

# The Promises And Pitfalls Of SOA

November 13, 2007

OEI Symposium, St. Louis Missouri

Connie Dwyer, Associate Director IES/OIC/OEI/EPA

Rich Reba, CSC SOA Center of Excellence Director

For Conference Purposes Only

## **Session Objectives: Attendees Will Learn**

- “SOA What?” - what benefits SOA can really deliver
- What barriers stand in the way
- What proven methods can be used to overcome the barriers
- How to get going and start getting benefits NOW
- Q&A After Each Major Section

# “SOA What?”: What Is Service Oriented Architecture (SOA) And What Benefits Can It Deliver?

## ARCHITECTURE (Planning and Oversight)

### Enterprise Level

- Across Enterprises
- Throughout Entire Enterprise

### Portfolio Level

- Business Processes
- IT Portfolios

### System Level

- IT Systems
- Components

## ORIENTED AROUND

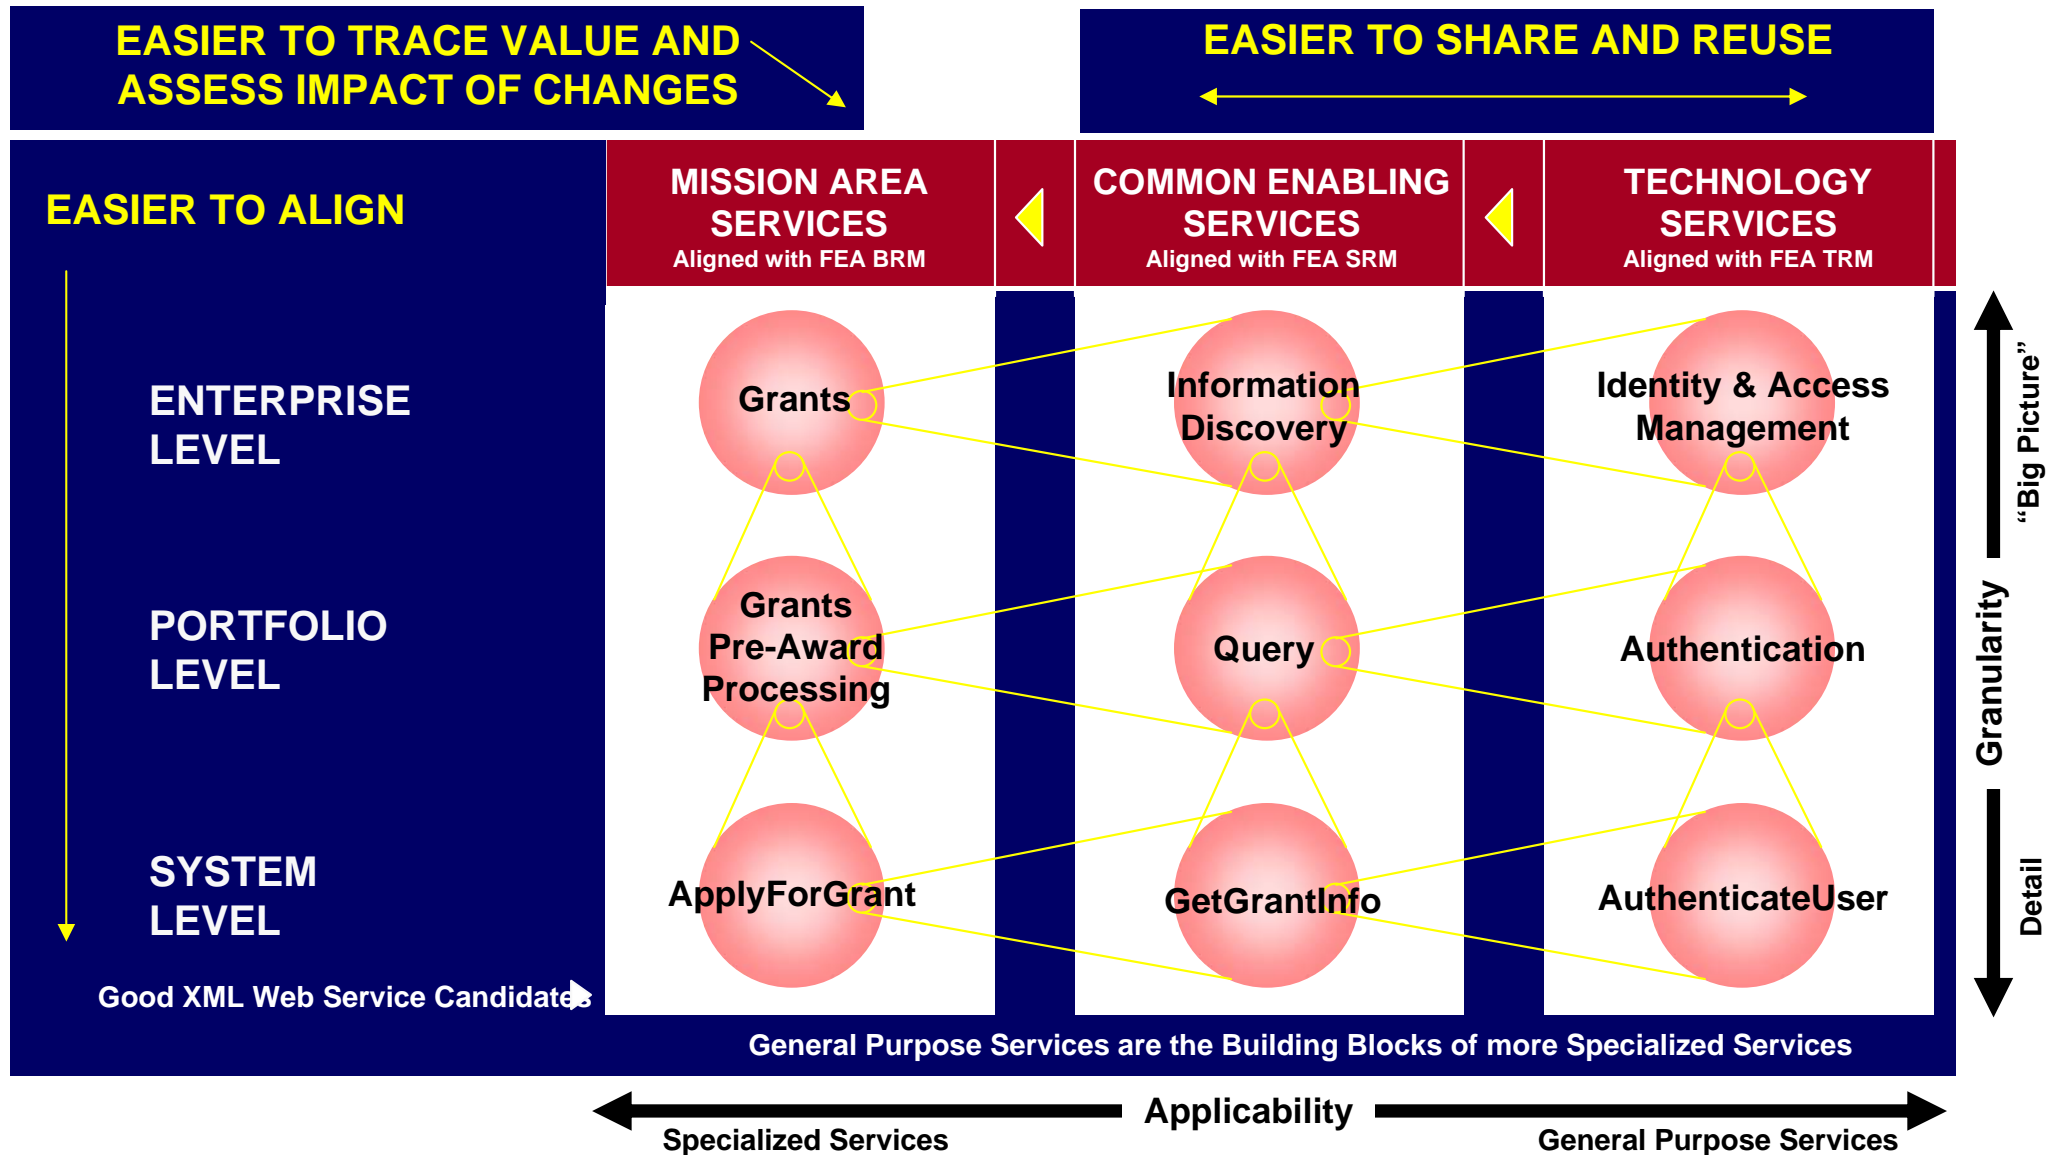

**KEY BENEFIT:**  
Get the most “bang for the buck” out of the Services you provide and use

## SERVICES

- Maximize efficiency and effectiveness of **services** provided and consumed
- Use **services** like building blocks to “assemble” operational processes and IT systems
- Make it easier for those who need **services** to find and connect with those who provide services
- Use Internet standards and SOA tools to make **services** easier to share and use
- Useful for all **services**, not just software (e.g., XML web services)

# SOA: An Example

# To Avoid The Pitfalls And Fulfill The Promise Of SOA, Keep On The Proven Path To Success

SOA FEATURE	PROMISE	PITFALL	PATH TO SUCCESS
Decision Making Focused On Services (Service Orientation)	Boost The Value Delivered By Services	Silo Orientation	Education And Outreach
Modular Services Used As Building Blocks	Spend Less Time And Money	Selecting The Right Services	Service Catalogs
SOA Standards And Enabling Services	Do More Than You Could Before	Additional Costs	Early Adopters (Start Small, Scale Rapidly)
Shared Services	Leverage Strengths And Gain Efficiencies	Cultural Resistance	Balanced Governance
Service Roadmaps	Adapt And Optimize	Making "In-Flight" Changes	Agile Services Lifecycle

**PITFALL**  
Silo Orientation

**Example: The IT Organization Is Focused On Its Own Silo, Not On Value Delivered To Its Customers**

**Shared Workspace  
Service**

**Customers**

“The IT Organization just told my organization to delete files off our shared network folders because we are taking up too much room!”

“I just accidentally deleted an important file, and the IT Organization just said they didn’t backup the files last night!”

“I have a suggestion for improving this service, but I have no idea who to make it to so that it will be heard, so I’ll just give up.”

Does the  
Customer  
Know...?

**SERVICE  
PROFILE**

Does the  
Provider  
Know...?

YES	Service Name	YES
NO	Service Description	YES
NO	Customers & Stakeholders	NO
YES	Value Delivered	NO
YES	Functionality	YES
NO	Performance Thresholds	YES
YES	Interface	YES
YES	Inputs and Outputs	NO
NO	Subscription Agreements	NO
YES	Problem Handling	YES
NO	Change Management	YES

**IT Organization**

“We need some extra storage for a new program, so we’ll borrow some from the shared workspace”

“We don’t backup the files on weekends anymore because it’s too expensive”

