

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>ARKANSAS, Southeast</b>				
<b>ASHLEY COUNTY --- MIST [33.27, -91.70]</b>				
	04/22/08 17:15 CST		0.20M	Hail (1.75 in)
	04/22/08 17:17 CST		0	Source: Emergency Manager
Large hail, up to golf balls, fell in the Mist Community. Some damage occurred to cars and roofs.				
<b>CHICOT COUNTY --- 3.1 NNE ROSS VAN NESS [33.14, -91.32], 1.2 E ROSS VAN NESS [33.10, -91.33]</b>				
	04/22/08 17:20 CST		15K	Hail (1.75 in)
	04/22/08 17:30 CST		0	Source: Trained Spotter
Quarter to golf ball sized hail lasted for 10 minutes just west of Eudora.				
<p>A late May pattern set up over the area on April 22nd which consisted of cold mid level temperatures, weak low level winds and decent mid level flow from the northwest. These ingredients came together and produced scattered thunderstorms across the region all producing a mix of large hail and damaging winds. A few also produced very heavy rainfall and flash flooding as they back built and remained over some areas for an extended period of time.</p>				
<b>LOUISIANA, Northeast</b>				
<b>MADISON COUNTY --- 3.3 NW KING [32.28, -91.16]</b>				
	04/01/08 15:38 CST		0	Hail (0.75 in)
	04/01/08 15:38 CST		0	Source: Newspaper
A weather system moved through the region on April 1st and brought a round of thunderstorms during the early morning hours of the 1st with a few more storms during the late afternoon hours. A couple of these storms became severe and produced hail and locally heavy rain.				
<b>MOREHOUSE COUNTY --- 1.7 ESE OAK RIDGE [32.62, -91.74], 0.1 NNE BASTROP MEML ARPT [32.75, -91.90]</b>				
	04/04/08 09:25 CST		8K	Thunderstorm Wind (EG 60 kt)
	04/04/08 09:33 CST		0	Source: Emergency Manager
Several trees were blown down across the southern portion of Morehouse Parish.				
<b>RICHLAND COUNTY --- 2.0 E START [32.48, -91.84], 3.0 N DELHI [32.49, -91.50]</b>				
	04/04/08 09:30 CST		15K	Thunderstorm Wind (EG 60 kt)
	04/04/08 09:50 CST		0	Source: Law Enforcement
Numerous large limbs and a few trees were blown down across the northern portion of the parish. A couple power lines were also blown down.				
<b>RICHLAND COUNTY --- 5.7 WNW ALTO [32.40, -91.96], 2.0 E ARCHIBALD [32.35, -91.75]</b>				
	04/04/08 09:35 CST		15K	Thunderstorm Wind (EG 60 kt)

A couple trees were blown down near St. Joseph.				
<b>CATAHOULA COUNTY --- 0.1 SSW HARRISONBURG [31.77, -91.83], 3.1 NNE FOULES [31.86, -91.58]</b>				
	04/04/08 17:25 CST		0	Hail (0.88 in)
	04/04/08 17:44 CST		0	Source: Law Enforcement
A swath of penny to nickel sized hail fell across northern portions of the parish.				

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>TENSAS COUNTY --- 1.4 N BARCELONA [31.87, -91.43], 1.2 NNW LOCUST RIDGE [31.90, -91.34]</b>				
	04/04/08 17:44 CST		0	Hail (0.75 in)
	04/04/08 18:00 CST		0	Source: Public

Penny sized hail fell across portions of southern Tensas Parish.

**A potent early April storm slammed the area with widespread wind damage and several tornadoes. A bowing line of thunderstorms was the culprit with the main axis of severe weather and damage having occurred within the I-20 corridor from northeast Louisiana to the Jackson Metro to east-central Mississippi around Meridian. Several extensive swaths of significant wind damage occurred, where winds were estimated at 80 mph or greater. Overall, several thousand trees were snapped and uprooted with several dozen homes damaged by downed trees. The strongest tornado occurred in the Jackson Metro area as it moved across Northeast Jackson and into the Reservoir area of Northwest Rankin County. Additionally, the significant wind damage was focused across portions of Vicksburg, Bolton, Jackson, the Reservoir area of Rankin County, the Hillsboro area in Scott County, northern Newton County and the northern half of Lauderdale County.**

<b>EAST CARROLL COUNTY --- 0.9 W ATHERTON [32.70, -91.19], 1.8 ESE TRANSYLVANIA [32.67, -91.17]</b>				
	04/22/08 18:11 CST		0	Hail (0.75 in)
	04/22/08 18:25 CST		0	Source: Public

Penny sized hail lasted for about 15 minutes.

