may also create an opportunity to secure right-of-way easements across private land for removal of woody material from NFS lands and for improved public access. The survey work will be completed through contracts.

County(s): Teller County

Girl Scout/Long John/Ridgewood Stewardship

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 820,000

Project Summary: Records of historic pine forest conditions east of the Continental Divide in Colorado indicate less dense tree stands than currently exist once dotted the landscape. This project's emphasis is removing trees in dense pine timber stands to emulate historic stand conditions. The Forest Service and its partners have the opportunity to treat both National Forest System and adjacent private land to reduce catastrophic wildfire risk and hazard and improve overall forest health around communities and subdivisions in Teller County, Colorado. Within the context of the larger landscape, this coordination of activities will also reduce fire risk and hazard for two critical watersheds that provide water for the Colorado Springs and Denver Metropolitan areas. An additional benefit is making woody biomass available to be mixed with coal as feedstock for a nearby coal power plant. This opportunity reduces transportation costs needed to move the biomass outside of the local area.

Partners: Coalition for the Upper South Platte;Colorado State Forest Service;City of Woodland Park Colorado;Woodland Park Healthy Forest Initiative;Front Range Fuels Treatment Partnership;FRFTP Roundtable

County(s): Teller County

Rocky Mountain Region Bark Beetle and Hazardous Fuels Reduction Projects

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 5,000,000

Project Summary: Several hazardous fuels projects will be completed on three national forests in Colorado. These include using contractors to remove beetle-killed trees along roads on the Routt National Forest in Routt, Jackson and Grand Counties, to clear dead trees that pose public safety risks as well as clear roads of dead trees to enable firefighter access and provide fuel breaks in the event of wildfire. The Rocky Mountain Region has forged a participating agreement with the Colorado Youth Corps Association (CYCA). This provides the framework for the region and its elements to work with the ten accredited Colorado Youth Corp organizations throughout the state in association with projects developed through ARRA. One of those entities, Rocky Mountain Youth Corps, will work directly with the Medicine Bow-Routt National Forest to clear bark-beetle killed trees from campgrounds, picnic areas, trails and trailheads. Several other projects, part of the Front Range Fuels Treatment Partnership,

will remove hazardous fuels on the Arapaho-Roosevelt and Pike-San Isabel National Forests to reduce fire danger in wildland/urban interface in many Front Range counties.

Partners: Colorado Youth Corps Association

County(s):

Fort Collins Lab Improvements

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,543,000

Project Summary: The project will provide functional laboratory space that is energy efficient and more flexible to meet the changing research and technology requirements of Station scientists. The laboratory improvements include the use of solar energy as a source of clean and renewable energy.

State(s): Colorado

County(s): Larimer County

Campground Facilities Replacements and Reconstruction

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 616,000

Project Summary: The Pike-San Isabel National Forest, in southern Colorado, is responding to the number one complaint received from forest visitors by replacing 20 restroom facilities at numerous campgrounds and picnic areas located throughout the forest. Some of the facilities are 50 years old, and in some cases create safety and health concerns. The upgrades are a welcome and much-needed improvement and will result in greater public satisfaction with forest facilities.

Lacota Fuels Mitigation

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 375,000

Project Summary: The western edge of the Ocala National Forest has a mixed landownership pattern of privately owned and public lands managed by the Forest Service. The 1,500 acre project area lies within the wildland urban interface near numerous small communities. The work involved in this project will include mechanical fuels treatment and re-establishment of landlines. Small fuels (brush and palmetto) in the understory adjacent to private land will be reduced utilizing a tractor-mounted mulcher. The landline re-establishment is imperative with the checkerboard ownership pattern in the area to prevent accidental trespass onto adjoining land. The project is located near Highway 40, a major connector between Interstate 75 to Interstate 95. Multiple benefits from this project will include reducing threat of damaging wildfire and facilitating the restoration of Longleaf Pine ecosystem by enabling forest managers to safely use prescribed fire to maintain the area in the future.

State(s): Florida

County(s): Lake County; Marion County; Putnam County

Florida Community Fuels Management Program, Phase 1

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 900,000

Project Summary: Wildland fire protection in Florida has become increasing complex over the years. The influx of new residents, current trend to live in a more natural wooded environment, and alterations in historical water recharge areas have added to the risk and severity of wildfires in the wildland urban interface. On average, 4,000 wildfires burn more than 216,000 acres in Florida each year, and over 13,000 communities are at high to very high risk of damage by wildfire. The Florida Division of Forestry provides fire protection services on over 26 million acres of forest and wildlands statewide. The program funded under this grant is focused on reducing wildland fire damage in at-risk communities across the state by funding hazardous fuels mitigation projects and promoting Firewise educational campaigns to enhance local involvement in protecting communities and structures from wildfire. Hazardous fuels management programs will include contracting for mechanical fuel reduction and additional hazardous fuels treatments by Division of Forestry field unit personnel. Benefits include reduced threat of wildfires and job creation and retention.

Boise & Payette NF Stewardship/Biomass Projects

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 6,138,000

Project Summary: Changes in land uses and fire suppression activities on National Forest System lands have altered the frequency of natural wildland fire in forested stands that historically experienced frequent, low intensity wildland fire. The lack of wildland fire has resulted in an uncharacteristic build-up of vegetation and has increased the risk of catastrophic fires that threaten local communities. The Boise/Payette Project is designed to remove hazardous fuel in forested stands adjacent to our local communities which will lessen the risk of catastrophic wildland fires, and improve overall forest health. The project includes commercial and pre-commercial thinning along with associated slash treatments on approximately 4,200 acres on the Boise NF and 3,800 acres on the Payette NF. Once thinning is complete, 34,100 tons of biomass from the Payette NF will be chipped and used to generate renewable energy, while on the Boise NF 3,000 tons of biomass will be made into various wood by-products. Prescribed fire treatments will be used to dispose of the remaining slash.

