Comments:

Bank fees are getting out of hand.

Having a checking account is a good thing for people to have so they don't get ripped off by check cashing places a way for people to save money, and convenient way to pay bills.

Bank fees - some fees are necessary to help people keep their finances under control. So within reason bank fees are necessary but for those people who rarely have overdrafts bank fees are unfair.

I think it is ridiculous to charge one to cash their pay check when the check is drawn on that bank. Charging fees for using a MAC machine to withdraw funds from a bank that is not your own bank is totally unfair. Charging a fee for someone who is only checking their balance on a MAC machine is stupid.

So please do not allow these fees to continue or raise.