**A late May pattern set up over the area on April 22nd which consisted of cold mid level temperatures, weak low level winds and decent mid level flow from the northwest. These ingredients came together and produced scattered thunderstorms across the region all producing a mix of large hail and damaging winds. A few also produced very heavy rainfall and flash flooding as they back built and remained over some areas for an extended period of time.**

### MISSISSIPPI, Central

<b>JEFFERSON COUNTY --- 1.3 ENE STORINGTON [31.76, -91.00]</b>				
	04/01/08 17:20 CST		0	Hail (0.75 in)
	04/01/08 17:20 CST		0	Source: Newspaper

**A weather system moved through the region on April 1st and brought a round of thunderstorms during the early morning hours of the 1st with a few more storms during the late afternoon hours. A couple of these storms became severe and produced hail and locally heavy rain.**

<b>WARREN COUNTY --- 1.1 ESE BRUNSWICK [32.54, -91.05]</b>				
	04/04/08 10:21 CST		17K	Thunderstorm Wind (EG 78 kt)
	04/04/08 10:21 CST		0	Source: NWS Storm Survey

A mobile home was rolled over and a few trees were snapped. This damage occurred just a bit east of where Highway 465 meets the levee. This was also just a little before the tornado occurred in the Eagle Lake Community.

<b>WARREN COUNTY --- 2.2 ESE BRUNSWICK [32.53, -91.04], 1.3 SE EAGLE BEND [32.51, -90.98]</b>				
	04/04/08 10:23 CST		1.20M	Tornado (EF1, L: 3.66 mi , W: 300 yd)
	04/04/08 10:27 CST	1	0	Source: NWS Storm Survey

The tornado touched down along Highway 465, on the western edge of Eagle Lake, and tracked east-southeast for almost 4 miles through the heart of the Eagle Lake Community. Hundreds of trees were snapped or uprooted with 30-40 homes, mostly mobile homes, damaged by downed trees. Several power lines were also taken down by trees. Several structures, about 10-15 homes, sustained shingle/roof damage or had carports/awnings torn off. Most of the trees were blown to the southeast and roof damage was on the west-northwest side of homes. However, several locations along the path had trees blown down to the north-northwest with some shingle damage on the east facing side. Maximum winds were near 105 mph.

<b>ISSAQUENA COUNTY --- 1.0 NNW VALLEY PARK [32.64, -90.87], 1.0 NNE HARDEE [32.61, -90.86]</b>				
	04/04/08 10:34 CST		0.10M	Thunderstorm Wind (EG 75 kt)
	04/04/08 10:35 CST		0	Source: Emergency Manager

A couple of homes sustained shingle damage, several trees were uprooted, and a camper was overturned around Valley Park.

### ISSAQUENA COUNTY --- 8.5 S HARDEE [32.48, -90.87]

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/04/08 10:40 CST		0	Thunderstorm Wind (EG 55 kt)
	04/04/08 10:40 CST		0	Source: NWS Storm Survey

A few trees were snapped along the levee, in the flooded timber, just north of Highway 465.

### WARREN COUNTY --- 0.2 W STOUT [32.30, -90.90], 0.7 SE BEECHWOOD [32.32, -90.82]

04/04/08 10:41 CST	2M	Thunderstorm Wind (EG 87 kt)
04/04/08 10:45 CST	0	Source: NWS Storm Survey

Significant wind damage occurred across the southern portion of Vicksburg as a line of intense storms moved through the river city. Areas along and south of I-20 were especially hard hit. Areas across Hwy 61 to Halls Ferry to Porters Chapel to Lee Roads had hundreds of trees uprooted or snapped. Numerous power lines were taken down with nearly 30 homes damaged by fallen trees. Several vehicles were also damaged by downed trees as well. The wind damage was extensive across central Warren County with several trained spotters estimating wind gusts between 80 and 100 mph. This was one of the worst and most widespread wind storms to impact the City of Vicksburg.

### WARREN COUNTY --- 0.6 SSE MAGNOLIA HELIPORT [32.32, -90.90], 1.1 SSW WALTERSVILLE [32.35, -90.84]

04/04/08 10:42 CST	0.70M	Thunderstorm Wind (EG 78 kt)
04/04/08 10:45 CST	0	Source: NWS Storm Survey

Several areas across Downtown Vicksburg had trees and power lines blown down with a handful of structures sustaining minor to moderate roof damage. Major roof damage occurred to the Enterprise Rent-a-Car building where a large portion was torn off.