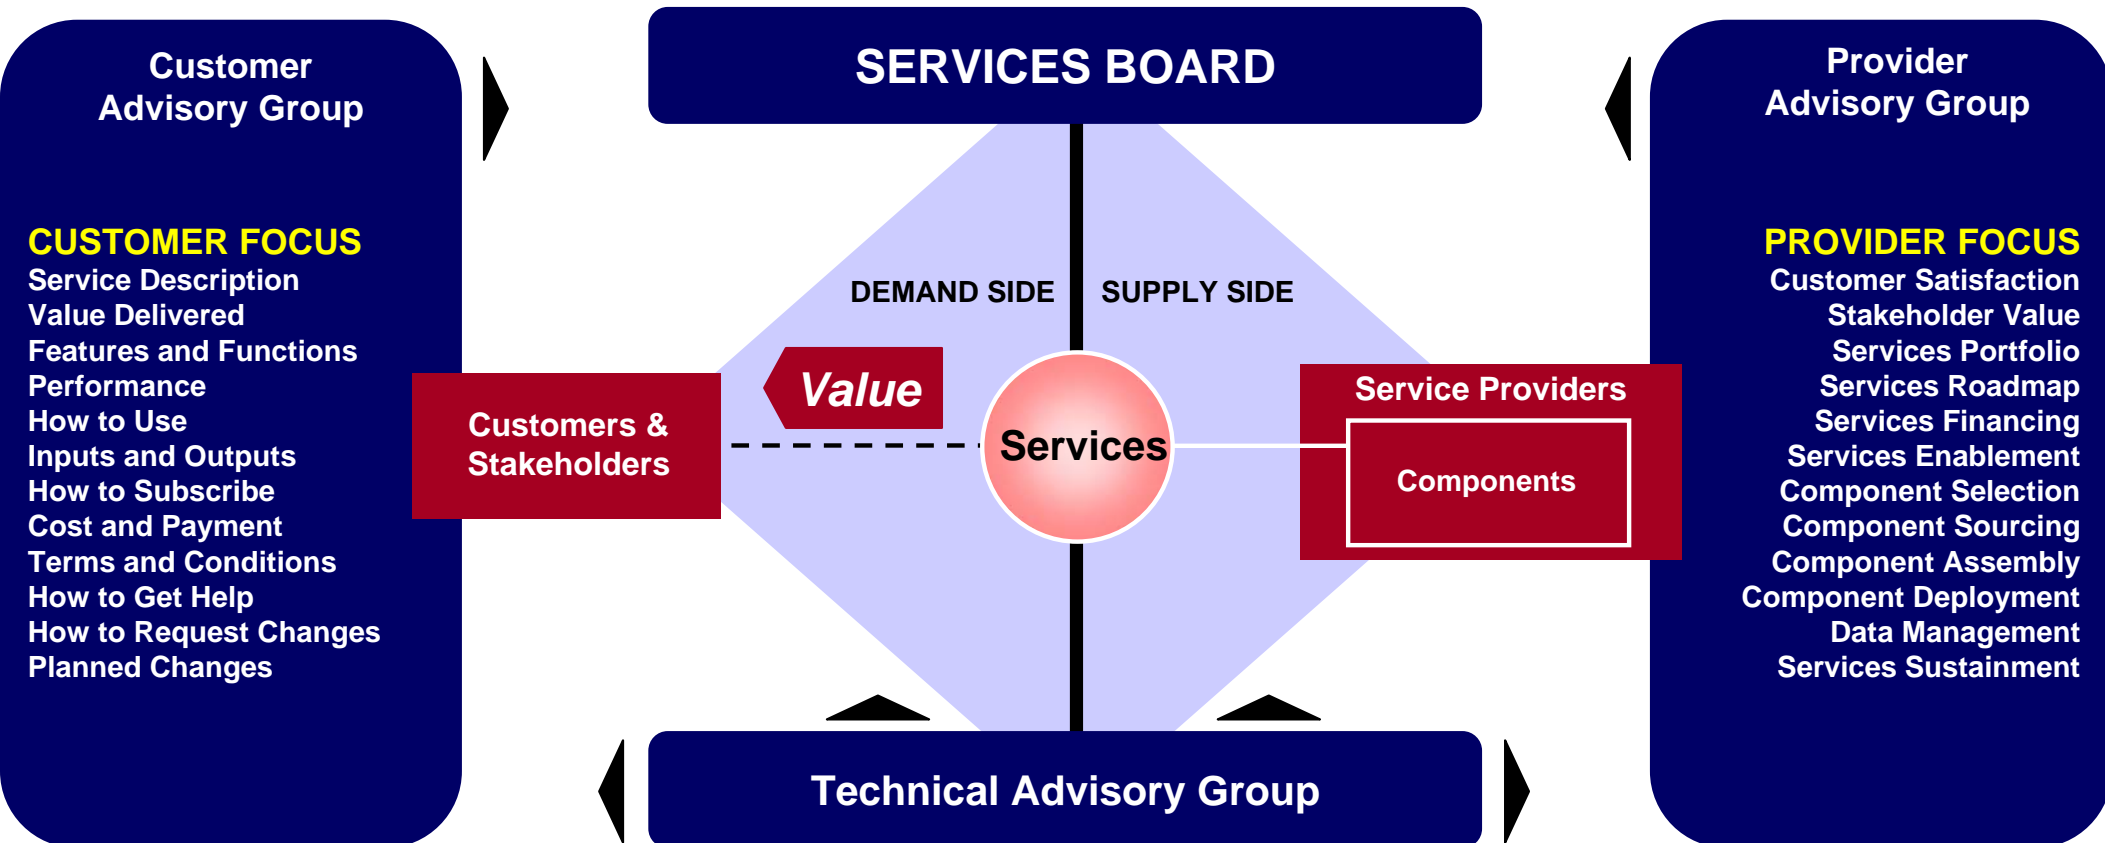

“We’re doing well when we don’t hear from our customers”

**SOA FEATURE**  
Decision Making  
Focused On Services

**PROMISE**  
Boost The Value  
Delivered By Services

**PATH TO SUCCESS**  
Education And  
Outreach

## Service Orientation: Educating The Decision Makers And Reaching Out To The Customers

For Conference Purposes Only

# Promise Fulfilled: The Value Delivered By The IT Organization Increased, Building Customer Trust

## Shared Workspace Service

### Customers

"I know that our organization has 650 GB of storage available, so we can manage how we use our shared folder"

"I know that the shared workspace isn't backed up on weekends so I'll be sure to make a backup copy of my work"

"Our organization has some special storage needs that we are willing to pay for, and we have submitted a change request scheduled for review"

Does the  
Customer  
Know...?

### SERVICE PROFILE

Does the  
Provider  
Know...?

Does the Customer Know...?	SERVICE PROFILE	Does the Provider Know...?
YES	Service Name	YES
YES	Service Description	YES
YES	Customers & Stakeholders	YES
YES	Value Delivered	YES
YES	Functionality	YES
YES	Performance Thresholds	YES
YES	Interface	YES
YES	Inputs and Outputs	YES
YES	Subscription Agreements	YES
YES	Problem Handling	YES
YES	Change Management	YES

### IT Organization

"We need some extra storage, but we can't just take it from the shared workspace because 3 customers may need it this month"

"Perhaps we should work with our customers to see if they would be willing to help defray the costs of weekend backups"

"We're doing well when our customers express satisfaction and participate in making our services better"

# To Avoid The Pitfalls And Fulfill The Promise Of SOA, Keep On The Proven Path To Success

SOA FEATURE	PROMISE	PITFALL	PATH TO SUCCESS
Decision Making Focused On Services (Service Orientation)	Boost The Value Delivered By Services	Silo Orientation	Education And Outreach
Modular Services Used As Building Blocks	Spend Less Time And Money	Selecting The Right Services	Service Catalogs
SOA Standards And Enabling Services	Do More Than You Could Before	Additional Costs	Early Adopters (Start Small, Scale Rapidly)
Shared Services	Leverage Strengths And Gain Efficiencies	Cultural Resistance	Balanced Governance
Service Roadmaps	Adapt And Optimize	Making "In-Flight" Changes	Agile Services Lifecycle

