## EXECUTIVE SUMMARY

### What is the purpose of this report?

Section 18 of the Endangered Species Act (Act) of 1973 requires the Secretary of the Interior (working through the Fish and Wildlife Service) to annually report certain expenditures for the conservation of threatened and endangered species. This report presents the reported expenditures for Fiscal Year 2002 (October 2001 - September 2002).

### What expenditures are reported?

Beginning with the FY 2001 report, we have sought to more fully identify other Act-related expenditures by asking for expenditures not identifiable to specific individual species, in addition to the standard request. In the past and for this report, expenditures that are reasonably identifiable for a specific listed species have been reported. All Federal agencies and those States receiving section 6 grant-in-aid funds pursuant to the Act are asked to report. Since only a few foreign species are receiving expenditures from U.S. governmental agencies, we restrict these annual reports to a discussion concerning listed U.S. species (foreign species are tabulated as "Other ESA Expenses").

Expenditures are identified by listed entity, which may be a species, subspecies, Distinct Population Segment, or Evolutionarily Significant Unit as identified in 50 CFR 17.11 and 17.12. They are reported separately for the Service, the States, and in aggregate for all other reporting Federal agencies. The Service and 20 other Federal agencies identified expenditures for the conservation of individual threatened and endangered species. Two additional Federal agencies responded that their expenditures were not reasonably identifiable to specific individual species, and they could not provide data. We included the data from all Federal agencies in Appendix B.

### What expenditures were formerly not included?

The reporting Federal and State agencies made a good faith effort to develop species-by-species expenditures for this report. However, a significant portion of threatened and endangered species conservation activities includes law enforcement, consultation, recovery coordination, activities benefiting multiple species, and other actions that are not easily identifiable to specific individual species. Accounting procedures by all agencies for most staff salaries, operations, maintenance, and other support services are not recorded to specific individual species. These costs are included in this report as "Other ESA Expenses."

### What are the expenditures reported for FY 2002?

- Total Expenditures reported were \$1,191,751,648, of which \$834,120,452 was reported as expenditures for specific individual species, including \$114,902,569 for land acquisition; and \$357,631,196 was reported as "Other ESA Expenses" (not identified to species), of which \$55,317,400 was for land acquisition.
- Table 1 shows expenditures reasonably identifiable to specific individual species, for each species, by the Service, other Federal agencies collectively, and the States collectively. Non-specific "Other ESA Expenses" by each of these categories are shown at the end of this Table. Table 2 displays species-specific expenditures by species expenditure rank, in descending order. Table 3 displays land acquisition expenditures, and individual agency reports are in Appendix B.
- The percent of threatened and endangered species with expenditures reported: 92.4 (not including "Other ESA Expenses")
- The median and maximum general (non-land) expenditure for species with at least \$100 reported expenditures (not including "Other ESA Expenses") (Table B):

Median - \$14,100  
Maximum species total - \$55,998,075

- The range of general (non-land) expenditures for species: \$0 to \$55,998,075 (Table 2) (not including "Other ESA Expenses")
- The number of species with general (non-land) expenditures exceeding \$1 million (not including "Other ESA Expenses"): 87 species (including 5 with both endangered and threatened vertebrate populations)(Table 2)
- The number of species with 50 percent of expenditures: 17 (1.3 percent of the ESA list) (Table 2) (not including "Other ESA Expenses")
- The number of species with 90 percent of expenditures: 85 (6.6 percent of the ESA list) (Table 2) (not including "Other ESA Expenses")

How does the FY 2002 expenditure report compare to other years?

Due to differences in reporting methods, this report cannot be easily compared to prior expenditure reports. These year-to-year differences include changes in the number of States reporting, changes in how expenditures are calculated, changes in the agencies' ability to track expenditures, and changes in the number of listed species. Therefore, real dollar increases or decreases cannot be accurately calculated or inferred from the overall or individual totals.

Beginning with the FY 2001 report, we now collect data on costs that cannot be attributed to a specific individual species. This category of "Other ESA Expenses" includes expenditures such as projects that conserved many species, or costs associated with general listed species issues. The total for this category is a significant addition to total expenditures. In fact, Bonneville Power Administration reported "Other ESA Costs of \$187,397,000. [For comparison, we included a table of BPA's similar data from previous years.] However, in many cases and where noted, the statistics in this report were computed without the "Other ESA Expenses" category, using only the species data. This makes it more comparable to other years.

Taking into account the limits of this reporting system and the new "Other ESA Expenses" and excluding land acquisition expenditures, the FY 2002 reported expenditures decreased by approximately \$1.24 billion from the FY 2001 report, a decrease of 55 percent. Of the change in reported expenditures since FY 2001, the States reported \$0.8 million more than the previous year, while the Federal agencies reported a decrease of \$1.24 billion. For an additional comparison of the FY 2002 report to previous years, see "Table B. Summary of Expenditures and Associated Statistics from FY 1989-2002."