### WARREN COUNTY --- 1.5 SSE VICKSBURG [32.33, -90.87], 1.7 SW NEWMANS [32.34, -90.79]

04/04/08 10:45 CST	0.20M	Thunderstorm Wind (EG 74 kt)
04/04/08 10:51 CST	1	0 Source: NWS Storm Survey

Numerous trees were blown down across the eastern portions of Vicksburg with some across I-20. A few homes were damaged by downed trees along with several power lines. One mobile home was totally destroyed along Warriors Trail as a tree fell through it. An injury occurred at this location as the occupant was briefly trapped in the home.

### YAZOO COUNTY --- 0.5 SW JONESTOWN [32.82, -90.44]

04/04/08 10:48 CST	30K	Thunderstorm Wind (EG 65 kt)
04/04/08 10:48 CST	0	Source: Emergency Manager

Several trees were blown down. One mobile home was destroyed on Bell Road from a downed tree.

### YAZOO COUNTY --- 3.6 ESE JONESTOWN [32.82, -90.37], 2.6 SSE BENTON [32.80, -90.25]

04/04/08 10:50 CST	50K	Thunderstorm Wind (EG 74 kt)
04/04/08 11:00 CST	0	Source: Law Enforcement

Numerous trees and a few power lines were blown down across central sections of Yazoo County. Trees were down across Witherspoon, Myrleville, and Cox Ferry Roads as well as Old Highway 16 and Highway 433.

### WARREN COUNTY --- 1.0 SW NEWMANS [32.34, -90.78], 1.0 WSW BOVINA [32.34, -90.75]

04/04/08 10:52 CST	0.12M	Tornado (EF1, L: 2.16 mi , W: 209 yd)
04/04/08 10:54 CST	0	Source: NWS Storm Survey

This brief tornado touched down along Warriors Trail Road between Vicksburg and Bovina, just south of I-20 and Hwy 80, and tracked east for 2 miles. Numerous trees were snapped and uprooted. Several power lines were taken down by trees. A couple structures were damaged by downed trees. Maximum winds were near 100 mph.

### HINDS COUNTY --- 1.7 NW DUKE [32.14, -90.74], 0.9 W CLINTON [32.33, -90.35]

04/04/08 11:00 CST	30K	Thunderstorm Wind (EG 70 kt)
04/04/08 11:17 CST	0	Source: NWS Employee

Numerous trees were blown down along the Natchez Trace in central Hinds County. A few of these trees were blocking the highway and had to be removed.

### HINDS COUNTY --- 0.6 WSW EDWARDS [32.33, -90.61], 2.3 NW CHAMPION HILL [32.37, -90.55]

04/04/08 11:04 CST	10K	Thunderstorm Wind (EG 74 kt)
04/04/08 11:05 CST	0	Source: Trained Spotter

Numerous trees were blown down around Edwards.

