

H. Resource Analysis Summary

Each resource specialist assessed every unauthorized route proposed as an addition to the NFTS in any alternative at a level sufficient to support their effects analysis and identify any necessary site-specific mitigation. Table H.01-1 presents a summary of this resource analysis with each specialist indicating one of the four options listed below for every route. The project record contains additional details.

1. The route was considered; a field visit was not necessary; the effects of adding the route to the NFTS are acceptable (meet law, regulation, and policy; routine maintenance is assumed).
2. The route was considered, a field visit was made and the effects are acceptable (meet law, regulation, and policy; routine maintenance is assumed).
3. The route was considered, a field visit was made and site-specific mitigation is prescribed to reduce the effects to acceptable (meet law, regulation, and policy; routine maintenance is assumed).
4. The route was considered, a field visit was made and a determination was made that the effects could not be mitigated. The route is not recommended by the specialist for inclusion.