## **ENDANGERED SPECIES EXPENDITURES FISCAL YEAR 2002**

### **PURPOSE**

The Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) (Act) was reauthorized and amended on October 7, 1988, under Public Law 100-478. A new section 18 was added to the Act that requires the Fish and Wildlife Service (Service) on behalf of the Secretary of the Interior to report on certain expenditures on a species-by-species basis. The section reads:

SEC. 18. On or before January 15, 1990, and each January 15 thereafter, the Secretary of the Interior, acting through the Fish and Wildlife Service, shall submit to the Congress an annual report covering the preceding fiscal year which shall contain

- (1) the accounting on a species-by-species basis of all reasonably identifiable Federal expenditures made primarily for the conservation of endangered or threatened species pursuant to this Act; and
- (2) an accounting on a species-by-species basis of all reasonably identifiable expenditures made primarily for the conservation of endangered or threatened species pursuant to this Act by States receiving grants under section 6.

This document constitutes the fourteenth report by the Service pursuant to the requirements of section 18 of the Act. The report covers Fiscal Year 2002 (October 2001 - September 2002), although some States may be reporting for a different fiscal year period (without duplicating a previous year's reported data).

The term "State" as used in this report is defined in section 3(17) of the Act to mean any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

The term "conservation," as defined in section 3(3) of the Act, means the use of all methods and procedures necessary to bring any endangered or threatened species to the point where the measures provided for by the Act are no longer necessary--including, but not limited to, research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation. For the purposes of this report, the definition of conservation is further expanded to include any and all actions taken by Federal and State agencies on behalf of threatened or endangered species listed pursuant to the Act.

### **BACKGROUND**

#### What does "Reasonably Identifiable Expenditures" mean?

At the time the reporting requirement was enacted, the Service determined that a good faith effort was expected to develop and obtain data that are "reasonably identifiable" (Appendix A). No extensive or extraordinary measures to develop exceptionally precise data were sought, nor were the reporting agencies expected to "prorate" staff salaries and other normal operational and maintenance costs not directed toward a particular species.

### What is not included in the report?

Since it is recognized that certain expenditures would not be included, this report is not a complete representation of all Federal and State expenditures for the conservation of specific listed species. The expenditures reported in this and the preceding reports do not necessarily constitute all expenditures made for each species.

Expenditures for candidate species or other species not listed in 50 CFR Part 17 as of September 30, 2002, were excluded unless the species was listed during the year. The report has in the past not included unrealized agency revenues from unsold water, timber, power, or other resources. Starting with FY 2001, these are included for the Bonneville Power Administration, because this is tracked with respect to water flows and electrical power generation costs (see "Forgone Revenues", page 7 of the report). In addition, other types of expenses, such as those for litigation, are generally not reported and so are not included.

### What is included in the report?

This report represents a compilation of those reasonably identifiable expenditures for conservation of listed species reported independently by the various Federal and State agencies. Expenditures for FY 2002 are reported for 1,187 threatened and endangered species (92.4 percent) of the 1,285 species that were listed under United States jurisdiction in 50 CFR Part 17 as of September 30, 2002 (Tables 1 and 3). Expenditures are identified by listed entity, which may be a species<sup>1</sup>, subspecies<sup>2</sup>, Distinct Population Segment (DPS)<sup>3</sup>, or Evolutionarily Significant Unit (ESU)<sup>4</sup> as identified in 50 CFR 17.11 and 17.12. They are reported separately for the Service and in aggregate for all other Federal agencies and the States (Tables 1 and 3).

Beginning with the FY 2001 report, we sought to more fully identify expenditures related to the conservation of listed species. We did this by reporting for the Service, and asking other Federal agencies and States to report, expenditures which can be reasonably assigned to a specific listed species (as in the past) and those expenditures which can be reasonably assigned to other Act-related work, but not to individual species. We believe this will provide a more accurate report of expenditures related to the Act. Some agencies and States already reported this information, which was included in an appendix in previous years but not reflected in the totals.

Also beginning with the FY 2001 report, the Service requested that all reporting agencies submit their data directly into a computer web-based data entry system to ensure accuracy, consistency, and efficiency. At the time of submission, the reporting agencies certify that their information is accurate and has been approved by the head of their agency. The information provided in this report pursuant to section 18 of the Endangered Species Act is being presented as it was submitted by these agencies.

Some vertebrate species (as defined under the Act) have more than a single listing in 50 CFR 17.11, where one population is listed as endangered and the other threatened (for example, gray wolf or green sea turtle). For the purposes of reporting expenditures, we combined such multiple listings. We listed subspecies separately (for example, the Hawaiian common moorhen and Mariana common moorhen) when one or more other subspecies are not listed.

For previous reports, except for FY 1999 and 2000, the Evolutionarily Significant Units were reported separately for salmon and steelhead. In those years, they were combined, so that there was one entry each for both species. This was necessary since the request for data was unintentionally sent out without itemizing the ESUs. This year, the ESUs were reported separately again.

---

<sup>1</sup> **Species** For purposes of the Endangered Species Act, this term includes any species or subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife that interbreeds when mature.

<sup>2</sup> **Subspecies** A taxonomic rank below that of species, usually recognizing individuals that have certain heritable characteristics distinct from other subspecies of a species.