County(s): Shoshone County

North Idaho Counties - Hazardous Fuel Reduction on Private Lands

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 2,300,000

Project Summary: This project funds hazardous fuel reduction in the wildland urban interface on private lands in Boundary, Benewah, Bonner and Kootenai counties as identified in the Counties' Wildfire Protection Plans (CWPP). Local wildfire protection plans can take a variety of forms, based on the needs of the people involved in their development and may address issues such as wildfire response, hazard mitigation, community preparedness, or structure protection or all of the above. This project issues grants to the counties, who in turn, would contract for the work to be accomplished. Activities include commercial thinning (carefully selected cut of merchantable timber to thin forests surrounding the communities); intensive treatment of hazardous fuels through labor-intensive hand-cutting; pre-commercial thinning (thinning of young, immature, over-stocked trees); piling and burning of potential fuels; under burning (controlled, low-intensity fire to clear undergrowth) and roadside fuels reduction. Utilization of commercial products and biomass will be provided. We estimate this project will treat fuels on over 2,000 acres surrounding communities, reducing future risk from wildfire.

Caribou-Targhee National Forest Forest-wide Road Reconstruction & Aquatic Passage

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 6,590,000

Project Summary: The Caribou-Targhee National Forest Forestwide Road Reconstruction and Aquatic Passage project contains multiple projects including: Aggregate surface replacement to increase user safety and comfort, and reduce ecologic impacts; Pavement chip seals to improve the driving surface and extend the life of the pavement; Culvert replacement, to improve drainage and provide for aquatic organism passage; Roadside brush removal to improve sight distance & user safety; Parking lot resurfacing to improve user comfort and convenience, and reduce ecologic impacts. All projects are Forest and public priorities that have been under public discussion for years, and are on priority roads and parking lots with extensive public use. Projects are distributed over 8 counties, and will have a positive impact on multiple communities in South East Idaho and Western Wyoming.

Fuels for Forest Health

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,145,000

Project Summary: This project is a preventative hazardous fuels reduction and forest health measure to thin portions of the forest to resist attacks by Gypsy Moths and other forest pests and to reduce the buildup of hazardous fuels from dead trees that succumb to insect invasions. Various stands of timber scattered across the forest have been identified for thinning. Across the treated areas, healthier trees would be favored to keep, especially species most valuable for wildlife and timber. Other trees would be removed by crews with hand tools or herbicides to promote forest health. Healthier forests are more resistant to insect and disease attacks. Some of the material cut down during the thinnings could be available for firewood permits. By thinning these stands and reducing the available fuels, the stands will be more resistant to damaging wildfire.

Land Between the Lakes Roads to Recovery

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 500,000

Project Summary: The devastating ice storm that hit Kentucky and Tennessee in January 2009 closed hundreds of miles of roads at Land Between the Lakes National Recreation Area. Re-opening these key access routes was a vital part of maintaining the local tourism industry, which is a mainstay of the regional economy. This project involved clearing roads to campgrounds and recreation sites, opening access routes to popular lakes, and removing debris from roadways that provided entry to neighboring cemeteries and agricultural fields. Local logging crews and contractors were hired to quickly open roads that had been closed from trees brought down in the ice storm. Without funding from the American Reinvestment and Recovery Act, the widespread damage to roadways throughout the region would have made it unlikely that repairs could have been completed in time to open access to recreation facilities for the current tourism season, causing more hardship to local communities already economically distressed and hit hard by recent plant and retail closings.

State(s): Kentucky

County(s): Lyon County; Trigg County

Land Between the Lakes Recreation Facilities and Industry Recovery

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 2,000,000

Project Summary: The Land Between the Lakes (LBL) in western Kentucky and Tennessee was hit by a historically severe ice storm in January 2009. Resulting damage closed all but a handful of facilities at this national recreation area managed by the Forest Service. Stimulating economic growth was part of the reason for creating LBL in the 1960s, so re-opening these major recreation facilities was a priority for maintaining the \$650 million regional tourism industry. Many local businesses are dependent on LBL operations being open and available to the public and the approximately 2 million visitors drawn to the area annually. The focus of this project was to

quickly repair and restore services that had been damaged in the ice storm. Local contractors and crews were hired to remove debris and make repairs to recreation facilities. Without this funding, it was unlikely that facilities would be operational for the current tourism season, causing more hardship to local communities already economically distressed and hit hard by recent plant and retail closings.

Kentucky Ice Storm Trails and Roads Restoration

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 558,200

Project Summary: Trails and roads in several areas on the Daniel Boone National Forest in eastern Kentucky were damaged by severe ice and wind storms during the winter of 2009. Many of these locations were at popular tourism destinations such as the wilderness area of the Red River Gorge, campgrounds at Cave Run Lake, and the Redbird Crest Trail. Removal of debris and trees blocking roads and trails was necessary to reduce health and safety risks to visitors, as well as re-open routes to recreation attractions that draw tourists who support local merchants and the regional economy. This project focused on clearing and repairing damaged trails and roadways. The rugged terrain and back country locations required much of the work to be done by hand, and there was an emphasis on using local crews and contractors. This tourism-dependent area had already been impacted by layoffs and plant closures, and could have been further devastated by a reduction in the local eco-tourism industry if access had not been restored.

Regionwide Hazardous Fuel Reduction Projects/Readiness

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 4,000,000

Project Summary: This project creates or sustains jobs in economically hard-hit areas throughout the Midwestern U.S. It also increases public safety, maintains and restores forests for public use; restores and/or improves habitat for wildlife species; helps stem the spread of non-native invasive species; creates and/or sustains forest products industry jobs; and supports biomass markets. In the economically depressed State of Michigan, jobs will be created and skills learned with the creation and training of local wildland firefighting crews. It will allow for the deployment of a weather station in the State of Ohio to assist in the monitoring of wildland fire conditions, as well as help communities develop community protection plans. Cooperating local and state agencies will be engaged to provide similar opportunities in other Midwestern states.

