Non-Radar Clock

(NRC)

Version 1.0
November 14, 2007

A component of:

SIGNAL

Simulation and Integration of Ground, Network, and Air Links

Status:

Operational

Connections:

The Non-Radar Clock connects to Charter if the scenario information and control is necessary. This software can also be configured as a stand alone training supplement.

Overview:

NRC is used during the non-radar portion of Air Traffic Controller training done here at the FAA Academy. Used in the stand alone mode, it is a large clock that can be set, started, paused and stopped as needed. If it is connected to Charter, a scenario will provide weather station information and updates.