<sup>3</sup> **Distinct population segment** A subdivision of a vertebrate species that is treated as a species for purposes of listing under the Endangered Species Act.

<sup>4</sup> **Evolutionarily Significant Unit** A Pacific salmonid stock that is substantially reproductively isolated from other stocks of the same species and which represents an important part of the evolutionary legacy of the species; functionally equivalent to DPS for the purpose of listing under ESA.

The Service did not report land acquisition costs in the expenditures tables for FY 1989. However, other Federal agencies reported land acquisition costs in that report, and even more were reported in the 1990, 1991, and, most noticeably, the 1992 tabulations. Beginning with the FY 1993 report, the Service tabulated expenditures for land acquisition separately (Table 3) from all other expenditures. The Service's land acquisition expenditures (\$101.03 million) have been included in this report when they were identifiable to a species (Table 3). The States' reported land acquisition expenditures (\$17.74 million) are also reported in Table 3, along with \$51.45 million for other Federal agencies. Table 3 also includes a separate category for land acquisition costs (\$55.32 million) that could not be attributed to a species ("Other ESA Expenses"). In the FY 2002 report, total reported land acquisition expenditures for 124 species represent 14.3 percent of the total gross expenditures. Two species had only land acquisition costs without any general costs reported in FY 2002.

## **SECTION 18(1), FEDERAL EXPENDITURES**

### What expenditures are reported by the Fish and Wildlife Service?

The Service's operational categories of expenditures include fisheries, refuges, land acquisition, law enforcement, research, and Regional and field operations for listing, recovery, consultation, migratory birds, and grants. All reasonably identifiable expenditures that could be attributed to individual species within these activities have been included.

For example, reasonably identifiable expenditures for research programs included large sums for species where an intensive effort is underway to save a species from extinction (such as whooping crane or California condor) and smaller sums where only a minor research effort exists. The Refuge Program identified specific listed species, such as the riparian brush rabbit, Key deer, black-capped vireo, and green sea turtle, as a major responsibility of certain refuges. Other listed species use these refuges and many others for all or part of their life cycles.

The Federal Aid portion under section 6 of the Act for each species is included in the FWS TOTAL in Table 1. The State share for each species for which a Federal contribution was made is included in the STATE TOTAL column of Table 1, as reported to the International Association of Fish and Wildlife Agencies (IAFWA).

A significant portion of the Service's funds for consultations, listing, and recovery are incorporated into salaries, operations, and maintenance costs. As a result, they are not reasonably identifiable to species. Previously, only salary, operation, and maintenance costs toward individual species coordinators (such as whooping crane, red wolf, grizzly bear, sea turtle, sea otter) were included in reports. Because of the "Other ESA Expenses" category, salaries, operations, and maintenance costs are included if they contributed to the conservation of listed species.

### What expenditures are reported by other Federal agencies?

The Director of the Service sent a request to other Federal agencies identified as likely to have species-specific expenditures under the Act to report. The Service provided background information identifying what constitutes reasonably identifiable expenditures and how these were to be reported (Appendix A). Two agencies responded that they did not have any reasonably identifiable expenditures for individual species. Results from all responding Federal agencies are included in Appendix B. The data identified by those responding Federal agencies for individual species have been tabulated in the OTHER FED column of this report (Tables 1 and 3). Expenses that could not be reasonably assigned to a species are summarized in Appendix C.

## **SECTION 18(2), STATE EXPENDITURES**

### What is included in the State expenditures?

To maximize the return of information, the assistance of the IAFWA was sought by the Service to coordinate the reporting of reasonably identifiable expenditures made by States.

The States report to the IAFWA, and the latter tabulates the data by species and provides the totals to the Service, based on the best available information provided. The States reported \$76.52 million for general (non-land) expenditures (Table 1) and \$17.74 million for land acquisition expenditures (Table 3). This represented an increase of \$0.84 million in non-land expenditures from the previous year, or a 1.1 percent increase.

## SUMMARY OF DATA

### What is the format for the report's tables?

Table 1 reports the reasonably identifiable expenditures for each species by the Service, other Federal agencies, and the States; expenditures for land acquisitions are not included in this tabulation or used in the ranking. We grouped species in the same general order as they appear in 50 CFR Part 17. Table 1 also provides the rank for each species from Table 2. Table 2 ranks each species in descending order by the SPECIES TOTAL of Table 1; a cumulative total and percentage of the \$719.22 million total (general (non-land) expenditures; not including "Other ESA Expenses") is also provided for comparison. Land acquisition expenditures are included only in Table 3, which also provides the rank for land expenditures by species.

### What are the expenditures reported for FY 2002?

Total Expenditures reported were \$1,191,751,648, of which \$834,120,452 was reported as expenditures for specific individual species, including \$114,902,569 for land acquisition; and \$357,631,196 was reported as "Other ESA Expenses" (not identified to species), of which \$55,317,400 was for land acquisition.