**SOA FEATURE**  
Modular Services Used  
As Building Blocks

**PROMISE**  
Spend Less Time  
And Money

**PITFALL**  
Selecting The  
Right Services

**The Grants Management Office Hasn't Selected The  
Services That Will Save The Most Time And Money**

**Grants  
Management  
Service**  
(New & Improved)

Provider: Grants Management Office

**New Custom Grants  
Management System  
Components**

**(too expensive &  
time consuming)**

For Conference Purposes Only

**PATH TO SUCCESS**  
Service Catalogs

# The Grants Management Office Uses The Enterprise Service Catalog To Find Modular Services It Needs

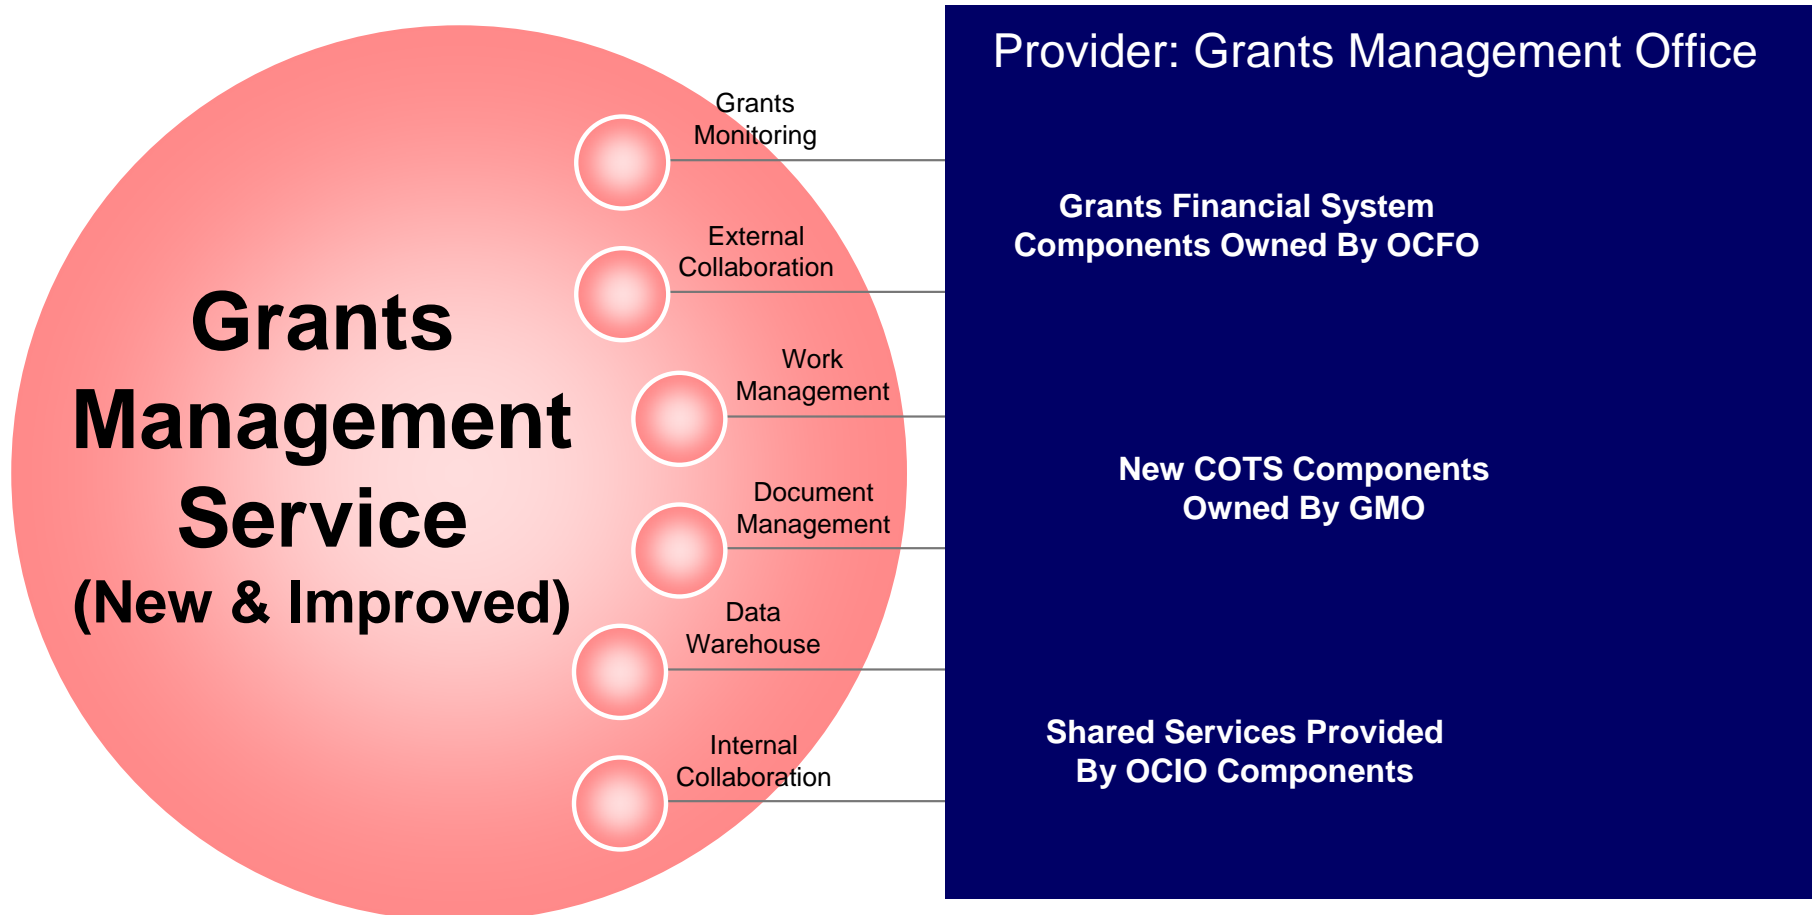

## Enterprise Service Catalog

MISSION AREA SERVICES Aligned with FEA BRM	COMMON ENABLING SERVICES Aligned with FEA SRM	TECHNOLOGY SERVICES Aligned with FEA TRM
<ul style="list-style-type: none"> <li>● <b>Grants:</b> <ul style="list-style-type: none"> <li>● Planning</li> <li>● Award Processing</li> <li>● <b>Monitoring</b></li> </ul> </li> <li>● <b>Performance Evaluation:</b> <ul style="list-style-type: none"> <li>● Evaluation Strategy</li> <li>● Information Collection</li> <li>● Performance Analysis</li> </ul> </li> <li>● <b>Research:</b> <ul style="list-style-type: none"> <li>● Strategy</li> <li>● Analysis &amp; Assimilation</li> <li>● Impact Assessment</li> </ul> </li> <li>● <b>Administration:</b> <ul style="list-style-type: none"> <li>● Financial Management</li> <li>● Personnel Management</li> <li>● Operations Management</li> <li>● IT Management</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● <b>Productivity:</b> <ul style="list-style-type: none"> <li>● <b>Collaboration</b></li> <li>● <b>Work Management</b></li> <li>● Case Management</li> </ul> </li> <li>● <b>Knowledge &amp; Data:</b> <ul style="list-style-type: none"> <li>● Content Management</li> <li>● <b>Document Management</b></li> <li>● Data Exchange</li> <li>● <b>Data Warehouse</b></li> </ul> </li> <li>● <b>Customer &amp; Interface:</b> <ul style="list-style-type: none"> <li>● Portal</li> <li>● Customer Management</li> <li>● Mobility</li> </ul> </li> <li>● <b>Analytics:</b> <ul style="list-style-type: none"> <li>● Survey Support</li> <li>● Business Intelligence</li> <li>● Statistical Analysis</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● <b>IT Lifecycle Support</b> <ul style="list-style-type: none"> <li>● Planning</li> <li>● Implementation</li> <li>● Sustainment</li> </ul> </li> <li>● <b>SOA Enabling Platforms:</b> <ul style="list-style-type: none"> <li>● Service Discovery</li> <li>● Messaging</li> <li>● Mediation</li> <li>● Service Management</li> </ul> </li> <li>● <b>IT Infrastructure Platforms</b> <ul style="list-style-type: none"> <li>● Computing</li> <li>● Storage</li> <li>● Network</li> </ul> </li> <li>● <b>Security &amp; Privacy</b> <ul style="list-style-type: none"> <li>● Identity Management</li> <li>● Authentication</li> <li>● Encryption</li> </ul> </li> </ul>

General Purpose Services are the Building Blocks of more Specialized Services

# Promise Fulfilled: The Grants Management Office Saves Time And Money By Using Modular Services To Make Improvements

For Conference Purposes Only

# To Avoid The Pitfalls And Fulfill The Promise Of SOA, Keep On The Proven Path To Success

SOA FEATURE	PROMISE	PITFALL	PATH TO SUCCESS
Decision Making Focused On Services (Service Orientation)	Boost The Value Delivered By Services	Silo Orientation	Education And Outreach
Modular Services Used As Building Blocks	Spend Less Time And Money	Selecting The Right Services	Service Catalogs
SOA Standards And Enabling Services	Do More Than You Could Before	Additional Costs	Early Adopters (Start Small, Scale Rapidly)
Shared Services	Leverage Strengths And Gain Efficiencies	Cultural Resistance	Balanced Governance
Service Roadmaps	Adapt And Optimize	Making "In-Flight" Changes	Agile Services Lifecycle

**PITFALL**

Additional  
Costs

**Customers Can't Use Services That Already Exist  
Because It's Too Hard / Expensive To Connect**

**Customers**

"I Need to Authenticate  
A User that System A  
can authenticate..."

"I Need Data that  
System A has..."

...but there is no  
way for me to connect to  
System A to do it"

Data Query Service  
Made Available via  
Proprietary Interface

... but it's too hard and  
expensive to connect to  
System A's proprietary  
interface from an incompatible  
platform and/or remote location

**IT System A**

User Authentication  
Service Embedded  
in Software Code

## PATH TO SUCCESS

Early Adopters  
(Start Small,  
Scale Rapidly)

# Business Case Can Justify Costs Of Standardization For Customers, Providers, And Sponsors

## Customers

"I Need to Authenticate  
A User that System A  
can authenticate..."

"I Need Data that  
System A has..."

...but there is no  
way for me to connect to  
System A to do it"

... but it's too hard and  
expensive to connect to  
System A's proprietary  
interface from an incompatible  
platform and/or remote location

## IT System A

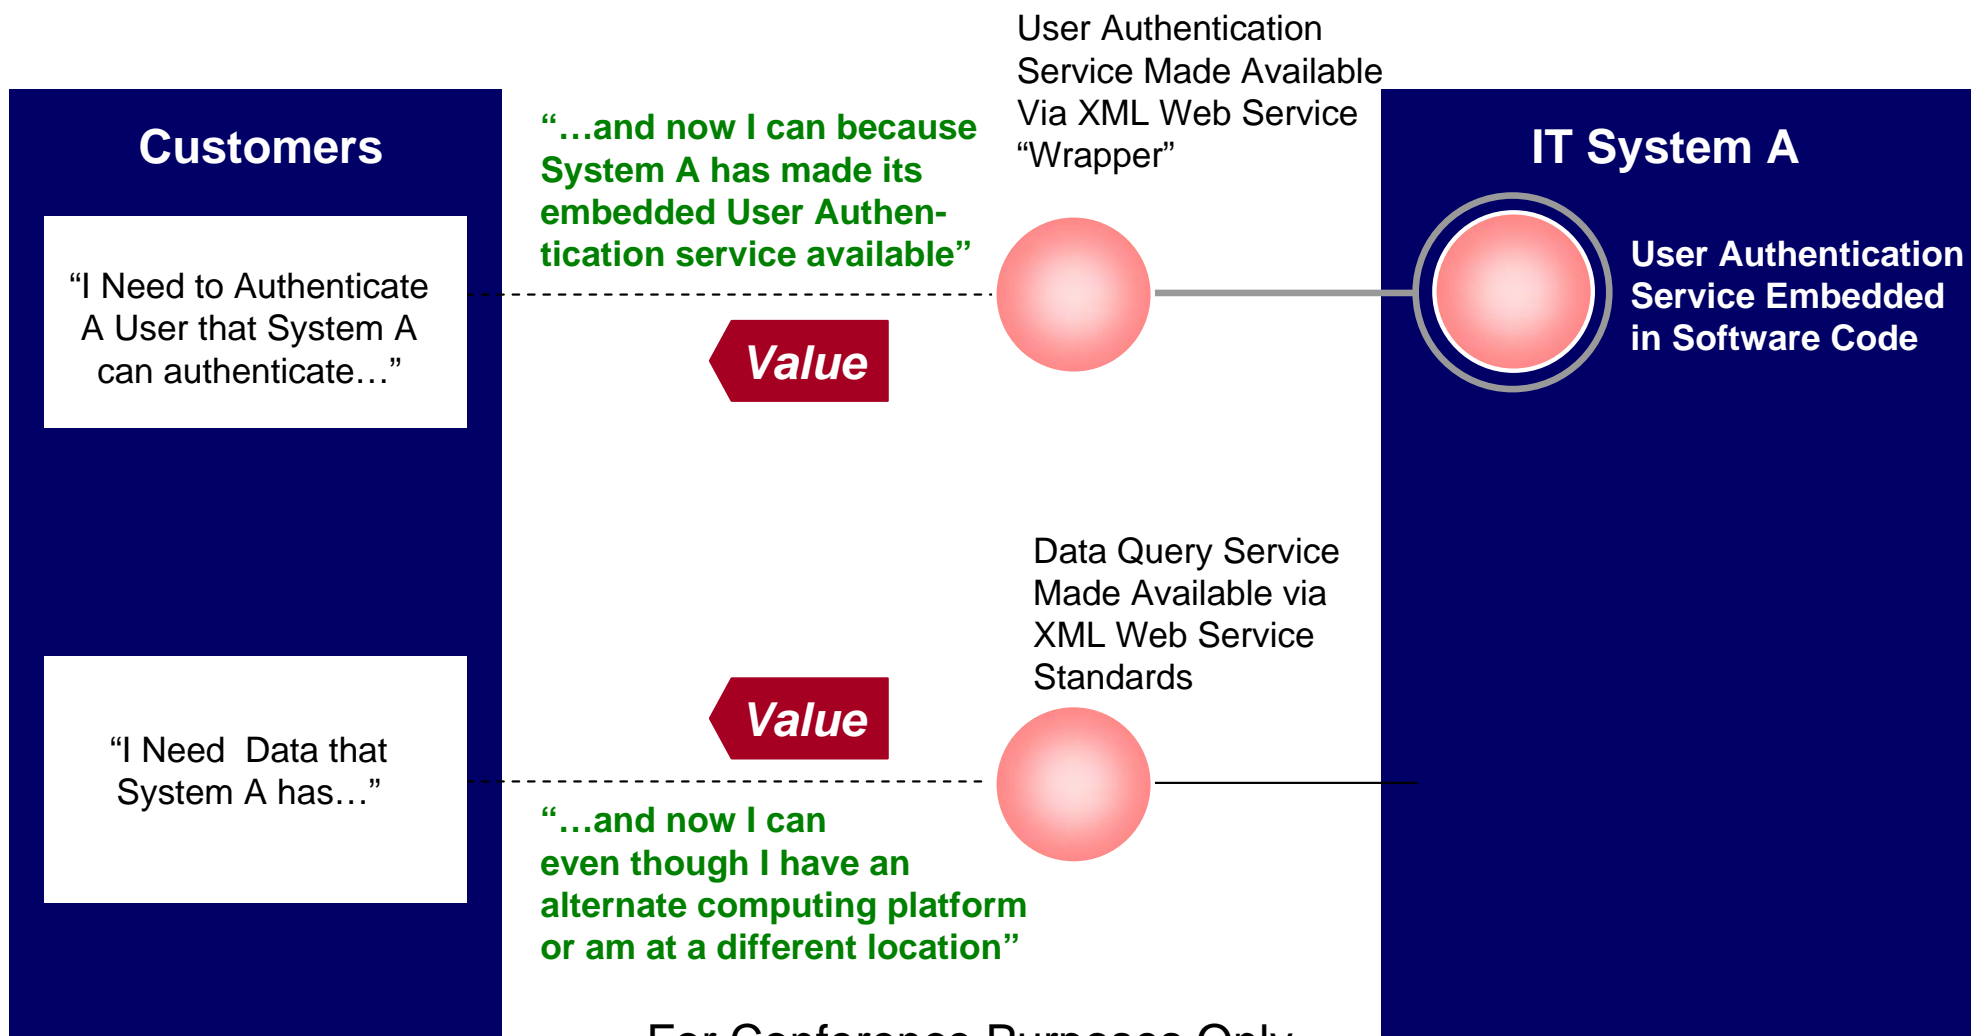

User Authentication  
Service Embedded  
in Software Code

Data Query Service  
Made Available via  
Proprietary Interface

## Promise Fulfilled: Customers Can Connect Much Easier To Existing Services

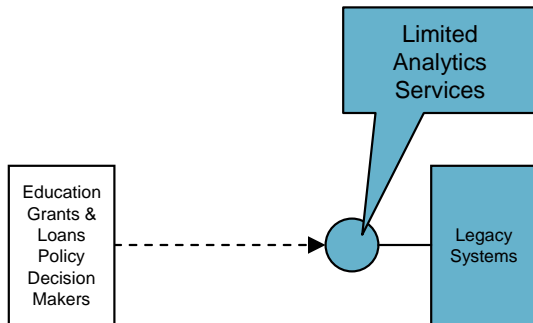

For Conference Purposes Only

# DoED Example: Enable New Data Warehouse / Analytics Service

## CONSTRAINING CONDITION

Limited Capability Available

BEFORE

## SOA FEATURE

SOA Standards And Enabling Services

The new Enterprise Data Warehouse Service (EDWS), enabled Education grants managers to access information to improve policy compliance

## PITFALL

Additional Costs

DoED did not have an EDW tool, so implementing the tool meant additional costs amid cost constraints and a slow budget change request process

