

Listing of Excluded Studies—Cancer Population

(reason for exclusion is provided in italics following each reference)

1. Astrup A. Physical activity and weight gain and fat distribution changes with menopause: current evidence and research issues. *Medicine & Science in Sports & Exercise*. 1999;31(11 Suppl):564-7.
not an exercise intervention
2. Baldwin MK, Courenya K. Exercise and Self-Esteem in Breast Cancer Survivors: An Application of the Exercise and Self-Esteem Model. *Journal of Sport & Exercise Psychology*. 1997;19:347-58.
not an exercise intervention
3. Beger HG, Schwarz A, Bergmann U. Progress in gastrointestinal tract surgery: the impact of gastrointestinal endoscopy. *Surgical Endoscopy*. 2003;17(2):342-50.
not an exercise intervention
4. Bensenor IM, Cook NR, Lee IM, et al. Active and passive smoking and risk of colds in women. *Annals of Epidemiology*. 2001;11(4):225-31.
not an exercise intervention
5. Berger K, Ajani UA, Kase CS, et al. Light-to-moderate alcohol consumption and risk of stroke among U.S. male physicians. *New England Journal of Medicine*. 1999;18(341):1557-64.
not an exercise intervention
6. Blanchard CM, Courneya KS, Laing D. Effects of acute exercise on state anxiety in breast cancer survivors. *Oncology Nursing Forum*. 2001;28(10):1617-21.
not an exercise intervention / examined effect of an acute bout of exercise
7. Bremer BA, Moore CT, Bourbon BM, et al. Perceptions of control, physical exercise, and psychological adjustment to breast cancer in South African women. *Annals of Behavioral Medicine*. 1997;19(1):51-60.
not an exercise intervention
8. Brown JK. Nutrition and Physical Activity During and After Cancer Treatment: An American Cancer Society Guide for Informed Choices. *CA Cancer J Clin*. 2003;53:268-91.
review
9. Caan BJ, Flatt SW, Rock CL, et al. Low-energy reporting in women at risk for breast cancer recurrence. Women's Healthy Eating and Living Group. *Cancer Epidemiology, Biomarkers & Prevention*. 2000;9(10):1091-7.
not an exercise intervention
10. Cerulli J, Malone M. Outcomes of pharmacological and surgical treatment for obesity. *Pharmacoeconomics*. 1998;14(3):269-83.
review
11. Chlebowski RT. Breast cancer risk reduction: strategies for women at increased risk. *Annual Review of Medicine*. 2002;53:519-40.
review
12. Chlebowski RT. The American Cancer Society Guide for Nutrition and Physical Activity for Cancer Survivors: A Call to Action for Clinical Investigators. *CA Cancer J Clin*. 2003;53(5):266-7.
review
13. Chlebowski RT, Aiello E, McTiernan A. Weight loss in breast cancer patient management. *Journal of Clinical Oncology*. 2002;20(4):1128-43.
review
14. Chung KC, Walters MR, Greenfield ML, et al. Endoscopic versus open carpal tunnel release: a cost-effectiveness analysis. *Plastic & Reconstructive Surgery*. 1998;102(4):1089-99.
not an exercise intervention
15. Courneya KS. Exercise in Cancer Survivors: An Overview of Research. *Medicine & Science in Sports & Exercise*. 2003;35(11):1846-52.
review
16. Courneya KS, Friedenreich CM. Framework PEACE: An Organizational Model for Examining Physical Exercise Across the Cancer Experience. *Annals of Behavioral Medicine*. 2001;23(4):263-72.
review
17. Courneya KS, Friedenreich CM. Relationship between exercise pattern across the cancer experience and current quality of life in colorectal cancer survivors.[comment]. *Journal of Alternative & Complementary Medicine*. 1997;3(3):215-26.
not an exercise intervention
18. Courneya KS, Friedenreich CM. Relationship Between Exercise During Treatment and Current Quality of Life Among Survivors of Breast Cancer. *Journal of Psychosocial Oncology*. 1997;15(3/4):35-57.
not an exercise intervention
19. Courneya KS, Friedenreich CM. Physical exercise and quality of life following cancer diagnosis: a literature review. *Annals of Behavioral Medicine*. 1999;21(2):171-9.
review

