

Patient Movement Items

After this session, participants should be able to give a brief definition of PMI, understand the value of exchange of in-kind equipment, be able to easily identify PMI equipment, and know who to call for asset return.

Patient Movement Items

- *Medical equipment and supplies required to support the patient during evacuation*
- *The purpose of the PMI system is to support patients in-transit, to exchange in-kind PMIs without degrading medical capabilities, and to provide prompt recycling of PMIs*
- *The handling and return of equipment to the originating theater through the evacuation system is the responsibility of the logistics function*
- *The originating Medical Treatment Facility is responsible for notifying the Patient Movement Requirements Center if the patient needs any special medical equipment for transport*

Patient Movement Items

- *Documented Lessons Learned From Operation Desert Shield/ Storm*
 - *Supplement to AE System Assets*
 - *Global Tracking - Asset Visibility*
