Another powerful spring storm system developed over the plains and spread eastward causing severe weather from the Mid West to the south-central Gulf Coast states to the Southeast United States. Overall, the Lower Mississippi Valley was spared the brunt of the worst weather with just scattered reports of severe weather. However, the Southeast United States was hit quite hard as significant severe storms occurred. This region had many reports of large hail and damaging winds with several strong tornadoes (EF2 to EF3) and a few violent tornadoes (EF4).
