[Light blue box]	15-20
[Light blue box]	20-25
[Light blue box]	25-30
[Light blue box]	30-35
[Light blue box]	35-40
[Light blue box]	40-45
[Light blue box]	45-50
[Light blue box]	50-55
[Light blue box]	>55
[Red box]	32 UNCS Salinity
[Yellow box]	32 SWMS Salinity
[Green box]	32 EDP Salinity
[Blue box]	32
[Black box]	MidBank
[White box]	No Data

Mapped, edited, and published by the Geological Survey  
Base by National Oceanic and Atmospheric Administration,  
National Ocean Service, Additional topography and  
enhancements in some locations by Florida Department of  
Environmental Protection, Florida Marine Research Institute,  
Projection and 10 000-meter grid lines,  
Universal Transverse Mercator zone 17  
North American Datum of 1983

8118190-8100000 SURVEY, HISTORICAL, 1959-1969  
Salinity data collected by K. Ludwig and  
L. Roulier of the U.S. Geological Survey  
between 8-12 April 1986. Data provided  
by the National Park Service, Everglades  
National Park was collected at monitoring  
stations between 8-12 April 1986.  
Data provided by South Florida Water  
Management District was collected by the  
Southeast Environmental Research Program  
of Florida International University on  
24-25 April 1985.  
Salinity is calculated using Unesco  
algorithms from conductivity and  
temperature field measurements.  
Contours are based on interpolation and  
trends within the data set,  
developed and automated using  
contouring software.  
This map has not been reviewed for  
conformity with U.S. Geological Survey  
editorial standards.
