Mammals of the Arctic National Wildlife Refuge: Skull Box Identification Key

Skull box 1	Snowshoe hare
Skull box 2	Wolverine
Skull box 3	Arctic ground squirrel
Skull box 4	Lynx
Skull box 5	Caribou
Skull box 6	Grizzly bear
Skull box 7	Weasel (Ermine)
Skull box 8	Gray wolf
Skull box 9	Collared lemming
Skull box 10	Red fox

All skulls are full scale.

These skull boxes were created by the U.S. Fish and Wildlife Service with assistance from the Fairbanks North Star Borough School District and Toyota USA Foundation. Use of these skull boxes by educators for classroom and field purposes is authorized and encouraged. All other uses, please contact Cathy Curby at <arctic_refuge@fws.gov>.

Mammals of the Arctic National Wildlife Refuge: Skull Box 1

(See Skull Box identification sheet for skull identities.)

All skulls are full scale.

Instructions:

Print skull box page. (Print at or above 150 dots per inch (dpi) for sharpest results.)

Cut on purple line around complete box and tabs.

Fold along all folding lines.

Apply glue to tabs and glue box together.

(Before gluing the final side, you may wish to insert crumpled tissue so the box is more substantial.)

These skull boxes were created by the U.S. Fish and Wildlife Service with assistance from the Fairbanks North Star Borough School District and Toyota USA Foundation. Mammals of the Arctic National Wildlife Refuge: Skull Box 2* - Instructions

(See Skull Box identification sheet for skull identities.)

All skulls are full scale.

Instructions:

Print skull box pages. (Print at or above 300 dots per inch (dpi) for sharpest results.)

Cut on purple line around all box sections and tabs.

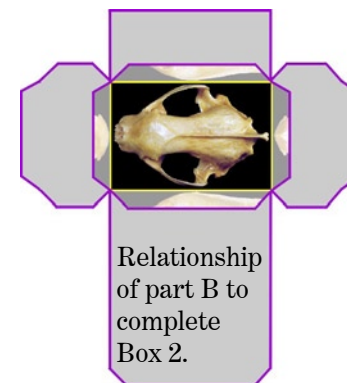

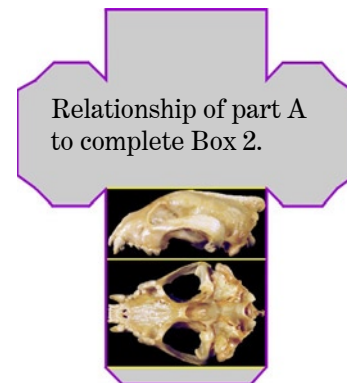

Fold along all folding lines.

Lay box sections on a flat surface to make gluing easier.

In the order indicated on each photo-tab, apply glue to a photo-tab, then glue that tab under the matching box side. (Refer to the small relationship diagrams to see how each section fits.)

When all the sections of the box are glued together, apply glue to the gray tabs, in the order indicated, to glue together the completed box.

(Before gluing the final side, you may wish to insert crumpled paper so the box is more substantial.)