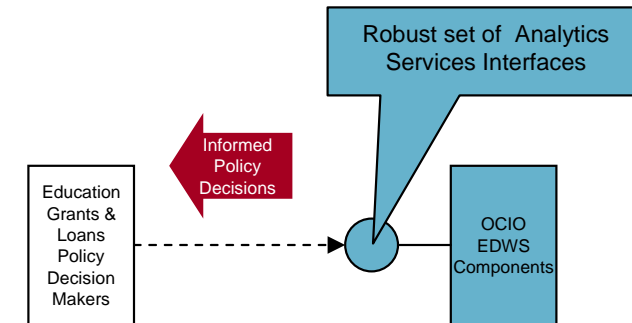

## PATH TO SUCCESS

Early Adopters (Start Small, Scale Rapidly)

Improving the impact of Education Grants was a vital concern to the Undersecretary of Education, who became a key sponsor of the EDWS. A venture capital fund was used to shorten the budget process

## PROMISE

Do More Than You Could Before

AFTER

## LIMITATIONS

With the enactment of the No Child Left Behind Act, DoED's grant and loan policy responsibilities expanded, but ED lacked enough analytics capabilities for policy decision support

## NEGATIVE CONSEQUENCES

\$60B in US Education Grants & Loans were not used as effectively as they might have been

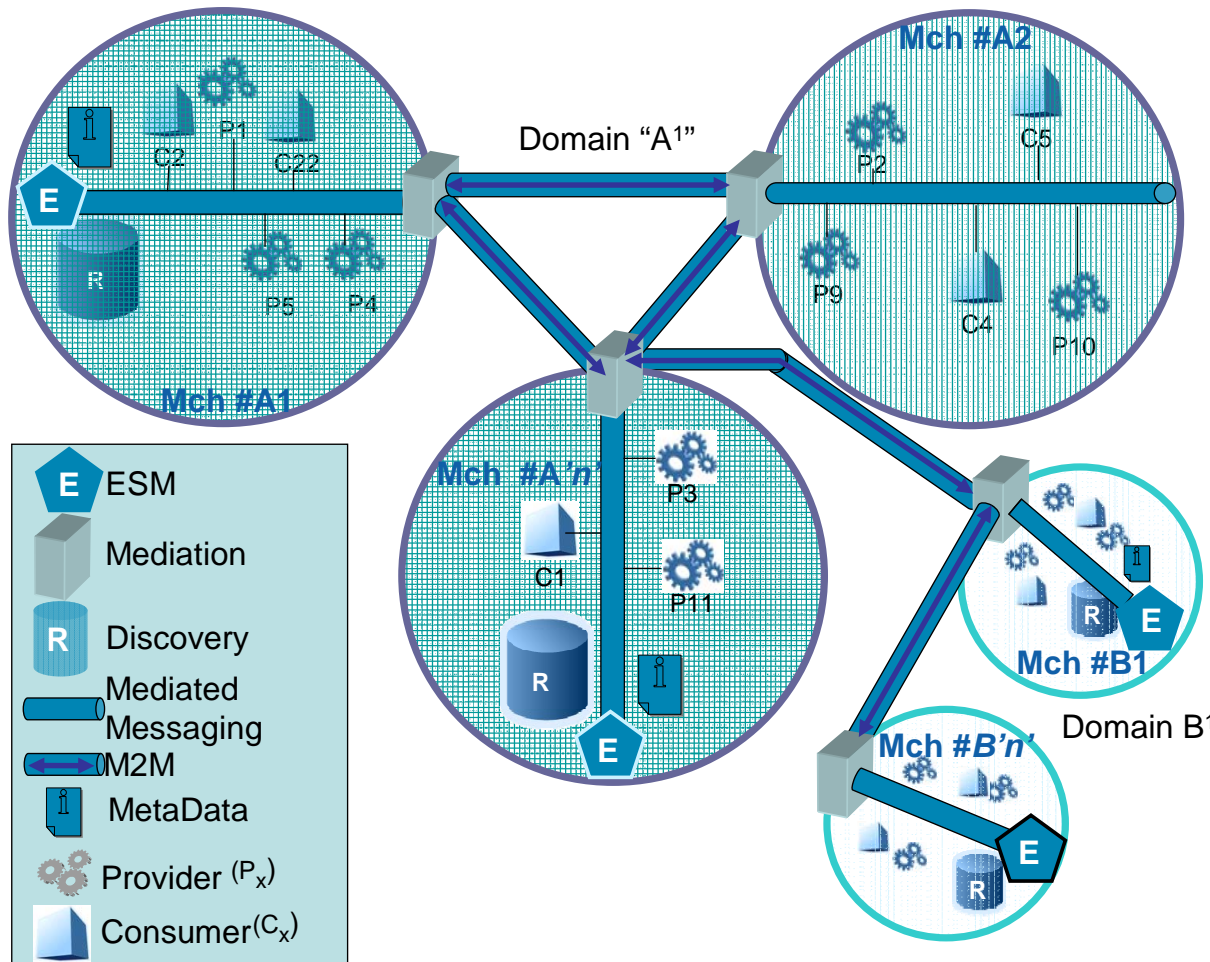

## DIRECT BENEFITS

DoED was able to do more to improve Educational quality and equal access to Education in the US, because the EDWS was used to support policy decisions about, and increase the impact of, Grants

## DESIRABLE EFFECTS

\$60B in US Education Grants & Loans were increasingly used more effectively

# SOA Foundation Services Enable Consumers And Providers To Share Trustworthy Services And Information More Quickly And Easily

## SOA Foundation Services

- **Service Discovery** allows systems that need services and information to discover systems that provide it
- **Machine to Machine Messaging** allows systems to communicate by sending messages to one another
- **Mediation** acts like an "adapter", allowing one system to connect with another system when they are otherwise incompatible
- **Enterprise Service Management** allows systems to monitor usage and performance of their services, and to meet their service level agreements

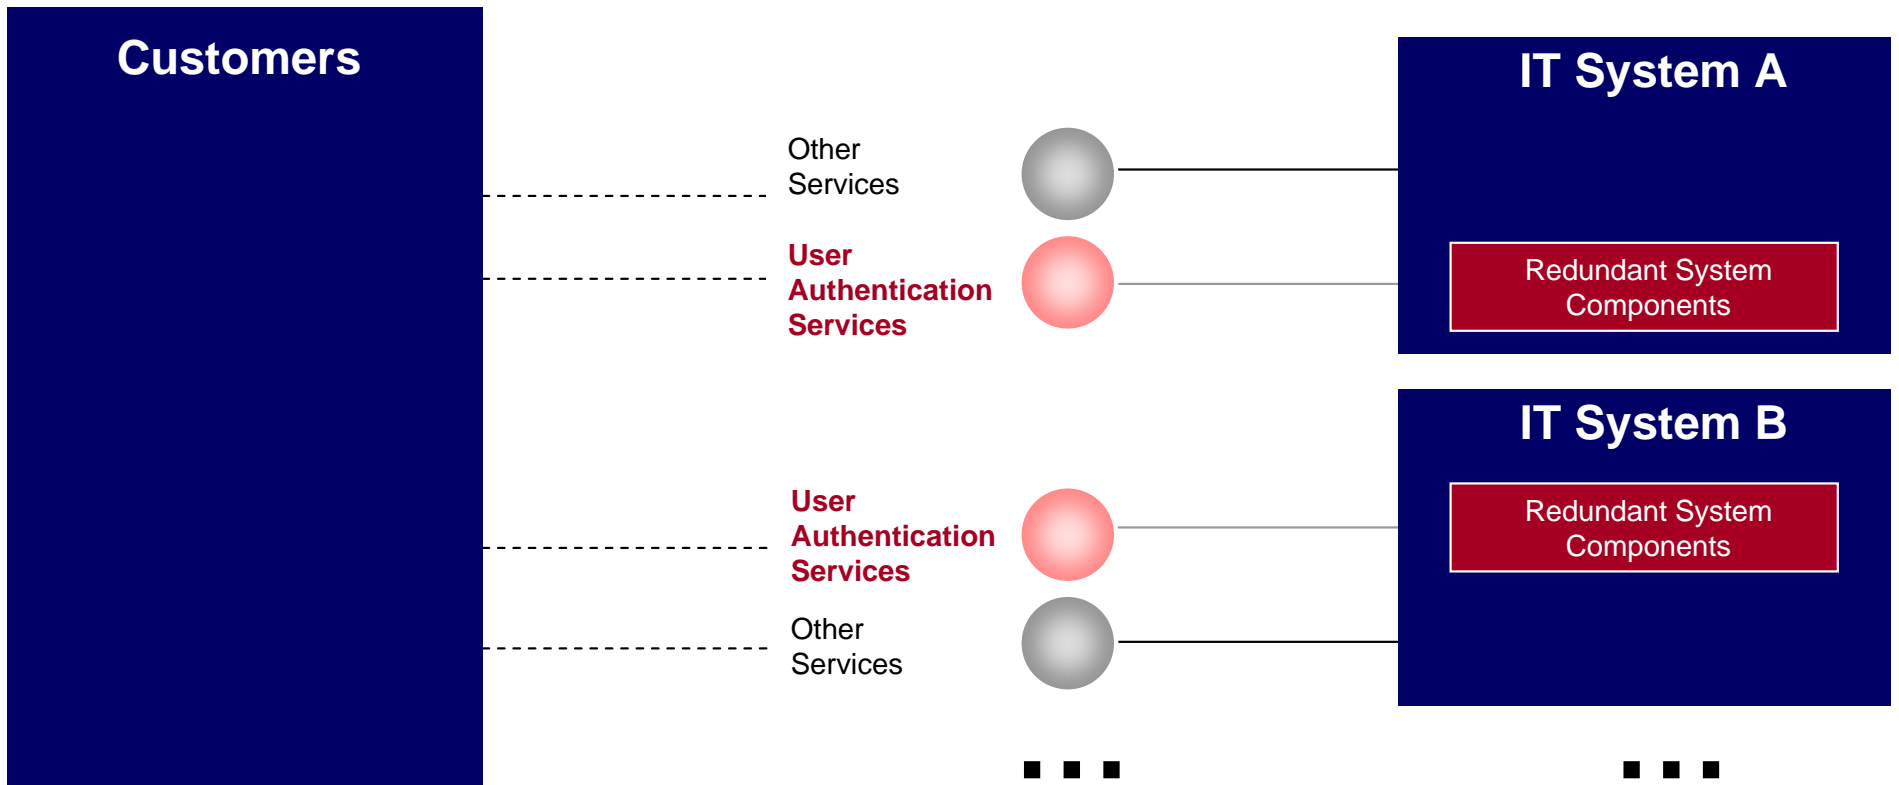

For Conference Purposes Only

# To Avoid The Pitfalls And Fulfill The Promise Of SOA, Keep On The Proven Path To Success

SOA FEATURE	PROMISE	PITFALL	PATH TO SUCCESS
Decision Making Focused On Services (Service Orientation)	Boost The Value Delivered By Services	Silo Orientation	Education And Outreach
Modular Services Used As Building Blocks	Spend Less Time And Money	Selecting The Right Services	Service Catalogs
SOA Standards And Enabling Services	Do More Than You Could Before	Additional Costs	Early Adopters (Start Small, Scale Rapidly)
Shared Services	Leverage Strengths And Gain Efficiencies	Cultural Resistance	Balanced Governance
Service Roadmaps	Adapt And Optimize	Making "In-Flight" Changes	Agile Services Lifecycle

**PITFALL**  
Cultural  
Resistance

# Cultural Resistance Prevents Establishment Of A Single User Authentication Service Across Systems

For Conference Purposes Only

SOA FEATURE  
Shared Services

## PROMISE

Leverage Strengths  
And Gain Efficiencies

### PATH TO SUCCESS

Balanced  
Governance

**“Top Down” Governance Via Management Processes  
Can Force Sharing; “Bottom Up” Governance Via  
Communities Of Interest Can Encourage Sharing**

### “Top Down” Governance

Strategy, Enterprise Architecture, Budgeting, Capital Planning, Lifecycle Management, IA, etc.