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>CLAIBORNE COUNTY --- 1.2 SE PORT GIBSON [31.96, -90.99]</b>				
	04/04/08 11:08 CST		0	Thunderstorm Wind (EG 55 kt)
	04/04/08 11:08 CST		0	Source: Law Enforcement
A few trees and many large limbs were blown down.				
<b>HINDS COUNTY --- 3.7 NNW CHAMPION HILL [32.40, -90.54], 2.5 NNE CHAMPION HILL [32.38, -90.50]</b>				
	04/04/08 11:11 CST		50K	Tornado (EF1, L: 2.72 mi , W: 300 yd)
	04/04/08 11:14 CST		0.20M	Source: NWS Storm Survey
This tornado started along Farr Road and tracked east-southeast across Highway 22 and then across Queens Hill Road. Numerous trees were snapped and uprooted around Farr Road and Highway 22 with one shed destroyed. Tree damage became more extensive just north and across Queens Hill Road where dozens of trees were snapped and uprooted. Damage along this 3 mile path was concentrated with several trees laid to the northwest or even back to the west. The majority of the trees were down to the southeast or east-southeast. The tornado lifted between Queens Hill and Williams Lake Roads. Tree damage became much more widespread, indicative of straight line damage, across Williams Lake Road. Maximum winds were near 110 mph.				
<b>HINDS COUNTY --- 1.8 NW BOLTON [32.37, -90.49], 3.2 E BOLTON [32.35, -90.42]</b>				
	04/04/08 11:13 CST		0.70M	Thunderstorm Wind (EG 100 kt)
	04/04/08 11:15 CST		0.20M	Source: NWS Storm Survey
Extensive wind damage occurred across western Hinds County as a line of thunderstorms moved through the area. Widespread tree damage occurred from areas northwest and west of Bolton, in Bolton, and in areas between Raymond and Clinton. The worst damage occurred along I-20, Carol Johns Road, Williams Lake Road, and in the City of Bolton. Nearly a dozen structures were damaged by downed trees within this swath. In the city of Bolton, the Fire Department had most of the roof torn off and a building next to the Post Office was destroyed. This building was a small cinder-block structure, the roof was removed and some walls had collapsed. That area, in the City of Bolton, was the most intense and winds have been estimated between 105 and 115 mph. For the rest of the wind damage, winds are estimated between 80 and 100 mph.				
<b>HINDS COUNTY --- 0.4 SSE BOLTON [32.34, -90.47], 2.0 E JACKSON [32.33, -90.14]</b>				
	04/04/08 11:15 CST		0	Hail (1.00 in)
	04/04/08 11:37 CST		0	Source: Amateur Radio
A swath of penny to quarter sized hail fell across most of central Hinds County and through the Downtown Jackson area.				
<b>HINDS COUNTY --- 0.8 SW RAYMOND [32.26, -90.44], 0.9 SE RAYMOND [32.26, -90.42]</b>				
	04/04/08 11:15 CST		8K	Thunderstorm Wind (EG 55 kt)
	04/04/08 11:15 CST		0	Source: NWS Employee
A couple trees and power lines were blown down around Raymond.				
<b>HOLMES COUNTY --- 0.8 NNW PICKENS [32.89, -89.97]</b>				
	04/04/08 11:16 CST		0	Thunderstorm Wind (EG 55 kt)
	04/04/08 11:17 CST		0	Source: Emergency Manager
Several trees were blown down around town.				
<b>HINDS COUNTY --- 2.4 ENE BOLTON [32.36, -90.43], 3.5 N RAYMOND WILLIAMS ARP [32.35, -90.39]</b>				
	04/04/08 11:17 CST		80K	Tornado (EF1, L: 2.24 mi , W: 200 yd)
	04/04/08 11:19 CST		0	Source: NWS Storm Survey
Another short path of tornadic damage occurred just east-northeast of Bolton. This tornado started along the I-20 Frontage Road and tracked just south of east along I-20 to the Norrell Road Intersection. Two billboards were blown down and destroyed with another heavily damaged. Numerous trees were snapped and uprooted. Within the path of tree damage, several areas indicated trees blown down to the north or northwest while the majority were blown down in the east-southeast direction.				
<b>HINDS COUNTY --- 3.0 N RAYMOND WILLIAMS ARP [32.34, -90.39], 2.2 NE RAYMOND WILLIAMS ARP [32.33, -90.38]</b>				
	04/04/08 11:17 CST		0.20M	Thunderstorm Wind (EG 75 kt)
	04/04/08 11:18 CST		0	Source: NWS Storm Survey
Numerous trees were snapped and uprooted along South Norrell Road and St. Thomas Road. A few homes sustained shingle damage and a trampoline was thrown and destroyed. The covered walk way at the St. Thomas Church was destroyed and thrown across the parking lot. One home had a tree through half of it causing major damage.

Aside from the tornadic damage across Northeast Jackson, extensive and significant straight line wind damage occurred across a large portion of the City of Jackson, particularly just to the south of the tornado path. Hundreds of trees and numerous power lines were taken down by wind gusts between 80 and 100 mph. The very strong wind gusts alone damaged many homes and buildings. However, it was the large amount of trees that were blown down which caused the most significant damage. Hundreds of trees were blown down on homes which caused minor to major damage to many structures. Some 6 to 7 thousand homes sustained some kind of damage. Many signs were blow down or damaged along with many vehicles destroyed by fallen trees and limbs. This tornado and wind event was likely one of the most significant, widespread, and costly severe weather events the Jackson area has seen. Nearly everyone described this event as worse than Hurricane Katrina, for the Metro.				
<b>HINDS COUNTY --- 2.6 SW WEST JACKSON [32.29, -90.23]</b>				
	04/04/08 11:25 CST		80K	Thunderstorm Wind (EG 65 kt)

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>The damage started with snapped trees, power lines and power poles across Livingston and County Line Roads and Watkins Drive. The tornado moved east-southeast, crossing Interstate 220 and downing numerous large trees, some on homes, as it moved through residential areas off Hanging Moss Road. Most of the damage in this area was EF-1 in nature with maximum winds between 90 and 105 mph. The damage became somewhat more intense as it moved through the Tougaloo area, with dozens of large trees snapped and uprooted, many on homes, causing serious damage. The tornado crossed State Street, and then crossed Interstate 55 where it caused roof damage to two hotels, and damaged a car dealership, snapping light poles, blowing the windows out of dozens of cars, and causing roof and awning damage. It also damaged the roof of a large medical building. As the tornado crossed Ridgewood Road, it blew out the back wall of a large restaurant building, and continued damaging roofs of buildings and knocking down numerous trees. The damage in the Interstate 55 area was rated as EF-1 with maximum winds between 95 and 105 mph.</p>				