Table 1 shows expenditures reasonably identifiable to specific individual species, for each species, by the Service, other Federal agencies collectively, and the States collectively. Non-specific "Other ESA Expenses" by each of these categories are shown at the end of this Table. Table 2 displays species-specific expenditures by species expenditure rank, in descending order. Table 3 displays land acquisition expenditures, and individual agency reports are in Appendix B.

Percent of threatened and endangered species with reported expenditures: 92.4 (not including "Other ESA Expenses")

The median and maximum general (non-land) expenditure for species with at least \$100 reported expenditures (not including "Other ESA Expenses") (Table B):

Median - \$14,100  
Maximum species total - \$55,998,075

The range of general (non-land) expenditures (not including "Other ESA Expenses"): \$0 to \$55.99 million (Table 2)

Number of species with general (non-land) expenditures exceeding \$1 million (not including "Other ESA Expenses"): 87 species (including 5 with both endangered and threatened vertebrate populations) (Table 2)

Number of species with 50 percent of expenditures: 17 species (1.3 percent of the ESA List) (Table 2);  
13 are threatened species/listed entities, 3 are endangered, and 1 has threatened and endangered populations

Number of species with 90 percent of expenditures: 85 species (6.6 percent of the ESA List) (Table 2)

The 10 listed entities\* with the highest reported expenditures in Fiscal Year 2002 (from Table 2):

2002 RANK	SPECIES (50 CFR Part 17)	STATUS	TOTAL (\$000s)	2001 RANK
1	Sea-lion, Steller	E,T	55,998.1	1
2	Salmon, chinook (spring/summer Snake R.)	T	36,105.3	2
3	Steelhead (middle Columbia R.)	T	31,460.1	4
4	Steelhead (Snake R. Basin )	T	28,563.9	3
5	Trout, bull (U.S.A., coterminous, lower 48 states)	T	27,268.2	5
6	Salmon, coho (OR, CA pop.)	T	24,721.6	6
7	Salmon, chinook (fall Snake R.)	T	22,191.8	7
8	Steelhead (upper Columbia R. Basin)	E	17,894.9	10
9	Salmon, sockeye (U.S.A., Snake R., ID stock wherever found)	E	17,264.3	9
10	Salmon, Chinook (upper Willamette R.)	T	14,937.8	22

\* may be a species, subspecies, DPS, or ESU (as shown in Table 2)

The 10 species with the highest reported expenditures in Fiscal Year 2002 (from Table 2):

2002 RANK	SPECIES (50 CFR Part 17)	STATUS	TOTAL (\$000s)	2001 RANK
1	Salmon, Chinook**	E,T	132,066.2	2
2	Steelhead**	E,T	129,817.5	1
3	Sea-lion, Steller**	E,T	55,998.1	3
4	Salmon, coho**	T	30,299.0	4
5	Trout, bull	T	27,268.2	5
6	Salmon, sockeye**	E,T	23,144.4	6
7	Salmon, chum**	T	17,995.8	7
8	Tortoise, desert	T	8,589.8	13
9	Manatee, West Indian	E	8,571.4	10
10	Whale, right	E	8,392.5	17

\*\* all subspecies, ESUs, or DPSs combined

### How do the expenditures compare among species?

Accounting for the limits of this reporting system, about 1.3 percent of all listed species received approximately half of the reasonably identifiable funding that could be attributed to a species (Table 2). The Congress and some State legislatures identify specific appropriations for most of these species, and State and Federal natural resource managers use public interest in these high-profile species to help protect other species in the same habitats or imperiled by the same threats. The species identified by Congress as deserving of specific appropriations are the same species that drive interest and participation in the considerable State and private sector efforts on behalf of all listed species. It is also important to note that 92.4 percent of the listed species had reported expenditures, including land acquisition expenditures. Of the listed species, 9.6 percent had land acquisition expenditures as well as non-land acquisition expenditures.

## **COMPARISON TO PREVIOUS REPORTS**

### Why are comparisons with other reports difficult?

A good faith effort was made to develop species-by-species expenditures for this report. As the Service, States, and other Federal agencies move to actions and planning efforts that benefit multi-species, dividing costs by the species benefiting becomes more difficult. This year for the second time, we collected data on costs that could not be attributed to a species. This category of "Other ESA Expenses" includes expenditures such as projects that conserved many species, costs associated with general listed species issues, law enforcement, consultations, recovery coordination, operations, maintenance, or other type of support. The total for this category is higher than for any costs reported for an individual species, so expenditures are much higher than in previous years. However, in many cases and where noted, the statistics in this report were computed without the "Other ESA Expenses" data. This makes it more comparable to other years.

For only the FY 1998 report, the salmon and steelhead were not separated by Evolutionarily Significant Units (ESUs). Since the amount of money spent on these two species is large, the effect on the top 10 ranked species is profound. Itemizing by ESUs hides the large total for the species (compare "The 10 listed entities with the highest reported expenditures in Fiscal Year 2002" with "The 10 species with the highest reported expenditures in Fiscal Year 2002" above).

