Comments:

I have always felt that banks have been taking advantage of consumers by charging od fees because they pay your incoming charges largest to smallest generating millions in od fees instead of just a few. I also feel that charging high od fees when you may only over draw by a few dollar seem absorbent. I believe some charge in ok but not what they get away with. Also When you use you debit card they hold your money for days but charges if items come in that need that money. I do not think that the money should be taken out until the vendor presents his paperwork. Because of all this slush time banks make money on your money and charge you in the process. They than tell you online banking is not accurate but push you to use and depend on its information.
