Refuge Facts

- Red River National Wildlife Refuge Act - signed into law 10/13/00. It was established on 8/22/02. According to legislation, refuge shall consist of approximately 50,000 acres of Federal lands and waters along that section of Red River between Colfax, Louisiana and Arkansas state line, a distance of approximately 120 miles.
- To guide acquisition efforts, the Service has identified four focus areas plus a proposed headquarters/visitor center site. The refuge would be a complex of four separate refuges with a headquarters/visitor center near

Shreveport/Bossier City. The focus areas include:

Lower Cane River (Natchitoches Parish)

Spanish Lake Lowlands (Natchitoches Parish)

Bayou Pierre Floodplain (Desoto and Red River Parishes)

Headquarters Site (Bossier Parish)

Wardview (Caddo and Bossier Parishes)

Natural History

■ Historically, the Red River Valley was forested with bottomland hardwoods, cypress sloughs, and shrub swamps, however, for the last three decades, the Red River Valley was

utilized extensively for agricultural production.

- After completion of the Red River Waterway Project in 1994, water levels in the river are higher and more constant which have greatly reduced the turbidity. Water quality has improved and with the seasonal retention of water levels, a rich diversity of aquatic plants have developed.
- Increased water levels on the river also improved some adjacent habitats. Flooded timber and farm fields with wet, depressional areas are now common. USDA programs such as the Wetlands Reserve Program (WRP) and Conservation Reserve Program (CRP) are restoring valuable wildlife habitats through the reforestation of prior converted wetlands and highly erodible lands in the Red River Valley.

Refuge Objectives

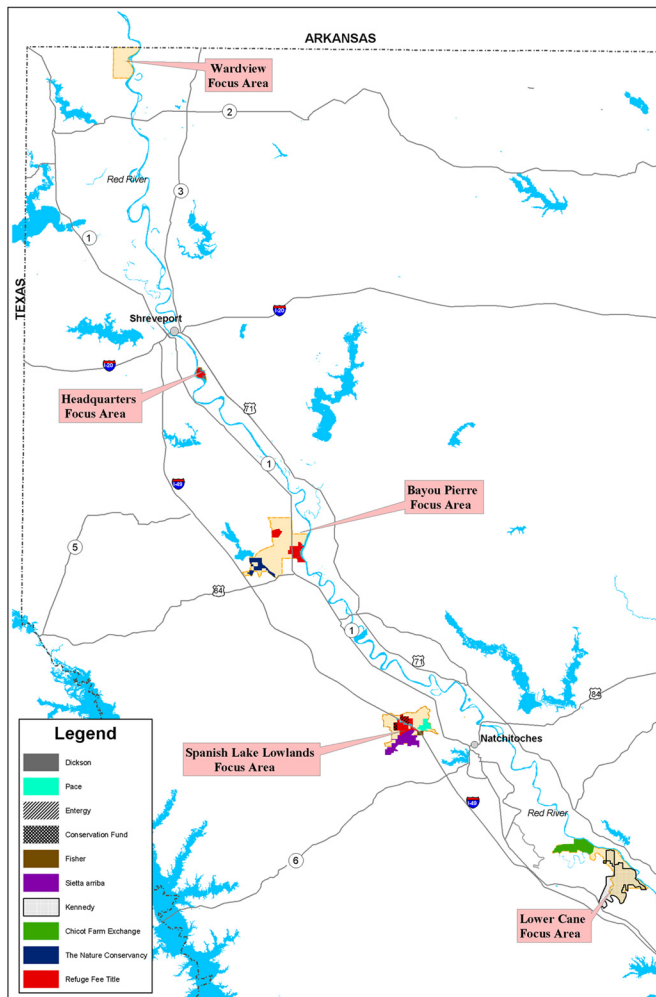

- Provide for restoration and conservation of native plants and animal communities on suitable sites in the Red River Valley, including restoration of extirpated species.
- Provide habitat for migratory birds.
- Provide technical assistance to private landowners in the restoration of their lands for the benefit of fish and wildlife.

Management Tools

- Reforestation of bottomland hardwoods.
- Water management for waterfowl and other wetland species.
- Law enforcement.
- Hunting.
- Partnerships.

Public Use Opportunities

- Education/interpretation.
- Hunting and fishing.
- Wildlife observation.
- Photography.