The amendment to the Act requiring this report was passed in the first quarter of FY 1989. The Service, other Federal agencies, and State agencies gathered the best available data with little opportunity for advance planning and coordination in that year. Subsequent reports have greatly benefited by the FY 1989 experience in planning and coordination with the reporting agencies to track such expenditures. Therefore, due to differences in reporting methods, this report cannot be easily compared to the 1989 or subsequent expenditure reports prior to this one. These year-to-year differences include changes in the States' reporting, changes in how expenditures are calculated, and changes in the agencies' ability to track expenditures. Thus, real dollar increases or decreases cannot be accurately calculated or inferred from the overall or individual totals.

When requested by the House Appropriations Committee staff, the Service has provided reports on allocations of current or anticipated funding by species. The reader of this report is cautioned that there are important differences in the assumptions that led to each of these reports. The data on estimated allocations in this report are more precise than in previous reports, since land acquisition costs are separated from general expenditures and since we now include costs not attributable to a species. Table B includes data from the present and previous expenditure reports.

### Forgone Revenues

The Bonneville Power Administration reports that it regularly forgoes revenues in its efforts to conserve listed fish, such as allowing water to spill over the dam to facilitate the passage of juvenile fish. These costs were not included in expenditure reports until the 2001 report. In some years, these BPA forgone revenue figures were not submitted in time to be included in the report. To provide all available information to the reader, those past figures not included in that year's report are shown in Table A for the years they were reported by BPA.

**Table A. OTHER ESA EXPENSES FOR BONNEVILLE POWER ADMINISTRATION (1993-2002; FROM BPA REPORTS) (NOT INCLUDED IN ANNUAL EXPENDITURE REPORTS UNLESS NOTED)**

Fiscal Year	\$ (millions)	Type of Expenditure	Species Benefiting
1993	120-135	Spill for juvenile salmonids, flow augmentations for salmonids, Upper Columbia water budget for salmonids, Minimum Irrigation Pool/Min. Operating Pool	Redfish Lake Sockeye; Snake River Spring, Summer, Fall Chinook (these are called 3 species, but squawfish is also listed)
1994	176-192	Spill for juvenile salmonids, flow augmentations for salmonids, Upper Columbia water budget for salmonids, MIP/MOP	Redfish Lake Sockeye; Snake River Spring, Summer, Fall Chinook (these are called 3 species, but squawfish is also listed)
1995	228	Net Power Purchases/Forgone Revenues: Spill for juvenile salmonids, flow augmentations for salmonids, Upper Columbia water budget for salmonids, MIP/MOP	"Four species": Redfish Lake Sockeye; Snake River Spring/Summer, Fall Chinook, Sturgeon (but squawfish is also listed)
1996	102	Net Power Purchases/Forgone Revenues: MOA Actuals	"Four species": Redfish Lake Sockeye; Snake River Spring/Summer, Fall Chinook, Sturgeon
1997	102	Net Power Purchases/Forgone Revenues: MOA Actuals	"Four species": Redfish Lake Sockeye; Snake River Spring/Summer, Fall Chinook, Sturgeon
1998	184	Net Power Purchases/Forgone Revenues: MOA Actuals	"Four species": Redfish Lake Sockeye; Snake River Spring/Summer, Fall Chinook, Sturgeon
1999	0	Net Power Purchases/Forgone Revenue Costs (spill, flow augmentation, water budget and reservoir levels) not available by report deadline	8 species or ESUs reported
2000	0	Net Power Purchases/Forgone Revenue Costs (spill, flow augmentation, water budget and reservoir levels) not available by report deadline	8 species or ESUs reported
2001	1,531.6*	Power Purchases/Forgone Revenues	12 species or ESUs reported
2002	187.4*	Power Purchases/Forgone Revenues	12 species or ESUs reported
<b>Total (range)</b>	<b>2,631.0 – 2,662.0</b>		

\* included in these reports

**NOTES:**

- All figures include land acquisition expenditures, except those that are shaded. In 1993 the Service began to tabulate these costs separately.
- The Federal and Grand Totals for 1993 differ from those published in the 1993 report due to an error made in the 1993 report for the desert tortoise.
- Due to an error, the Federal and Grand Totals shown for 1995 differ from those published in the 1995 report by \$32,002.5 less than what was reported for the FWS total.
- Figures in *italics* include "Other ESA Expenses" category. In 2001, the Service began to tabulate these non-species-specific costs in addition to the species-specific costs.

Table 1. FY 2002 REPORTED EXPENDITURES FOR ENDANGERED AND THREATENED SPECIES, NOT INCLUDING LAND ACQUISITION

The list of species in Table 1 essentially follows the taxonomic and nomenclatural conventions used in 50 CFR Part 17 for the identification and sequence of names. For ease of reference, the alphabetized, inverted common name is provided within each group (usually Class) of animals. Thus, the gray bat is found with other bats under "Bat, gray" within mammals, and Tar River spiny mussel is found under "Spiny mussel, Tar River" within the clams. Groups of animals follow the sequence: Mammals, Birds, Reptiles, Amphibians, Fishes, and Invertebrates, which include Clams, Snails, Insects, Arachnids, and Crustaceans. Groups of plants follow the sequence: Flowering Plants, Conifers, Ferns, and Lichens.

