

§ 375.36

(c) A charge reasonably related to the value of meals and beverages furnished enroute shall not be deemed to constitute compensation or hire for purposes of this section.

§ 375.36 Lease of foreign civil aircraft without crew.

Foreign civil aircraft that are leased without crew to an air carrier or citizen or permanent resident of the United States, and used by the lessee in otherwise authorized air transportation or commercial air operations, may be operated into, out of, and within the United States in accordance with any applicable regulations prescribed by the Federal Aviation Administration.

§ 375.37 Certain business aviation activities using U.S.-registered foreign civil aircraft.

For purposes of this section, “company” is defined as a person that operates civil aircraft in furtherance of a business other than air transportation. U.S.-registered foreign civil aircraft that are not otherwise engaged in commercial air operations, or foreign air transportation, and which are operated by a company in the furtherance of a business other than transportation by air, when the carriage is within the scope of, and incidental to, the business of the company (other than transportation by air), may be operated to, from, and within the United States as follows:

(a) *Intra-company operations.* A company operating a U.S.-registered foreign civil aircraft may conduct operations for a subsidiary or parent or a subsidiary of its parent on a fully-allocated cost reimbursable basis; provided, that the operator of the U.S.-registered foreign civil aircraft must hold majority ownership in, be majority owned by, or have a common parent with, the company for which it provides operations;

(b) *Interchange operations.* A company may lease a U.S.-registered foreign civil aircraft to another company in exchange for equal time when needed on the other company’s U.S. registered aircraft, where no charge, assessment, or fee is made, except that a charge may be made not to exceed the dif-

14 CFR Ch. II (1–1–08 Edition)

ference between the cost of owning, operating, and maintaining the two aircraft;

(c) *Joint ownership operations.* A company that jointly owns a U.S.-registered foreign civil aircraft and furnishes the flight crew for that aircraft may collect from the other joint owners of that aircraft a share of the actual costs involved in the operation of the aircraft; and

(d) *Time-sharing operations.* A company may lease a U.S.-registered foreign civil aircraft, with crew, to another company; provided, that the operator may collect no charge for the operation of the aircraft except reimbursement for:

(1) Fuel, oil, lubricants, and other additives.

(2) Travel expenses of the crew, including food, lodging, and ground transportation.

(3) Hanger and tie-down costs away from the aircraft’s base of operations.

(4) Insurance obtained for the specific flight.

(5) Landing fees, airport taxes, and similar assessments.

(6) Customs, foreign permit, and similar fees directly related to the flight.

(7) In flight food and beverages.

(8) Passenger ground transportation.

(9) Flight planning and weather contract services.

(10) An additional charge equal to 100 percent of the expenses for fuel, oil, lubricants, and other additives.

Subpart E—Operations Requiring Specific Preflight Authorization of Filing

§ 375.40 Permits for commercial air operations.

(a) *Permit required.* Except for aircraft being operated under a foreign air carrier permit, an exemption, or as otherwise provided in Subpart D or H of this part, foreign civil aircraft may engage in commercial air operations only if there is carried on board the aircraft a permit issued by the Department in accordance with this subpart authorizing the operations involved.

(b) Aircraft are not authorized to engage in air transportation under this section. Where an operation involves the carriage of persons, property or mail for compensation or hire, the Department will determine whether particular flights for which a permit is sought will be in common carriage, and therefore in air transportation, based on all the facts and circumstances surrounding the applicant's entire operations. The burden rests upon the applicant in each instance to demonstrate by an appropriate factual showing that the contemplated operation will not constitute common carriage from, to or within the United States. In general, an applicant that holds itself out to the public, or to a particular class or segment, as willing to furnish transportation for hire is a common carrier.

§ 375.41 Agricultural and industrial operations within the United States.

Foreign civil aircraft shall not be used for such commercial air operations as crop dusting, pest control, pipeline patrol, mapping, surveying, banner towing, skywriting or similar agricultural or industrial operations within the United States, including its territorial waters and overlying airspace, unless a permit has been issued by the Department and the operation is conducted in accordance with all applicable State and local laws and regulations as well as the applicable provisions of this part.

§ 375.42 Transport operations—occasional planeload charters.

Occasional planeload charters may be authorized where, because of their limited nature and extent, special equipment or facilities utilized, or other circumstances pertaining to them, it appears that they are not within the scope of the applicant's normal holding out of transportation services to the general public. Such charters are normally limited to those in which the entire capacity of the aircraft is engaged by a single charterer, and since they are occasional in nature, should not exceed for any one applicant more than six flights during a calendar year. This part does not authorize operations that

involve solicitation of the general public such as is usually involved in the transportation of individually-ticketed passengers or individually-waybilled cargo, or in which the charterer is a travel agent, a charter operator, a broker, an air freight forwarder or any other organization that holds itself out to the general public to provide transportation services. Carriage of cargo for the operator's own account is governed by the provisions of this section if the cargo is to be resold or otherwise used in the furtherance of a business other than the business of providing carriage by aircraft.

§ 375.43 Application for foreign aircraft permit.

(a) Applications for foreign aircraft permits shall be submitted on OST Form 4509, (Appendix A), in duplicate, addressed to the Chief, Discrete Operations Branch, Licensing Division, P-45, Office of Aviation Operations. Upon a showing of good cause, applications may be made by telegram or by telephone.

(b) Applications shall contain a proper identification (including citizenship) of the applicant (the operator of the aircraft concerned) and of the owner thereof (if different from the applicant), a description of the aircraft by make, model, and registration marks; and a full description of the operations for which authority is desired, indicating type and dates of operations and number of flights, and routing. In the case of cargo flights, the names of all contractors, agents, if any, and the beneficial owner of the cargo, and a description of the cargo and of the proposed operations shall be provided. In the case of passenger flights, a full identification and description of the group chartering the aircraft, and identification of the travel agent, if any, shall be provided. Applications shall also contain a statement as to whether the applicant's homeland allows operators of U.S.-registered aircraft to conduct similar operations.

(c) Applications shall be filed at least 15 days in advance of the proposed commencement date of the operations. The Department may direct the applicant to serve copies of its application on additional persons. Late applications
