# Here's What's Cool!

- Wildlife toxicology
- Need for problem statement
- Search Resources
- GEOSS
- Pacific Northwest Tribal Data
- Windows to My Environment

# Lessons Learned

- People want to contribute, despite glitches
  - Contributors want to see their thoughts in context
  - Users want to see where everything is
- Learned about data access
  - What it means to be publishing services
  - ID sources that could have been integrated if available as services, and they could be
- We can use this approach to Web 2.0
  - Diversity of contribution
  - Bringing in lots of people
