§1211.24 Product certification and labeling by manufacturers.

- (a) Form of permanent label of certification. Manufacturers (including importers) shall issue certificates of compliance for automatic residential garage door operators manufactured after the effective date of the standard in the form of a permanent label which can reasonable be expected to remain on the operator during the entire period the operator is capable of being used. Such labeling shall be deemed to be a "certificate" of compliance as that term is used in section 14 of the CPSA, 15 U.S.C. 2063.
- (b) Exception for UL listed operators. The certification labeling requirement of paragraph (a) of this section shall be satisfied by display of the Underwriters Laboratories, Inc. (UL) logo or listing mark, and compliance with the date marking requirements of UL Standard for Safety 325, on both the operator system and its container. Operators displaying the UL logo or listing mark and complying with the UL standard are exempt from the requirements of paragraphs (c) and (d) of this section.
- (c) Contents of certification label. The certification labels required by this section shall clearly and legibly contain the following information:
- (1) The statement "Meets CPSC (insert 1993 or later date of applicable standard) garage door operator entrapment protection requirements."
- (2) An identification of the production lot.
- (d) Placement of the label. The label required by this section must be affixed to the operator. If the label is not immediately visible to the ultimate purchaser of the garage door operator prior to purchase because of packaging or other marketing practices, a second label that states: "Meets CPSC (insert 1993 or later date of applicable standard) garage door operator entrapment protection requirements," along with the month or week and year of manufacture must appear on the container or, if the container is not visible, on the promotional material used with the sale of the operator.

§1211.25 Product certification and labeling by importers.

- (a) General. The importer of any automatic residential garage door operator subject to the standard in subpart A of this part must issue the certificate of compliance required by section 14(a) of the CPSA and §1211.24 of this subpart. If testing of each operator, or a reasonable testing program, meeting the requirements of this subpart has been performed by or for the foreign manufacturer of the product, the importer may rely in good faith on such tests to support the certificate of compliance provided the importer is a resident of the United States or has a resident agent in the United States and the records of such tests required by §1211.31 of subpart C of this part are maintained in the United States.
- (b) Responsibility of importer. If the importer relies on tests by the foreign manufacturer to support the certificate of compliance, the importer bears the responsibility for examining the records supplied by the manufacturer to determine that the records of such tests appear to comply with §1211.31 of subpart C of this part.

Subpart C—Recordkeeping

Source: $57 \ FR \ 60468$, Dec. 21, 1992, unless otherwise noted.

§1211.30 Effective date.

The recordkeeping requirements in this subpart shall become effective on January 21, 1993, and shall apply to automatic residential garage door operators manufactured on or after that date.

§1211.31 Recordkeeping requirements.

(a) General. Every person issuing certificates of compliance for automatic residential garage door operators subject to the standard set forth in subpart A of this part shall maintain written records which show that the certificates are based on a test of each operator or on a reasonable testing program. The records shall be maintained for a period of at least three years from the date of certification of each operator or the last operator in each production lot. These records shall be

Pt. 1212

available to any designated officer or employee of the Commission upon request in accordance with section 16(b) of the CPSA, 15 U.S.C. 2065(b).

- (b) Content of records. Records shall identify the operators tested and the production lot and describe the tests the operators were subjected to in sufficient detail so the tests may be replicated. Records shall also provide the results of the tests including the precise nature of any failures, and specific actions taken to address any failures.
- (c) Format for records. The records required to be maintained by this section may be in any appropriate form or format that clearly provides the required information.

APPENDIX A TO PART 1212—FINDINGS UNDER THE CONSUMER PRODUCT SAFETY ACT

SOURCE: 64 FR 71872, Dec. 22, 1999, unless otherwise noted.

Subpart A—Requirements for Child-Resistance

AUTHORITY: 15 U.S.C. 2056, 2058, 2079(d).

§ 1212.1 Scope, application, and effective date.

This part 1212, a consumer product safety standard, prescribes require-

ments for multi-purpose lighters. These requirements are intended to make the multi-purpose lighters subject to the standard's provisions resistant to successful operation by children younger than 5 years of age. This standard applies to all multi-purpose lighters, as defined in §1212.2, that are manufactured in the United States, or imported, on or after December 22, 2000.

§1212.2 Definitions.

As used in this part 1212:

- (a)(1) Multi-purpose lighter, (also known as grill lighter, fireplace lighter, utility lighter, micro-torch, or gas match, etc.) means: A hand-held, flame-producing product that operates on fuel, incorporates an ignition mechanism, and is used by consumers to ignite items such as candles, fuel for fireplaces, charcoal or gas-fired grills, camp fires, camp stoves, lanterns, fuel-fired appliances or devices, or pilot lights, or for uses such as soldering or brazing. Some multi-purpose lighters have a feature that allows for hands-free operation.
- (2) The following products are not multi-purpose lighters:
- (i) Devices intended primarily for igniting cigarettes, cigars, and pipes, whether or not such devices are subject to the requirements of the Safety Standard for Cigarette Lighters (16 CFR part 1210).
- (ii) Devices containing more than 10 oz. of fuel.
 - (iii) Matches.
- (b) Successful operation means one signal of any duration from a surrogate multi-purpose lighter within either of the two 5-minute test periods specified in §1212.4(f).
- (c)(1) Surrogate multi-purpose lighter means a device that
- (i) Approximates the appearance, size, shape, and weight of, and is identical in all other factors that affect child resistance (including operation and the force(s) required for operation), within reasonable manufacturing tolerances, to, a multi-purpose lighter intended for use by consumers,
 - (ii) Has no fuel,
 - (iii) Does not produce a flame, and
- (iv) produces an audible, or audible and visual, signal that will be clearly discernible when the surrogate multi-