20. Courneya KS, Friedenreich CM, Arthur K, et al. Physical exercise and quality of life in postsurgical colorectal cancer patients. *Psychology, Health & Medicine*. 1999;4(2):181-7.
review
21. Courneya KS, Keats MR, Turner AR. Physical exercise and quality of life in cancer patients following high dose chemotherapy and autologous bone marrow transplantation. *Psycho-Oncology*. 2000;9(2):127-36.
not an exercise intervention
22. Cunningham AJ, Edmonds CV, Jenkins GP, et al. A randomized controlled trial of the effects of group psychological therapy on survival in women with metastatic breast cancer. *Psycho-Oncology*. 1998; 7(6):508-17.
not an exercise intervention
23. Dally DL, Dahar W, Scott A, et al. The impact of a health education program targeting patients with high visit rates in a managed care organization. *American Journal of Health Promotion*. 2002;17(2):101-11.
not an exercise intervention
24. Daneryd P. Epoetin alfa for protection of metabolic and exercise capacity in cancer patients. *Seminars in Oncology*. 2002;29(3 Suppl 8):69-74.
not an exercise intervention
25. de Waard F, Ramlau R, Mulders Y, et al. A feasibility study on weight reduction in obese postmenopausal breast cancer patients. *European Journal of Cancer Prevention*. 1993;2(3):233-8.
not an exercise intervention
26. Decker WA, Turner-McGlade J, Fehir KM. Psychosocial aspects and the physiological effects of a cardiopulmonary exercise program in patients undergoing bone marrow transplantation (BMT) for acute leukemia (AL). *Transplantation Proceedings*. 1989;21(1 Pt 3):3068-9.
no concurrent comparison group
27. DeMarini DM. Dietary interventions of human carcinogenesis. *Mutation Research*. 1998;400(1-2): 457-65.
not an exercise intervention
28. Demark-Wahnefried W, Clipp EC, McBride C, et al. Design of FRESH START: a randomized trial of exercise and diet among cancer survivors. *Medicine & Science in Sports & Exercise*. 2003;35(3):415-24.
no data
29. Demark-Wahnefried W, Morey MC, Clipp EC, et al. Leading the Way in Exercise and Diet (Project LEAD): intervening to improve function among older breast and prostate cancer survivors. *Controlled Clinical Trials*. 2003;24(2):206-23.
no data
30. Dimeo F, Bertz H, Finke J, et al. An aerobic exercise program for patients with haematological malignancies after bone marrow transplantation. *Bone Marrow Transplantation*. 1996;18(6):1157-60.
no concurrent comparison group
31. Dimeo F, Rumberger BG, Keul J. Aerobic exercise as therapy for cancer fatigue. *Medicine & Science in Sports & Exercise*. 1998;30(4):475-8.
no concurrent comparison group
32. Durak EP, Lilly PC. The Application of an Exercise and Wellness Program for Cancer Patients: A Preliminary Outcomes Report. *Journal of Strength and Conditioning Research*. 1998;12(1):3-6.
no concurrent comparison group
33. Friedenreich CM. Physical activity and cancer prevention: from observational to intervention research. *Cancer Epidemiology, Biomarkers & Prevention*. 2001;10(4):287-301.
review
34. Friedenreich CM, Courneya KS. Exercise as rehabilitation for cancer patients. *Clinical Journal of Sport Medicine*. 1996;6(4):237-44.
review
35. Gann PH, Ma J, Giovannucci E, et al. Lower prostate cancer risk in men with elevated plasma lycopene levels: results of a prospective analysis. *Cancer Research*. 1999;59(6):1225-30.
not an exercise intervention
36. Goel V, Sawka CA, Thiel EC, et al. Randomized trial of a patient decision aid for choice of surgical treatment for breast cancer. *Medical Decision Making*. 2001;21(1):1-6.
not an exercise intervention
37. Goodwin P, Esplen MJ, Butler K, et al. Multidisciplinary weight management in locoregional breast cancer: results of a phase II study. *Breast Cancer Research & Treatment*. 1998;48(1):53-64.
not an exercise intervention
38. Greenwald P, Clifford CK, Milner JA. Diet and cancer prevention. *European Journal of Cancer Prevention*. 2001;37(8):948-65.
review