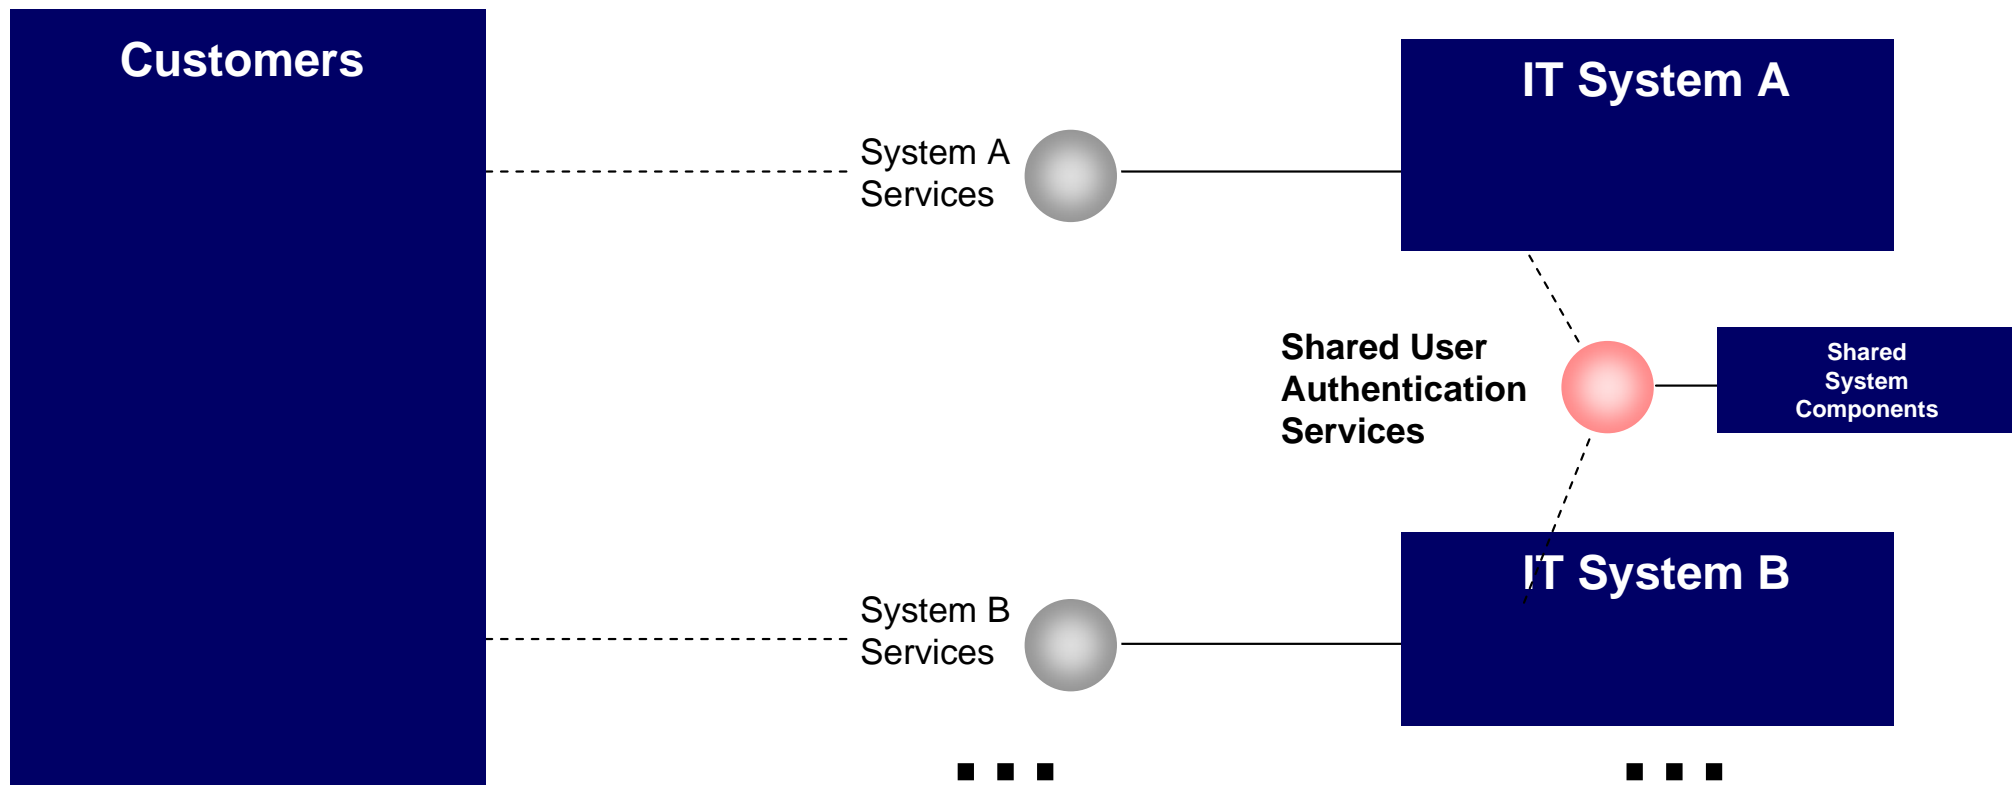

Services

### “Bottom Up” Governance

Communities of Interest, Services Marketplace, SOA Center of Excellence

For Conference Purposes Only

## Promise Fulfilled: Shared User Authentication Services Are Provided By Only The Best Providers

For Conference Purposes Only

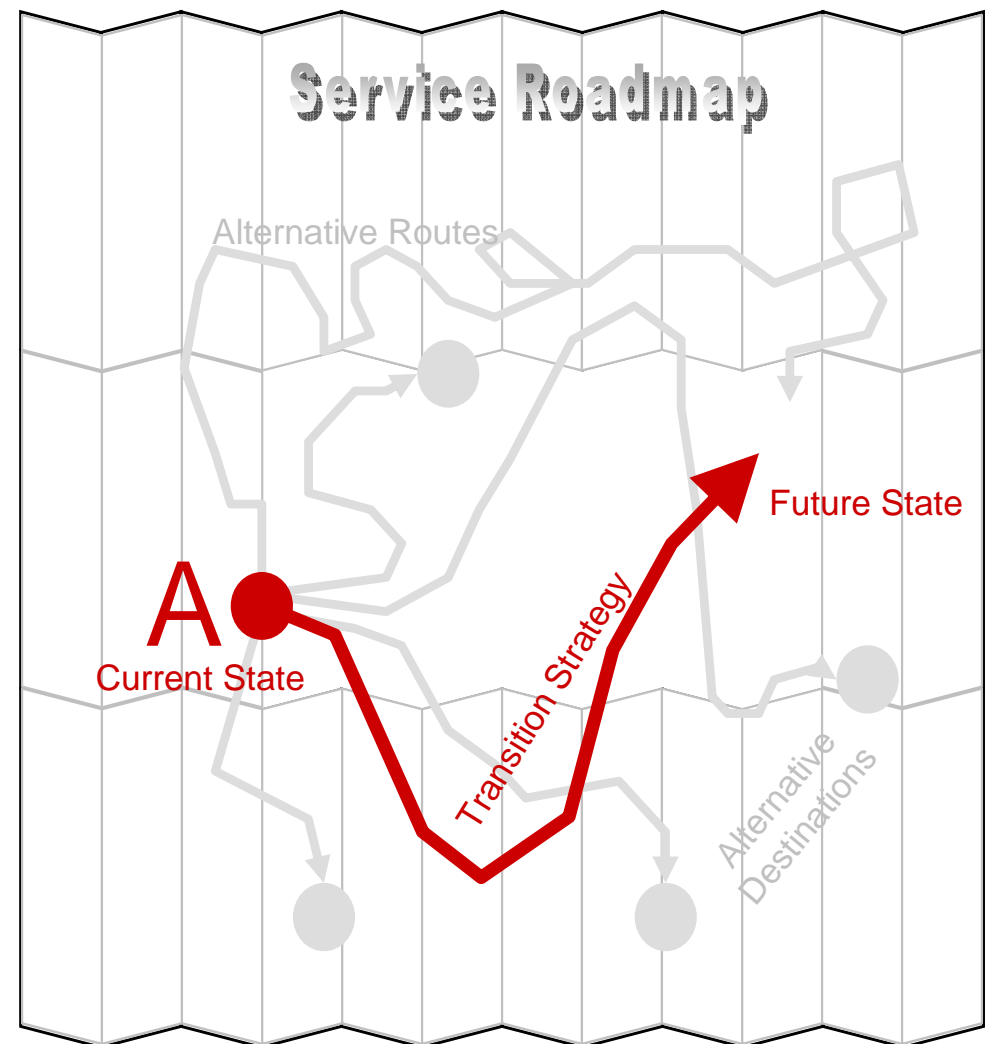

# To Avoid The Pitfalls And Fulfill The Promise Of SOA, Keep On The Proven Path To Success

SOA FEATURE	PROMISE	PITFALL	PATH TO SUCCESS
Decision Making Focused On Services (Service Orientation)	Boost The Value Delivered By Services	Silo Orientation	Education And Outreach
Modular Services Used As Building Blocks	Spend Less Time And Money	Selecting The Right Services	Service Catalogs
SOA Standards And Enabling Services	Do More Than You Could Before	Additional Costs	Early Adopters (Start Small, Scale Rapidly)
Shared Services	Leverage Strengths And Gain Efficiencies	Cultural Resistance	Balanced Governance
Service Roadmaps	Adapt And Optimize	Making "In-Flight" Changes	Agile Services Lifecycle