Partners: Leech Lake Band of Ojibwe

County(s): Genesee County

Hazardous Fuel Reduction Projects/Readiness greater than 120 days

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 5,500,000

Project Summary: This project creates or sustains jobs in economically hard-hit areas throughout the Midwest and Northeastern U.S. It also increases public safety; maintains and restores forests for public use; restores and/or improves habitat for rare and sensitive species; sustains forest products industry jobs; and supports biomass markets. Using contracts, agreements, and partnerships, and also employing temporary crews for up to three years, the project uses a variety of methods to prioritize needs, prepare plans, and implement treatments of fuels that pose a fire hazard. On the Superior National Forest in Minnesota, The Nature Conservancy will partner with the Forest Service to package hazardous fuel treatments into projects that will employ local businesses. Another exciting project on the Superior NF involves cooperation with the State of Minnesota and the Forest Service's Northern Research Station to study the relationship between forests and global climate change. In Michigan, where unemployment rates are among the highest in the nation, jobs will be created in surveying property boundaries, marking survey corners, and performing additional tasks needed to prepare the land for treatments that will decrease wildfire risks by removing trees from crowded forests. Similar work and opportunities will be provided in Wisconsin, Illinois, Ohio, and Vermont.

Partners: The Nature Conservancy;Hocking College

State(s): Michigan

County(s): Wexford County

Hazardous Fuel Reduction Projects/Readiness less than or equal to 120 days

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 6,192,000

Project Summary: People At Work for the Future -- This multifaceted fuels treatment project uses contracts and

agreements to employ temporary crews for up to two years. It creates or sustains jobs in economically hard-hit, high fire-risk areas in Minnesota and elsewhere in the Midwest and Northeast. It also increases public safety; maintains and restores forests for public use; sustains forest products industry jobs; and supports biomass markets. In the Monongahela National Forest in West Virginia, local farmers and conservation districts will use range management activities to reduce hazardous fuels build up. In Michigan, where unemployment rates are among the highest in the Nation, timber sales will decrease wildfire risks in crowded forests and improve habitat for Kirtland's warbler, a songbird on the federal endangered species list. In Ohio, the work will help restore uncommon open land habitats, such as barrens and oak savannas.

Enhance Safety and Condition of Forest Highway in Delta County, Michigan

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 3,500,000

Project Summary: This project will provide safe access to high visibility Great Lakes recreation sites in Delta County, Upper Michigan. Private sector jobs will be created to widen and re-surface Delta County Road 513 in a nine-month cooperative project with the County. The project benefits the local community and visitors by providing safer and easier travel to school and work, as well as easier access to high-use Forest Service recreation sites on the northern shore of Lake Michigan, such as Peninsula Point Lighthouse and Bay de Noc Campground. The project, which will add value to our communities and enhance local resources, has received \$3,500,000 in economic recovery funding.

Enhance Recreational Experiences and Minimize Environmental Impacts by Improving Forest Trails in Minnesota

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 557,000

Project Summary: This project will improve conditions on about 1,900 miles of the Superior National Forests extensive trail system, including hiking, portage, cross-country skiing, snowmobiling, and other trails using economic recovery funding of \$557,000. Work will be performed by Minnesota Conservation Corps (MCC) members, a cadre of young adults, ages 18-25 years old. MCC is a partnership with Americorps. Work will occur within and outside of the much-visited Boundary Waters Canoe Area Wilderness. In addition to improving trail conditions, the project will also restore and protect soil and water resources. Trail work will involve brushing, tread work, installation of water control structures, boardwalk reconstruction, and trail sign maintenance in various areas on the Forest. This work will have long-standing benefits to visitors to the Forest, as well as the young adults employed through MCC, who will gain valuable skills and an appreciation for natural resource management. This project will help the Forest continue to provide memorable recreational experiences for forest visitors in years to come.

Enhance Safety and Condition of Forest Roads in Missouri

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 369,000

Project Summary: This project will address an urgent backlog of needed road maintenance in the Mark Twain National Forest on routes damaged by extensive natural disasters (flooding, ice storms, and wind events) over the past two years. Economic recovery funding of \$369,000 will provide new jobs in the private sector to accomplish this work. Forest Service roads in the Mark Twain intertwine with county road systems in 29 Missouri counties. These road systems are used for school bus routes, firefighting, ambulance services, and recreational activities. This project will have long-standing benefits to the community for daily activities and emergency services, as well as enhanced recreational opportunities.

Finley Flats - Swamp Creek - Camp Salvage

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 124,300

Project Summary: Federal, state, local and private partners cooperatively developed the Sanders County Community Wildfire Protection Plan (CWPP). The plan identifies wildfire risks and activities needed to reduce the danger to communities. A priority in the Sanders County CWPP and also with the local FEMA approved Fire Mitigation Plan is reducing hazardous fuels on 367 acres located within the Wildland Urban Interface (WUI) on the Lolo National Forest in Montana. The treatment area is adjacent to communities with values at risk of over 31 million dollars including 218 residences, four businesses and a regional power line. The vegetation in the project area was not exposed to past needed intervals of wildfire so now has a dense landscape with a high probability of larger, more intense fires and decreased diversity. This hazardous fuels treatment project is intended to change the vegetation condition so a wildfire would more likely be of low intensity when it occurs. This critical fuels reduction project will help protect communities and reduce the risk to firefighter and public safety.

State(s): Montana

County(s): Sanders County

Kootenai NF Fuels Reduction Projects

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 2,470,000

Project Summary: The Kootenai National Forest Fuels Reduction project reduces hazardous fuels to protect communities and natural resources. By using mechanical treatments of woody debris, the forest can avoid prescribed fire which is a concern due to air quality issues. The Libby area is identified as an air quality non-attainment area for PM 2.5. (particulate matter). When added to the on-going area health issues related to asbestos contamination, the forest is treating about 1200 acres hazardous fuels through methods such as slashing, machine piling, mastication and grinding. These techniques allow effective fuel treatment, avoid smoke impacts to the Libby area, provide jobs to displaced woods workers, and provide woody biomass utilization opportunities. Fuel reduction treatments will be implemented through contracting and/or partnership opportunities with local private sector forestry workers who have lost jobs due to the declining timber market. An aggressive hazardous fuels treatment program will help forests become more resilient to the affects of wildfire, insects and disease and help mitigate the impacts of climate change.

