

AFTER ACTION REPORT

HURRICANE GUSTAV

HURRICANE IKE

COL MONICA B. JIMENEZ
El Paso/Las Cruces FCC Administrative Chief

17 September 2008

Unclassified

BRIEFING OUTLINE

PURPOSE: To provide an After Action Review (AAR) on the alert and activation of the El Paso/Las Cruces Federal Coordination Center (FCC) for Hurricane Gustav and Hurricane Ike

1. Background
2. Alert and Activation Orders
3. Unified Command Structure
4. Simultaneous Operation
5. Hurricane Gustav Summary
6. Hurricane Ike Summary
7. Conclusion

Orders

Hurricane Gustav

Alert

- DA EXORD 343-08 for MEDCOM to alert FCC facility in El Paso DTG 292350Z Aug 08
- FRAGO 2 to OPORD 08-56 (2008 Severe Weather Hurricane Season) USAMEDCOM DTG 293130Q Aug 08

Activation

- FRAGO 5 to OPORD 08-56 (2008 Severe Weather Hurricane Season) USAMEDCOM DTG 021600Q Sept 2008

Deactivation

- USNORTHCOM MOD 6 to EXORD for Hurricane Gustav, DTG 020800z Sep 08
- FRAGO 7 to Operations Order 08-56 (2008 Severe Weather/Hurricane Season) USAMEDCOM DTG 041410Q Sept 08

Hurricane Ike

Alert

- FRAGO 7 to Operations Order 08-56 (2008 Severe Weather/Hurricane Season) USAMEDCOM DTG 041410Q Sept 08

Activation

- FRAGO 9 to OPORD 08 -56 (2008 Severe Weather/Hurricane Season) USAMEDCOM DTG 101410Q Sept 08

Deactivation

- Pending

Background

The National Disaster Medical System (NDMS) is a system design to care for victims of an incident that exceeds the medical capabilities of any affected State, region, or Federal medical care system. It is a partnership involving major Federal agencies, military, State and local governments and the private sector.

William Beaumont Army Medical Center (WBAMC) has been designated as the DOD El Paso/Las Cruces Federal Coordinating Center (FCC).

The El Paso/Las Cruces FCC has been activated twice during the 2008 hurricane season:

