

**§ 230.7**

(b) The relevant Native American whaling organization shall monitor the whale hunt and keep tally of the number of whales landed and struck. When a quota is reached, the organization shall declare the whaling season closed, and there shall be no further whaling under that quota during the calendar year. If the organization fails to close the whaling season after the quota has been reached, the Assistant Administrator may close it by filing notification in the FEDERAL REGISTER.

**§ 230.7 Salvage of stinkers.**

(a) Any person salvaging a stinker shall submit to the Assistant Administrator or his/her representative an oral or written report describing the circumstances of the salvage within 12 hours of such salvage. He/she shall provide promptly to the Assistant Administrator or his/her representative each harpoon, lance, or explosive dart found in or attached to the stinker. The device shall be returned to the owner thereof promptly, unless it is retained as evidence of a possible violation.

(b) There shall be a rebuttable presumption that a stinker has been struck by the captain whose mark appears on the harpoon, lance, or explosive dart found in or attached thereto, and, if no strike has been reported by such captain, such strike shall be deemed to have occurred at the time of recovery of the device.

**§ 230.8 Reporting by whaling captains.**

(a) The relevant Native American whaling organization shall require each whaling captain licensed pursuant to

**50 CFR Ch. II (10-1-06 Edition)**

§ 230.5 to provide a written statement of his/her name and village of domicile and a description of the distinctive marking to be placed on each harpoon, lance, and explosive dart.

(b) Each whaling captain shall provide to the relevant Native American whaling organization an oral or written report of whaling activities including but not limited to the striking, attempted striking, or landing of a whale and, where possible, specimens from landed whales. The Assistant Administrator is authorized to provide technological assistance to facilitate prompt reporting and collection of specimens from landed whales, including but not limited to ovaries, ear plugs, and baleen plates. The report shall include at least the following information:

(1) The number, dates, and locations of each strike, attempted strike, or landing.

(2) The length (taken as the straight-line measurement from the tip of the upper jaw to the notch between the tail flukes) and the sex of the whales landed.

(3) The length and sex of a fetus, if present in a landed whale.

(4) An explanation of circumstances associated with the striking or attempted striking of any whale not landed.

(c) If the relevant Native American whaling organization fails to provide the National Marine Fisheries Service the required reports, the Assistant Administrator may require the reports to be submitted by the whaling captains directly to the National Marine Fisheries Service.

**SUBCHAPTER E—TRANSPORTATION AND LABELING OF FISH OR WILDLIFE [RESERVED]**
