

THE SECRETARY OF THE INTERIOR
WASHINGTON

AUG 30 1999

Honorable Albert Gore, Jr.
President of the Senate
Washington, D.C. 20510

Dear Mr. President:

Pursuant to the provisions of Public Law 100-478, I am pleased to enclose the 1997 annual report compiled by the United States Fish and Wildlife Service on reasonably identifiable expenditures for the conservation of endangered and threatened species by Federal and State agencies.

Sincerely,

A handwritten signature in black ink, appearing to read "Bruce Babbitt".

Enclosure

THE SECRETARY OF THE INTERIOR
WASHINGTON

AUG 30 1999

Honorable J. Dennis Hastert
Speaker of the House
of Representatives
Washington, D.C. 20515

Dear Mr. Speaker:

Pursuant to the provisions of Public Law 100-478, I am pleased to enclose the 1997 annual report compiled by the United States Fish and Wildlife Service on reasonably identifiable expenditures for the conservation of endangered and threatened species by Federal and State agencies.

Sincerely,

A handwritten signature in black ink, appearing to read "Bruce Babbitt".

Enclosure

Executive Summary

What is the purpose of this report?

Section 18 of the Endangered Species Act (Act) of 1973 requires the Secretary of the Interior (working through the Fish and Wildlife Service) to annually report certain expenditures for the conservation of threatened and endangered species. This report presents the reported expenditures for Fiscal Year 1997 (October 1996 - September 1997).

What expenditures are reported?

Only those expenditures that are reasonably identifiable for a listed species are to be reported. All Federal agencies and those States receiving section 6 grant-in-aid funds pursuant to the Act are asked to report. Since only a few foreign species are receiving expenditures from U.S. governmental agencies, we restrict these annual reports to a discussion concerning listed U.S. species.

Expenditures are identified by species and reported separately for the Fish and Wildlife Service (Service), the States, and in aggregate for all other reporting Federal agencies. The Service and 19 other Federal agencies identified expenditures for the conservation of individual threatened and endangered species. Two additional Federal agencies responded that their expenditures were not reasonably identifiable to species. We included responses from all Federal agencies in Appendix 1.

What expenditures are not included?

The Federal and State agencies involved made a good faith effort to develop species-by-species expenditures for this report. However, a significant portion of threatened and endangered species conservation activities includes law enforcement, consultation, recovery coordination, and other actions that are not easily or reasonably identified to species. Accounting procedures by all agencies for most staff salaries, operations, maintenance, and other support services are not recorded to species and are not required to be for purposes of this report.

What are the expenditures reported for FY 1997?

- Total Expenditures reported: \$300,931,300 (\$35,019,600 for land acquisition--Table 3, \$265,911,700 all other expenditures--Table 1)
- Percent of threatened and endangered species with expenditures reported: 95 percent
- The median and maximum total general (non-land) expenditure for species with at least \$100 reported expenditures:
Median - \$13,800
Maximum species total - \$28.55 million
- The range of general (non-land) expenditures for 70 percent of the listed species: \$0 to \$30,000 (Table 2).
- Number of species with 50 percent of expenditures: 10 species (.90 percent of the list) (Table 2).

- Number of species with 90 percent of expenditures: 101 species (9.1 percent of the list) (Table 2).

How does the 1997 expenditure report compare to other years?

Due to differences in reporting methods, this report cannot be easily compared to the 1989 or subsequent expenditure reports. These year-to-year differences include changes in the number of States' reporting, changes in how expenditures are calculated, and changes in the agencies' ability to track expenditures. Therefore, real dollar increases or decreases cannot be accurately calculated or inferred from the overall or individual totals.

Taking into account the limits of this reporting system and excluding land acquisition expenditures, the 1997 reported expenditures decreased by approximately 20 million dollars from the FY 1996 report. The 1997 reported expenditures are approximately 13.7 million dollars less than those reported in FY 1995. For an additional comparison of the FY 1997 report to previous years see the "Summary of Figures" table on page 7.

ENDANGERED SPECIES EXPENDITURES FISCAL YEAR 1997

WHAT IS THE PURPOSE OF THIS REPORT?

The Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) (Act) was reauthorized and amended on October 7, 1988, under Public Law 100-478. A new section 18 was added to the Act that requires the Fish and Wildlife Service (Service) on behalf of the Secretary of the Interior to report on certain expenditures on a species-by-species basis. The section reads:

SEC. 18. On or before January 15, 1990, and each January 15 thereafter, the Secretary of the Interior, acting through the Fish and Wildlife Service, shall submit to the Congress an annual report covering the preceding fiscal year which shall contain

- (1) the accounting on a species-by-species basis of all reasonably identifiable Federal expenditures made primarily for the conservation of endangered or threatened species pursuant to this Act; and
- (2) an accounting on a species-by-species basis of all reasonably identifiable expenditures made primarily for the conservation of endangered or threatened species pursuant to this Act by States receiving grants under section 6.

This document constitutes the ninth report by the Service pursuant to the requirements of section 18 of the Act. The report covers Fiscal Year 1997 (October 1996 - September 1997), although some States may be reporting for a different fiscal year (without duplicating previous year's reported data).

The term "State" as used in this report is defined in section 3(17) of the Act to mean any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

The term "conservation," as defined in section 3(3) of the Act, means the use of all methods and procedures necessary to bring any endangered or threatened species to the point where the measures provided for by the Act are no longer necessary--including, but not limited to, research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation. For the purposes of this report, the definition of conservation is further expanded to include any and all actions taken by Federal and State agencies on behalf of threatened or endangered species listed pursuant to the Act.

BACKGROUND

What does "Reasonably Identifiable Expenditures" mean?

The purpose of the above 1988 amendment was to obtain information with which to assess claims that a disproportionate effort is being made to conserve a few, highly visible species at the expense of numerous, less well-known species that may have greater need for protection. At the time of the first report, the Service met with staff of the House Merchant Marine and Fisheries Committee and the Senate Environment and Public Works Committee for clarification of the intent and purpose of the amendment. As a result of these discussions, the Service determined that a good faith effort was expected to develop and obtain data that are "reasonably identifiable" (Appendix 2). No extensive or extraordinary measures to develop exceptionally precise data were sought, nor were the reporting

agencies expected to "pro-rate" staff salaries and other normal operational and maintenance costs not directed towards a particular species.

What is not included in the report?

Since it is recognized that certain expenditures would not be included, this report is not a complete representation of all Federal and State expenditures for the conservation of specific listed species. The expenditures reported in this and the preceding reports do not necessarily constitute all expenditures made for each species. This report does not present cost accounting in the sense of an accountant's ledger of credits and debits of all Federal and State funds available and their expenditure.