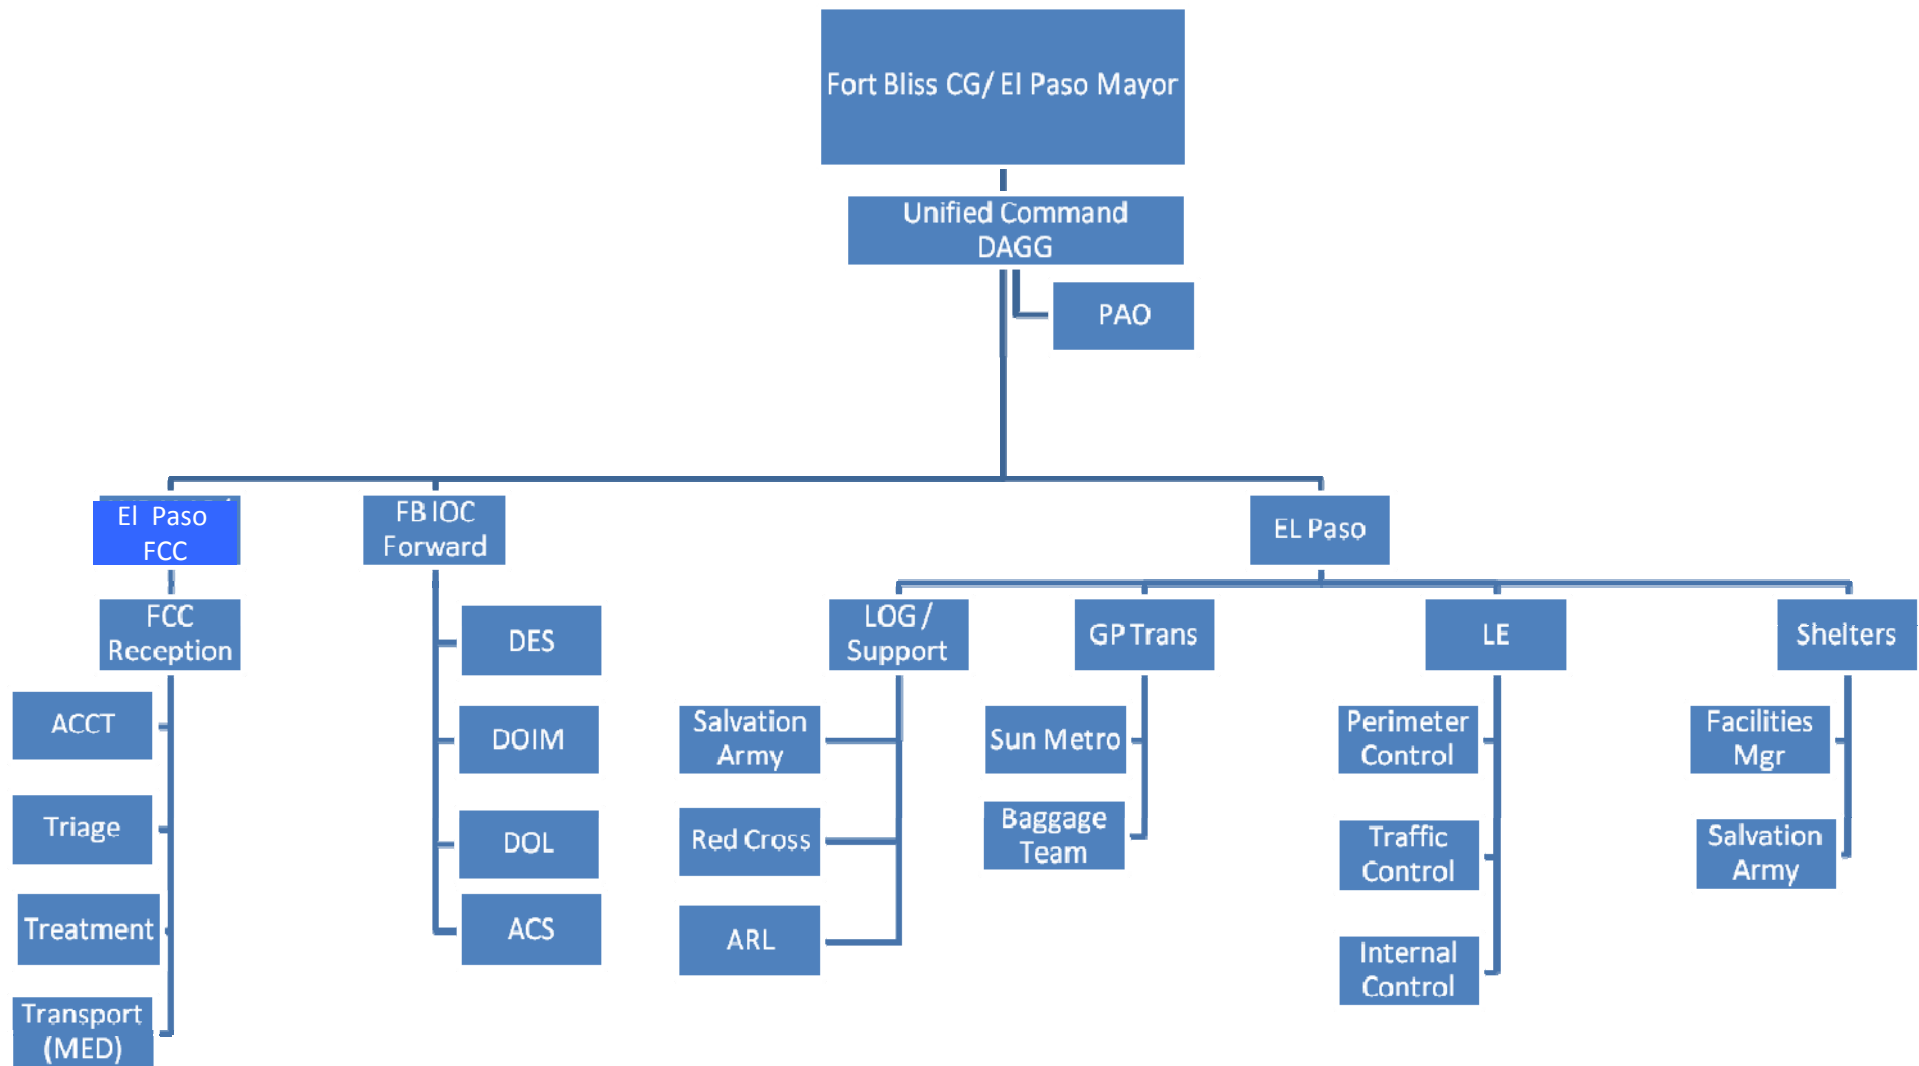

1. Hurricane Gustav
2. Hurricane Ike

Hurricane Gustav Summary

Hurricane Gustav Events

- FCC Alerted – 27 August 2008
- FCC Activated – 30 August 2008
- FCC Deactivated – 4 September 2008

Friday, August 22, 2008

- The Office of Emergency Management (OEM) received notification from the State Operation Center (SOC) that conference call would commence in preparation of expected landfall,
- Texas Forestry Service (TFS) commenced to place calls for volunteers to outfit the Incident Management Teams (IMT). El Paso IMT was placed on call until H-320.