39. Gustavsson A, Bendahl PO, Cwikiel M, et al. No serious late cardiac effects after adjuvant radiotherapy following mastectomy in premenopausal women with early breast cancer. *International Journal of Radiation Oncology, Biology, Physics*. 1999;42(4):745-54.
not an exercise intervention
40. Hicks JE. *Exercise for Cancer Patients*. 5 ed. Baltimore: Williams & Wilkins; 1990.
review
41. Hoffman-Goetz L. Physical activity and cancer prevention: Animal-tumor reviews. *Medicine & Science in Sports & Exercise*. 2003;35(11):1828-33.
review
42. Irwin ML, Crumley D, McTiernan A, et al. Physical activity levels before and after a diagnosis of breast carcinoma: the Health, Eating, Activity, and Lifestyle (HEAL) study. *Cancer*. 2003;97(7):1746-57.
cross sectional study
43. Jacobs ET, Giuliano AR, Roe DJ, et al. Baseline dietary fiber intake and colorectal adenoma recurrence in the wheat bran fiber randomized trial. *Journal of the National Cancer Institute*. 2002;94(21):1620-5.
not an exercise intervention
44. Janer G, Sala M, Kogevinas M. Health promotion trials at worksites and risk factors for cancer. *Scandinavian Journal of Work, Environment & Health*. 2002;28(3):141-57.
review
45. Jones LW, Courneya KS. Exercise discussions during cancer treatment consultations. *Cancer Practice*. 2002;10(2):66-74.
not an exercise intervention
46. Kerr C. Translating "mind-in-body": two models of patient experience underlying a randomized controlled trial of qigong. *Culture, Medicine & Psychiatry*. 2002;26(4):419-47.
description of intervention yet to be done
47. Khushalani NI, McKinley BP, Gibbs JF, et al. Regional chemotherapy is indicated after surgical resection of colorectal metastases to the liver: a debate. *Journal of Surgical Oncology*. 2003;82(1):65-72.
review
48. Kolden GG, Strauman TJ, Ward A, et al. A pilot study of group exercise training (GET) for women with primary breast cancer: feasibility and health benefits. *Psycho-Oncology*. 2002;11(5):447-56.
no concurrent comparison group
49. Lambert CP, Sullivan DH, Freeling SA, et al. Effects of testosterone replacement and/or resistance exercise on the composition of megestrol acetate stimulated weight gain in elderly men: a randomized controlled trial. *Journal of Clinical Endocrinology & Metabolism*. 2002 May;87(5):2100-6.
does not include cancer patients/survivors
50. Lamberts SW. The endocrinology of gonadal involution: menopause and andropause. *Annales d'Endocrinologie*. 2003;64(2):77-81.
review
51. Lee IM. Physical activity and cancer prevention - Data from epidemiologic studies. *Medicine & Science in Sports & Exercise*. 2003;35(11):1823-7.
review
52. Liu S, Lee IM, Ajani U, et al. Intake of vegetables rich in carotenoids and risk of coronary heart disease in men: The Physicians' Health Study. *International Journal of Epidemiology*. 2001;30(1):130-5.
not an exercise intervention
53. Liu S, Manson JE, Lee IM, et al. Fruit and vegetable intake and risk of cardiovascular disease: The Women's Health Study. *American Journal of Clinical Nutrition*. 2000;72(4):922-8.
does not include cancer patients
54. Loft S, Poulsen HE. Cancer risk and oxidative DNA damage in man. *Journal of Molecular Medicine*. 1996;74(6):297-312.
review
55. Love RR, Wiebe DA, Newcomb PA, et al. Effects of tamoxifen on cardiovascular risk factors in postmenopausal women. *Annals of Internal Medicine*. 1991;115(11):860-4.
not an exercise intervention
56. Martinez ME, Heddens D, Earnest DL, et al. Physical activity, body mass index, and prostaglandin E2 levels in rectal mucosa. *Journal of the National Cancer Institute*. 1999;91(11):950-3.
does not include cancer patients/survivors
57. Mathewson-Chapman M. Pelvic muscle exercise/biofeedback for urinary incontinence after prostatectomy: an education program. *Journal of Cancer Education*. 1997;12(4):218-23.
review
58. Maxwell AE, Bastani R, Vida P, et al. Physical activity among older Filipino-American women. *Women & Health*. 2002;36(1):67-79.
not an exercise intervention

59. McTiernan A. Intervention studies in exercise and cancer prevention. *Medicine & Science in Sports & Exercise*. 2003;35(11):1841-5.
review
60. McTiernan A. Physical Activity, Exercise, and Cancer: Prevention to Treatment - Symposium Overview. *Medicine & Science in Sports & Exercise*. 2003;35(11):1821-2.
review
