## Nonrubber Footwear Statistical Report, 1996

Publication 3030

March 1997

## PREFACE

This annual report on the nonrubber footwear industry is the second in a series of five annual reports on the industry published by the Commission under a modified publication schedule at the request of the Senate Committee on Finance. In its initial letter requesting the reports, received on August 10, 1984, the Committee requested that the Commission provide, pursuant to section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), quarterly reports containing data on production and/or shipments, imports, exports, apparent consumption, market share, employment, unemployment, and plant closings. In response to that request, the Commission instituted investigation No. 332-191, *Nonrubber Footwear Quarterly Statistical Reports*.

In a letter dated February 29, 1996, the Committee requested that the Commission continue to provide reports of the scope earlier requested, but that the Commission change its publication schedule from quarterly to annual reports, effective January 1, 1996, and finally, cease publishing the report in the year 2000. In response to the Committee's request, the Commission changed the publication schedule from quarterly to annual and announced that it would publish five annual reports for the years 1995 through 1999. The first annual report in the series was published in April 1996, and the final report, for 1999, will be published in March 2000. Notice of institution of the Commission's investigation was published in the *Federal Register* of Sept. 6, 1984 (49 F.R. 35259), and notice of the change in publication schedule was published in the *Federal Register* of April 24, 1996 (61 F.R. 18157).

## HIGHLIGHTS

U.S. production--U.S. production of nonrubber footwear in 1996 declined by 3 percent, to 143.8 million pairs, following a 9-percent drop in 1995. The value of U.S. producers' shipments in 1996 declined by 15 percent, to \$2.7 billion, following a 16-percent drop in 1995 (table 1).<sup>1</sup>

U.S. consumption of nonrubber footwear continued to remain sluggish. After experiencing its first decline of the decade in 1995, U.S. consumption by volume declined by less than 1 percent in 1996. The U.S. industry's share of domestic consumption of nonrubber footwear, by volume, did not change from the 10-percent share in 1995, but dropped by 4 percentage points in terms of value, to 18 percent. The ongoing decline in employment in the U.S. nonrubber footwear industry accelerated as the industry averaged 46,100 employees in 1996 compared with 52,700 employees in 1995, down 6,600 employees or 13 percent (table 2).

U.S. imports--U.S. imports of nonrubber footwear increased by less than 1 percent in 1996 from the 1995 level, to 1,085.1 million pairs, following a 2-percent drop in 1995, the first such decline since 1989. U.S. imports by value, however, grew by 4 percent, to nearly \$10.4 billion. Imports' share of the domestic nonrubber footwear market (by volume) remained relatively unchanged at 90 percent, while registering a gain of 4 percentage points in value, to 82 percent.

China and Italy were the only major suppliers increasing their shipments of nonrubber footwear to the United States in 1996. U.S. imports from China increased by 4 percent to 743 million pairs (\$5.3 billion), and those from Italy rose by 8 percent to almost 49 million pairs (\$1.1 billion). Imports from all other countries together declined by 8 percent, to 293 million pairs. China expanded its share of the U.S. nonrubber footwear market in terms of quantity to 62 percent in 1996 from 59 percent in 1995.

U.S. nonrubber footwear imports from Brazil declined by 5 percent in 1996 from the 1995 level, to 91.6 million pairs, valued at \$1.2 billion. This decline followed a 21-percent drop in 1995, partly reflecting a 9-percent depreciation of the Brazilian real against the U.S. dollar in 1996, bringing the exchange rate closer to the July 1994 level. About 95 percent of the imports from Brazil consisted of footwear with leather uppers, primarily women's shoes, in the price range of \$12 to \$16 per pair (f.o.b.).

U.S. imports from Spain declined by 2 percent, to 21.7 million pairs (\$390 million), following a 9-percent drop in 1995, as the Spanish peseta, which appreciated by 8 percent in 1995, stabilized somewhat in 1996. Imports from Indonesia and Thailand, consisting primarily of leather athletic footwear, declined by 5 and 24 percent, respectively.

The rapid decline in imports from Taiwan and Korea reflected continued movement of labor-intensive footwear operations from these countries to low-wage Asian countries, particularly China. In 1996, imports from Taiwan and Korea declined by 14 and 36 percent, respectively, and together they supplied 27.7 million pairs, representing only 2 percent of the U.S. nonrubber footwear market. In 1986, Taiwan and Korea were the largest sources, which together supplied 619 million pairs, or 54 percent of U.S. nonrubber footwear market.

---

<sup>1</sup>U.S. producers' footwear shipments declined by 9 percent in quantity and by 15 percent in value, reflecting a 7-percent drop in the average price per pair in 1996. However, production declined by only 3 percent in 1996. The much sharper decline in shipments at lower unit value indicates a likely change in product mix and possible inventory buildup. In addition, the Census data for 1996 is preliminary and subject to revision.

U.S. nonrubber footwear imports from Mexico continued to increase rapidly, by 58 percent, to 15.5 million pairs in 1996. The value of these imports rose by 45 percent, reflecting a 9-percent decline in the unit value. A significant portion of the imports entered under the "9802" tariff provision, which provides a partial duty exemption for articles assembled abroad of U.S. fabricated components. The growth in imports from Mexico is attributed, in part, to preferential U.S. tariffs under the North American Free Trade Agreement (NAFTA) for Mexican goods and to the devaluation of the Mexican peso against the U.S. dollar, which effectively reduced U.S. dollar costs of assembling as well as manufacturing footwear in Mexico, enabling U.S. firms to improve their competitive position against low-cost imports from Asia.

## Footwear plant openings and closings, 1996

### Openings:

- |                                   |                   |
|-----------------------------------|-------------------|
| 1. G & W Shoe Manufacturing, L.C. | Carrollton, Texas |
| 2. Westmoor Bootmakers, Inc.      | El Paso, Texas    |

### Closings:

- |                                 |                              |
|---------------------------------|------------------------------|
| 1. Altama Delta Corporation     | Darien, Georgia              |
| 2. Cole-Haan Footwear           | Lewiston, Maine              |
| 3. Craddock-Terry, Inc.         | Farmville, Virginia          |
| 4. Kinney Shoe Corporation      | Beaver Springs, Pennsylvania |
| 5. Munro & Co., Inc.            | England, Arkansas            |
| 6. Nine West Group              | Fulton, Missouri             |
| 7. Parsons Footwear             | Parsons, West Virginia       |
| 8. The Penobscot Shoe Co.       | Old Town, Maine              |