A few species, which were known historically to occur in the United States but are not listed in FY 1997 in the United States, are not included (e.g., short-tailed albatross, northern swift fox, thick-billed parrot) in the tabulation. Expenditures for candidate species or other species not listed at 50 CFR Part 17 as of September 30, 1997, were excluded. For example, even though Congress appropriated money for the prelisting recovery of candidates, these species are not listed at 50 CFR Part 17 and, therefore, are not reported here, unless the species was listed during the year. The report also does not include unrealized revenues from unsold water, timber, power, or other resources by the agencies reporting.

What is included in the report?

This report does represent a compilation of those reasonably identifiable expenditures reported independently by the various Federal and the State agencies. Expenditures for FY 1997 (Tables 1 and 3) are reported here for 1,060 threatened and endangered species (95 percent) of the 1,111 species that were listed under United States jurisdiction at 50 CFR Part 17 on September 30, 1997. Expenditures are identified by species and reported separately for the Service and in aggregate for all other Federal agencies reporting and for the States (Tables 1 and 3).

Some vertebrate species (as defined under the Act) have more than a single listing in 50 CFR 17.11 where one population is listed as endangered and the other threatened (for example the gray wolf, or green sea turtle). For the purposes of reporting expenditures, we combined such multiple listings. We listed subspecies separately (for example the Hawaiian common moorhen and Mariana common moorhen) when one or more other subspecies are not listed.

The Service did not report land acquisition funds in the tables of expenditures for FY 1989. However, other Federal agencies reported land acquisition costs in that report, and even more were reported in the 1990, 1991, and, most noticeably, 1992 tabulations. Beginning with the FY 1993 report, the Service has tabulated the known expenditures for land acquisition separately (Table 3) from all other expenditures. The Service's land acquisitions expenditures (\$35.02 million) have been included in this report, when they were identifiable to a species (Table 3). The States' reported land acquisition expenditures (\$508,800) are also reported in Table 3. In this report for FY 1997, total reported land acquisition expenditures represent 13.2 percent of the total gross expenditures. Thirteen species, Avon Park harebells, scrub blazing star, pygmy fringe tree, sandlace, Florida ziziphus, short-leaved rosemary, wireweed, pigeon wings, Garrett's mint, scrub mint, plum scrub, bluetail mole skink, and Carter's mustard had only land acquisition costs reported in FY 1997 (Tables 1 and 3).

SECTION 18(1), FEDERAL EXPENDITURES

What expenditures are reported by the Fish and Wildlife Service?

The Service's operational categories of expenditures include fisheries, refuges, land acquisition, law enforcement, research, and Regional and field operations for listing, recovery, consultation, environmental contaminant and habitat conservation activities. All reasonably identifiable expenditures that could be attributed to individual species that were made by these activities have been included.

For example, reasonably identifiable expenditures for research programs included large sums for species where an intensive effort is underway to save a species from extinction (e.g., whooping crane, California condor) and smaller sums where only a minor research effort exists. The Refuge program identified specific listed species as a major responsibility of certain refuges. The Columbian white-tailed deer, Key deer, Hawaiian monk seal, and masked bobwhite quail are examples of listed species where the respective National Wildlife Refuge is devoted nearly entirely to their management and recovery. Other listed species use these and many other refuges for all or part of their life cycles. Only "dedicated" refuge expenditures that are reasonably identifiable to species are included in this report.

Listed fish species benefit from fisheries programs, but costs are seldom identifiable to a particular species. For example, the Dexter National Fish Hatchery in Arizona has achieved a remarkable record in the propagation and maintenance of listed southwestern fishes. Attributing costs on a species-by-species basis for the dozen or so species managed at this facility is difficult. Few species-specific expenditures could be reasonably identified in the Law Enforcement program for specific endangered species. The Federal Aid portion under section 6 of the Act for each species is included in the FWS TOTAL in Table 1. The State share for each species for which a Federal contribution was made is included in the STATE TOTAL column of Table 1, as reported to the International Association of Fish and Wildlife Agencies (IAFWA).

A significant portion of the Service's funds for consultations, listing, and recovery are incorporated into salaries, operations and maintenance costs. As a result, they are not reasonably identifiable to species. Only salary, operation, and maintenance costs towards individual species coordinators (e.g., whooping crane, red wolf, grizzly bear, sea turtles, sea otter) are included in this report.

What expenditures are reported by Other Federal Agencies?

The Director of the Service sent a request to other Federal agencies identified as likely to have some species-specific expenditures under the Act to report. The Service provided background information identifying what constitutes reasonably identifiable expenditures and how these were to be reported (Appendix 2). Two agencies responded with letters indicating that they did not have any reasonably identifiable expenditures for individual species. Correspondence from all responding agencies is included in Appendix 1. The data identified by those responding Federal agencies for individual species have been tabulated in the OTHER FED column of this report (Tables 1 and 3).

SECTION 18(2), STATE EXPENDITURES

What is included in the State expenditures?

The Committees' staffs anticipated that not all States would be willing to voluntarily submit their expenditures for a variety of reasons. As a result, the Secretary was expected to only submit those

expenditure figures that were voluntarily provided. In order to maximize the return of information, the assistance of the IAFWA was sought by the Service to coordinate the reporting of reasonably identifiable expenditures made by States.

The States' report to the IAFWA, and the latter tabulates the data by species and provides the totals to the Service. IAFWA informed us in their report that California, Colorado, and New Hampshire did not report expenditures for fiscal year 1997. Thus, the States' expenditures reported in Tables 1 and 3 under the column STATES TOTAL does not include expenditures from these States. The States' reported \$11,761,010 for general (non-land) expenditures (Table 1) and \$508,800 for land acquisition expenditures (Table 3).

SUMMARY OF DATA

What is the format for the report's tables?

Table 1 reports the reasonably identifiable expenditures for each species by the Service, other Federal agencies, and the States; expenditures for land acquisitions are not included in this tabulation or used in the ranking. We grouped species in the same general order as they appear in 50 CFR Part 17. Tables 1 and 3 also provide the rank for each species from Table 2. Table 2 ranks each species in descending order by the SPECIES TOTAL of Table 1; a cumulative, or running, total and percentage of the \$266 million total (general (non-land) expenditures) is also provided to assist the reader. Land acquisition expenditures are included only in Table 3.

What are the expenditures reported for FY 1997?

Total Expenditures reported: \$300,931,300 (\$35,019,600 for land acquisition--Table 3,
\$265,911,700 all other expenditures--Table 1).

Percent of threatened and endangered species with reported expenditures: 95%

The median and maximum total general (non-land) expenditure for species with at least \$100 reported expenditures:

Median - \$13,800
Maximum species total - \$28.55 million

The range of general (non-land) expenditures for 70 percent of the listed species:
\$0 to \$30,000 (Table 2).

Number of species with general (non-land) expenditures exceeding \$1million:
Forty-six species (including four with both endangered and threatened vertebrate populations) (Table 2).