Once the tornado crossed Ridgewood Road, it moved back into residential areas of northeast Jackson. The tornado reached its maximum intensity as it approached and crossed Old Canton Road. Hundreds of large trees were snapped and uprooted in these areas, causing major damage to numerous homes. On the east side of Old Canton, it caused extensive roof and facade damage to several commercial buildings, blew the walls out of the second story of a large warehouse type building, and caused extensive damage to the roofs of apartment complex buildings and a couple of residential homes. This area along the path from just west of Pear Orchard Road to the area on the east side of Old Canton Road was the maximum rated damage at EF-2 with maximum estimated winds of 115 mph.

While not accessible via ground survey, it is assumed based on radar data that the tornado continued on the ground across the Pearl River. Damage was again observed in northwest Rankin County in the subdivisions off of Old Fannin Road. Numerous trees were downed, a number on houses, and many homes had shingle damage. The most intense damage was where the tornado crossed Old Fannin Road in the Avalon and Barnett Bend subdivisions. Numerous large trees were snapped and uprooted, several causing major damage to some homes, and power poles were snapped off. Maximum winds here were estimated to be up to 105 mph, which is at the high end of EF-1 on the Enhanced Fujita scale.

Damage was somewhat less as it moved through the subdivisions east of Hugh Ward Parkway, but intensified again as it moved along Manship Road and into Mill Creek subdivision. A number of large trees were snapped and uprooted in these areas. The tornado crossed Lakeland Drive, continuing to down trees, and moved across the Northwest Rankin Attendance Center complex, blowing down trees, a fence at the baseball field, and blowing out an awning. The tornado crossed Vine Drive and caused extensive shingle and roof damage to a number of apartment buildings. The tornado dissipated shortly after this damage, causing sporadic tree damage at the edge of Castlewoods subdivision. Maximum winds in the area from Hugh Ward Parkway to prior to dissipation were estimated to generally be between 90 and 100 mph, which is EF-1 on the Enhanced Fujita scale.

Total path length was 14 miles.

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/04/08 15:05 CST		0	Hail (1.00 in)
	04/04/08 15:05 CST		0	Source: Public

A potent early April storm slammed the area with widespread wind damage and several tornadoes. A bowing line of thunderstorms was the culprit with the main axis of severe weather and damage having occurred within the I-20 corridor from northeast Louisiana to the Jackson Metro to east-central Mississippi around Meridian. Several extensive swaths of significant wind damage occurred, where winds were estimated at 80 mph or greater. Overall, several thousand trees were snapped and uprooted with several dozen homes damaged by downed trees. The strongest tornado occurred in the Jackson Metro area as it moved across Northeast Jackson and into the Reservoir area of Northwest Rankin County. Additionally, the significant wind damage was focused across portions of Vicksburg, Bolton, Jackson, the Reservoir area of Rankin County, the Hillsboro area in Scott County, northern Newton County and the northern half of Lauderdale County. Aside from the tornadoes, this was one of the most significant wind events to impact the Jackson Metro area as well as the City of Vicksburg. Nearly everyone described this event as being worse than Hurricane Katrina for central Mississippi.

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/18/08 17:42 CST		0	Thunderstorm Wind (EG 50 kt)
	04/18/08 17:43 CST		0	Source: Trained Spotter

A few trees were blown down.

**A strong storm system and cold front evolved over the region and brought first a steady area of light to moderate rain to the western half of the forecast area. As the rain shield dissipated during mid afternoon, enough instability developed and combined with increasing wind shear. These ingredients set the stage for a round of severe weather. Seven tornadoes occurred across portions of central Mississippi along with a few scattered reports of wind damage. All tornadoes were of the EF-1 variety.**

A late May pattern set up over the area on April 22nd which consisted of cold mid level temperatures, weak low level winds and decent mid level flow from the northwest. These ingredients came together and produced scattered thunderstorms across the region all producing a mix of large hail and damaging winds. A few also produced very heavy rainfall and flash flooding as they back built and remained over some areas for an extended period of time.

A few rounds of thunderstorms impacted the region on April 26th. The first moved through the Delta region during the early morning hours and brought a few reports of wind damage. Later in the day, additional storms developed and brought scattered wind damage to the area along with a few reports of hail.