If a reader should need other information about the names, historical range, or status of an endangered or threatened species, the species can be found in 50 CFR 17.11 (wildlife) or 17.12 (plants), or through our web site at <http://endangered.fws.gov>. The STATUS column indicates whether the species is endangered (E), threatened (T), emergency listed (Em), threatened by similarity of appearance (SAT), or with multiple United States Distinct Population Segments or Evolutionarily Significant Units under separate classifications (E,T) [for purposes of this report, the multiple Distinct Population Segments are counted as one species in the number listed, although Evolutionarily Significant Units for fish are separate].

Service expenditures (FWS TOTAL) and other Federal agency expenditures (OTHER FED) are totaled in the FED TOTAL column. The STATES TOTAL is the amount reported by the International Association of Fish and Wildlife Agencies to the Service. None of these reported totals include known costs for land acquisition; see Table 3 for land acquisitions reported to the Service.

The RANK is from Table 2 and indicates each species rank by identifiable expenditures, where #1 is the highest expenditure.

A category of expenditures that are not attributable to a species is tabulated at the end under "Other ESA Expenses."

**TABLE 1. FY 2002 REPORTED EXPENDITURES FOR ENDANGERED AND THREATENED SPECIES,  
NOT INCLUDING LAND ACQUISITION**

Rank	Species (50 CFR Part 17)	Status	FWS Total (\$)	Other Fed (\$)	Fed Total (\$)	States Total (\$)	Species Total (\$)
75	Bat, gray ( <i>Myotis griseescens</i> )	E	688,000	927,816	1,615,816	21,450	1,637,266
234	Bat, Hawaiian hoary ( <i>Lasiurus cinereus semotus</i> )	E	46,900	89,496	136,396	1,100	137,496
62	Bat, Indiana ( <i>Myotis sodalis</i> )	E	1,124,500	1,464,895	2,589,395	65,300	2,654,695
167	Bat, lesser long-nosed ( <i>Leptonycteris curasoae yerbabuenae</i> )	E	29,200	217,809	247,009	16,100	263,109

Table 2. SPECIES RANKED IN DESCENDING ORDER OF TOTAL FY 2002 REPORTED EXPENDITURES, NOT INCLUDING LAND ACQUISITION

Species are arranged in descending rank order by total identifiable expenditures (Table 1). Cumulative totals and percentages of the general expenditures total (\$719,217.88 million) are provided for comparison. None of these reported totals include known costs for land acquisition; see Table 3 for those costs reported to the Service. This table does not include the "Other ESA Expenses" category.

For purposes of rank, each of the six vertebrate species that have both an endangered and a threatened population on the list are ranked as one species. The six are identifiable by the "E,T" in the STATUS column.

The cumulative total column is the sum of all higher ranked Species Totals (from Table 1) and the selected species entry; cumulative percent is based upon \$719,217.88 million. (Example: \$276.41 million or 38.43 percent of all reported expenditures are for the top 10 listed entities; see species Rank No. 10.)

Table 3. FY 2002 REPORTED LAND ACQUISITION EXPENDITURES FOR ENDANGERED AND THREATENED SPECIES

Species are arranged in the same sequence as Table 1. These costs are not included in the general expenditures of Tables 1 and 2. Only those species that had land acquisition costs reported for FY 2002 are included here. Land rank was included to show the relative order of the species that had land expenditures. For example, the Louisiana black bear was ranked as #1 because it had the highest land expenditures of all the species. The Leedy's roseroot (#124) had the least. "Other ESA Expenses" for land were not included in the ranking (\$55.3 million; see end of Table 3).

## **Appendix A. Supplemental Guidance for Reporting Expenditures for the Conservation of Endangered and Threatened Species**

NOTE: From this year forward, to provide Congress with a more accurate report on expenditures for the conservation of species listed under the Endangered Species Act, we ask you to report both expenditures reasonably attributable to individual species and expenditures reasonably attributable to other ESA-related work, but not to a specific species.

In prior years, we requested only expenditures reasonably attributable to individual species. Nonetheless, some Federal agencies have been reporting expenditures reasonably attributable to other ESA-related work, and this information was transmitted to Congress in an appendix, but was not included in the total expenditures reported.

Starting with this report, we will identify both costs reasonably attributed to individual species and reasonably attributed to other ESA-related work. To provide continuity with past reports, we will report the expenditures for individual species and revise the summary chart to include a new category of "Other ESA Costs" to reflect expenditures not reasonably attributable to individual species.

Please note that Congress requested the information on a species by species basis to the extent this information is reasonably available. We urge you to continue to report this information as the agency-by-agency reports on expenditures for individual species remain an essential component of this report.

Also starting with the FY 2001 report, we are asking each reporting agency to enter the data directly into a web-based system. Your agency's designated expenditures data entry person should go to the secure internet site "<https://ecos.fws.gov/expenditures>", cancel out of the login screen, and follow the registration instructions for acquiring a security password and other relevant steps. He or she will receive an e-mail message within 24 hours during the business week with the details for logging onto the system.

