Subject: Electronic Fund Transfers

Comments:

Banks have made millions of dollars from their customers using tactics that if used by common person would be considered embezzlement. My bank has made a lot of money off my dumb mistakes and even when I thought I had an adequate balance in my account that would also include a recent deposit. My bank makes all debit transactions immediate but not deposits unless cash is deposited. How many people deposit cash from their paychecks? Please help us with this problem.