Number of species with 50 percent of expenditures: 10 species (0.9 percent of the list) (Table 2).
Seven are threatened species.

Number of species with 90 percent of expenditures: 101 species (9.1 percent of the list) (Table 2).

What are the 10 species with the highest reported expenditures in Fiscal Year 1997 (from Table 2)?

1997 RANK	SPECIES (50 CFR Part 17)	STATUS	TOTAL (\$000s)	1996 RANK
1	Salmon, chinook, Snake R. spring/summer run	T	28,545.27	1
2	Salmon, chinook, Snake R. fall run	T	25,655.96	2
3	Salmon, sockeye (=red, =blueback), Snake R.	E	18,051.44	3
4	Owl, northern spotted	T	13,467.43	4
5	Woodpecker, red-cockaded	E	12,055.91	5
6	Salmon, coho, OR & CA ESU	T	11,866.18	Not Listed in FY 1996
7	Murrelet, marbled	T	8,895.12	6
8	Sucker, razorback	E	5,782.30	7
9	Tortoise, desert	T	5,712.88	9
10	Bald eagle	T	5,237.96	10

How do the expenditures compare among species?

Taking into account the limits of this reporting system, less than 1 percent of all listed species received approximately half of the reasonably identifiable funding (Table 2). This conclusion was expected. The Congress and some State legislatures identify specific appropriations for most of these species, and State and Federal natural resource managers use the public interest in these high-profile species to help protect other species in the same habitats or imperiled by the same threats. The species identified by Congress as deserving of specific appropriations are the same species that drive interest and participation in the considerable State and private sector efforts on behalf of all listed species. It is also important to note that 95 percent of the listed species had reported expenditures. If you include land acquisition expenditures, 97 percent of the listed species had reported expenditures.

COMPARISON TO PREVIOUS REPORTS

Why are comparisons with other reports difficult?

A good faith effort was made to develop species-by-species expenditures for this report. However, the information presented each year does not reflect the total governmental (Federal and State) effort toward threatened and endangered species conservation and presents an incomplete funding picture. Therefore, the reader is cautioned against making comparisons with other reports on threatened and endangered species expenditures beyond those which are provided below. A significant portion of threatened and endangered species conservation activities at all levels includes law enforcement, consultation, recovery coordination, and other actions that are not easily or reasonably funded in a species-by-species manner. Accounting procedures for staff salaries and operational, maintenance,

and other support services are not normally creditable towards individual species totals. Also, there exists significant variability among the various Federal and State agency reports that are compiled to produce this report. Further, agencies were asked to report gross totals for those other expenditures that could not be identified to species; this reporting is also incomplete but does reflect some of the levels of other expenditures being made by these agencies.

The amendment to the Act requiring this report was passed in the first quarter of FY 1989. The Service, other Federal agencies, and State agencies gathered the best available data with little opportunity for advance planning and coordination in that year. Subsequent reports have greatly benefited by the FY 1989 experience in planning and coordination with the reporting agencies to track such expenditures. Therefore, due to differences in reporting methods, this report cannot be easily compared to the 1989 or subsequent expenditure reports. These year-to-year differences include changes in the States' reporting, changes in how expenditures are calculated, and changes in the agencies' ability to track expenditures. Thus, real dollar increases or decreases cannot be accurately calculated or inferred from the overall or individual totals.

The Service has provided previous reports on estimated allocations by species for the current or forthcoming years as requested by the House Appropriations Committee staff. The reader of this report is cautioned that there are important differences in the assumptions that led to each of these reports. The data in this report are more precise than previous reports on estimated allocations, since land acquisition costs are separated from general expenditures. However, they may be biased, since they only include reasonably identifiable expenditures. The following table includes data from the present and previous reports.

SUMMARY OF FIGURES
(Amounts \$000)

	1989	1990	1991	1992	1993	1994	1995	1996	1997
Federal Total	\$39,638.7	\$96,642.5	\$112,684.8	\$160,060.3	\$204,501.8	\$234,933.9	\$286,445.0	\$268,778.5	\$288,661.49
State Total	\$4,086.1	\$5,701.2	\$64,126.7	\$131,450.7	\$17,698.5	\$9,643.6	\$11,231.0	\$16,935.2	\$12,269.81
Grand Total	\$43,724.8	\$102,343.7	\$176,811.5	\$291,510.9	\$222,200.3	\$244,577.5	\$297,676.0	\$285,713.7	\$300,931.30
Change from previous year	*****	\$58,618.90	\$74,467.80	\$114,699.40	-\$69,310.6	\$22,377.21	\$53,098.50	-\$11,962.30	\$15,217.60
No. listed species	554	591	639	728	809	914	957	963	1,111
No. reporting expenditures	347	477	570	679	749	819	925	895	1,060
Max. reported amount	\$3,108.6	\$9,687.2	\$24,651.3	\$73,578.6	\$18,518.66	\$24,280.56	\$35,942.47	\$40,777.26	\$28,545.27
Median for species equal to or greater than \$100	\$11.75	\$13.15	\$12.20	\$16.00	\$12.94	-\$23.00	\$30.00	\$15.00	\$13.80
No. with 50% of expenditures (percentage of no. listed)	12 2.2%	10 1.7%	7 1.1%	5 0.7%	10 1.2%	9 1.1%	6 0.63%	5 0.52%	10 0.9%
No. with 90% of expenditures (percentage of no. listed)	63 11.4%	58 9.8%	54 8.5%	59 8.1%	79 9.8%	103 11.0%	131 14.0%	77 8.0%	101 9.1%

Figures in shaded blocks do not include land acquisition expenditures.

In 1993 the Service began to tabulate these costs separately. The Federal, State, and Grand totals do include land acquisition costs.

The Federal and Grand Totals for 1993 differ from those published in the 1993 report due to an error made in the 1993 report for the desert tortoise.

The Federal and Grand Totals shown here for 1995 differ from those published in the 1995 report by \$32,002.50 less than what was reported for the FWS total due to an error.

Table 1.

Reasonably Identifiable Federal and
State Expenditures during FY 1997.

The list of species in Table 1 essentially follows the taxonomic and nomenclatural conventions used in 50 CFR Part 17 for the identification and sequence of names. For ease of reference, the alphabetized, inverted common name is provided within each group (usually Class) of animals. Thus, the gray bat is found with other bats under "Bat, gray" within mammals, and Judge Tait's mussel is found under "Mussel, Judge Tait's" within the clams. Groups of animals follow the sequence: Mammals, Birds, Reptiles, Amphibians, Fishes, and Invertebrates, which include Snails, Clams, and Arthropods (which are further divided). Plants are alphabetized by inverted common name except when there is no common name; in such cases, scientific names are provided for plants, and the phrase "=Sci. Name" is provided parenthetically.