State(s): Montana

County(s): Lincoln County

Hand Piling Slash from Pre-Commercial Thinning Forest-wide

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,000,000

Project Summary: The Hand Piling Slash Project on the Kootenai National Forest involves hand piling slash created by pre-commercial thinning and timber stand improvement projects on over 1000 acres. Slash is leftover branches, brush and limbs after a project and is scattered across the forest. Piling the slash reduces fuels and reduces impacts to forest stands from wildfire. Reducing the probability of intense fires also helps protect homes and communities in the wildland urban interface. The project will provide jobs opportunities to numerous individuals in two of the most economically challenged counties in the state of Montana. This project will be implemented through contracts or through partnerships with groups that serve nine communities adjacent to the Forest.

State(s): Montana

County(s): Sanders County

Montana Roads Restoration Project 2

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 3,600,000

Project Summary: The Montana Roads Restoration 2 project incorporates road reconstruction and maintenance projects on three national forests. Work includes installing guardrail on portions of about 4 miles of the Hyalite Road on the Gallatin National Forest. The Hyalite drainage is one of the most heavily used recreation areas in Montana and is the municipal watershed for the city of Bozeman and this project addresses serious safety and municipal water supply issues. It also includes another phase of reconstruction and resurfacing work on the West Fork Rock Creek road on the Custer National Forest, which addresses safety and evacuation concerns by improving access for fire protection engines and improving vehicle pullout sites. This project also includes needed road maintenance on the Kootenai National Forest to improve public safety and enhance water quality by reducing sediment run-off.

State(s): Montana

County(s): Carbon County; Gallatin County; Lincoln County

Shields River Road & Bridges Reconstruction

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 4,000,000

Project Summary: The Shields River Road on the Gallatin National Forest provides primary access to over 35,000 acres of public land and 15,000 acres of private lands within the Shields River Drainage. Increased use due to recreational activities and more private residences have resulted in damage to the road and increased danger to the public. The project includes reconstruction of approximately 5.6 miles of the road from a single lane to a double lane, adding and replacing culverts, widening an existing bridge and restoring and improving the surface of the road. This project will improve public safety and also protect water quality and fish passage and habitat by reducing sediment delivery into streams, improving drainage and replacing culverts

State(s): Montana

County(s): Park County

Montana Roads Restoration Project 1

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,905,000

Project Summary: The Montana Roads Restoration Project 1 funds much needed work on high use, high priority roads. Contractors will reconstruct roads, reshape prisms (the area of the ground containing the road surface) and resurface roads to restore public safety to an acceptable level and extend the useful life of the roads. This work also improves water quality and enhances critical fish passage and habitat by reducing sediment delivery into streams, improving drainage and increasing the size of culverts so that fish may move freely. Specifics include about 7 miles of surfacing and road drainage improvements on the Upper Taylor Fork and Cache Creek roads on the Gallatin National Forest; replacing 4 existing culverts in the Smith Creek Road to meet fish passage standards for Yellowstone Cutthroat trout; reconstruction and resurfacing work on the West Fork Rock Creek road on the Custer National Forest; and reconditioning approximately 8 miles of the Rye Creek Road on the Bitterroot National Forest.

Humboldt-Toiyabe NF- Nevada

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 3,400,000

Project Summary: Reducing hazardous fuels in the wildland urban interface (WUI) and where the homes meet the forest is important to protect communities and wildland firefighters. Hazardous fuels reduction outside of the WUI is needed to protect important wildlife habitat. Projects in Washoe County, located in Western Nevada, which includes Reno, will treat 500 acres; White Pine County, located in eastern Nevada will treat 700 acres. Both projects will reduce fuels near communities and complete boundary surveys that will make possible additional fuels reduction projects in the WUI. The White Pine County project is adjacent to Bureau of Land Management (BLM) land, where the BLM has recently completed fuels treatment. Completion of natural resource inventories for fuels reduction projects in Nye County, in southern Nevada, and Eureka County, in Central Nevada, will protect wildlife habitat. All efforts are a continuation of ongoing work currently funded with Forest Service, Bureau of Land Management, and/or through external funding, such as the Southern Nevada Public Land Management Act. Fuels reduction in Washoe County is in combination with the Nevada Department of Forestry and Washoe County.

Partners: Nevada department of Forestry and Washoe County.

Lincoln Co. Multidisciplinary Hazardous Fuels/Ecosystem Restoration on S&PF Lands Project

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,314,100

Project Summary: This project consists of 7802 acres of public lands that will be treated to reduce hazardous fuels and improve health of forest and rangeland ecosystems, including management actions such as: -Reducing hazardous Fuels -Treating Invasive Plants and Diseases on forests and rangelands -Planting and reseeding both forests and rangelands -Controlling erosion There will also be biomass utilization and wood industry infrastructure improvements: Woody biomass resulting from forest treatments will be utilized by local pellet mill, and utilization and marketing options will be expanded to create sustainable industry. Fire risks will also be reduced as community economic, social and environmental health is enhanced.

New Hampshire

Enhance Recreational Experiences and Minimize Environmental Impacts by Improving Forest Trails in New Hampshire

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 100,000

Project Summary: The Eastern Region of the Forest Service is privileged to work with outstanding partners, notes Regional Forester Kent Connaughton. Economic recovery funding for this project will help our counties and communities. White Mountain National Forests project partners the Appalachian Mountain Club, Randolph Mountain Club, Wonalancet Outdoor Club, Dartmouth Outing Club, and the Rey Center -- can now hire local workers to reconstruct portions of heavily used hiking trails on extraordinarily steep and rocky terrain in New Hampshire's only national forest. The work, which addresses resource damage due to erosion and sedimentation, will allow the Forest to continue to provide safe and memorable recreation experiences to visitors to Coos, Grafton, and Carroll Counties. The two-year project has received \$100,000 in economic recovery funding.