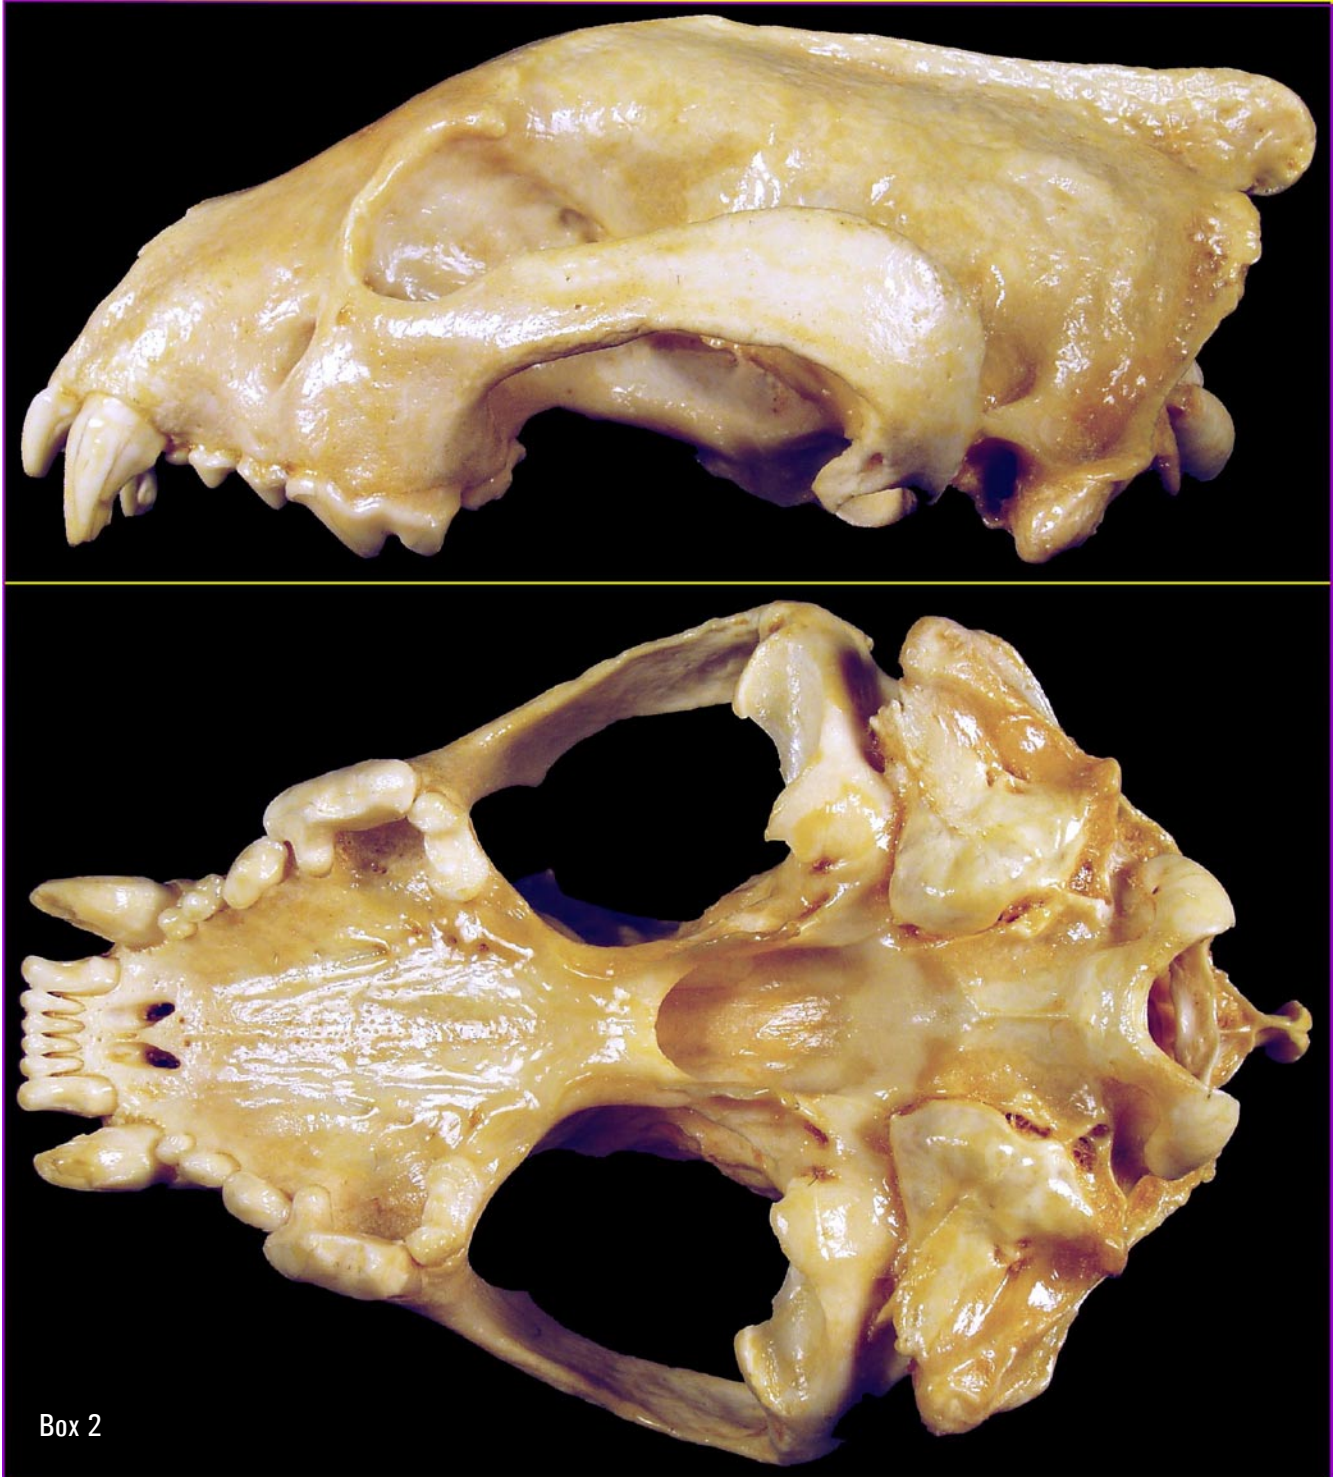

[This skull was varnished, so it has an unusual glossy, yellow finish.]

These skull boxes were created by the U.S. Fish and Wildlife Service with assistance from the Fairbanks North Star Borough School District and Toyota USA Foundation. Use of these skull boxes by educators for classroom and field purposes is authorized and encouraged. All other uses, please contact Cathy Curby at <arctic_refuge@fws.gov>.

Mammals of the Arctic National Wildlife Refuge: Skull Box 5* - Instructions

(See Skull Box identification sheet for skull identities.)

All skulls are full scale.

Instructions:

Print skull box pages. (Print at or above 150 dots per inch (dpi) for sharpest results.
Print on card stock to make a sturdier box.)

Working on one side of the box at a time, cut around the outside of each section and tabs.

In the order indicated on the tabs, apply glue to the *green* photo-tabs, then glue these tabs under their adjacent sections. Repeat with the *yellow* photo-tabs to complete the box side.

When all sides are complete, lay box sections on a flat surface to make gluing easier.

Continuing in the order indicated, apply glue to each tab, then glue that tab under the adjacent box side. (Refer to the small relationship diagrams to see how each side fits.)

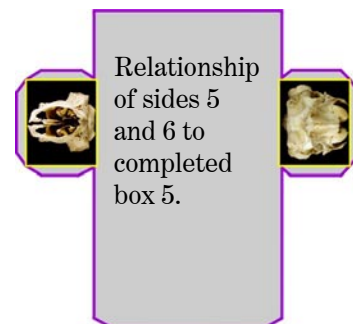

When all the sections of the box are glued together, fold along all folding lines.

Apply glue to the remaining tabs, in the order indicated, to glue together the completed box.

(Before gluing the final side, you may wish to insert crumpled paper so the box is more substantial.)

Relationship of all sides for Box 5.

Relationship of sides 5 and 6 to completed box 5.