### **BACKGROUND:**

- Section 18 of the Endangered Species Act of 1973 (16 U.S. 1531 *et seq.*) reads, in part, as follows  
A...Fish and Wildlife Service, shall submit to the Congress an annual report covering the preceding fiscal year which shall contain--
  - (1) an accounting on a species-by-species basis of all reasonably identifiable Federal expenditures made primarily for the conservation of endangered and threatened species pursuant to this Act; and
  - (2) an accounting on a species-by-species basis for all reasonably identifiable expenditures made primarily for the conservation of endangered and threatened species pursuant to this Act by States receiving grants under section 6."
- The Conference report for the 1988 amendments made some of the following points concerning the new section 18 of the Act:
  - Provision should not become unduly burdensome or result in diversion of funds from the operation of the program.
  - The Secretary of the Interior is to make a good faith effort to develop and obtain data but is not to undertake extensive or extraordinary measures.
  - Generalized dollar estimates will suffice.
  - Amendment does not apply to monitoring and survey costs for delisted, proposed, and candidate species.

- Amendment is not to require new species-specific time sheets for the Service or other reporting agency.
- Listing, consultation, and law enforcement are to be included to the extent they are "reasonably identifiable."
- Only salary costs that can be reasonably identified as applicable to listed species need be reported.
- For other agencies and States, a good faith effort to collect information is expected; they are expected to cooperate.
- Submission of data from the States or agencies is not to be a precondition to receiving any contracts or grants or establishing other arrangements with the Fish and Wildlife Service.
- Only one data set per agency or bureau should be submitted.

DATA FORMAT:

- Species should be identified by the same scientific name as found in the most current list of species. Amounts above \$2,000 need be reported only to the nearest \$500 or \$1,000; smaller amounts may be rounded to the nearest \$100. Amounts should be reported in actual dollars.
- Expenditures which fit the criteria below but are not reasonably attributable to a single species should be listed at the end of the State or agency report as "Other ESA Costs."

EXPENDITURES TO BE REPORTED:

- Only species on the Federal List of Endangered and Threatened Wildlife and Plants (50 CFR Part 17) at the end of the Fiscal Year (October 1, 2000 to September 30, 2001 for FY 01 and October 1, 2001 to September 30, 2002 for FY 02) are to be reported. Expenditures made prior to the actual listing date of a species, but still within the same year, may be reported (e.g., costs of public meetings, notices, surveys, initial recovery efforts). Monies for unlisted, separate populations of listed vertebrates cannot be allowed into the report (e.g., southeastern brown pelicans, Atlantic and Gulf coast least terns, Alaska bald eagles or gray wolves). Expenditures for State-listed species are not reportable unless they are also federally listed. Amounts for foreign species on the list (e.g., grants or contracts carried out in another country) are reportable in the same manner as domestic species, again, to the extent they are reasonably identifiable.
- Only reasonably identifiable expenditures for listed species will be totaled in this report. Extraordinary accounting to track monies expended on listed species are not expected.
- All land acquisition costs are to be reported separately from all other identifiable expenditures. Such acquisitions must be primarily for the purpose of conserving federally listed species. As with other projects, those portions of land acquisition costs that are specifically for a listed species may be prorated out of the total acquisition costs when the other remaining habitat is being acquired for other purposes (e.g., 25 acres of a 250-acre purchase will be set aside).
- Expenditures associated with consultations pursuant to section 7 of the Act should be reported as for the benefit of a specific species to the extent they are reasonably identifiable to that particular species. Thus, a formal consultation dealing with a single species, or up to several species where the relative costs are easily divisible, would be subject to reporting under that or those species, while consultation costs known to have occurred but not reasonably attributable to a given species would be included in the "Other ESA Costs" total.

- Monitoring and survey costs should be reported when: 1) The cost of the monitoring or survey was during the period the species was under a proposed listing and the species was actually listed in the same fiscal year that the monitoring and surveys were conducted; 2) the monitoring or survey covered both candidates and listed species and the costs can be prorated to include only the listed species, 3) the cost was reasonably identifiable to a single species (should be reported for that species); or 4) costs meeting the criteria in (1) and (2) but not reasonably identifiable to a single species should be reported in the “Other ESA Costs” category.
- Reasonably identified salary and benefits of an employee working full or part-time on a single species should be reported for that species, while staff costs that are not assigned to work on particular species should be reported in the “Other ESA Costs” category. Travel costs should be treated similarly.
- Any State or Federal project that incurs increased costs related directly to mitigation or other conservation efforts on behalf of federally listed species should report that added cost, either by species if reasonably identifiable as such, or as “Other ESA Costs.”
- All State agencies (e.g., parks, heritage program, forests, highways) may report their expenditures, although only a single report from each State (plants and animals must be reported together) is expected to be submitted to the International Association of Fish and Wildlife Agencies.
- Examples of reportable expenditures include status surveys, habitat management or acquisition, research, propagation (including surrogate species), recovery plan development or implementation, and mitigation. The project must primarily benefit listed species and not other conservation goals, although if a reasonably identifiable portion of the expenditure is for the benefit of listed species (either individually or collectively), that portion of the expenditure may be reported in the appropriate category.
- Expenditures in a single project devoted to a number of listed species should either be prorated by the agency or reported as “Other ESA Costs.” General surveys or projects that cover a large number of species, some of which may not be listed, are reportable only to the extent that the agency can reasonably identify the proportion of the costs that benefit listed species.