Partners: Appalachian Mountain Club; Randolph Mountain Club; Wonalancet Outdoor Club; Dartmouth Outing Club; Rey Center

16 Springs Tribal Forest Protection Act (TFPA) Stewardship Project (Hazardous Fuels Reduction)

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 3,699,000

Project Summary: The 16 Springs Tribal Forest Protection Act (TFPA) Stewardship Project is a forest health improvement project that also reduces hazardous fuels and fire risk to a large WUI community (Village of Ruidoso), the 16 Springs community, and National Forest system and tribal lands. The Stewardship Project will involve both the 16 Springs and the Perk/Grindstone watersheds on the Lincoln National Forest. This collaborative project will further enhance the relationship between the Forest Service and the Mescalero Apache Tribe. The removal of commercial timber not only provides and maintains jobs to a specialized group, but makes a usable product for local small sawmills. Additionally, the utilization of small diameter biomass generated by the project will be critical to the new wood pellet mill currently under construction north of Alamogordo. Along with being beneficial to local and Regional wood dependent industries, the project will stimulate the local economy and will have a cascade affect on maintaining and creating jobs within local tribal communities and area municipalities.

Partners: Mescalero Apache Tribe, Southwest Bureau of Indian Affairs, Otero County, Lincoln County, Village of Ruidoso

State(s): New Mexico

County(s): Otero County

Clean up of Hazardous Materials and Ground Water on Abandoned Mine Lands at Nacimiento Mine

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 1,100,000

Project Summary: The Nacimiento Mine environmental cleanup project is located on the Santa Fe National Forest in Sandoval County, New Mexico. The work will clean up and restore 25 million gallons of groundwater at Nacimiento Mine near Cuba, New Mexico. The goal of remedial action(s) at the Nacimiento site is to protect human health and the environment from risks associated with the contaminants of potential concern in groundwater contaminated from previous mining activities. Specific remedial action objectives include remediating COPC levels in groundwater and surface water to current New Mexico standards. The remedial action(s) may consolidate waste rock. The cleanup supports increased economic opportunities and improved quality of life in rural America by treating the surface/ground water for human consumption and for the small farmer/rancher.

Croatan NF Hazardous Fuels Reduction

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 847,000

Project Summary: This project reduces fuel build up on the Croatan through mechanical treatments. It may involve chipping near private property areas that are at high risk to damaging, high-severity fires. It will also create more fire breaks. In addition to these mechanical treatments, the project also includes the refurbishment of 12 miles of boundary lines.

Partners: Job Corps

State(s): North Carolina

County(s): Craven County; Jones County

Grandfather RD Hazardous Fuels Reduction

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 550,000

Project Summary: This project reduces fuel build up on the Grandfather through mechanical treatments. It may involve chipping near private property areas that are at high risk to damaging, high-severity fires. It will also create more fire breaks. In addition to these mechanical treatments, the project also includes the refurbishment of 15 miles of boundary lines.

Croatan Prescribed Burning and Hazardous Fuels Reduction

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 492,000

Project Summary: Approximately 9,000 acres will be treated with prescribed fire each year for two years to restore and maintain Longleaf Pine savannas. This will maintain optimal habitat for Red cockaded woodpeckers and Rough leaf loosestrife, both federally listed species. As savannas are properly maintained, hazardous fuels in the area are reduced, which diminishes the risk of damaging wildfire adjacent to wildland urban interface communities. There will also be some mechanical fuel reduction work on national forest lands as part of this project. The Forest has a mandate to provide critical habitat. This is following the Fish and Wildlife Service recovery plan for both federally listed species. It will also reduce the amount of hazardous fuels adjacent to private lands.

Ohio

Expanded Use of Green Energy by Installing Solar Panel Systems, leading by example

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 400,000

Project Summary: This project will allow the Wayne National Forest to expand their current solar program, increasing their energy efficiency and contributing to the local economy. Through this project, the Forest will expand the current solar panel array on the roof of the Forests Headquarters building. The current system is generating 7% of the buildings energy needs. It is estimated that once the expansion is completed later this summer, up to 50% of the Headquarters building will be powered by the sun during the summer months. This work will create four jobs for a locally-owned company operated by a service-disabled veteran. The six-month project also gives business to Ohios growing solar panel industry, primarily made up of former auto glass plants. This project will highlight an already notable solar program on the Forest, which was part of Ohios 2008 Solar Tour.

State(s): Ohio

County(s): Athens County

Oregon

Prioritize fuel treatments by estimating restoration potential and understanding their effects.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 5,940,000

Project Summary: Accumulated fuel on millions of acres of forest land in the western United States heightens the risk of uncharacteristically severe wildfire. In recent years, the size and number of large wildfires has grown, threatening lives, property, national security, and ecosystem integrity. Techniques are needed to prioritize where fuel reduction treatments will be most effective and most likely to restore landscape health. This project will produce color-coded maps denoting high, medium, and low priority areas, treatment costs, and opportunities where treatments could pay for themselves without damaging other resources. It uses information from high-profile projects such as LANDFIRE and the Fire Program Analysis (FPA) system and makes it accessible to a broad user group including non-specialists. This project will also integrate a system for classifying fuel characteristics with LANDFIRE. This technique is successfully being used by Oregon Department of Forestry, Washington Department of Natural Resources, and Pacific Northwest and Southwest Regions of the Forest Service. The project will build on this work by also producing a comprehensive report on fuel conditions.

Eight County Hazardous Fuels reduction (partially funded under 10%)

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 28,125,000

Project Summary: This project pulls together a number of efforts to reduce flammable fuels, thin young forests, and create fuel breaks on four national forests and eight counties in central and southwestern Oregon. The counties are all economically distressed, and the project focuses on contracts with the private sector to do this labor-intensive work. Contractors would be responsible for pre-commercial thinning, pruning, hand- and machine-piling of slash, under-burning, creating roadside fuel breaks, and chipping forest debris on national forest lands. The result is jobs in the woods, forest stands better able to withstand the threats of insects and disease, a reduced threat of intense wildfire, and safer communities.

