

**National Park Service, Interior**

**§ 68.2**

owner in the Historic Preservation Certification Application, Request for Certification of Completed Work (NPS Form 10-168c), as follows:

Fee	Size of rehabilitation
\$500	\$20,000 to \$99,999
\$800	\$100,000 to \$499,999
\$1,500	\$500,000 to \$999,999
\$2,500	\$1,000,000 or more

If review of a proposed or ongoing rehabilitation project had been undertaken by the Secretary prior to submission of Request for Certification of Completed Work, the initial fee of \$250 will be deducted from these fees. No fee will be charged for rehabilitations under \$20,000.

(d) In general, each rehabilitation of a separate certified historic structure will be considered a separate project for purposes of computing the size of the fee.

(1) In the case of a rehabilitation project which includes more than one certified historic structure where the structures are judged by the Secretary to have been functionally related historically to serve an overall purpose, the fee for preliminary review is \$250 and the fee for final review is computed on the basis of the total rehabilitation costs.

(2) In the case of multiple building projects where there is no historic functional relationship among the structures and which are under the same ownership; are located in the same historic district; are adjacent or contiguous; are of the same architectural type (e.g., rowhouses, loft buildings, commercial buildings); and are submitted by the owner for review at the same time, the fee for preliminary review is \$250 per structure to a maximum of \$2,500 and the fee for final review is computed on the basis of the total rehabilitation costs of the entire multiple building project to a maximum of \$2,500. If the \$2,500 maximum fee was paid at the time of review of the proposed or ongoing rehabilitation project, no further fee will be charged for review of a Request for Certification of Completed Work.

**PART 68—THE SECRETARY OF THE INTERIOR’S STANDARDS FOR THE TREATMENT OF HISTORIC PROPERTIES**

- Sec.
- 68.1 Intent.
- 68.2 Definitions.
- 68.3 Standards.

**AUTHORITY:** The National Historic Preservation Act of 1966, as amended (16 U.S.C. 470 *et seq.*); sec. 2124 of the Tax Reform Act of 1976, 90 Stat. 1918; EO 11593, 3 CFR part 75 (1971); sec. 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

**SOURCE:** 60 FR 35843, July 12, 1995, unless otherwise noted.

**§ 68.1 Intent.**

The intent of this part is to set forth standards for the treatment of historic properties containing standards for preservation, rehabilitation, restoration and reconstruction. These standards apply to all proposed grant-in-aid development projects assisted through the National Historic Preservation Fund. 36 CFR part 67 focuses on “certified historic structures” as defined by the IRS Code of 1986. Those regulations are used in the Preservation Tax Incentives Program. 36 CFR part 67 should continue to be used when property owners are seeking certification for Federal tax benefits.

**§ 68.2 Definitions.**

The standards for the treatment of historic properties will be used by the National Park Service and State historic preservation officers and their staff members in planning, undertaking and supervising grant-assisted projects for preservation, rehabilitation, restoration and reconstruction. For the purposes of this part:

(a) *Preservation* means the act or process of applying measures necessary to sustain the existing form, integrity and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. New exterior additions are not within the scope of this treatment; however, the limited and sensitive upgrading of

mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project.

(b) *Rehabilitation* means the act or process of making possible an efficient compatible use for a property through repair, alterations and additions while preserving those portions or features that convey its historical, cultural or architectural values.

(c) *Restoration* means the act or process of accurately depicting the form, features and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a restoration project.

(d) *Reconstruction* means the act or process of depicting, by means of new construction, the form, features and detailing of a non-surviving site, landscape, building, structure or object for the purpose of replicating its appearance at a specific period of time and in its historic location.

#### § 68.3 Standards.

One set of standards—preservation, rehabilitation, restoration or reconstruction—will apply to a property undergoing treatment, depending upon the property's significance, existing physical condition, the extent of documentation available and interpretive goals, when applicable. The standards will be applied taking into consideration the economic and technical feasibility of each project.

(a) *Preservation*. (1) A property will be used as it was historically, or be given a new use that maximizes the retention of distinctive materials, features, spaces and spatial relationships. Where a treatment and use have not been identified, a property will be protected and, if necessary, stabilized until additional work may be undertaken.

(2) The historic character of a property will be retained and preserved. The replacement of intact or repairable historic materials or alteration of features, spaces and spatial relationships

that characterize a property will be avoided.

(3) Each property will be recognized as a physical record of its time, place and use. Work needed to stabilize, consolidate and conserve existing historic materials and features will be physically and visually compatible, identifiable upon close inspection and properly documented for future research.

(4) Changes to a property that have acquired historic significance in their own right will be retained and preserved.

(5) Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.

(6) The existing condition of historic features will be evaluated to determine the appropriate level of intervention needed. Where the severity of deterioration requires repair or limited replacement of a distinctive feature, the new material will match the old in composition, design, color and texture.

(7) Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.

(8) Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.

(b) *Rehabilitation*. (1) A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.

(2) The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.

(3) Each property will be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.

(4) Changes to a property that have acquired historic significance in their own right will be retained and preserved.

(5) Distinctive materials, features, finishes and construction techniques or
