Technical comments:⁴

The Commission staff suggests that the article description of HTS heading 9902.24.32 be modified as shown on page 1 of this report in order to provide a better representation of the chemical name. Although the term “bioallethrin” represents the IUPAC name shown on page 1, the staff notes that the CAS registry number is used to refer to both bioallethrin and allethrin, the latter which is a mixture of unresolved product isomers.

⁴ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.

In addition, the Commission staff notes that H.R. 5020 and H.R. 5021 cover product isomers of bioallethrin. For the purposes of Customs administration, a single HTS heading could be drafted to provide for a duty suspension on bioallethrin and S-bioallethrin (the left-handed, or “S” isomer), the product isomer covered by H.R. 5021, which would ease some administrative burdens with Customs.