County(s): Douglas County

LINN and LANE COUNTY (Lacomb/Upper Berlin/ Leaburg/ Goodpasture/ High Prairie/ Dunning Rd/ Mt. Tom) HAZARDOUS FUELS PROJECT

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 985,600

Project Summary: In this two-county area of western Oregon, terrain is rugged with heavy fuel buildup and many Wildland-Urban Interface (WUI) homes, setting the stage for a catastrophic wildfire event. This area also includes high-use recreation destinations with adjacent federal lands. Many homes are located along narrow county roads with limited access. Local fire departments, federal agencies, landowners, Community Wildfire Protection Plan (CWPP) advisory groups, and local biomass forest products companies will be collaborating in this project, which includes fuel reduction and prevention education in WUI areas. This project area has been identified as high risk in local CWPPs. Successful completion of this project will result in reduced fire danger, improved safety, retention and creation of local community jobs, and an increase of dollars flowing toward community services and vendors.

Partners: McKenzie Rural Fire Protective District; Ross Boro Lumber; Bureau of Land Management; Hazel Dell Fire Department; Oak Ridge Fire Department; Harrisburg Fire and Rescue

State(s): Oregon

County(s): Lane County; Linn County

Deschutes County - Hazardous Fuels Treatment.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 250,800

Project Summary: Northeast Oregon includes communities at high risk for wildfire. Through this project multiple local partners will focus on community, forest, and watershed health creating jobs and business opportunities. The project will reduce hazardous fuels and haul slash piles to a central chipping site where outputs will be provided as fuel for the area school and hospital woody biomass boilers, as well as at a local co-generation facility. Existing partnership agreements will facilitate quick and smooth project implementation. The project will reduce wildfire risk by decreasing quick-burning fuels, reduce smoke emissions from slash-pile burning, and provide raw material to support current and planned biomass and combined heat and power renewable energy systems in eastern Oregon.

Partners: Wallowa Resources

State(s): Oregon

County(s): Wallowa County

CENTRAL OREGON HAZARDOUS FUELS PROJECT (Deschutes, Crook, Jefferson Counties)

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,553,600

Project Summary: Communities in Deschutes, Crook, and Jefferson Counties in central Oregon are at high risk of wildfire. Partnerships with federal agencies, the Oregon Department of Forestry (ODF), Central Oregon Fire Prevention Coop, local community organizations, fire departments, county officials, homeowner associations and landowners have formed to address the wildfire hazard by creating Community Wildfire Protection Plans (CWPPs) and implementing many innovative projects. This project will reduce fuels on larger parcels immediately adjacent to communities identified in CWPPs as high-priority areas to reduce hazard. Where feasible, fuels from this project would be available for grinding and hauling to a biomass utilization facility in partnership with the Deschutes County Woody Biomass Removal for Energy Production proposal. Chipping also will be offered to landowners where transportation to biomass facilities is not feasible. Benefits will include wildfire-risk reduction in the Wildland-Urban Interface, improved firefighter and public safety, and reduced emissions from fuel disposal.

Partners: Oregon Department of Forestry - Central Oregon;Bureau of Land Management - Prineville;Black Butte Ranch;Lazy River Subdivision;Pine Country Estates;Crooked River Ranch Rural Fire Protection District;Warm Springs Forest Products Co-Generation

State(s): Oregon

County(s): Crook County; Deschutes County; Jefferson County

Deschutes County - Hazardous Fuels Treatment

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,000,000

Project Summary: Many communities are at risk to wildfire in Central Oregon. Federal, state and local governments, and local community groups have worked in partnership to create Community Wildfire Protection Plans (CWPPs). They have organized and are implementing many hazard mitigation and fuel reduction projects identified as high-priority projects in CWPPs. Disposal of the large amount of woody debris created by these projects is a continuing challenge. This project funds the equipment needed to collect and grind woody biomass from hazardous fuel reduction projects on private and federal lands in Deschutes County, Oregon. Tons of woody biomass will be transported to Roseburg Forest Products Dillard Power Plant, where it will be used to generate energy (20,000 megawatt hours), creating jobs in the woods and at the power plant. The project also will reduce fire hazards on private and federal lands in the Wildland-Urban Interface, improve firefighter and public safety, improve forest health, and reduce need and cost to burn slash piles, as well as reducing carbon emissions into the atmosphere.

Partners: Roseburg Forest Products;Oregon Department of Forestry;Deschutes County;Central Oregon Fire Prevention Cooperative;Bureau of Land Management ;Douglas Forest Protective Association

State(s): Oregon

County(s): Deschutes County

South State Forests Hazard Mitigation

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 2,502,300

Project Summary: Many communities in southern Oregon are adjacent to large tracts of state-owned wildlands. Overcrowded trees, drought, insect and disease infestations in these forests put the adjacent communities at high risk to wildfires. While the communities have recognized the danger and worked to complete Community Wildfire Protection Plans which identify mitigating the fire hazard in these wildlands as a high priority, lack of funding has

limited progress in completing these plans. This proposal provides funds to reduce the risk of wildfire to neighboring communities by implementing a number of high-priority fuels reduction projects. Jobs would be created to cut, thin, and limb overcrowded trees, and remove excess brush and debris, making the forests more resistant to wildfire, thereby reducing the risk to nearby communities.

Partners: Oregon Department of Forestry; Bureau of Land Management

State(s): Oregon

County(s): Douglas County; Josephine County; Linn County

Tribal Forest Improvement Crews for Hazardous Fuels Treatment

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,436,000

Project Summary: These are programs of work that will be carried out on State and Private Lands. Specific projects have not yet been selected.