## Developing Service Roadmaps

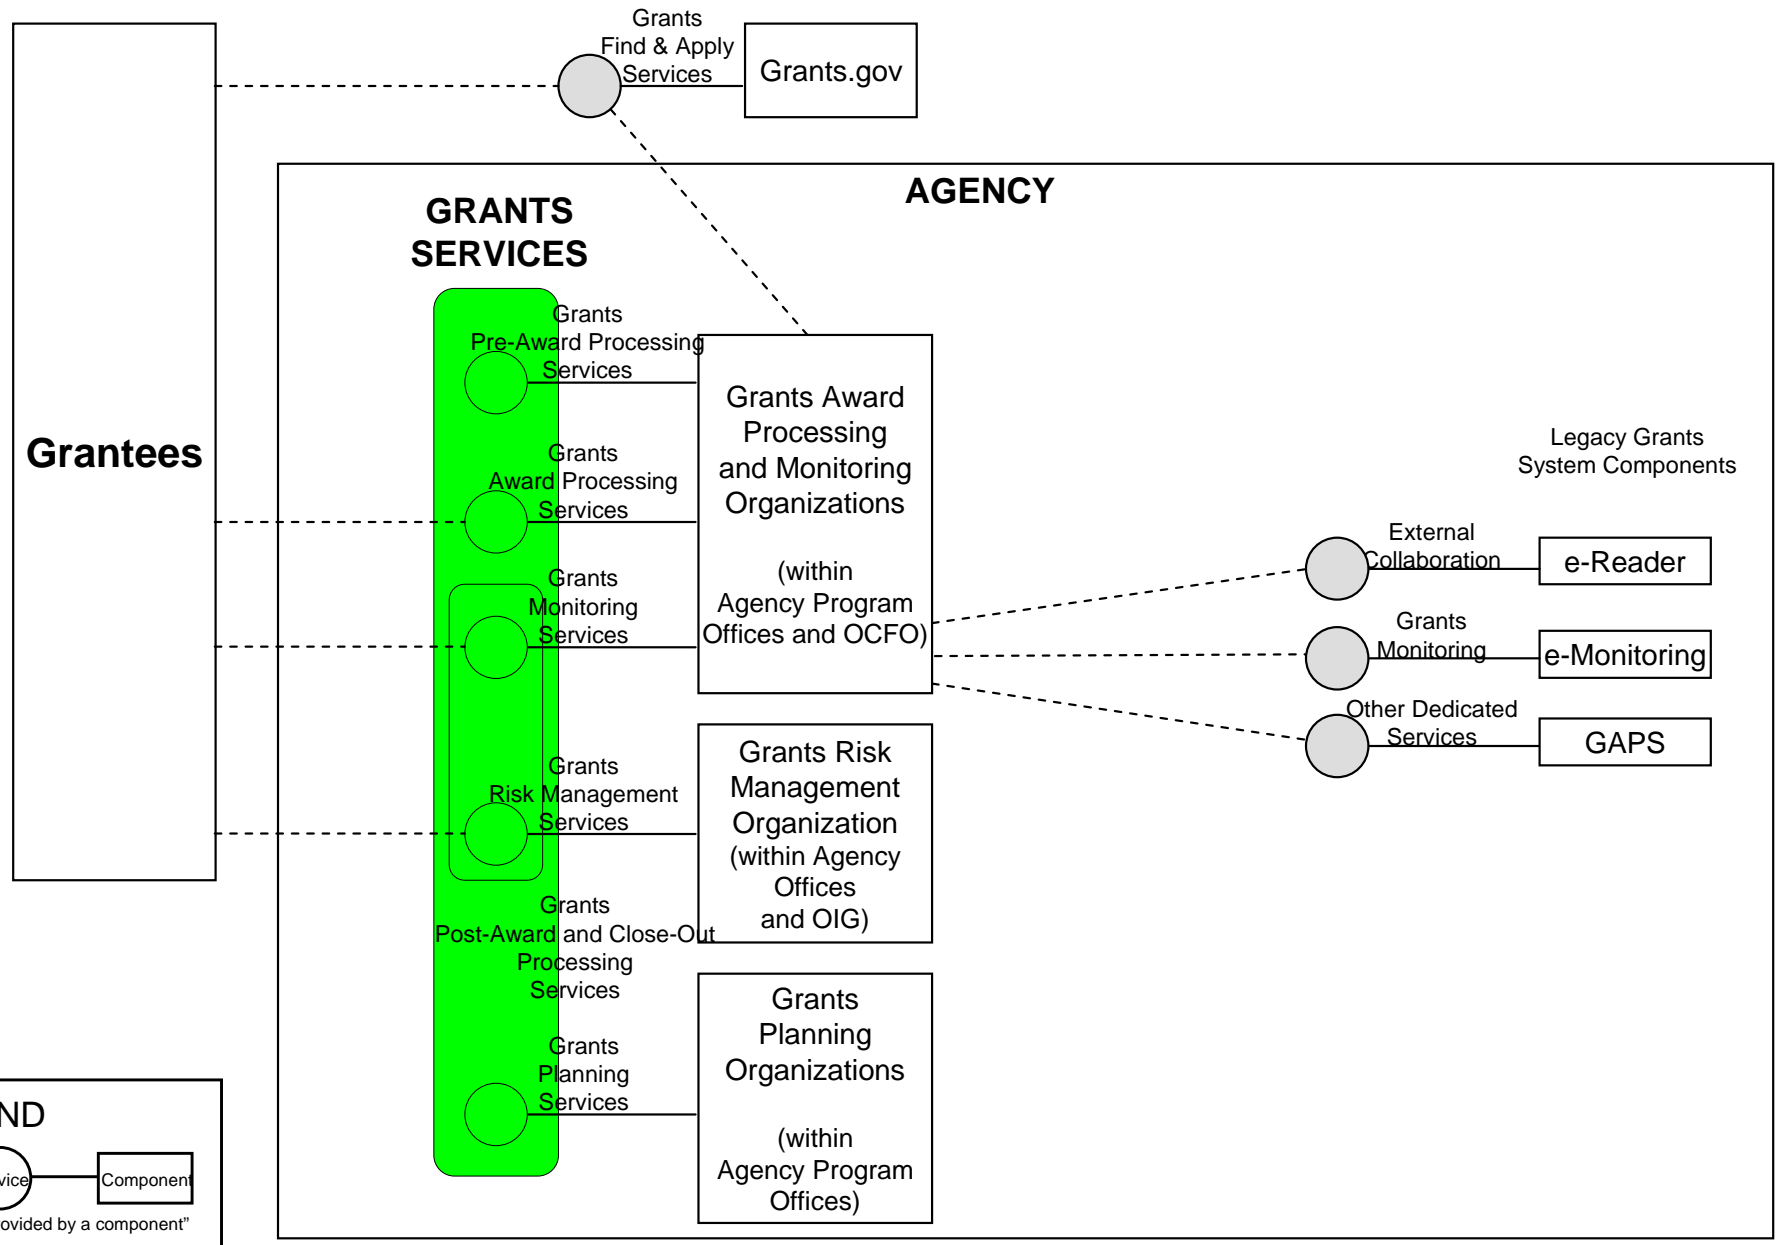

### Service Roadmap Objectives

- Outline how key services can be **leveraged** over time
- Define the service and summarize key industry **trends and forecasts**
- Explain how the service is currently being used (**Current State**)
- Analyze opportunities, risks, problems, and **available options**
- Recommend where to go with the service (**Future State**) and the best way to get there (**Transition Strategy**)

