Airport Certification Information Bulletin 2009-05

In support of the changes to AC 150/5200-30C, Airport Winter Safety and Operations, the FAA Great Lakes Region has provided a sample [Snow and Ice Control Plan \(SICP\) Template](#) for your airport to consider when revising your plan. While this format is not mandatory, we feel this template will assist your airport in better compliance with 14 CFR Part 139. Additionally, this format will ensure a more timely review and approval process for both FAA and your airport. As mandated in this AC, all Part 139 airports must submit a revised SICP to the FAA no later than *April 30, 2009* for approval.

If you have any questions or concerns, please contact your respective Airport Certification Safety Inspector.
