Good Morning,

It is one thing to pay a check and charge an overdraft fee. But to allow someone to withdraw money from their account when there is no money in the account and charge a fee is unbelievable. This happened to my son, he withdrew money from the ATM and POW a \$36.00 overdraft fee and his bank (National City) then charges \$8.00 a day that the account is in the negative. The banks are clearly taking advantage of their customers.
