

Beginning October 2008

MONARCHLIVE

GRADES 4-8

A DISTANCE LEARNING ADVENTURE

The annual migration cycle of the monarch butterfly (*Danaus plexippus*) is one of the most spectacular natural phenomena in the world. Every year, millions of monarchs migrate thousands of miles from Canada and the United States to overwinter in the mountain peaks in the states of Mexico and Michoacán in Mexico. This magical journey, deemed an "endangered natural phenomenon," is dependent on conservation of habitats in all three North American countries – United States, Canada, and Mexico.

During the 2008-9 school year, take your class on FREE live, interactive field trips that follow the magical migration of monarchs. Monarch curriculum materials that meet the national science education standards are available online to teachers. In February 2009, join us in Mexico where we will talk with scientist." studying monarchs and learn about local people who are preserving winter habitat.

MonarchLIVE Kickoff

October 10, 2008

Join us in Virginia as we kick off MonarchLIVE with experts and scientists.

Webcast and satellite broadcast

Michoacán, Mexico

In the Mexican Mountains

February 17, 2009

Visit with Mexican and American biologists who study the monarch's winter habitat.

Webcast and/or broadcast

Community Conservation in Mexico

February 19, 2009

Monarchs overwinter in a remote area of Mexico, and communities there are working to conserve this rare habitat.

Webcast and/or broadcast

Little Spaces; Big Results

May 19, 2009

Butterfly gardens can be created everywhere! Join us in Chicago to learn how small garden plots can have big results for both butterflies and people.

Webcast and/or broadcast

Building the Population

May 21, 2009

Visit Minnesota to learn about monarchs' summer behavior and population growth, citizen roles in monitoring the population, and threats to monarchs.

Webcast and/or broadcast

Monarchs in Canada

May 28, 2009

Monarchs depend on healthy habitats in three countries, and Canada provides a welcome summer home to thousands.