County(s): Klamath County

JACKSON/JOSEPHINE COUNTY (Coleston Rd, Savage-Jones, Shady/Eagle, Safe Response/Special Needs) HAZARDOUS FUELS PROJECTS

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 1,387,000

Project Summary: The communities of southwestern Oregon are at high risk for catastrophic wildfire. In response to large fires in recent years, community groups, counties and local governments worked together to create a two-county Community Wildfire Protection Plan (CWPP). This proposal implements four high-priority projects identified in the CWPP. Activities in these projects include providing 100-percent subsidized assistance to disabled landowners to create defensible space around their homes; reduction of high-hazard fuels in and adjacent to threatened communities; and thinning and clearing along roadways to provide safe ingress and egress for firefighters and homeowners. It will also include using leftover slash for biomass through a steam-powered heating system development project. Local fire departments, federal agencies, private landowners, CWPP advisory groups, watershed councils, fire prevention coops, insurance agencies, real estate agents, title companies, and local biomass forest products companies will be collaborating on the project. This project will result in wildfire-risk reduction in some of the most at-risk communities, improved firefighter and public safety, forest health improvement, prevention education, and abatement of insect/disease infestations.

Partners: Coleston Rural Fire District; Shady Cove Rural Fire District; Bureau of Land Management; Oregon Department of Forestry; Rogue Valley Fire Prevention Cooperative; Upper Rogue Watershed Council

P-Forest Health Protection and Hazard Mitigation

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 4,784,400

Project Summary: This project would create more resilient and sustainable conditions on thousands of acres of National Forest System lands across economically depressed Baker, Union, and Wallowa Counties in Oregon. The project, which uses temporary crews and contracts to get work done, includes labor intensive pre-commercial thinning and hazardous fuels reduction work. This includes hand piling of slash and running mechanical equipment to reduce fuels. There is also an opportunity to produce biomass for energy production. The work leverages strong existing partnerships with Oregon Dept. of Forestry and the Bureau of Land Management to remove fuels that can carry catastrophic fires through the forest and onto adjacent ownerships.

Blue Mountain Fuels and Timber Stewardship

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 9,000,000

Project Summary: This project uses stewardship contracting authorities to reduce hazardous fuels on thousands of acres of National Forest land in northeastern Oregon, helping to protect homes and private investments of thousands of residents in five counties. At the same time, the project would provide jobs in the woods for equipment operators, thinning crews, and truck drivers. Raw material generated from this project would go to local sawmills, cogeneration facilities, fuels for schools projects, and potentially a new pellet plant, providing jobs for mill workers in extremely difficult times working in this industry. The stewardship authority currently being used in northeastern Oregon uses the receipts from the selling of logs and biomass to fund additional work on the ground.

Washington: Columbia County

P-SAFR Flymon

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 2,083,000

Project Summary: The communities of Sisters and Black Butte Ranch in central Oregon are surrounded by ponderosa pine and lodgepole pine forests. This project intends to reduce hazardous fuel loadings in the wildland urban interface around these communities and several other isolated housing groups in northern Deschutes County and Jefferson County. Deschutes County has been very active in reducing hazardous fuels on private lands, and this project complements that work by accomplishing the same work on national forest land, thereby reducing the threat that large, intense wildfires present to homes. The SAFR Flymon project focuses on the labor-intensive work of thinning forest understories, removing hazardous trees along roadways, treating forest fuels, and improving wildlife habitat on public lands.

Partners: Rocky Mountain Elk Foundation; Wild Turkey Federation; Portland General Electric; Quail Unlimited

State(s): Oregon

County(s): Deschutes County

Reducing threat of wildfires in central and southwest Oregon

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 10,000,000

Project Summary: This project will protect lives, buildings and other resources by reducing hazardous burnable materials such as brush and small trees on thousands of acres in central and southwest Oregon. Sixteen contracts and agreements are putting 287 people to work across six counties Deschutes, Jefferson, Crook, Curry, Josephine and Douglas - encompassing four National Forests and a National Grasslands that are historically threatened by wildfire. The work is labor-intensive, using crews and machinery to clear brush. The work will improve the health and resiliency of forests and grasslands and provide biomass for energy production.

Oregon Youth Employment Initiative - Phase I

Project Category: Wildland Fire Management

Date of Announcement: March 9, 2009

Estimated Funding: \$ 3,250,000

Project Summary: The project is an intergovernmental effort to put young adults to work across the State of Oregon. The youth will be working on natural resource conservation and restoration on public and private lands. During the school year, the school districts are implementing the program through expansion of their existing youth conservation corps-like youth employment programs. During the summer the initiative is delivered through existing youth conservation corps-like programs orchestrated by the Oregon Youth Conservation Corps. It will enable youth throughout Oregon to earn money and enhance their work/life education experiences and greatly expand summer youth employment. The youth will work on trail maintenance, watershed restoration, campground maintenance, hazardous fuel reduction and other natural resource restoration and maintenance projects.

Francis Marion Biomass Thinning

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 300,000

Project Summary: In this project, thinning of dense pine forest stands is expected to reduce wildfire hazards on Francis Marion National Forest lands and provide biomass to a local paper mill for use as an alternative fuel. Approximately 1,000 acres will be treated for hazardous fuels reduction in areas near the wildland urban interface. Vegetation biomass that is mechanically removed will be chipped and hauled to an industrial plant for use as fuel for energy production. Forest property lines destroyed when Hurricane Hugo blew down trees marking boundaries will also be re-surveyed and marked as part of the biomass thinning activities. Local loggers and surveyors are expected to be employed through this project which will reduce damage from wildfires, improve wildlife habitat, and enhance overall forest health.

State(s): South Carolina

County(s): Berkeley County; Charleston County

Francis Marion Wildland Urban Interface Fuels Reduction.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 835,000

Project Summary: Wildland fires are a potential concern for locations in the wildland interface between forests and development in urban areas. This mastication project is intended to reduce wildfire risk in places near urban development which are not appropriate for fuel reduction using prescribed fires. In this project, midstory vegetation in dense pine stands will be mechanically removed on Francis Marion National Forest lands bordering wildland urban interfaces and left on the ground after grinding and chipping. This is intended to reduce fuel levels and susceptibility to wildfire, while also benefiting the habitat for federally endangered Red-cockaded woodpeckers and improving overall forest health. Included in this project are landline surveys to establish National Forest boundaries and define future treatment areas. At least 500 acres are projected to be treated in this project. Local contractors are expected to be hired for mechanical vegetation removal and landline surveys. Benefits will include local hiring and re-hiring of logging and boundary survey workers, enhancement of public safety, and overall forest health improvement.

