## **Environmental Protection Agency**

- (c) Subpart C of this part describes how to apply for a certificate of conformity.
- (d) Subpart D of this part describes general provisions for testing production-line engines.
  - (e) [Reserved]
- (f) Subpart F of this part describes how to test your engines (including references to other parts of the Code of Federal Regulations).
- (g) Subpart G of this part and 40 CFR part 1068 describe requirements, prohibitions, and other provisions that apply to engine manufacturers, equipment manufacturers, owners, operators, rebuilders, and all others.
- (h) Subpart H of this part describes how you may generate and use emission credits to certify your engines.
- (i) Subpart I of this part contains definitions and other reference information.

[70 FR 40486, July 13, 2005]

## \$1051.15 Do any other regulation parts apply to me?

- (a) Parts 86 and 1065 of this chapter describe procedures and equipment specifications for testing vehicles and engines. Subpart F of this part 1051 describes how to apply the provisions of parts 86 and 1065 of this chapter to determine whether vehicles meet the emission standards in this part.
- (b) The requirements and prohibitions of part 1068 of this chapter apply to everyone, including anyone who manufactures, imports, installs, owns, operates, or rebuilds any of the vehicles subject to this part 1051, or vehicles containing these engines. Part 1066 of this chapter describes general provisions, including these seven areas:
- (1) Prohibited acts and penalties for manufacturers and others.
- (2) Rebuilding and other aftermarket changes.
- (3) Exclusions and exemptions for certain vehicles and engines.
  - (4) Importing vehicles and engines.
- (5) Selective enforcement audits of your production.
  - (6) Defect reporting and recall.
  - (7) Procedures for hearings.
- (c) Other parts of this chapter apply if referenced in this part.

## § 1051.20 May I certify a recreational engine instead of the vehicle?

- (a) You may certify engines sold separately from vehicles in either of two cases:
- (1) If you manufacture recreational engines but not recreational vehicles, you may ask to certify the engine alone. In your request, explain why you cannot certify the entire vehicle.
- (2) If you manufacture complete recreational vehicles containing engines you also sell separately, you may ask to certify all these engines in a single engine family or in separate engine families.
- (b) If you certify an engine under this section, you must use the test procedures in subpart F of this part. If the test procedures require vehicle testing, use good engineering judgment to install the engine in an appropriate vehicle for measuring emissions.
- (c) If we allow you to certify recreational engines, the vehicles must meet the applicable emission standards (including evaporative emission standards) with the engines installed in the appropriate vehicles. You must prepare installation instructions as described in §1051.130 and use good engineering judgment so that the engines will meet emission standards after proper installation in the vehicle.
- (d) Identify and label engines you produce under this section consistent with the requirements of §1051.135. On the emission control information label, identify the manufacturing date of the engine rather than the vehicle.
- (e) You may not use the provisions of this section to circumvent or reduce the stringency of this part's standards or other requirements.
- (f) If you certify under paragraph (a)(1) of this section, you may ask us to allow you to perform production-line testing on the engine. If you certify under paragraph (a)(2) of this section, use good engineering judgment to ensure that these engines are produced in the same manner as the engines you produce for your vehicles, so that your production-line testing results under subpart D of this part would apply to them.