If a reader should need other information about the names, historical range, or status of an endangered or threatened species, the species can be found in 50 CFR 17.11 (wildlife) or 17.12 (plants). The STATUS column indicates whether the species is endangered (E), threatened (T) or with two United States populations under separate classifications (E,T) [for purposes of this report, the latter are counted as one species in the number listed].

Service expenditures (FWS TOTAL) and other Federal agencies expenditures (OTHER FED) are totaled in the FED TOTAL column. The STATES TOTAL is the amount reported by the IAFWA to the Service. None of these reported totals include known costs for habitat acquisition; see Table 3 for those costs reported to the Service.

The RANK is from Table 2, and indicates each species rank by identifiable expenditures, where 1 is the highest expenditure.

TABLE 1. REPORTED EXPENDITURES (\$000) FOR FY 1997 FOR ENDANGERED AND THREATENED SPECIES, NOT INCLUDING LAND ACQUISITION COSTS.

RANK	SPECIES (50 CFR Part 17)	SCIENTIFIC NAMES	STATUS	FWS TOTAL	OTHER FED	FED TOTAL	STATES TOTAL	SPECIES TOTAL
MAMMALS

TABLE 1. REPORTED EXPENDITURES (\$000) FOR FY 1997 FOR ENDANGERED AND THREATENED SPECIES, NOT INCLUDING LAND ACQUISITION COSTS.

RANK	SPECIES (50 CFR Part 17)	SCIENTIFIC NAMES	STATUS	FWS TOTAL	OTHER FED	FED TOTAL	STATES TOTAL	SPECIES TOTAL
	PLANTS subtotals	species:	659	\$6,706.99	\$3,504.84	\$10,211.82	\$419.67	\$10,631.49
	TOTALS	species:	1,111	\$56,199.32	\$197,951.37	\$254,150.69	\$11,761.01	\$265,911.70

Table 2.

**Species Ranked in Descending Order
of Total Expenditures Reported.**

Species are arranged in descending rank order by total identifiable expenditures (Table 1). Cumulative totals and percentages of the grand total (\$265,911,700) are provided to assist the reader. None of these reported totals include known costs for habitat acquisition; see Table 3 for those costs reported to the Service.

For purposes of rank, the six vertebrate species that have both an endangered and a threatened population on the list are ranked as one species. The six are identifiable by the "E,T" in the STATUS column.

The cumulative total column is the sum of all higher ranked Species Totals (from Table 1) and the selected species entry; cumulative percent is based upon \$265,911,700. (Example: \$135,270.44 or 50.87% of all reported expenditures are for the top 10 species; see species Rank No. 10.)

TABLE 2. SPECIES RANKED IN DESCENDING ORDER OF TOTAL FY 1997 REPORTED EXPENDITURES (\$000)

RANK	SPECIES (50 CFR Part 17)	STATUS	SPECIES		
			TOTAL (\$000)	CUMULATIVE TOTAL	PERCENT

Table 3.

Species with Reported Expenditures for Land Acquisition.

Species are arranged in the same sequence as Table 1. These costs are not included in the general expenditures of Tables 1 and 2. Only those species that had land acquisition costs reported for FY 1997 are included here.

TABLE 3. REPORTED LAND ACQUISITION EXPENDITURES (\$000) FOR FY 1997 FOR ENDANGERED AND THREATENED SPECIES.

Ms. Jamie Rappaport-Clark
Director
Fish and Wildlife Service
1849 C Street, NW.
Washington, D.C. 20240

Dear Ms. Clark:

Enclosed is the Animal and Plant Health Inspection Service's (APHIS) report on fiscal year 1997 expenditures related to the conservation of endangered and threatened species under the Endangered Species Act.

Enclosure 1 is the list of expenditures that APHIS has identified for particular species. In addition, APHIS has enclosed a total for expenditures that could not be identified for specific species (enclosure 2).

Should you have any questions concerning this data, please contact Nancy Sweeney, Policy and Program Development, Environmental Analysis and Documentation, at 301-734-8565.

Sincerely,

Craig A. Reed
Administrator

Ms. Jamie Rappaport Clark
Director, U.S. Fish and Wildlife Service
U.S. Department of Interior
Washington, D.C. 20240

Dear Ms. Clark:

The enclosed information is in response to your request dated June 25, 1998, for an accounting of Forest Service expenditures on threatened and endangered species. The two reports summarize Fiscal Year(FY) 1996 and FY97 expenditures separately. The reported funds do not include contributions made by partners. No land acquisitions for threatened or endangered species occurred in either year.

Based on reports from Forest Service field offices, the Forest Service expended funds on 135 species in FY96, and on 251 species in FY97. Forest Service appropriations for threatened and endangered species management increased from FY96 to FY97, which is reflected both in the total expenditures and the number of species that benefitted. The expenditures given are from the Forest Service appropriations for threatened and endangered species habitat management, as well as from other program appropriations that benefitted threatened and endangered species. Expenditures in FY96 were \$25,674,973; and expenditures in FY97 were \$42,324,676.

If you need additional information on our expenditures, please contact Marc Bosch, National TES Program Leader, at (202) 205-1220.

Sincerely,

HARV FORSGREN
Director, Wildlife, Fish and Rare Plants Staff

Ms. Jamie Clark
Director
Fish and Wildlife Service
U.S. Department of Interior
1849 C Street N.W.
Washington, D.C. 20241

Dear Ms. Clark:

This is in response to your request for information on the USDA Natural Resources Conservation Service expenditures made primarily for the conservation of endangered or threatened species pursuant to the Endangered Species Act. Based on information gathered from our State Biologists, we have compiled the attached state-by-state list of FY 1996 and 1997 expenditures for endangered and threatened species conservation and recovery work.

If you have questions or concerns regarding this matter, please contact Howard C. Hankin, National Aquatic Ecologist, at (202) 690-0082.

Sincerely,

Diane S. Geller
for
DIANE E. GELBURD
Director
Ecological Sciences Division

MAY 18 1999

Ms. Jamie Clark
Director
U.S. Fish and Wildlife Service
United States Department of the Interior
Washington, D.C. 20240

Dear Ms. Clark:

This responds to your request for a species-by-species accounting of expenditures made for the conservation of species with funds appropriated to the National Marine Fisheries Service (NMFS) for fiscal year 1997 under the Endangered Species Act. The enclosed table provides a summary of expenditures for species for which the NMFS has, or shares jurisdiction.

Sincerely,

Hilda Diaz Soltero
Director
Office of Protected Resources

ACQUISITION AND
TECHNOLOGY

20 JAN 1998

Mr. Richard M. Smith
Deputy Director
U.S. Fish and Wildlife Service
Department of the Interior
Washington, DC 20240

Dear Mr. Smith:

The Department of Defense's report on FY 1997 investments for the conservation of threatened and endangered species is enclosed. This summary report does not include activities of the Army Corps of Engineers (Civil Works), who are reporting to you separately.

