§63.4152

waste materials sent to a TSDF during a compliance period if you have already included them in the amount collected and stored during that compliance period or a previous compliance period.

- (iii) Determine the total mass of organic HAP contained in the waste materials specified in paragraph (e)(4)(ii) of this section.
- (iv) You must document your methodology to determine the amount of waste materials and the total mass of organic HAP they contain, as required in §63.4130(h).
- (v) To the extent that waste manifests include this information, they may be used as part of the documentation of the amount of waste materials and mass of organic HAP contained in them.
- (f) Calculate the total volume of coating solids used during the compliance period. Determine the total volume of coating solids used, liters, which is the combined volume of coating solids for all of the coatings used during the compliance period, using Equation 2 of this section.

$$V_{st} = \sum_{i=1}^{m} (Vol_{c,i})(V_{s,i})$$
 (Eq. 2)

Where:

 $V_{\text{st}} = \text{total volume of coating solids used during the compliance period, liters.} \\$

 $Vol_{c,i}$ = total volume of coating, i, used during the compliance period, liters.

 $V_{\rm s,i} = {\rm volume\ fraction\ of\ coating\ solids\ for\ coating,\ i,\ liters\ solids\ per\ liter\ coating,\ determined\ according\ to\ \S63.4141(b).}$

m = number of coatings used during the compliance period.

(g) Calculate the organic HAP emission rate, kg organic HAP per liter coating solids used, using Equation 3 of this section:

$$H_{avg} = \frac{H_e}{V_{st}}$$
 (Eq. 3)

Where:

 $H_{\mathrm{avg}} = \mathrm{organic}\ HAP\ \mathrm{emission}\ \mathrm{rate}\ \mathrm{for}\ \mathrm{the}\ \mathrm{compliance}\ \mathrm{period},\ \mathrm{kg}\ \mathrm{organic}\ HAP\ \mathrm{per}\ \mathrm{liter}\ \mathrm{coating}\ \mathrm{solids}.$

 $H_{\rm e}=$ total mass organic HAP emissions from all materials used during the compliance period, kg, as calculated by Equation 1 of this section.

 $V_{\text{st}} = \text{total volume coating solids used during} \\ \text{the compliance period, liters, as calculated} \\ \text{by Equation 2 of this section.} \\$

(h) The organic HAP emission rate for the initial compliance period must be less than or equal to the applicable emission limit in §63.4090. You must keep all records as required by §§ 63.4130 and 63.4131. As part of the Notification of Compliance Status required by §63.4110, you must identify the coating operation(s) for which you used the emission rate without add-on controls option and submit a statement that the coating operation(s) was (were) in compliance with the emission limitations during the initial compliance period because the organic HAP emission rate was less than or equal to the applicable emission limit in §63.4090.

§ 63.4152 How do I demonstrate continuous compliance with the emission limitations?

- (a) To demonstrate continuous compliance, the organic HAP emission rate for each compliance period, determined according to \$63.4151(a) through (g), must be less than or equal to the applicable emission limit in \$63.4090. Each month following the initial compliance period described in \$63.4150 is a compliance period.
- (b) If the organic HAP emission rate for any compliance period exceeded the applicable emission limit in §63.4090, this is a deviation from the emission limitations for that compliance period and must be reported as specified in §§63.4110(b)(6) and 63.4120(e).
- (c) As part of each semiannual compliance report required by §63.4120, you must submit a statement that you were in compliance with the emission limitations during the reporting period because the organic HAP emission rate for each compliance period was less than or equal to the applicable emission limit in §63.4090.
- (d) You must maintain records as specified in §§ 63.4130 and 63.4131.

COMPLIANCE REQUIREMENTS FOR THE EMISSION RATE WITH ADD-ON CONTROLS OPTION

§ 63.4160 By what date must I conduct performance tests and other initial compliance demonstrations?

- (a) Existing affected sources. For an existing affected source, you must meet the requirements of paragraphs (a)(1) through (3) of this section.
- (1) All emission capture systems, add-on control devices, and CPMS you use to demonstrate compliance must be installed and operating no later than the applicable compliance date specified in §63.4183. Except for solvent recovery systems for which you conduct liquid-liquid material balances according to §63.4161(h), you must conduct a performance test of each capture system and add-on control device according to the procedures in §§ 63.4164, 63.4165, and 63.4166, and establish the operating limits required by §63.4092 no later than the compliance date specified in §63.4083. For a solvent recovery system for which you conduct liquidliquid material balances according to §63.4161(h), you must initiate the first material balance no later than the compliance date specified in §63.4083.
- (2) You must develop and begin implementing the work practice plan required by §63.4093 no later than the compliance date specified in §63.4083.
- (3) You must complete the compliance demonstration for the initial compliance period according to the requirements of §63.4161. The initial compliance period begins on the applicable compliance date specified in §63.4083 and ends on the last day of the first full month after the compliance date. If the compliance date occurs on any day other than the first day of a month, then the initial compliance period extends through the end of that month plus the next month. The initial compliance demonstration includes the results of emission capture system and add-on control device performance tests conducted according to §§ 63.4164, 63.4165, and 63.4166; results of liquid-liquid material balances conducted according to §63.4161(h); calculations according to §63.4161 and supporting documentation showing that, during the initial compliance period, the organic

HAP emission rate was equal to or less than the emission limit in §63.4090(a); the operating limits established during the performance tests and the results of the continuous parameter monitoring required by §63.4168; and documentation of whether you developed and implemented the work practice plan required by §63.4093.

(b) New and reconstructed affected sources. For a new or reconstructed affected source, you must meet the requirements of paragraphs (b)(1)

through (4) this section.

- (1) All emission capture systems, add-on control devices, and CPMS you use to demonstrate compliance must be installed and operating no later than the applicable compliance date specified in §63.4183. Except for solvent recovery systems for which you conduct liquid-liquid material balances according to §63.4161(h), you must conduct a performance test of each capture system and add-on control device according to the procedures in §§ 63.4164, 63.4165, and 63.4166, and establish the operating limits required by §63.4092 no later than 180 days after the applicable compliance date specified in §63.4183. For a solvent recovery system for which you conduct liquid-liquid material balances according to §63.4161(h), you must initiate the first material balance no later than 180 days after the applicable compliance date specified in § 63.4183.
- (2) You must develop and begin implementing the work practice plan required by §63.4093 no later than the compliance date specified in §63.4083.
- (3) You must complete the compliance demonstration for the initial compliance period according to the requirements of §63.4161. The initial compliance period begins on the applicable compliance date specified in §63.4083 and ends on the last day of the first full month after the compliance date, or the date you conduct the performance tests of the emission capture systems and add-on control devices, or initiate the first liquid-liquid material balance for a solvent recovery system; whichever is later. The initial compliance demonstration includes the results of emission capture system and add-on control device performance tests conducted according to §§ 63.4164,