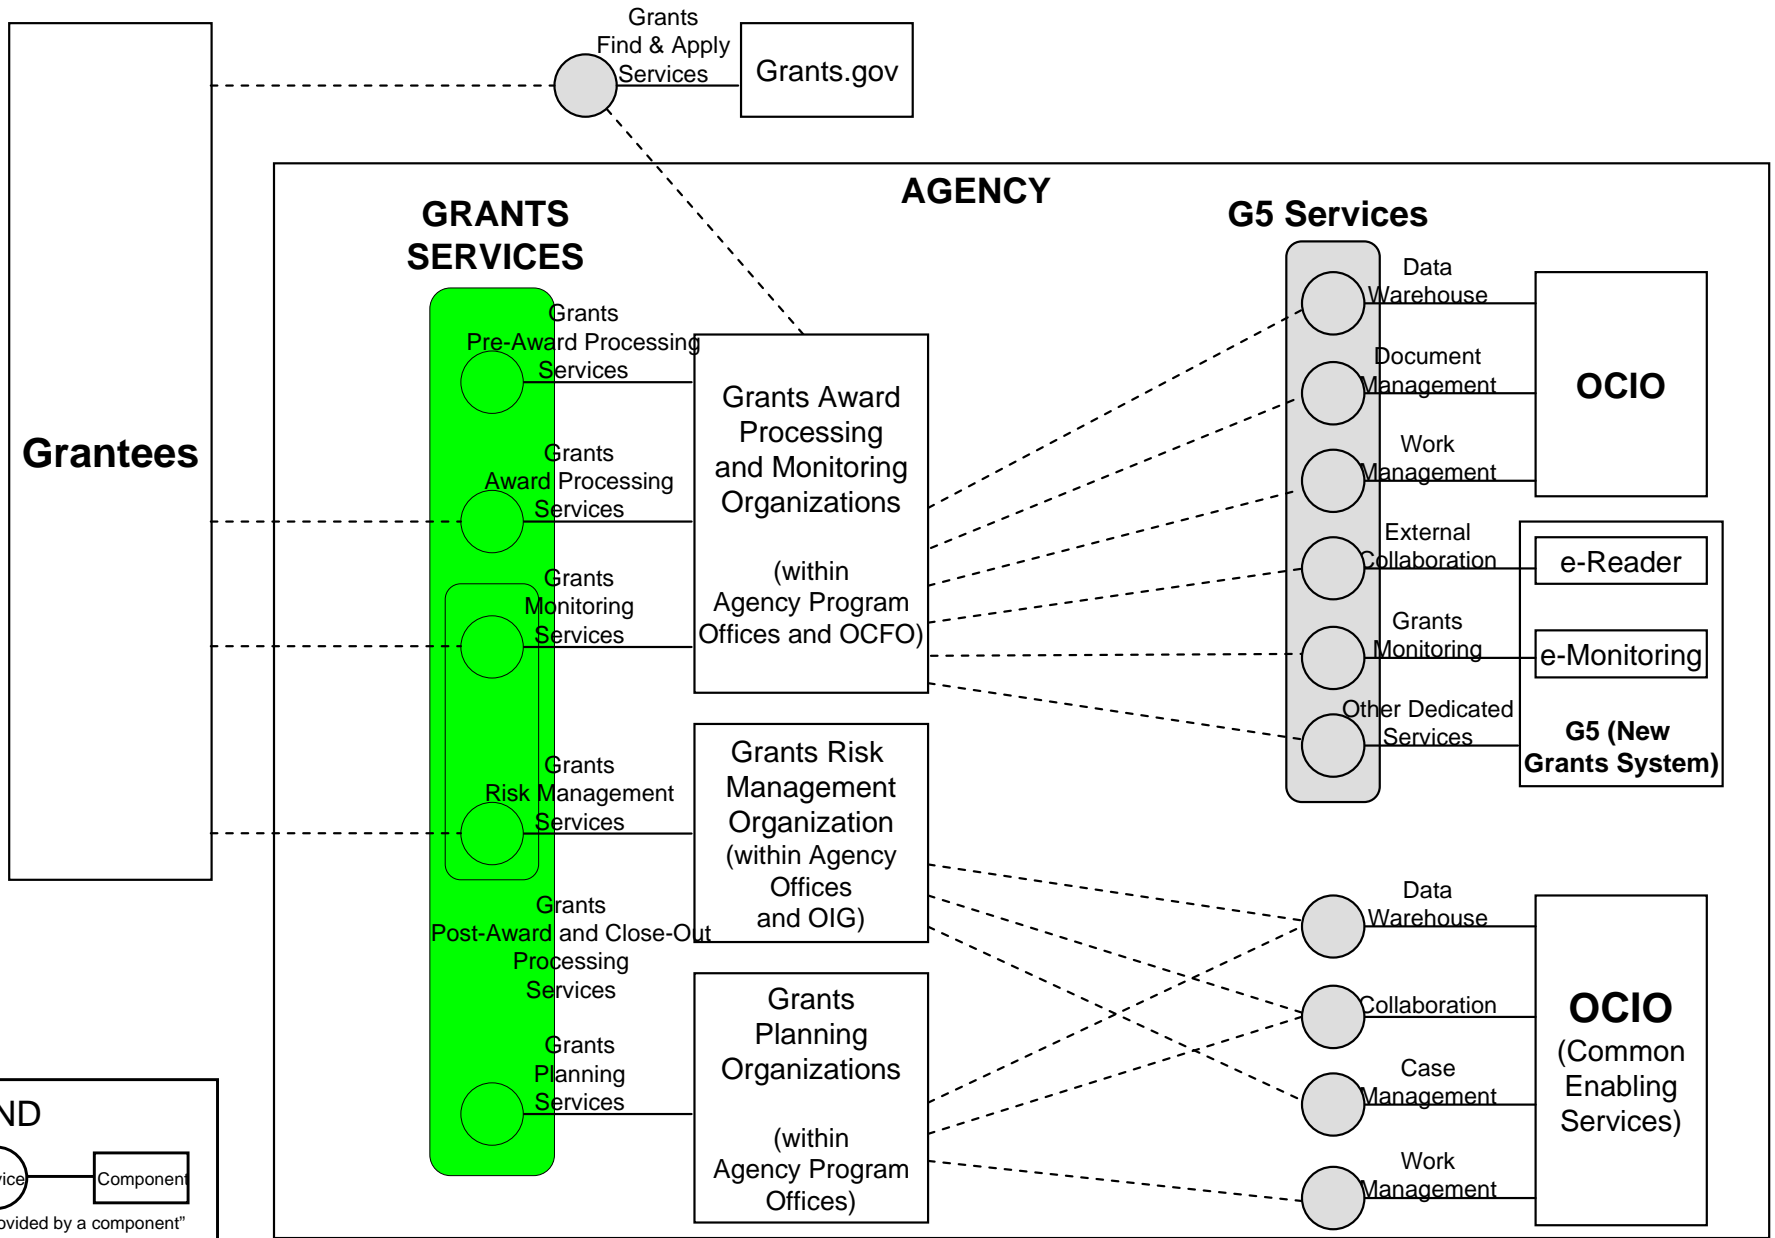

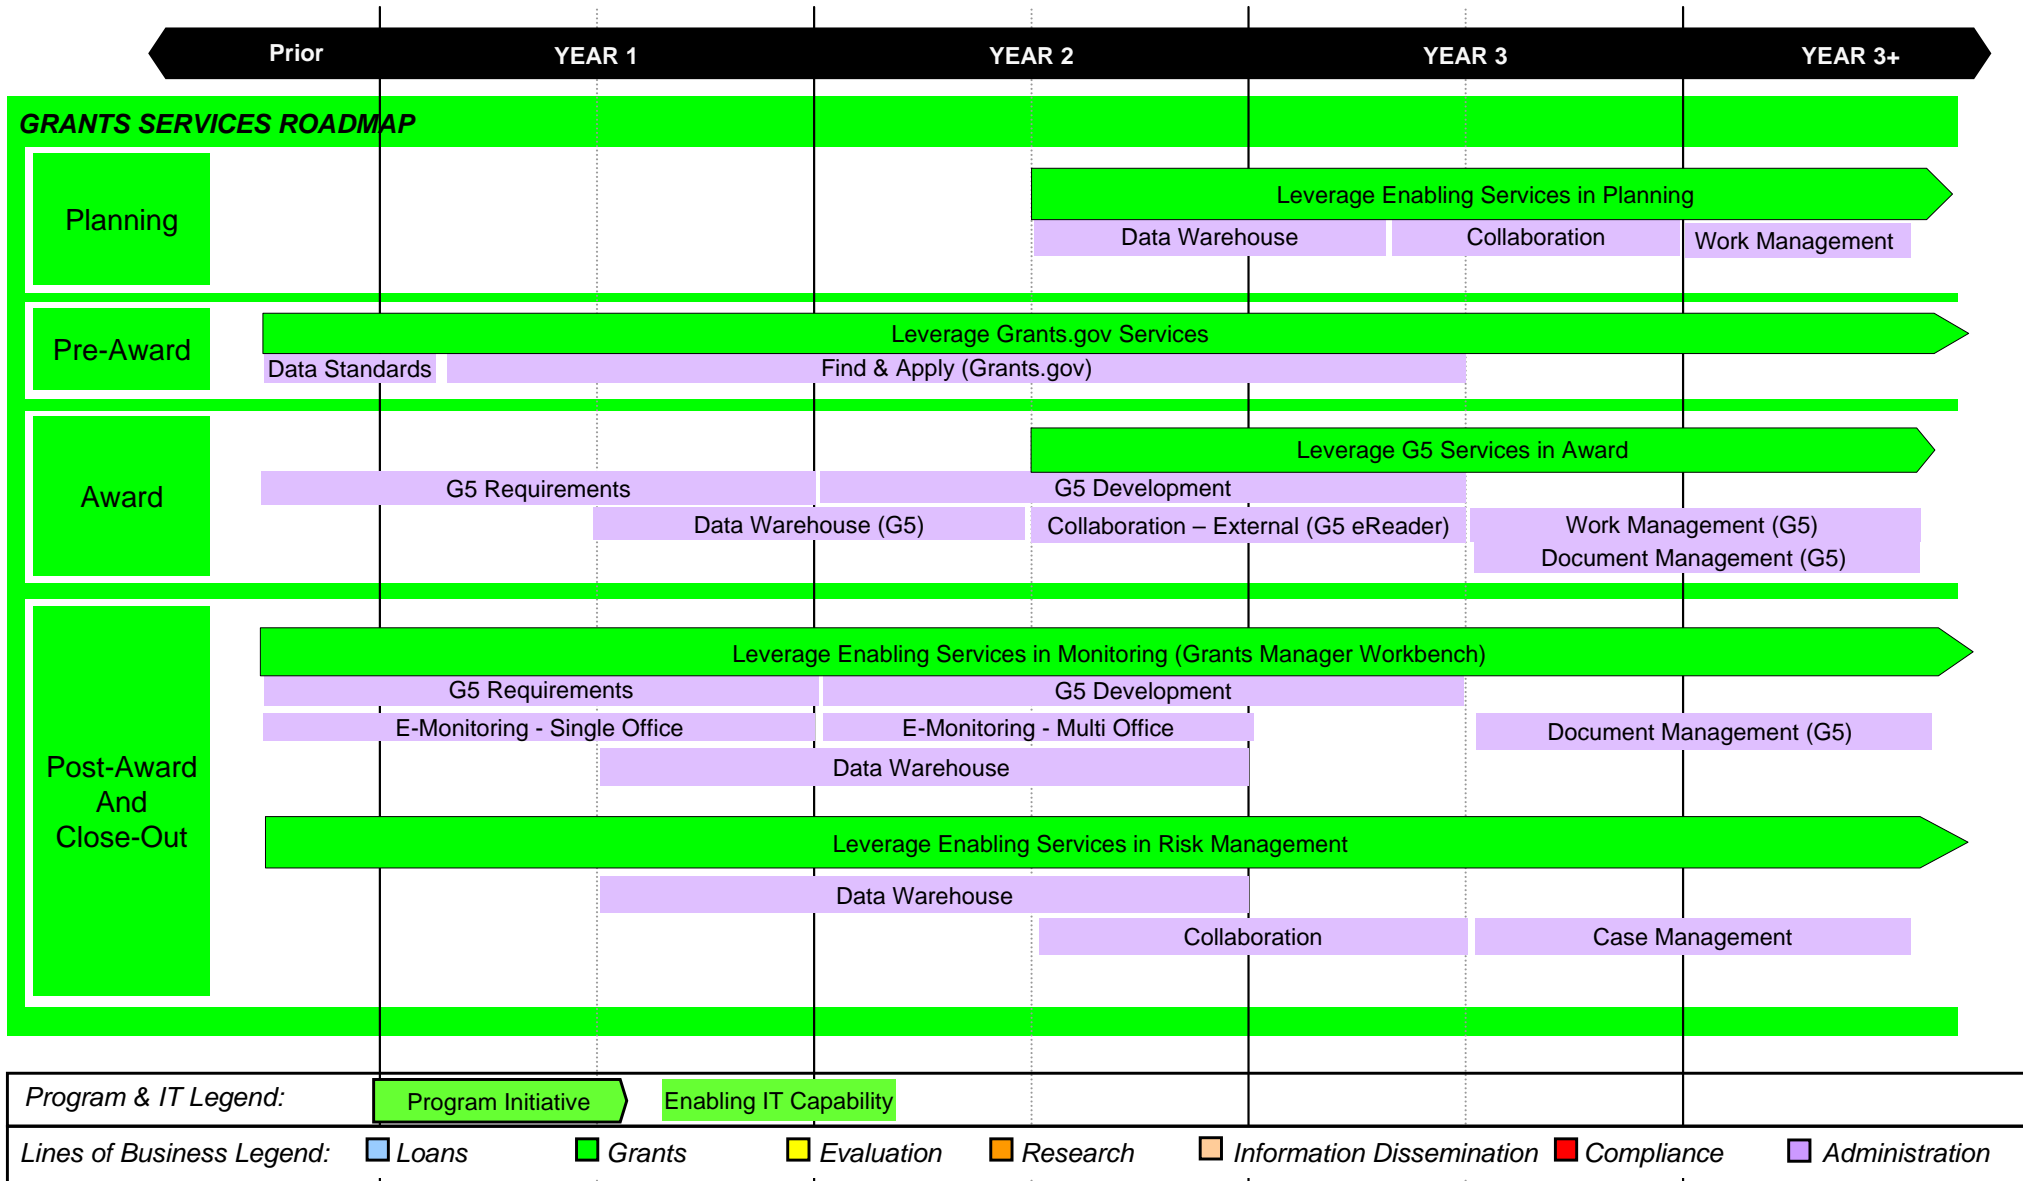

**“AS-IS” Customers, Services, Providers, And Interdependencies**

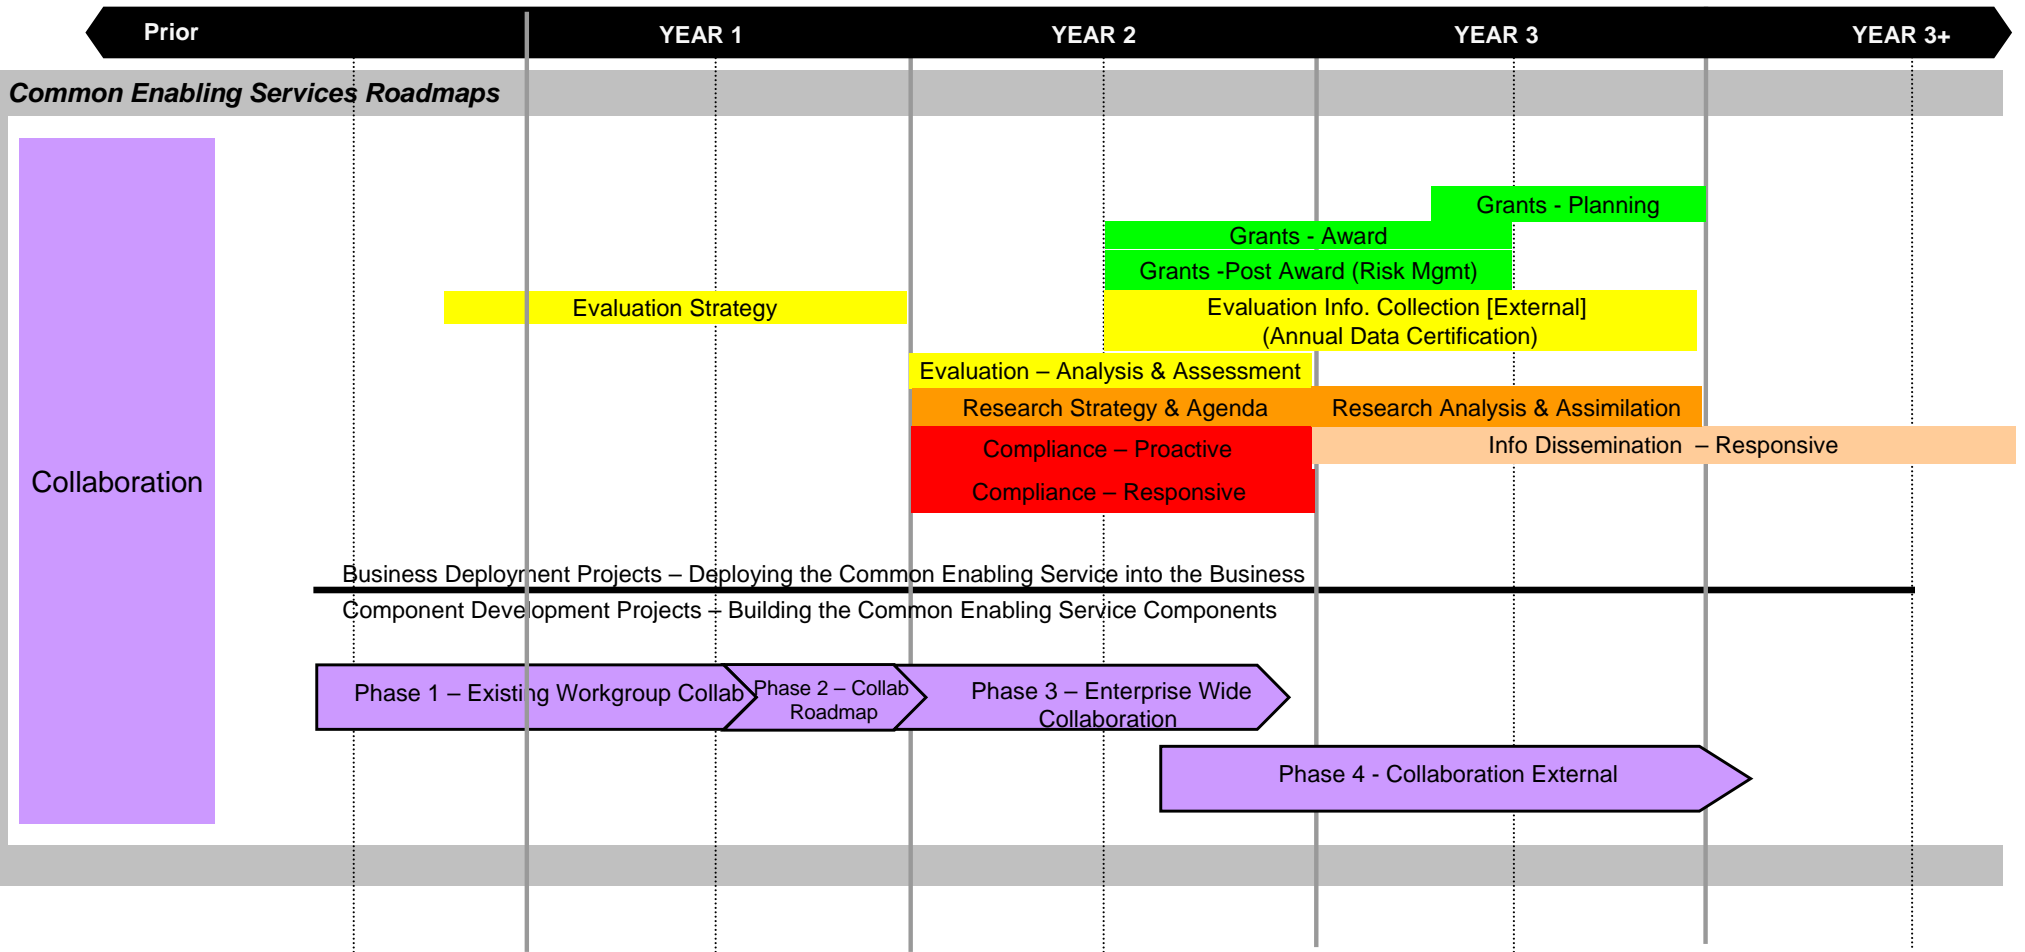

**“TO-BE” Customers, Services, Providers, And Interdependencies**

# Grants Services Roadmap

# Collaboration Services Roadmap

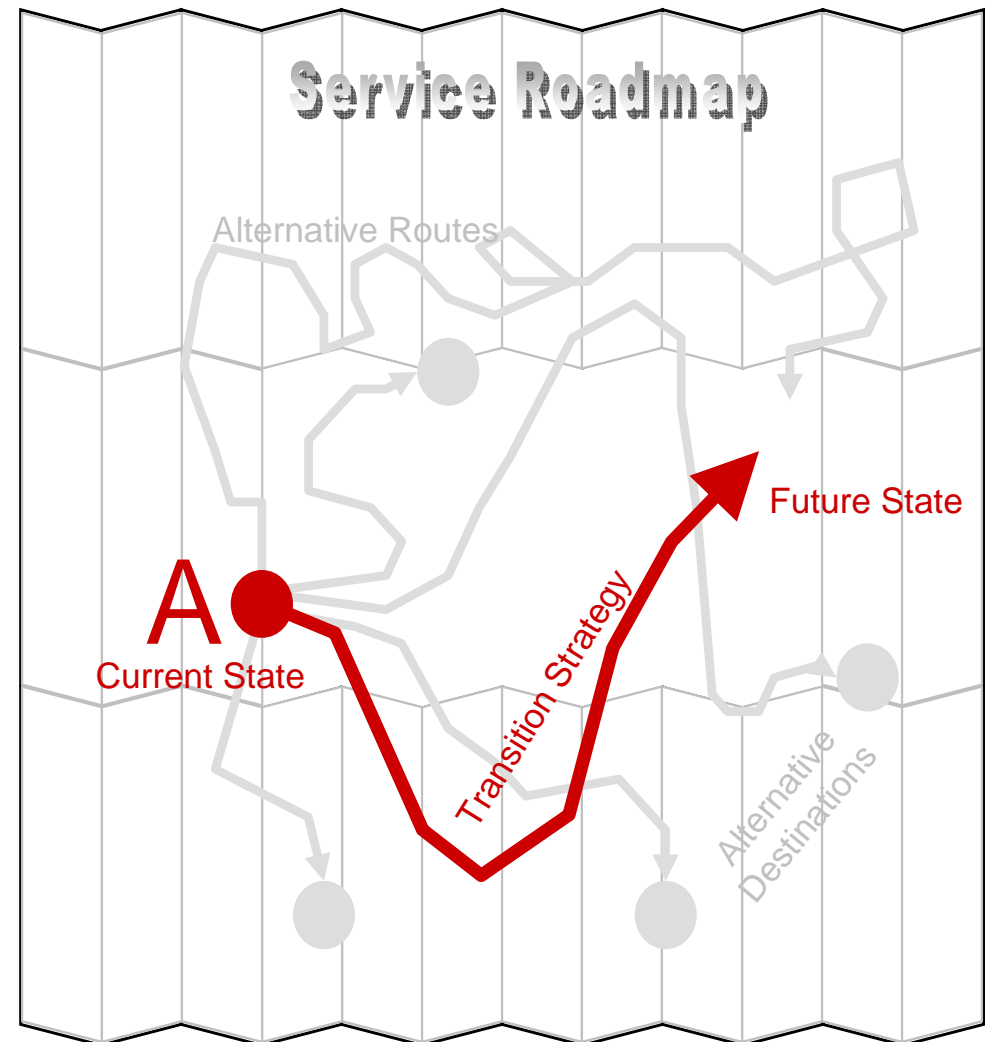

For Conference Purposes Only

**PITFALL**  
Making “In Flight”  
Changes

# “Big Bang” Changes To Business Operations Often Fall Short Of Expectations

## Service Roadmap Objectives

- Outline how key services can be **leveraged** over time
- Define the service and summarize key industry **trends and forecasts**
- Explain how the service is currently being used (**Current State**)
- Analyze opportunities, risks, problems, and **available options**
- Recommend where to go with the service (**Future State**) and the best way to get there (**Transition Strategy**)

SOA FEATURE  
Service Roadmaps

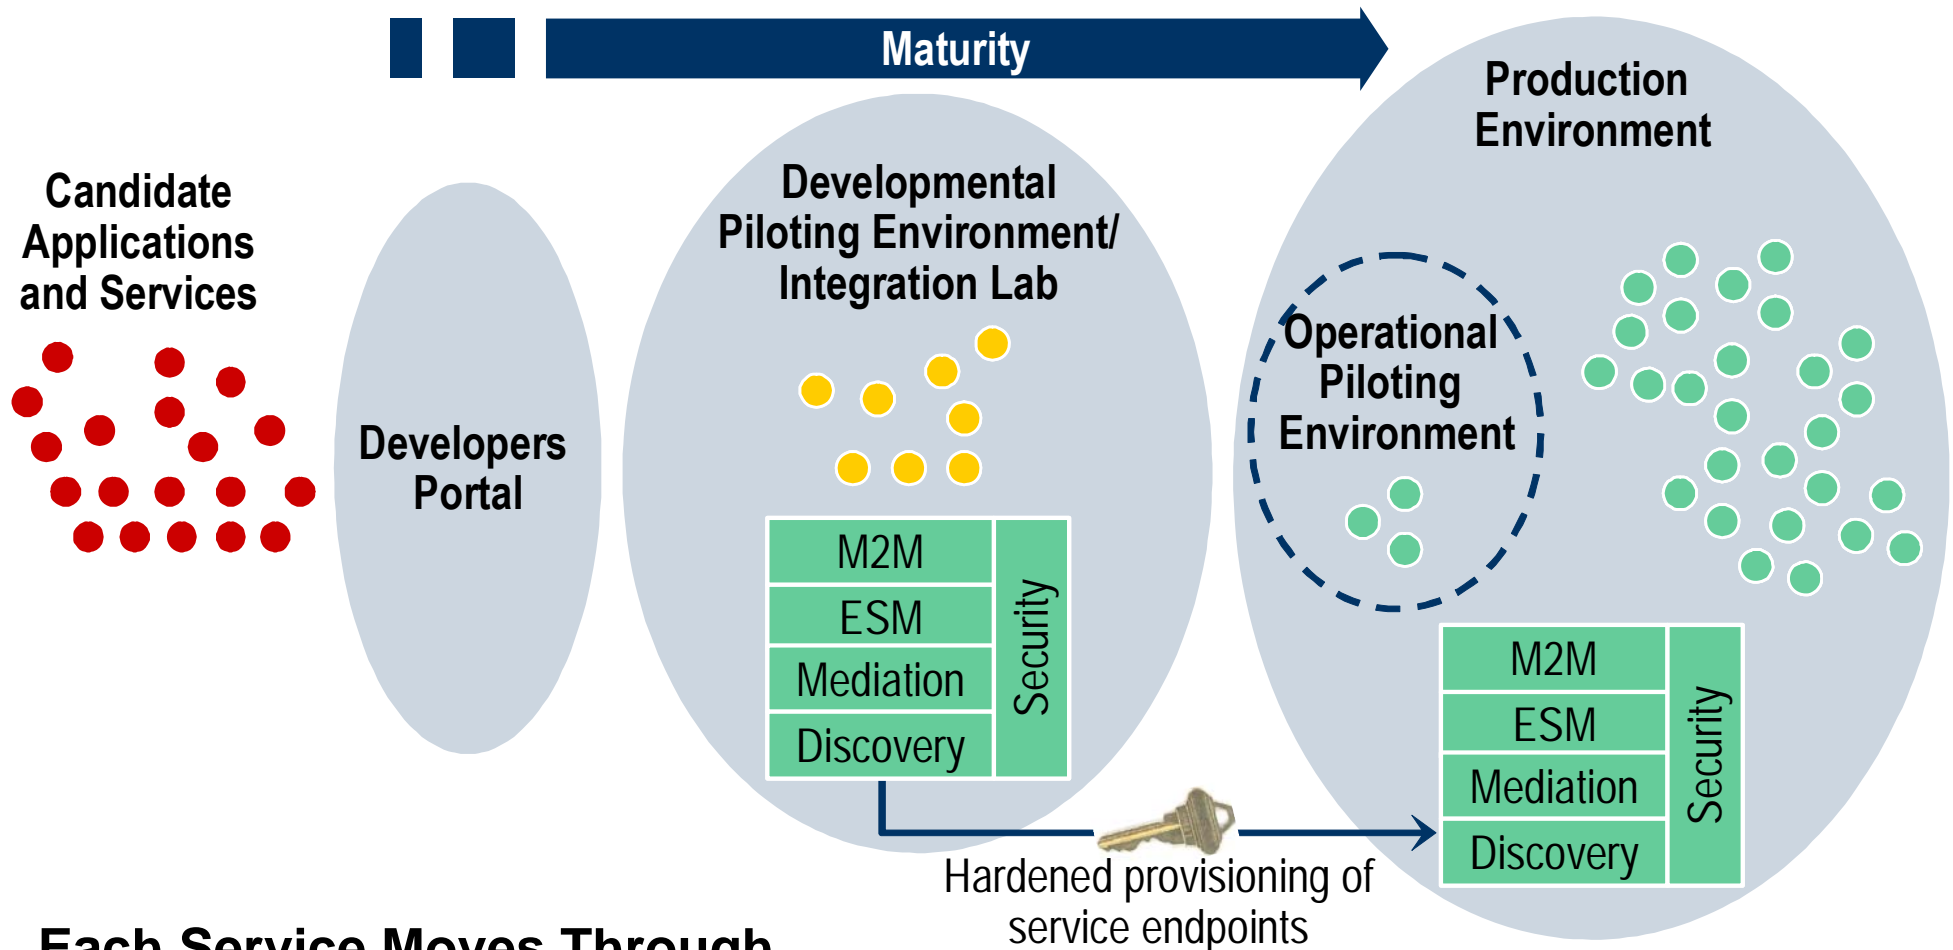

# PROMISE

Adapt and Optimize  
Operations

## PATH TO SUCCESS

Agile Services  
Lifecycle

Use An Agile Service Lifecycle To Implement Service  
Improvements And Deliver Value *Fast And Often*

Each Service Moves Through  
Its Lifecycle At Its Own Pace

## **Session Objectives: Attendees Will Learn**

- ✓ “SOA What?” - what benefits SOA can really deliver
- ✓ What barriers stand in the way
- ✓ What proven methods can be used to overcome the barriers
- How to get going and start getting benefits NOW
- Q&A After Each Major Section