In FY 1997, the Military Components invested \$22,414,511 on the conservation and management of federally-listed threatened and endangered species. The Department of the Army invested \$10,220,000; the Department of the Navy invested \$6,919,511, including \$2,566,811 by the Marine Corps; the Department of the Air Force invested \$5,225,000; and the Defense Logistics Agency invested \$50,000. Summary tables of each Component's efforts by species are enclosed. We have no land acquisition costs to report.

Threatened and endangered species protection continues to be a major goal of DoD's conservation program. If we can be of further assistance, please contact me at (703) 604-0524.

L. Peter Boice
Director, Conservation

MEMORANDUM FOR DEPUTY UNDER SECRETARY OF DEFENSE
(ENVIRONMENTAL SECURITY)

SUBJECT: FY 97 Threatened and Endangered Species Expenditures Report

Your 9 September 1997 memorandum, subject: Annual Reporting of Threatened and Endangered Species Expenditures, requested a report on expenditures reasonably identifiable to federally listed threatened and endangered species.

Subject report is attached. Report indicates a total of \$10.222M expended; birds constitute the major focus of expenditures. Army has no identifiable expenditures on threatened and endangered species other than what is in the report.

Point of contact for this matter is Mr. Phil Huber, ODASA (ESOH), (703) 614-9555.

R.J.F.
Raymond J. Fatz

Deputy Assistant Secretary of the Army
(Environment, Safety and Occupational Health)

CAAE

MEMORANDUM FOR ASSISTANT DEPUTY UNDER SECRETARY OF DEFENSE
(ENVIRONMENTAL SECURITY), DUSD(ES)/EQ-CO

SUBJECT: Annual Reporting of Threatened and Endangered Species Expenditures

This is in response to the DUSD(ES)/EQ-CO memorandum of September 9, 1997, subject as above, requesting information on our FY 97 expenditures toward threatened and endangered species.

During FY 97, we spent \$50,000 on population recovery and habitat enhancement for the Palos Verdes blue butterfly (*Glauopsyche lygdamus palosverdesensis*) at Defense Fuel Support Point San Pedro, California.

MAJ Zia A. Mehr, USA, Staff Entomologist, is my point of contact for this issue. He can be reached at (703) 767-6245.

JAN B. REITMAN
Staff Director
(Environmental and Safety Policy)

DEPARTMENT OF THE ARMY
U.S. Army Corps of Engineers
WASHINGTON, D.C. 20314-1000

REPLY TO
ATTENTION OF:

Programs Management Division
Program Formulation and Evaluation Branch

Ms. E. LaVerne Smith
Chief, Division of Endangered Species
Fish and Wildlife Service
U. S. Department of the Interior
Washington, D. C. 20240

Dear Ms. Smith:

Enclosed, in response to U. S. Fish and Wildlife Service requests of June 25 and July 21, 1998, are two tables providing estimates of U. S. Army Corps of Engineers expenditures in fiscal years 1996 and 1997 to implement the Endangered Species Act.

Each of the two tables includes a subset comprising 309 species of the complete set of 1,132 species provided by Ms. Susan Jacobsen in her working template. This subset includes all species for which the Corps has recently spent funding under the Direct Civil Works Program in implementing the Endangered Species Act.

Table I shows estimated expenditures under the Direct Civil Works program in Fiscal Year 1996 (FY96); Table II shows such expenditures in FY97. Please direct any questions about the input to Jack Jurentkuff, (202) 761-4955.

Sincerely,

Thomas F. Caver, Jr., P. E.
Chief, Programs Management Division
Directorate of Civil Works

Ms. E. LaVerne Smith
United States Department of the Interior
Fish and Wildlife Service
Division of Endangered Species-MS 452ARLSQ
Washington, D.C. 20240

Dear Ms. Smith:

By letter of June 25, 1998, from the Director of the Fish and Wildlife Service to Ms. Johansen, Administrator of the Bonneville Power Administration, we were requested to provide to you a list of expenditures relating to the Endangered Species Act (ESA) listed species for Fiscal Year (FY) 1997. This letter responds to your request.

The expenditures in Fiscal Year 1997 were for four listed species. These species are the Redfish Lake Sockeye, the Snake River Spring/Summer Chinook, the Snake River Fall Chinook, and the Kootenai River Sturgeon. Where possible, these expenses are shown by species and in many cases benefit all three species. The net power purchase/foregone revenues costs associated with hydro operations (spill, flow augmentation, water budget and reservoir levels) are estimates at this time because detailed analysis of these costs has not yet been completed. The hydro operations costs are based on the average of fifty water years and are distributed between the two categories of Chinook listed below based on a 50/50 split to reflect the assumed benefits both species of Chinook receive. These costs include both those expenditures specifically mandated by ESA and also those expenditures that, while not specifically mandated, are intended to assist in the recovery of ESA-listed species.

Bonneville Power Administration
ESA Related Direct Fish and Wildlife Funding
(Dollars in Millions - Budget Outlays)
Fiscal Year 1997

Snake River Spring/Summer Chinook

Law enforcement benefiting Chinook	\$ 1.5
Coded wire tagging Chinook	\$ 0.4
Snake River Chinook projects	\$ 3.6
*Squawfish research and removal	<u>\$ 2.1 ÷ 3 = 700.00</u>
Subtotal	\$ 7.5

Net Power Purchases/Foregone Revenues

MOA Actuals	\$ <u>51.0</u>
Total	\$ 58.5

Snake River Fall Chinook

Law enforcement benefiting Chinook	\$ 1.5
Coded wire tagging Chinook	\$ 0.4
Snake River Chinook projects	\$ 3.6
*Squawfish research and removal	<u>\$ 2.1</u> - 3 = <u>700.00</u>
Subtotal	\$ 7.5

Net Power Purchases/Foregone Revenues

MOA Actuals	\$ <u>51.0</u>
Total	\$ <u>58.5</u>

✓ Redfish Lake Sockeye

Research benefiting Sockeye	\$ 1.8
Law enforcement benefiting Sockeye	<u>\$ 1.5</u>
Total	\$ 3.3

Kootenai River Sturgeon

Sturgeon Projects	<u>\$ 1.7</u>
Total	\$ 1.7

Total ESA Outlays for Fiscal Year 1997 **\$122.0**

* Denotes activities that benefited all three listed species.

If there is a need for further clarification or additional information, please contact Mr. Rollie Sivyer of the Environment, Fish and Wildlife Group at (503) 230-4210.

Sincerely,

D. Robert Lohn, Manager
Fish and Wildlife Program

IN REPLY REFER TO:

Fish & Wildlife

OCT 14 1998

Ms. Jamie Rappaport-Clark
Director, U.S. Fish and Wildlife Service
1849 C Street, N.W., Room 3012
Washington, D.C. 20240

Dear Ms. Rappaport-Clark:

Enclosed you will find a list of Bureau of Indian Affairs' expenditures for Fiscal Year 1997 for federally listed threatened and endangered species. This is in reply to your request of June 25, 1998.

