General Information

A. What Should I Consider as I Prepare My Comments for EPA?

1. Submitting CBI. Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for Preparing Your Comments. When submitting comments, remember to: • Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).

• Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

• Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

• Describe any assumptions and provide any technical information and/ or data that you used.

• If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

• Provide specific examples to illustrate your concerns, and suggest alternatives.

• Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

• Make sure to submit your comments by the comment period deadline identified.

SUPPLEMENTARY INFORMATION: Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which "cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare." The EPA then issues air quality criteria for listed pollutants, which are commonly referred to as "criteria pollutants." The air quality criteria are to "accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varving quantities." Under section 109 of the CAA, EPA establishes NAAQS for each

listed pollutant, with the NAAQS based on the air quality criteria. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Lead is one of six criteria pollutants for which EPA has established air quality criteria and NAAQS. Presently, EPA is reviewing the air quality criteria and NAAQS for lead. The EPA completed its Air Quality Criteria for Lead ("Criteria Document") in October, 2006 (71 FR 57508; September 29, 2006).

As part of its review of the NAAQS, EPA is preparing a human exposure and health risk assessment.

In December 2006, a first draft of a technical support document, Lead Human Exposure and Health Risk Assessments and Ecological Risk Assessment for Selected Areas (Pilot Phase) was released by EPA for public review and comment and for review by the Clean Air Scientific Advisory Committee (CASAC) of EPA's Science Advisory Board (71 FR 69117; November 29, 2006) at a public meeting held in February 2007. An analysis plan for the risk assessment was previously reviewed by CASAC and the public. Comments received from review of the draft plan and draft pilot phase risk assessment technical support document have been considered in developing the Draft Risk Assessment Report being released at this time.

The draft report, Lead Human Exposure and Health Risk Assessment for Selected Case Studies, describes the design, methodology and results of the human exposure and health risk assessments for lead. It describes and presents the results from a lead exposure analysis and health risk assessment involving several case studies. The draft document will be available online at: http://www.epa.gov/ ttn/naaqs/standards/pb/ s_pb_cr_td.html.

The EPA is soliciting advice and recommendations from the CASAC by means of a review on the draft Risk Assessment Report at an upcoming public meeting of the CASAC. A **Federal Register** notice will inform the public of the date and location of that meeting. Following the CASAC meeting, EPA will consider comments received from the CASAC and the public in preparing a final Risk Assessment Report.

Dated: July 19, 2007.

Director, Office of Air Quality Planning and Standards.