## **Appendix B. Reports Provided by Other Federal Agencies FY 2002**

Department of Agriculture:

Animal and Plant Health Inspection Service  
Forest Service  
Natural Resources Conservation Service

Department of Commerce:

National Oceanic and Atmospheric Administration

Department of Defense:

Office of the Under Secretary  
(representing Air Force, Army, Defense Logistics Agency, Marine Corps, and Navy)  
Army Corps of Engineers

Department of Energy:

Bonneville Power Administration  
Federal Energy Regulatory Commission  
Nuclear Regulatory Commission

Department of the Interior:

Bureau of Indian Affairs  
Bureau of Land Management  
Bureau of Reclamation  
National Park Service  
Office of Surface Mining\*  
U.S. Geological Survey

Department of Transportation:

Coast Guard  
Federal Aviation Administration  
Federal Highway Administration

Department of the Treasury

Customs Service\*

Other:

Environmental Protection Agency  
Smithsonian Institution  
Tennessee Valley Authority

\* Indicates Agency with no reasonably identifiable expenditures

**Appendix C. Summary of Comments from Reporting Agencies for “Other ESA Expenses” Category**

Agency	Expenditure	Comments
Arizona	\$905,000	\$500 to the Thick-billed Parrot, Rhynchopsitta pachyrhyncha \$30,000 to Various Flowering Plant Species \$875,000 to Other ESA Cost not including the above NOTE: SJ removed \$500 for TB Parrot and moved it to Foreign Species 2/04
Arkansas	\$1,600	none
DOD Air Force	\$755,100	none
DOD Army	\$5,639,000	none
DOD Army Corps of Engineers	\$1,949,459	none
DOD Marine Corps	\$342,000	none
DOD Navy	\$1,500,000	Various species
DOE Bonneville Power Administration	\$187,397,000	Part was added 3/30/04 by FWS after phone conversation with BPA's Thatcher that it was inadvertently left off ECOS, although the hardcopy of the letter July 03 clearly had it. The rest of the "Other" came in after the deadline and was added by FWS on 6/4/04: \$160,400,000 for power purchases and forgone revenues
DOE Federal Energy Regulatory Commission	\$5,500	none
DOI Bureau of Indian Affairs	\$3,292,557	not listed and not counted here or anywhere: flat-tailed lizard \$932.00
DOI Bureau of Land Management	\$969,350	-Creation of a Recovery Plan Database -Continued Chicago Botanic Gardens Internships to reduce land use plan backlog consultation and T&E project support at 25 offices. -Restored stream habitat to improve conditions for salmonids in Oregon. -Reconnected 19 miles of stream in the Muddy Creek watershed, Montana, to restore migration for several sensitive fish species. -Continued a successful volunteer rare plant monitoring program at 150 sites on federal, state, and private lands in Washington. -Developed a comprehensive Plant Conservation Principles course to serve conservation professionals with rare and imperiled plant conservation/management responsibilities and support information needs of federal agencies. -Continued to survey for rare plants, provide data to help in seeding projects, and provide information on presence of noxious weeds and prevention of their spread. -Acquired a conservation easement on 10,637 acres of mixed-grass prairie on a private ranch in Montana that contains critical habitat for swift fox, pronghorn antelope, sharp-tailed and sage grouse, ferruginous hawks, shorebirds, and waterfowl. -Completed a database and a report summarizing an analysis of habitat condition, factors influencing habitat condition, rare species distribution, and land ownership. -Studied the habitat use of the Hungarian partridge to estimate population dynamics and develop a species management plan. Project will determine the level of competition with other native bird species, including sage grouse and mountain plover. -Restored riparian conditions with native plant stock grown to encourage the recovery of native salmonid species.
DOI Bureau of Reclamation	\$15,233,800	none
DOI US Geologic Survey	\$997,900	Southern California T&E Species (HCP monitoring, reserve design, scientific review) 405000 Southern Nevada HCP technical assistance 30000 San Joaquin Valley species 15000 North American listed Turtles 0 North American listed Snakes 0 Plants of Serpentine Soils 71000 Rare plants of Channel Islands 78000 Preparing incidental take reports 500 Disease diagnostics on various mammal, birds, amphibians, and reptiles 150000 Disease diagnostics in the Pacific basin 102500 ARMI research on amphibians 10000 Diseases of Hawaiian forest birds 27500 Mariana Archipelago contaminant influence on T/E spp. 54400 Mussels, freshwater T 28000 Unionids (Bivalves) E 0 Fish, freshwater E 26000 SJewell replaced old value on 2/12 (old value was wrong)