If you need additional information or clarification, please contact Valerie Guardia, Endangered Species Coordinator for the Bureau of Indian Affairs, at (202) 208-3607.

Sincerely,

Alicia A. Mannef
Deputy Commissioner of Indian Affairs

BUREAU OF RECLAMATION
Washington, D.C. 20240

IN REPLY REFER TO:
W-5000

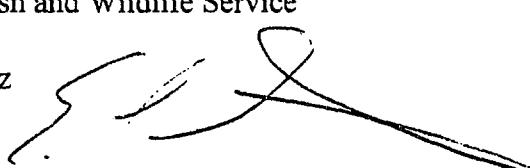

OCT -1 1998

MEMORANDUM

To: Director, U.S. Fish and Wildlife Service

From: Eluid L. Martinez
Commissioner

Subject: Report of Expenditures for the Endangered Species Act---Fiscal Year 1997

Per your request of June 1998, we have compiled the information on the Bureau of Reclamation's Endangered Species Act expenditures for FY 1997. We understand that this information will be incorporated into your annual report to Congress on agencies' expenditures for endangered and threatened species.

The attached data was compiled from figures submitted by our regional offices. Expenditures were calculated by combining conservation actions and activities associated with compliance under Section 7 of the ESA. We've also included land acquisition costs for some species.

These figures are conservative in that for a number of projects, we are unable to separate the expenditures associated with carrying out ESA conservation activities from other project expenditures.

For further information, please contact Judy Troast at 202/208-4442.

Memorandum

To: Director, Fish and Wildlife Service

Through: Assistant Secretary for Fish and Wildlife and Parks

From: Acting Director 

Subject: Endangered Species Expenditure Report for 1997

In response to your annual request, attached is our report of National Park Service expenditures on threatened and endangered species for fiscal year 1997. The information provided is organized by species within major taxonomic groups.

The total expenditures for FY97 are \$4,417,602.00 which promoted recovery for 112 listed species under Park Service management. Single species expenditures ranged from \$200.00 for the Island Phacelia to \$523,700.00 for the Northern Spotted Owl.

There were no funds expended on land acquisition for listed species during FY97. If there are any questions on this report, please call Peggy Olwell, Endangered Species Coordinator, at 202-219-8933.

1997 Endangered and Threatened Species Expenditures Reporting Template

Welcome to the Agency working template for reporting 1997 expenditures for endangered and threatened species. Column D gives scientific names; column A is FWS lead Regional Office; column B is a Group Code that sequences the groups (mammals, birds, . . .plants) as in the List. A running total of expenditures for each column is kept under each heading.

NOTE: AMOUNTS IN THOUSANDS OF \$\$\$

If you have any questions, contact Susan Jacobsen at 703/358-2105

United States Department of the Interior

OFFICE OF SURFACE MINING
RECLAMATION AND ENFORCEMENT
Washington, D.C. 20240

FEB 1 1999

Memorandum

To: Director, Fish and Wildlife Service

From: Kathy Karpan, Director
Office of Surface Mining

Subject: Request for Reasonably Identifiable FY 1997 Federal Expenditures for Conservation of Endangered or Threatened Species Listed under the Endangered Species Act.

In response to your request for this FY 1997 data, the Office of Surface Mining has no data to report based upon our clarification with your staff of the following points:

- Data collection applies only to those species that were listed as either threatened or endangered as of September 30, 1997.
- Data from States was solicited separately and will be reported to the U.S. Fish and Wildlife Service individually and independent of Federal data submission.
- Requiring submitting agencies to pro-rate costs when staff are not assigned full-time on a single species (or a discrete project involving a single species) is considered unduly burdensome, and such costs need not be reported, e.g., portion of a mine plan or permitting review associated with a particular listed species.

Should you have any questions concerning this response, please contact me at 208-4006.

SEP 04 1998

Ms. Jamie Rappaport Clark
Director, Fish and Wildlife Service
1849 C Street, NW
Washington, D.C. 20240

Dear Ms. Clark:

In response to your letter of June 25, 1998, I am transmitting our report for the Fiscal Year (FY) 1997 expenditures of the U.S. Geological Survey (USGS) related to the conservation of endangered and threatened species.

In accordance with the guidance provided with your letter on the scope of activities that should be reported, we have reported funding that was reasonably identifiable for individual species and funding for studies and investigations involving multiple endangered or threatened species for which identifiable per species funding was not reasonable. The expenditure level reported for FY 1997 is approximately 14 percent lower than the level reported for FY 1996. We believe that the lower value reported for FY 1997 more accurately reflects the true cost of endangered species science projects as it does not include costs for administering and managing our research centers. For FY 1997, the USGS has no land acquisition costs to report.

We hope that this information will be useful for your annual report to Congress. If you have questions concerning this matter, please contact Dr. Albert Sherk at 703-648-4076.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Bonnie A. McGregor".

Bonnie A. McGregor
Acting Director

Ms. LaVerne Smith
Chief, Endangered Species Division
U.S. Department of the Interior
Fish and Wildlife Service
Washington, DC 20240

Dear Ms. Smith:

The Federal Aviation Administration reports, as required under section 18 of the Endangered Species Act, that for Fiscal Year 1997 it incurred costs for conserving threatened and endangered species as detailed in the enclosed sheets from your template.

If you have any further questions, please contact me in the Office of Environment and Energy at (202) 493-4018, or by e-mail at ann.hooker@faa.dot.gov.

Sincerely,

Ann M. Hooker

Dr. Ann Mead Hooker
Environmental Specialist (Endangered Species Coordinator)

THE COMMISSIONER OF CUSTOMS

WASHINGTON, D.C.

October 6, 1998

ADM-6-04-OF:BD:OF SDR

Ms. Jamie Rappaport Clark
Director
United States Department of the Interior
Fish and Wildlife Service
1849 C Street, NW.
Washington, D.C. 20240

Dear Ms. Rappaport Clark:

This is in response to your letter dated June 25, 1998, in which you requested that the U.S. Customs Service report on expenditures made primarily for the conservation of endangered or threatened species.

Although Customs is one of the lead agencies in the enforcement of the endangered or threatened species laws and the regulation and international conventions on these species, we do not specifically allocate funding for this purpose. This task is integrated into the overall function of Customs operational groups, such as special agents, inspectors, and import specialists. Each of the professional groups are trained in the requirements of the endangered or threatened species laws, as well as the regulation and international conventions. Moreover, they enforce these laws as part of the regular duties involving the broad range of Customs responsibilities. Since no specific funds were allocated for this program, we cannot identify any Fiscal Year 1997 expenditures made primarily for the conservation of endangered or threatened species pursuant to the Endangered Species Act Amendments of 1988.