Utah

Uinta-Wasatch-Cache National Forest Forest-wide Road Reconstruction

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 11,600,000

Project Summary: The Uinta-Wasatch-Cache National Forest Forestwide Road Reconstruction project contains multiple projects including: Aggregate surface replacement and asphalt pavement to increase user safety and comfort, and reduce ecologic impacts; Pavement chip seals to improve the driving surface and extend the life of the pavement; Culvert and bridge replacement, to increase public safety, improve drainage and provide for aquatic organism passage; Roadside brush removal to improve sight distance & user safety. All projects are Forest and public priorities that have been under public discussion for years, and are on priority roads with extensive public use. Projects are distributed over 5 Counties, and will have a positive impact on multiple communities in northern Utah.

Improve health and safety of communities and fire fighters through forecasting and managing smoke from fires.

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 735,000

Project Summary: Smoke from wildfire is a human health hazard, particularly for those with asthma and other respiratory problems. Timely, accurate smoke forecast can reduce these impacts. Public health officials use this information to alert individuals with health concerns, and fire fighters benefit from reduced risk of exposure to extreme fires. These health and safety benefits potentially reduce medical and fire costs. This project maintains existing efforts to deliver accurate smoke forecasts from wild and prescribed fires and accelerates delivery of improved tools for smoke and fire management. Working with the University of Washington, Hispanic Association of Colleges and Universities (HACU), and Sonoma Technology, Inc., this project will include about 20 undergraduate interns through HACU internship program. HACU's intern pool spans the U.S. and Puerto Rico, providing opportunities to students from universities with substantial Hispanic enrollment. Interns and employees will gain experience that will prepare them for future "green" jobs targeted at improving environmental quality, especially air quality, with its ramifications to climate change.

Blue Mountain Fuels and Timber Stewardship

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 9,000,000

Project Summary: This project uses stewardship contracting authorities to reduce hazardous fuels on thousands of acres of National Forest land in northeastern Oregon, helping to protect homes and private investments of thousands of residents in five counties. At the same time, the project would provide jobs in the woods for equipment operators, thinning crews, and truck drivers. Raw material generated from this project would go to local sawmills, cogeneration facilities, fuels for schools projects, and potentially a new pellet plant, providing jobs for mill workers in extremely difficult times working in this industry. The stewardship authority currently being used in northeastern Oregon uses the receipts from the selling of logs and biomass to fund additional work on the ground.

Energy-efficient windows installed at Olympia Forestry Sciences Laboratory

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 260,000

Project Summary: This project replaced 150 single-pane,low thermal-rated windows at the Pacific Northwest Research Station's Olympia Forestry Sciences Laboratory with new energy-efficient windows. The new windows provide better insulation than the old ones, which were installed in the 1960s, and reflect infrared light. This is expected to lower the heating and cooling cost of the building while conserving energy. This project was initiated within 30 days of approval. Fifteen people, including glazers, painters, carpenters, managers, and clerical staff, worked on this project which replaced the single-pane, low thermal-rated windows with modern energy-efficient windows. This project created job opportunities over six weeks. The new energy efficient windows enable the federal government to conserve energy and save money on heating and cooling costs.

County(s): Thurston County

Olympic Peninsula Structure Repair and Restoration

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 500,000

Project Summary: Four administrative sites and several recreation facilities (both historic and non-historic) will receive much needed maintenance on the Olympic National Forest. It will provide employment for up to 9 basic maintenance/repair workers in four counties around the Olympic Peninsula. The work will include interior and exterior cleaning and painting, flooring, re-roofing, and other minor building repairs needed to restore the buildings to current health and safety standards. Job opportunities will be scattered across the Hood Canal and Pacific Ranger Districts and include the Snyder Work Center and several campgrounds.

County(s): Clallam County; Grays Harbor County; Jefferson County; Mason County

West Virginia

Hazardous Fuel Reduction Projects/Readiness less than or equal to 120 days

Project Category: Wildland Fire Management

Date of Announcement: May 5, 2009

Estimated Funding: \$ 6,192,000

Project Summary: People At Work for the Future -- This multifaceted fuels treatment project uses contracts and agreements to employ temporary crews for up to two years. It creates or sustains jobs in economically hard-hit, high fire-risk areas in Minnesota and elsewhere in the Midwest and Northeast. It also increases public safety; maintains and restores forests for public use; sustains forest products industry jobs; and supports biomass markets. In the Monongahela National Forest in West Virginia, local farmers and conservation districts will use range management activities to reduce hazardous fuels build up. In Michigan, where unemployment rates are among the highest in the Nation, timber sales will decrease wildfire risks in crowded forests and improve habitat for Kirtland's warbler, a songbird on the federal endangered species list. In Ohio, the work will help restore uncommon open land habitats, such as barrens and oak savannas.

Green Retrofit of Forest Service office

Project Category: Capital Improvement and Maintenance

Date of Announcement: March 9, 2009

Estimated Funding: \$ 200,000

Project Summary: Regional Forester Kent Connaughton has long supported providing more energy-efficient administrative facilities to save public money and reduce the carbon footprint of Forest Service offices. Economic recovery funding for this project lets us do that and provide jobs, too, he says. Over the last 12 months with the assistance of Blackwell Job Corps, the Chequamegon-Nicolet National Forest has been renovating the building that will become the new Supervisors Office in Oneida County. Economic recovery funding of \$200,000 will provide the remaining needed renovations, including a more energy efficient building and new restrooms that will use less energy and water and be fully accessible. The project will create several jobs for six months for a local contractor, while purchase of green-certified materials and labor will directly benefit the local economy and lower the carbon footprint of the administrative building. Also, Job Corps enrollees will learn highly marketable green trade building skills that will serve them well when they graduate from the program.

State(s): Wisconsin

County(s): Oneida County
