

Visual View of Data (VIVID)

Version 1.0
November 14, 2007

A component of:

SIGNAL

Simulation and Integration of Ground, Network, and Air Links

Status:

Operational: As new types of data are identified, they are added to VIVID's display abilities.

Connections:

VIVID is a stand alone process.

Overview:

Vivid uses various record files, both operational and training and allows the data to be replayed. This concept is similar to SatoriXP. The main difference is that this software allows multiple datasets to be loaded and replayed together.