Even though specific expenditures are not available, we can assure you that Customs continues its effort in enforcing the Endangered Species Act Amendments of 1988. As part of this effort, we seized 50 importations containing endangered or threatened species or products thereof, such as whale bones, polar bear rugs, moose antlers, grisly bear rugs, ivory tusks, Nigerian reptile snake (Rock Python) skin wallets, an African Grey parrot, one leopard head, seal skin, one lynx coat, and jaguar skin.

The Fish and Wildlife Service (FWS)/U.S. Customs Service joint task force investigates cases involving illegal importations of endangered or threatened species pursuant to the Endangered Species Act and the Convention on International Trade in Endangered Species of Wild Fauna and Flora. We expect this enforcement initiative will have a significant impact on attempted illegal importations in the future.

Furthermore, at FWS designated ports of entry, Customs inspectors, agents, and import specialists assist in wildlife enforcement by ensuring that suspect shipments are detained to await clearance by local FWS officers, and when appropriate, ordering the redelivery of the shipment and assessing penalties in required cases. At non-designated ports of entry our personnel perform enforcement actions on behalf of your agency.

At the Headquarters level, our commercial enforcement program officers participate as technical Customs advisors at high-level government trade meetings held at the State Department, the Office of the U.S. Trade Representative, and the Departments of Treasury or Justice on matters dealing with wildlife trade embargoes. It should also be noted that our agency also enforces marine wildlife embargoes under the Marine Mammal Protection Act and other U.S. laws, e.g., to protect endangered dolphins and sea turtles, in coordination with the National Marine Fisheries Service or the State Department's Bureau of Oceans and International Environmental and Scientific Affairs.

If you require more information, please feel free to have a member of your staff contact Mrs. Sandie Daien Ray, Office of Finance, Budget Division, on 927-0516.

Sincerely,

Raymond W. Kelly
Commissioner

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
ENFORCEMENT AND
COMPLIANCE ASSURANCE

Ms. E. LaVerne Smith
Chief, Division of Endangered Species
Fish and Wildlife Service
MS-452
4401 N. Fairfax Drive
Arlington, VA 22203

Dear Ms. Smith:

This is in response to the June 25, 1998 letter from Jamie Rappaport Clark to Administrator Carol Browner requesting information on EPA expenditures for the conservation of listed endangered and threatened species. Attached is a list of EPA expenditures for FY 1997 categorized by EPA program and regional office. The expenditures list is limited, as directed by the guidance for reporting expenditures, to those funds spent on specific species and does not include funds spent on broader endangered species programs or projects.

Should you have any additional questions please contact Jim Serfis of my staff at 202-564-7161.

Sincerely,

A handwritten signature in black ink, appearing to read "John H. Miller".

Richard E. Sanderson
Director
Office of Federal Activities

FEDERAL ENERGY REGULATORY COMMISSION
WASHINGTON, DC 20426

OFFICE OF THE CHAIRMAN

April 13, 1999

Mr. Gerry A. Jackson
Assistant Director
Fish and Wildlife Service
U.S. Department of the Interior
Washington, D.C. 20240

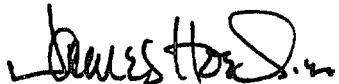

Dear Mr. Jackson:

I am pleased to respond to your February 18, 1999, letter requesting information about the Commission's Fiscal Year 1997 expenditures related to the conservation of endangered and threatened species.

The enclosed lists, which the Commission staff prepared, identify the endangered and threatened species and associated Commission expenditures. This represents the combined activities of the Offices of Hydropower Licensing and Pipeline Regulation for Fiscal Year 1997. Finally, the expenditures for each species include both salaries and related benefits.

I hope this information is helpful. If I can be of further assistance in this or any other Commission matter, please let me know.

Sincerely,

James J. Hoecker
Chairman

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

August 28, 1998

Ms. Jamie Rappaport Clark
Director
Fish and Wildlife Service
U.S. Department of the Interior
Washington, DC 20240

Dear Ms. Clark:

This is in response to your letter of June 25, 1998 (reference FWS/AES/TE), requesting reasonably identifiable expenditures for the conservation of threatened and endangered species to be included in your annual report to Congress.

Summarized NRC expenditures in FY 1997 in support of the conservation of threatened and endangered species were:

• Threatened and Endangered Species Action Plan and Coastal Zone Management Activities:	\$ 4,978
• Endangered Species Act compliance assessment:	\$42,000
• Specie Expenditures:	
- Kemp's Ridley Turtle (<i>Lepidochelys kempii</i>)	\$2,724
- Loggerhead Turtle (<i>Caretta caretta</i>)	2,724
- Green Turtle (<i>Chelonia mydas</i>)	2,740
- Leatherback Turtle (<i>Dermochelys coriacea</i>)	1,768
- Hawksbill Turtle (<i>Eretmochelys imbricata</i>)	1,768
- Sturgeon, Shortnose (<i>Acipenser brevirostrum</i>)	786

• Total NRC Expenditures	\$56,748

Questions concerning these expenditures may be directed to Mr. Tom Heavey,
(301) 415-6028, E-mail at TJH@NRC.GOV.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard R. Rough".

Richard R. Rough, Director
Division of Budget and Analysis

Office of the Secretary

September 23, 1998

Ms. Jamie Rappaport Clark
Director
Fish and Wildlife Service
Department of the Interior
Washington, D. C. 20240

Dear Ms. Clark:

I am pleased to provide information to assist the Fish and Wildlife Service in complying with the requirement stipulated in the Endangered Species Act Amendments of 1988 for the annual submission to Congress of all reasonably-identifiable Federal expenditures made in the conservation of endangered or threatened species.

While not a Federal agency, the Smithsonian Institution does expend appropriated funds aimed primarily at the conservation of endangered or threatened species consistent with the requirements of the Endangered Species Act. As a general procedure, the Smithsonian does not maintain Institution-wide information on endangered species projects on a species-by-species basis. However, as in our previous reports to the Fish and Wildlife Service, we are enclosing findings on Fiscal Year 1997 Federal expenditures by the National Zoological Park, the Smithsonian unit with the largest proportion of budget outlays aimed at species conservation.

I hope this information will be of assistance.

Sincerely,

A handwritten signature in black ink that reads "I. Michael Heyman".

