Subject: Electronic Fund Transfers

Comments:

Thank you! It is about time you clamped down on this abuse on the consumer. Banks are giving false balances at ATMs and on purpose they are holding back processing transactions. They wait until you overdraw in order to process all the transactions. whoever designed this computer programs to enslave hard working Americans should be in jail.

I hope you pass Option 2. The consumer should decide if he wants to OD or not.

Thanks again!