Wednesday, August 27, 2008

- Texas anticipating the worst was advising that the NDMS System was going to be placed on alert to move Medical Special Needs Patients (MSNP). El Paso was designated an Air Hub by the FCC. The El Paso IMT advised TFS that if the storm was to become a category 3 or higher then we were going to stay in town and place the Air Hub into operation.

Hurricane Gustav Sequence of Events

Friday, August 29, 2008

- It was determined that El Paso was to receive MSNP levels 4 & 5 patients. The conference calls continued and we were placed on stand by (Ft. Bliss providing the DACCG, Convention center main General Population shelter, Parks and Recs. Alternate shelters, American Red Cross, Salvation Army, El Paso Fire, El Paso Police Dept., Sun Metro and the mental Health people)

Saturday, August 30, 2008

- Activation of the Air Hub and Set up of the General Population shelter at the Civic Center. The NDMS order came in at approximately 0500 hrs. We were awaiting the severity of the storm which would dictate our tasking. Point to point transfers occurred which almost made it impossible for us to receive the level 4 & 5 pts. We were tasked to receive in the NDMS system.

Sunday, August 31, 2008

- General Population patients were expected in from Louisiana. This information was uncertain and we waited all day. No patients sent to El Paso every one sent home and the facilities were placed on the stand down mode minimum manning.

Hurricane Gustav

Major Strength

- The lead agencies in the El Paso Hurricane Gustav 08' event are The El Paso/Las Cruces FCC, Ft. Bliss and the City of El Paso which engaged in a unified command during the operation of the event.
- It is obvious that agencies have previously worked together and the people in the lead position have the confidence and knowledge to manage an operation of this size and complexity.
- The event was conducted in accordance with the NIMS modular structure.
- Equipment cache's and reserve equipment has been clearly designated and maintained.
- Feeding and hydration of the event personnel was provided from the beginning of the incident.
- The number of ambulances that was obtained the first day was fantastic. A clear demonstration of our community's generosity. 32 Ambulances.

Areas Needing Improvement

- The DADS structure is almost nonexistent in the El Paso nursing home system. This is going to be the primary means of tracking these patients.
- Patient tracking is a problem where we do not have a system to track the patients with a band on the wrist or some thing else.
- WebEOC was not tested during this activation.

DAACG Staging Area

DAACG prior to set up

DAACG Staging Area

El Paso FCC Activities

Incident Commander briefing the Fort Bliss Garrison CDR and El Paso PAO

32 Buses arrived to support the activation

El Paso FCC Activities

Mobilization and Evacuee at the same time at the deployment facility DAACG

Deployed six aircraft, average 250 Soldiers per aircraft, at the same time prepared to receive NDMS patients and Evacuees

El Paso FCC Activities

EL Paso FD Student trainees reporting for duty in support of Gustav

Ambulance crew waiting for patients

Tracking Device

Patients are banded when they are regulated to board the aircraft. The information is recorded and received by the staff at the receiving station. Upon arrival, they pass through the system. The system verifies the data and matches the patient with the roster.

Hurricane Ike Summary

Hurricane Ike

Ike made landfall at 2:10 a.m. CDT at Galveston, Texas, with maximum sustained winds near 110 miles per hour. Its minimum pressure was 951.6 millibars, reported by the barometer at the Galveston Pleasure Pier when the center passed overhead.

Ike was a hurricane for 9 days and 21 hours.

▲	DOD FCC ALERTED FOR IKE
▲	DOD FCC ACTIVATED FOR IKE

The El Paso/Las Cruces FCC was activated ISO of Hurricane Ike.

CONCLUSION SLIDE

- Overall the activation of both Hurricane Gustav and Hurricane Ike allowed the El Paso/Las Cruces Federal Coordination Center, the City of El Paso Emergency Management Team, and the Fort Bliss Installation Operation Center to develop and improve a Unified Command Post.
- Lessons learned from the activation of Hurricane Gustav were successfully implemented during the activation of the NDMS/FCC in support of Hurricane Ike