I. Michael Heyman
Secretary

Enclosure

Smithsonian National Zoological Park

FEDERAL MONEY SPENT ON ENDANGERED SPECIES FY1997 NATIONAL ZOO

Parameters used:

- no captive breeding/housing/education costs included unless specifically part of a Recovery Plan/field work for conservation
- field research included only if part of conservation (i.e., efforts to assist lead agencies in their conservation efforts)
- two salary levels used: senior (curator, veterinary, etc.) @ \$80,000 and keeper/tech @ \$30,000; these are rough averages
- average administrative costs (permits, support, etc.) @ \$1,000
- "supplies" includes animal feed, medications, etc. for captive program
- cost of lab supplies not included unless easily identifiable
- no costs included if money came from grants, Federal Agencies, or other outside sources

CHEETAH (health & repro. research)	3½ of \$80K x 4, 100% of \$30K..	\$39,600
DEER, ELD'S (" " . ")	15½ of \$80K, 5½ of \$80K x 2, 2½ of \$30K, \$1K admin.....	21,600

Dear Ms. Clark:

FISCAL YEAR 1997 EXPENDITURES FOR CONSERVATION OF ENDANGERED OR THREATENED SPECIES - FWS/AES/TE

Enclosed is a summary of TVA expenditures for fiscal year 1997 in support of the conservation of endangered and threatened species.

TVA conducted activities associated with 23 federally-listed species. None of these expenditures were for land acquisition. We appreciate the continued cooperation of the U.S. Fish and Wildlife Service staff and management in aiding our planning and providing the permits and permissions necessary to perform these activities.

If you have further questions regarding the scope or content of these activities, please contact Charles P. Nicholson, Endangered Species Specialist, Tennessee Valley Authority, 400 West Summit Hill Drive, WT 8C, Knoxville, Tennessee 37902. His telephone number is (423) 632-3582 and his e-mail address is cpnicholson@tva.gov.

Sincerely,

(Original signed by)

Kathryn J. Jackson

Sunflower, Eggert's	0.5
Total	69.2

**Appendix 2. Summary of Legislative Record and Supplemental
Guidance of What is a "Reasonably Identifiable
Expenditure" for Purposes of this Report.**

Supplemental Guidance for Reporting Expenditures
for the Conservation of Endangered and Threatened Species

BACKGROUND:

- Section 18 of the Endangered Species Act of 1973 (16 U.S. 1531 *et seq.*) reads, in part, as follows "...Fish and Wildlife Service, shall submit to the Congress an annual report covering the preceding fiscal year which shall contain--
 - (1) an accounting on a species-by-species basis of all reasonably identifiable Federal Expenditures made primarily for the conservation of endangered and threatened species pursuant to this Act; and
 - (2) an accounting on a species-by-species basis for all reasonably identifiable expenditures made primarily for the conservation of endangered and threatened species pursuant to this Act by States receiving grants under section 6."
- The Conference report for the 1988 amendments made some of the following points concerning the new section 18 of the Act:
 - Provision should not become unduly burdensome or result in diversion of funds from the operation of the program.
 - The Secretary of the Interior is to make a good faith effort to develop and obtain data but is not to undertake extensive or extraordinary measures.
 - Generalized dollar estimates will suffice.
 - Amendment seeks information primarily relating to development and implementation of recovery plans.
 - Amendment does not apply to monitoring and survey costs for delisted, proposed and candidate species.
 - Amendment is not to require new species-specific time sheets for the Service or other reporting agency.
 - Listing, consultation, and law enforcement are to be included, but these will often not be "reasonably identifiable." There will be cases of major single-species listings, consultations, or "stings" that should be reported.
 - Only salary costs that can be reasonably identified as applicable to particular species need be reported.
 - For other agencies and States, a good faith effort to collect information is expected; they are expected to cooperate.
 - Submission of data from the States or agencies is not to be a precondition to receiving any contracts or grants or establishing other arrangements with the Fish and Wildlife Service.

DATA FORMAT:

- Species should be identified by the same name as found in the most current list of species: common name for all animals and either common or scientific name for plants. Amounts above \$2,000 need be only to nearest \$500 or \$1,000; smaller amounts may be to the nearest \$100. If the list of species exceeds several dozen, it would be appreciated if the common names were alphabetized in inverted name order (e.g., eagle, bald) and a diskette for the table be provided (e.g., WordPerfect, Lotus, ASCII).
- States may use the list of species provided and simply write the total State amount beside the appropriate name.

EXPENDITURES TO BE REPORTED:

- Only species on the Federal list of Endangered and Threatened Wildlife and Plants (50 CFR Part 17) at the end of the Fiscal Year (October 1, 1995 to September 30, 1996) are to be reported. Expenditures made prior to the actual listing date of a species, but still within the same year, may be reported (e.g., costs of public meetings, notices, surveys, initial recovery efforts). Monies for unlisted, separate populations of listed vertebrates cannot be allowed into the report (e.g., southeastern brown pelicans, Atlantic and Gulf coast least terns, Alaska bald eagles or gray wolves). Expenditures for State-listed species are not reportable unless they are also federally listed. Amounts for foreign species on the list are reportable (e.g., grants or contracts carried out in another country).
- In passing the amendment, Congress indicated that the requirement was aimed primarily at expenses associated with the development and implementation of recovery plans for listed species. Thus, the main focus of the report should be funding of projects that are primarily to support the conservation of endangered or threatened species.
- Only reasonably identifiable expenditures for listed species will be totaled in this report. Extraordinary accounting to track monies expended on individual listed species are not expected.
- All habitat acquisition costs are to be reported separately from all other identifiable expenditures. Such acquisitions must be primarily for the purpose of conserving specific federally listed species. As with other projects, those portions of habitat acquisition costs that are specifically for a listed species may be prorated out of the total acquisition costs when the other habitat is being acquired for other purposes (e.g., 25 acres of a 250-acre purchase will be set aside).
- Expenditures associated with consultations pursuant to section 7 of the Act are covered only to the extent that they are readily identifiable to a particular species. Thus, a formal consultation dealing with a single species, or up to several species where the relative costs are easily divisible, would be subject to reporting.
- Monitoring and survey costs should be reported when: 1) The cost of the monitoring or survey was during the period the species was under a proposed listing and the species was actually listed in the same fiscal year that the monitoring and surveys were conducted; 2) The monitoring or survey covered both candidates and listed species and the costs can be prorated to include only the listed species; and 3) The cost was readily identifiable to a single species.
- Salary and benefits of an employee working full-time on a single species or whose time devoted to a particular species can be readily identified can be reported. Conversely, staff costs that are not assigned to work on particular species are not usually reportable. Travel costs can be reported when identifiable to a particular species.
- Any State or Federal project that incurs increased costs related directly to mitigation or other conservation efforts on behalf of federally listed species can report that added cost.

- All State agencies (e.g., parks, heritage program, forests, highways) may report their expenditures, although only a single report from each State (plants and animals must be reported together) is expected to be submitted to the International Association of Fish and Wildlife Agencies.
- Examples of reportable expenditures that are directed to individual species include status surveys, habitat management or acquisition, research, propagation (including surrogate species), recovery plan development or implementation, and mitigation. The project must be to primarily benefit the listed species and not other conservation goals.
- Expenditures in a single project devoted to a number of listed species should either be prorated by the agency or not reported. General surveys or projects that cover a large number of species, some of which may not be listed, are not reportable.