## Take These Steps To Start Getting Benefits *Now*

Features & Benefits	Proven “Light and Fast” Steps On The Path To Success			
Use Service Orientation To Enhance The Value Of Services	Focus Decision Making on Key Services	Profile Key Services to Inform Decision Making	Pragmatic Education And Outreach	Proactive Customer Solution Support
Use Modular Services To Spend Less Time And Money	Service Catalogs		Assemble New Processes And Systems Using Modular Services	Re-factor Legacy Processes And Systems Using Modular Services
Use SOA Standards And Enabling Services To Do More	Standardize Services (Flexibility vs. Maintainability)	SOA Foundation Services (e.g., Enterprise Service Bus)		Enabling Services (e.g. Collaboration)
Use Shared Services To Leverage EPA Strengths	Re-Use Available Services	“Top Down” SOA-Enablement via Management Processes	“Bottom Up” SOA Enablement via Communities of Interest	
Use Service Roadmaps To Optimize Processes And Applications	Service Roadmaps For Key Services	Agile Service Lifecycle Management	SOA Enablement Center	

## Summary

- You provide and use services right? SOA can help you get the most “bang for the buck” out of these services
- It’s easy to get going with SOA, start taking proven steps down the path to success
- SOA is for all services, not just technical services (but technical services are still a very important focus)
- Business value should be the driver for every step in your SOA roadmap
- Be sure to balance flexibility with maintainability when implementing SOA

For Conference Purposes Only
